

ADVANCED EDI FOR MICROSOFT DYNAMICS NAV AND MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

ADVANTAGES OF SAAS EDI

DiCentral's EDI-Integrated Suite for Microsoft Dynamics NAV and Microsoft Dynamics 365 Business Central is a fully hosted, seamless, and AS2 enabled solution that achieves the true optimization of business practices for which EDI has always been intended.

All mapping, trading partner management, testing, configuration, and 997 Functional Acknowledgement tracking are fully managed without the need for updates or patches to be purchased or installed by end users.

FULL DATA INTEGRATION

MS NAV users' sales, invoicing, production, scheduling, and shipping data are all fully integrated and reconciled, eliminating any need for manual intervention.

This integration greatly improves collaboration, visibility and optimizes processes in the supply chain. It promotes a tangible Return On Investment and radically changes the way organizations communicate and interact with each other.

The EDI Integrated Suite supports 3PL documents, and inventory management for ecommerce and drop ship.

Gold Application Development

BENEFITS:

- › True B2B supply chain collaboration through real time information
- › Management by exception eliminating the need for manual tracking
