Quick Instruction for ERISAN AnyCast

Any questions, please email: support@erisanhome.com

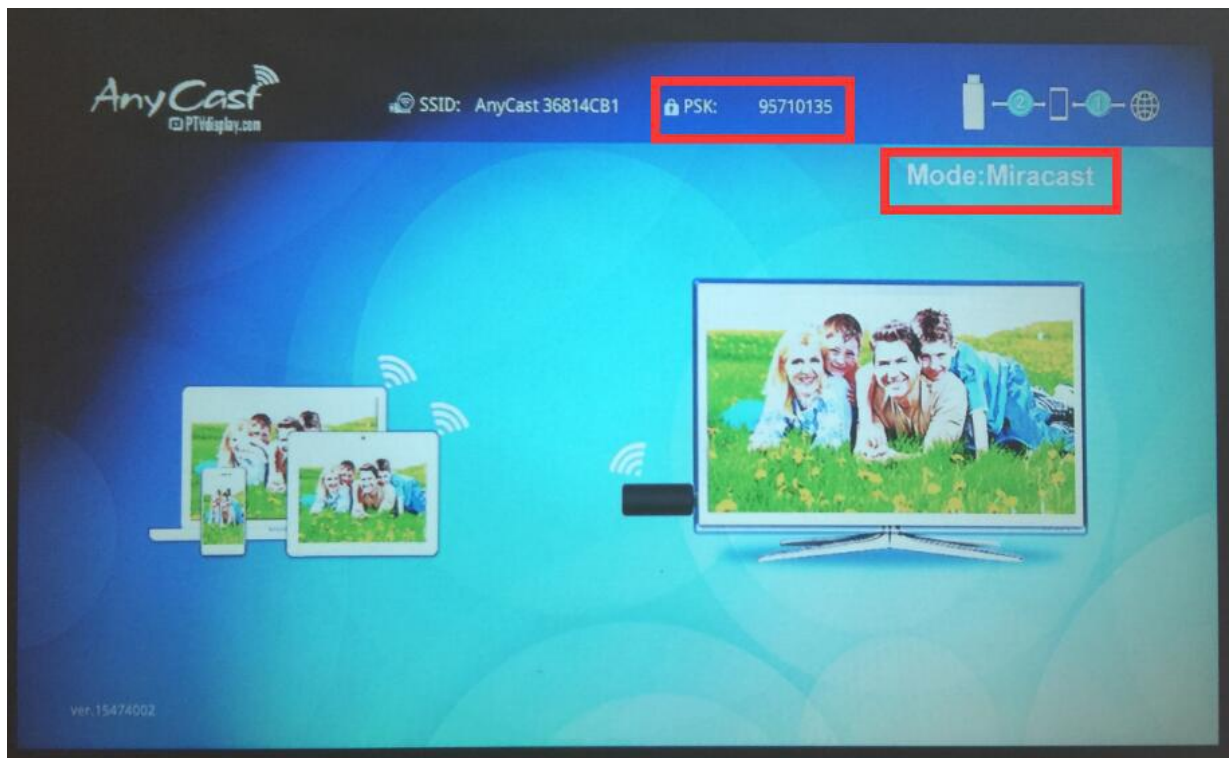

Fn Button

## Apple, Android mode switch button

The EZM2 has two modes for Wi-Fi connection, one is the Miracast for Android, the other is the

DLNA for iOS(like iPhone, iPad or Macbook)

Please press the "Fn" button to enter in the correct mode.

Miracast: for Android (**PSK : xxxxxxxx, the numbers "xxxxxxxx" is the password**)

DLNA: for iOS devices. (**PSK : xxxxxxxx, the numbers "xxxxxxxx" is the password**)
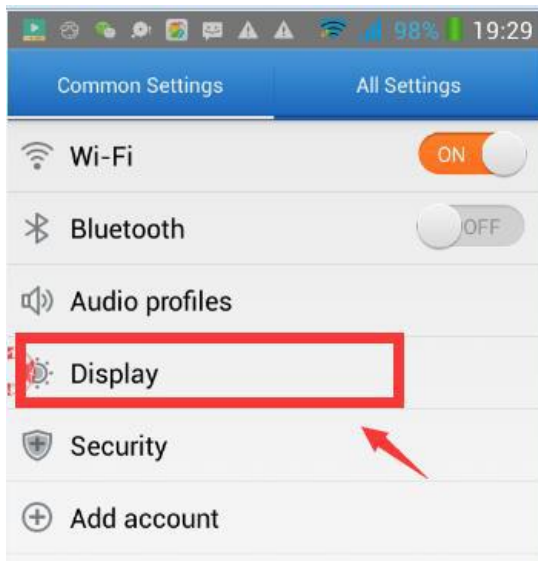

Part 1. Instruction For android device(Press the FN button to enter in the Miracast mode):
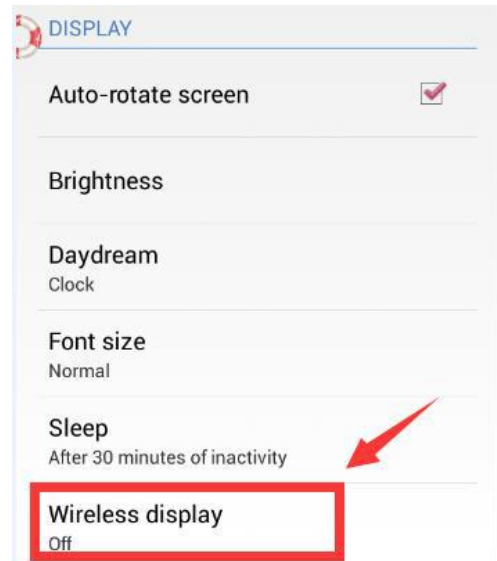

Please plug the EZM2 Wi-Fi device in the HDMI port & 5V USB ports of the projector/TV, then power on

the projector/TV and select the input signal as HDMI, it will show the booting screen.

