

WiFi Smart Plug Instruction

Any problems please follow Gosund on 🚹 and consult the service staff

▶ At a Glance

1. Flame Resistant Material 2. Socket Panel 3. On/Off Button 4. Indicator Light 5. Power Plug

Note: On/Off button can also be used as a factory reset button- simply press and hold the button.

Only do this if you want to erase the socket's current settings.

Parameters

Input: 100-240V~, 50/60Hz

Output: 16A Max Rated Power: 1920W/120V WIFI Frequency: 2.4GHz

▶ Install the "Gosund" App

1. Search for Gosund on App store/Google Play Store, or just scan the QR code below to download. (For iPhone, you can use build-in camera to scan the QR code. For Android, you may need barcode scanner to do that. Please confirm the App icon before downloading.)

PS: You can also add this smart plug to smart life app directly if you already have it on your phone, it is compatible and works the same way.

2. Register an account and memories the password, enter your email address or your phone number, then obtain verification code to complete the registry.

► Connect with Your Wi-Fi Requirements: 2.4GHz Wi-Fi condition at home

For 2.4Ghz Wi-Fi You'll Need to Know: If you only have 5GHz Wi-Fi router you will not be able to complete the connection.

2. If you are using a dual Wi-Fi router and it broadcast 2 Wi-Fi signals, make sure that your phone was connected with the 2.4GHz Wi-Fi signal, it should be the Wi-Fi signal that next to "_5G".

3. If you are using a dual Wi-Fi router but it broadcast only 1 Wi-Fi signal, you will have to manage your Wi-Fi router and change the settings to have 2.4GHz Wi-Fi.(you may change it back after connection)

CHOOSE A NETWORK...

Gosmart_xxxx_

A: For Easy Mode Connection- Blue Indicator Light Blink Quickly (Every 0.5 second)

- ---> Confirm that the smart plug is well installed
- ---> Open Gosund app ---> Choose the "+" symbol
- ---> "Electrical Outlet"

---> Confirm the light status on your plug and follow the App guide. (If you don't see blue light quickly blinking, press On/Off button to reset) ---> Set a unique name for this smart

plug, choose the room location.

B:AP Mode (Indicator light blinks every 2 seconds)If the Easy mode connection failed, please remove and install the smart plug into your power outlet again. When you make sure the indicator light is quickly blink again for Easy mode, hold the power button for about 7 seconds to plug to AP mode. Once you see the indicator light slowly blink(every 2 seconds), you can start to try the AP mode connection.

---> First go back to the Add Device "+" interface, choose the AP Mode on the upper right corner.

▶Getting to Know Gosund App

indicator light flashes slowly; -->Make sure the indicator light is flashing slowly and confirm it in APP; -->Choose your 2.4G Wi-Fi and enter the password and confirm it in APP; -->Tap "Connect now" and choose Wi-Fi hotspot named "Smart Life-xxx" then go back to Gosund App:

-->Long press on/off button until the

-->Wait till successful configuration and then tap "Completed".

Socket is on

Switch Left time Timer

(I)

Note: edit the default names in this interface, for better management. ▶ Create Scenes/Groups You can create certain scenes and groups on Gosund App, it allows you to control different smart devices in different rooms at the same time.

Set timer/schedule

Set device names

If you want to give others the permission to control your smart plug, you can authorize that by devicesharing function. Go to the Gosund app -->Choose the device you want to share

-->Choose Edit Button -->Choose shared devices --> Add sharing -->Enter his/her Gosund account -->Search and complete.

► How To Connect with Amazon

Requirements:

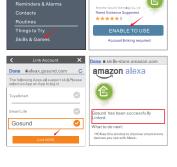

1.Amazon Alexa Device and Alexa App 2.The Smart Plug connected with Gosund App

3. Gosund App user ID and password Add Gosund as a "Skill" for Alexa Open Alexa app and choose Skills&

-->Search for Gosund-->ENABLE

TO USE-->Enter the Gosund account

-->Authorize to use -->Choose Gosund. And then, the devices you added on will sync to Alexa App. You can also ask Alexa to discover new devices for vou in this moment.

How to ask Alexa to turn on/off Smart

First you need to set exact name for the plug on Gosund app. If not, Alexa may tells you: "Sorry, I can't find the device named xxx..." You can say to Alexa "Alexa, turn On/Off Livingroon plug", this command will help you to do the work.

Things you can do with Alexa

* Voice Control the smart plug * Remote Control the smart plug via

Alexa App.

* Add the smart plug to certain groups on Alexa App. For other questions

about Alexa, please find out with Amazon Alexa support page, or contact us for help directly by email.

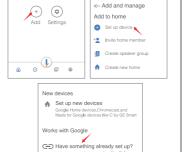

Tips for using Alexa Voice Control Please make sure the device name you set for the smart plug is unique and recognizable for Alexa voice assistant. You should make sure all the smart devices names at your home are non-repetitive and recognizable for Alexa. Voice assistant system needs the exact command to do the work.

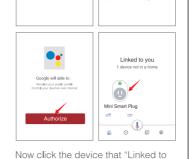

► How To Connect with Google Home

After you connected the smart plugs with Gosund app successfully, you can start to link them to Google Home App:

Open Google Home app and find "Set up device" -->Click "Works with Google'

-->Search Gosund-->Enter your Gosund account --> Authorize to use. After that you will see the smart plug in the home page of Google Home as "Linked to you", but you still haven't set the device name and assign a home or a room for it.

Now click the device that "Linked to you" or open "Works with Google"

again to manage your linked devices, follow the steps below and set up the device names, rooms and home for the smart plug, you won't be able to voice control it before you complete that.

► Trouble Shooting

Q: Why my phone connection failed? A:* You should try both Easy Mode and AP Mode, read page 5-page 7, make sure to follow the guide and try again. *Confirm your home Wi-Fi is 2.4GHz and you entered the correct password during the connection.

*Remove&Install the smart plug to start again, see what happens. Contact the after sales service for further help if you still have problems with the connection after following the steps above.

Q: Why can't I voice control it with my Alexa/Google?

A: * Make sure you set up smart plug successfully on Gosund app, and they are working fine.

* Make sure you put correct account when you link Gosund as a skill on Alexa/Google App, and you can find it on your skills.

* Make sure your Alexa/Google device is working fine.

* Check the device names that you set for this smart plug, it should be nonrepetitive and recognizable for voice assistant, Also, please make sure your native language is available for Alexa.

If you still having trouble to voice control our smart plug after followed all instructions, do not hesitate to contact us for help.

Q: Do I need to set up the device again if I changed my router?

A: Yes! you must set up the smart plug again if there is any change of the current Wi-Fi status, either you changed your router or your moved the device to a new house. However, you don't need to worry if you are just moving it inside your room, with the same Wi-Fi.

temporary lost power or Wi-Fi
