This software supports **amiibo**. You can use compatible amiibo™ accessories by touching them to the Touch Screen of a New Nintendo 3DS/New Nintendo 3DS XL system.

Your amiibo aren't just for show. You can use NFC (near-field communication) to connect them to compatible software and play with them in the game.

For more information, visit:

- amiibo.nintendo.eu (Europe)
- amiibo.nintendo.com.au (Australia/New Zealand)

- ◆ Each amiibo can only hold game data for one software title at a time. In order to create new game data on an amiibo that already has data saved on it from another game, you must first delete the existing game data. You can do this by going to the HOME Menu ⇒  ⇒ amiibo Settings.
- ◆ An amiibo can be read by multiple

compatible software titles.

- ◆ If the data on your amiibo becomes corrupted and cannot be restored, go to the HOME Menu ⇒  ⇒ amiibo Settings and reset the data.

The Nintendo 3DS NFC Reader/Writer is required to use amiibo with a Nintendo 3DS/3DS XL/2DS system.

IMPORTANT

A light touch on the Touch Screen is enough for the system to detect your amiibo. Do not press the amiibo into the screen or forcefully drag it across the screen.

In Teddy Together, you live with a bear that you can befriend through activities such as talking with it, feeding it, and taking it travelling!

Select "New Game" from the Title Screen to begin playing.

▶ Playing for the First Time

The first time you play, you will need to name your bear and set a player name. Use the virtual keyboard to enter the names. Touch  if you need to delete characters. Once you have decided on a name, touch "OK" and then "Yes" to set it. Please note that you will not be able to change your name or the name of your bear once it has been set.

Change keyboard to a symbol keyboard.

Call Your Bear's Name

Once you've entered a name, call your bear to start playing. Say your bear's name when the microphone appears on the Touch Screen.

Continuing to Play

If you already have save data for this game, selecting "Continue" will take you straight to the Living Room (p. 10), where you can continue to play from where you last exited the game.

Saving Data

From the Living Room (p. 10), select "Save" and then "Save" again to save your progress.

◆ You can only create one save file.

- Do not repeatedly reset the system or intentionally input incorrect controls. Do not remove any Game Card/SD card inserted into the system while saving. Make sure not to get dirt in the terminals. These actions could result in permanent data loss.
- Do not use external accessories or software to modify your save data, as this can lead to an inability to progress or loss of save data. Any modification is permanent, so be careful.

Deleting Save Data

Hold **[L]**, **[R]**, and **[A]** from the moment you load the game until you are taken to the data deletion screen; then select "Yes" to delete your save data.

◆ Deleted data cannot be recovered, so be careful when deleting data.

Even though the Nintendo 3DS system uses wireless communication, words you enter during the game and other information will not be shared with other systems.

This game can be controlled almost entirely using the Touch Screen and stylus. Touch or slide the stylus across the Touch Screen according to the instructions shown on-screen. You will also need to use the Nintendo 3DS system's microphone in certain situations.

Enjoy life with your bear from the Living Room (p. 10).

➤ Befriend Your Bear

By caring for and talking with your bear, it will become more and more fond of you.
