

FLEX 5000 I/O

Flexible I/O platform enabling integrated control for The Connected Enterprise

FLEX 5000™ I/O is a reliable and flexible distributed I/O solution, allowing you to choose your I/O to meet your operational needs. The platform offers integrated safety with discrete and analog fail-safe I/O for applications requiring speed, frequency measurement, temperature sensors, pressure, and flow sensor monitoring. The modules are TÜV certified up to SIL 3, PLe, Cat. 4 and can be conveniently mounted in the same rack with standard modules, reducing hardware cost. FLEX 5000 I/O enhances communication with 1 Gb EtherNet/IP™ connectivity, offering higher speed and increased bandwidth. Ease of communication is optimized with multiple network architecture and topology options such as Parallel Redundancy Protocol (PRP), Device Level Ring (DLR), Linear, and Star. And, a defense in depth security strategy is achieved with module vendor certificates, firmware encryption and secure boot functionality.

Extreme environment (XT) variant

ControlLogix® 5580 controllers

FLEX 5000™ I/O support for controller redundancy

Flexibility in design and maintenance

- Optimize footprint by mounting up to 16 modules on a single node, vertically or horizontally, and in any module sequence
- Operate at -40...70 °C (-40...158 °F) temperatures and in extreme environments with XT version rated up to G3 with conformal coating
- Use in hazardous areas under Class I, Division 2, Zone 2, Groups A, B, C, D
- Reduce downtime with simplified Removal and Insertion Under Power (RIUP) and easy online changes

Ready for Process applications

- Gain support for ControlLogix® 5580 controller redundancy in high availability applications from Studio 5000 Logix Designer® application, version 33 or later and deliver more consistent operations with increased reliability
- Reduce downtime with easy access to additional Process diagnostics via HART Premier Integration in Studio 5000 Logix Designer software
- Save engineering time through tight integration with instruction set in [PlantPAx® 5.0 system](#) and above
