iPAD CU-SP1 INTELLIGENT PUBLIC ACCESS DEFIBRILLATOR

CU-SP1 is the last generation of intelligent public access defibrillators with innovative features:

- Auto volume adjustment
It detects the ambient noise and automatically adjusts the volume of its prompts to make them audible over the background noise.

- Smart pads - intelligent storage
The pre-connected "Smart" electrode pads are stored in an easy access compartment on the underside of the unit. This ensures that the iPAD SP1 is always ready to be used in the shortest time possible. In addition, the visual frontal indicator shows if the connected pads are within their life expectancy. The indicator will change when the pads have only 3 months life left before their expiry date giving you time to arrange for replacements. It will change again when the expiry date is reached.

- CPR detection
CPR ensures that the casualty has the best chances of survival. The CU-SP1 detects if CPR is being performed with appropriate prompts, if not it encourages the responder to perform it.

- Easy communication with CU-EX1 software
Installing CU-EX1 software onto a computer allows you to see and analyze the usage history of the unit. Information such as time of "power on", the casualty's heart rhythm and shocks delivered are all clearly presented.
The iPAD CU-SP1 can store up to 5 events with up to 3 hours of ECG analysis on an SD memory card.

i-PAD NF 1200 PUBLIC ACCESS DEFIBRILLATOR

Semi-automatic external defibrillator designed for minimally trained individuals. It provides simple and direct voice prompts and indications for a straightforward rescue operation. Lightweight and battery powered for maximum portability. Designed to treat Ventricular Fibrillation (VF) and Fast Ventricular Tachycardia: the most common causes of sudden cardiac arrest (SCA). In SCA, the heart of the victim suddenly stops pumping. The only effective treatment for VF is the application of a defibrillating shock. It may be used on children 1-8 years old (less than 25 kg) with pediatric reduced energy pads, over with adult pads. Supplied with a set of adult pads, lithium battery (200 Shocks or 10 hours operating time), manual. According to ERC Guidelines 2010. **TRAINER:** simulates all the functions of i-PAD, with 8 rescue scenarios.

PRIMEDIC™ EXTERNAL DEFIBRILLATORS - AED

PRIMEDIC HeartSave product range is easy to operate and offers fast operation. Clear voice prompts guide first aiders through the rescue procedure.

Current controlled defibrillation - CCD
CCD Biphasic technology delivers peak-free current defibrillation on the patient's heart muscle through its individualized, gentle, effective and current-controlled defibrillation pulse. Featuring an escalating defibrillation strategy, HeartSave is impedance compensated and capable of a maximum energy of 360J.

Effective workflow
HeartSave is designed to help first aiders delivering the most effective life support. Through its advanced workflow, HeartSave supports the rescuer in minimizing the perishock pause as well as no-flow fraction.

Pediatric mode
At a touch of a button the Paediatric Mode can be promptly selected. No need of dedicated paediatric electrodes and extreme ease of use result in optimized costs of maintenance and prompt operation.

Fast
It turns on automatically as soon as the cover has been opened and rhythm analysis starts immediately as the pre-connected electrodes are attached to the patient. All accessories (razor, breathing mask, scissors and gloves) are included.

Status display
Active status display provides comprehensive information on the device's operating status and battery status (daily and monthly self-tests).

HEARTSAVE PAD and HEARTSAVE AED

AMBU® TRAINING MANIKINS

Ambu®
Ideas that work for life

• **34044 AMBU® MAN COMPRESSION**
A basic instruction
and training mani-
kin for the practice
of external chest
compression that
meets recom-
mendations of
AHA (American
Heart Associa-
tion) and ERC
(European Resuscita-
tion Council). With the size
of a normal adult torso, provides a life-
like representation of human anatomy.
Indicator for correct compression
The manikin includes an indicator bar
that shows the correct compression
depth, changing colour from red to
green.
Compact and portable
Easy AED training
Due to the closed shaped torso, defi-
brillation pads can be placed and AED
training can be performed realistically.
Weight: 2.0 kg
Size: 45x37x25 cm
Max compression depth: 7.5 cm
Manual in: GB, FR, IT, ES, DE, PT, GR, HU,
DK, PL, NO, SE, SI, CZ, TR, JP, CN.