Notice: **Android device Must support Miracast, please check the settings of android phone/tablet**

to use "Smart View" / "Wireless Display" / "Screen Mirroring" to connect.
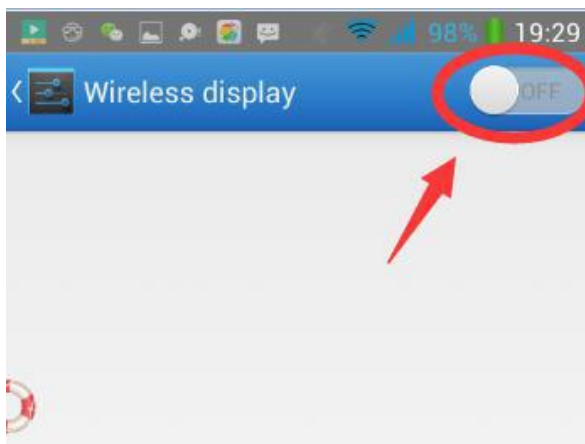

**Not sure? Please consult the device manufacturer for assistance.**

(3)

(4)

Part 2. Instruction For iOS device(Press the FN button to enter in the DLNA mode):
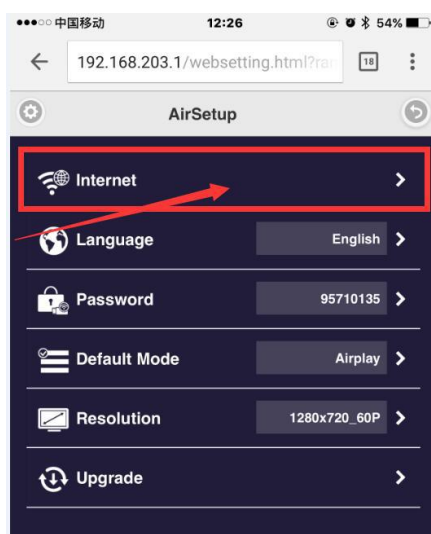

Please plug the EZM2 Wi-Fi device in the HDMI port & 5V USB ports of the projector/TV, then power on

the projector/TV and select the input signal as HDMI, it will show the booting screen.

Mode: DLNA, PSK : xxxxxxxx, the numbers "xxxxxxxx" is the password

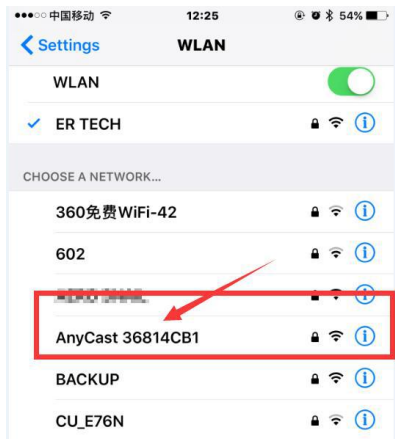

(1)

Go to Setting of your iPhone/iPad, In the WLAN, please

connect to the WiFi named like "Anycast-xxxxxx", input the

Password **(PSK : xxxxxxxx, the numbers "xxxxxxxx" is**

**the password)** .

(2)

Open the web browser of your iPhone/iPad, like Safari or

Chrome, input the IP: "192.168.203.1", please click the first

option "Internet", then you can find your home's WiFi and

please connect to it.

Please wait about 3-5 seconds after you input the
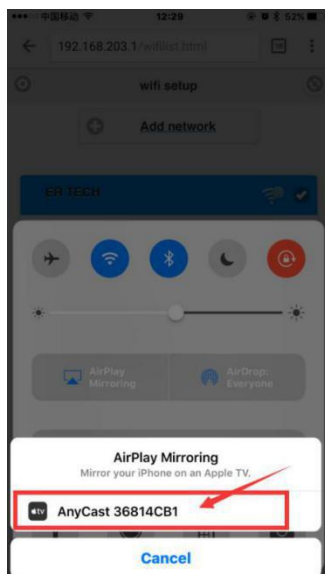

Password of your WiFi password.

Go back to Setting of your iPhone/iPad, In the WLAN,

please click the WiFi named like "Anycast-xxxxxx" again.

(3)

Slide upward from the bottom of iPhone/iPad to display

the hidden menu, please click "Airplay Mirroring".

(4)

Then please click "Anycast-xxxxxx".

(5)

Part 3. Instruction For Windows(Press the FN button to enter in the Miracast mode)