34044

• **34047 AMBU® MAN BASIC**
Cost efficient and reliable trai-
ning manikin designed to
fulfill all requirements for
the BLS algorithm trai-
ning. The closed shaped
torso with its anatomi-
cal correct landmarks
allows trainees to
learn and train the
use of Automatic
External Defibrillators
(AED) and the placement
of pads. It allows an optimal training of
chest compression in combination with
realistic ventilation. The unique hygienic
system prevents cross contamination.
It allows a realistic ventilation resistance
and expiration through mouth and nose.
The correct compression depth and requi-
red ventilation volume can be monitored
by the feedback indicator on the manikin.
Ventilation as in real life
The trainees will feel the realistic airway
resistance and the chest will start rising

- **34098 BASKET STRETCHER - orange**

Robust, resistant and flexible, it is ideal for a wide range of rescue operations in mines, at altitude and in water. A revolutionary production technique ensures uniform thickness of the entire length of the stretcher. The shell is in high-density polyethylene and is joined to an aluminium framework for better strength. The handles for transport, integrated in the structure, are placed along the entire perimeter. The grommets for the fixing of the spring catches of the harnessing are in stainless steel. Inside the shell there is a removable mattress, applied with Velcro®, made in closed-cell EPDM, which makes it impermeable to both blood and water. High density polyethylene guarantees shatterproofness and sanitization. It can contain a spine board. Comes with nylon rope along entire perimeter, three 50 mm nylon belts with quick-release buckles, water resistant and closed-cell mattress, footrest in pre-formed polyethylene with position regulator.

AMBU® AURAONCE™ DISPOSABLE LARYNGEAL MASK

**AMBU® AURAONCE™ DISPOSABLE LARYNGEAL MASKS**
AuraOnce has a special curve that carefully replicates natural human anatomy. Molded directly into the tube, the unique shape makes correct insertion easy without abrading the upper airway. AuraOnce's curve also ensures that the patient's head remains in a natural supine position when the mask is in use without extra stress on the upper jaw. Moreover, Auraonce is specially designed to give the airway tube the flexibility needed to adapt to individual anatomical variances and wide range of head positions. AuraOnce has a D-shaped airway tube to give a firm and ergonomical grip during insertion. In short, positioning is fast and accurate, with least possible internal pressure.
- Packaged sterile and ready for use
- Colour coded pouch with directions for use
- Available in 5 sizes fitting a wide range of patients.

Cuff and airway tube moulded as single unit with built-in, anatomically correct curve

The airway tube is flexible at the cuff and rigid at the connector for easy, atraumatic insertion and removal

Practical clear "window" to view condensation

Smooth sides without ridges or fins that can scratch delicate tissue

Ultra thin pilot balloon with universal check valve provides precise tactile indication of degree of inflation

Universal 15 mm connector (ISO)

Reinforced tip will not bend during insertion so positioning is always correct

AMBU® AURA-i™ LARYNGEAL MASK VENTILATION & INTUBATION

AMBU® AURA-i™ DISPOSABLE LARYNGEAL MASKS
Ambu® Aura-i™ is a disposable laryngeal mask designed for everyday use. Pre-formed to follow the anatomy of the human airway, the soft rounded curve of the Aura-i ensures fast and easy placement and guarantees long-term performance.
Aura-i is the preferred everyday routine device for establishing an airway where an ET-tube is deemed unnecessary.
At the same time it holds a place on the difficult airway cart.
In case of a "Cannot Intubate - Cannot mask Ventilate" (CI-CV) situation, where the purpose is to intubate the patient, Aura-i can be used as conduit for direct endotracheal intubation assisted by a flexible scope.
The airway tube is designed to allow easy passage of an appropriately sized ET-tube. The recommended ET-tube size is indicated on the connector block of the mask.
Aura-i comes in a complete range of 5 sizes, suitable for pediatrics and adults.
