- [7.4 Seller Support](#)

1 Register Your Seller Central Account

1.1 Select a Seller Plan

Before you register, choose your seller plan. Due to the limited functionalities in the individual plan, this guide is dedicated to professional sellers.

	INDIVIDUAL	Recommended plan PROFESSIONAL
How much does it cost?	PLN 4/product sold + percentage sales commission*	PLN 165.91 (VAT not included)/month + percentage sales commission*
Which one is right for me?	Select an individual plan if: <ul style="list-style-type: none"> - you plan on selling 40 units or less per month - you don't plan on advertising your products - you don't plan on using advanced sales tools 	Select a professional plan if: <ul style="list-style-type: none"> - you plan on selling more than 40 units per month - you want to advertise your products - you want to use advanced sales tools such as API integration or sales reporting - you want to sell products in restricted categories that require Amazon's approval

*Sales commissions depend on the category and range from **7% to 15%**.

Commissions are charged on the final price for the consumer (which is the price of the product + delivery cost).

Books, music, videos, DVDs, software and video games are charged a handling fee of **PLN 3-4** per item.

As part of the promotion on Amazon.pl, we are reducing sales commissions until 1 April 2022. Click [here](#) to view the new promotional charges.

1.2 Create an account

To create a new Amazon seller account, use this link: [Sign up](#)

Next 1) click on „Create your Amazon account“, 2) enter your first and last name, e-mail address and password, 3) select „Next“.

The screenshot shows the 'Get started selling on Amazon' page. At the top is the 'amazon seller central' logo. Below it is the heading 'Get started selling on Amazon'. There are two input fields: 'Email or mobile phone number' and 'Password'. A link 'Forgot your password?' is next to the password field. A yellow 'Next' button is below the fields. At the bottom, there is a checkbox for 'Keep me signed in. Details' and a 'New to Amazon?' link. A grey button 'Create your Amazon account' is at the very bottom.

The screenshot shows the 'Create account' page. At the top is the 'amazon seller central' logo. Below it is the heading 'Create account'. There are three input fields: 'Your name', 'Email', and 'Password'. The password field has a note 'At least 6 characters' and a link 'i Passwords must be at least 6 characters.'. Below the password field is a 'Re-enter password' field. A yellow 'Next' button is below the fields. At the bottom, there is a link 'Already have an account? Next'.

IMPORTANT: do not use an e-mail address you have previously used for an Amazon Account. Also, you are not allowed to own more than one seller account.

1.3 Business and Contact Information

Then you will be asked to select the country of establishment of your business and its type. Please provide your company's legal name (without using diacritic marks). If the name is too long, enter the abbreviation. For example, Sp. z o.o. (*spółka z ograniczoną odpowiedzialnością* — Polish limited liability company equivalent), P.H.U. (*przedsiębiorstwo handlowo-usługowe* — Polish commercial and service company equivalent), etc.

If you register as a sole trader, select your country of residence and enter the full name of the entity.

You will also be asked to carefully read and review the Amazon agreements and policies listed below.

Before starting, please ensure you have the following handy
We may require additional information or documents later

Business and Contact address

Mobile or Telephone number

Chargeable Credit card

Identity details

Business location 

Select a country 

If you don't have a business, enter your country of residence.
An incorrect selection may affect the status of your account.

By clicking on 'Agree and continue,' you agree to the [Amazon Services Europe Business Solutions Agreement](#), [Amazon Payments - Selling on Amazon User Agreement](#), and [Amazon Payments UK - Selling on Amazon User Agreement](#). For more information about how we manage your personal information, see the [Amazon Services Europe Privacy Notice](#), the [Amazon Payments Europe Privacy Notice](#), the [Amazon Payments UK Privacy Notice](#), our [Cookies Notice](#), and our [Interest-Based Ads Notice](#).

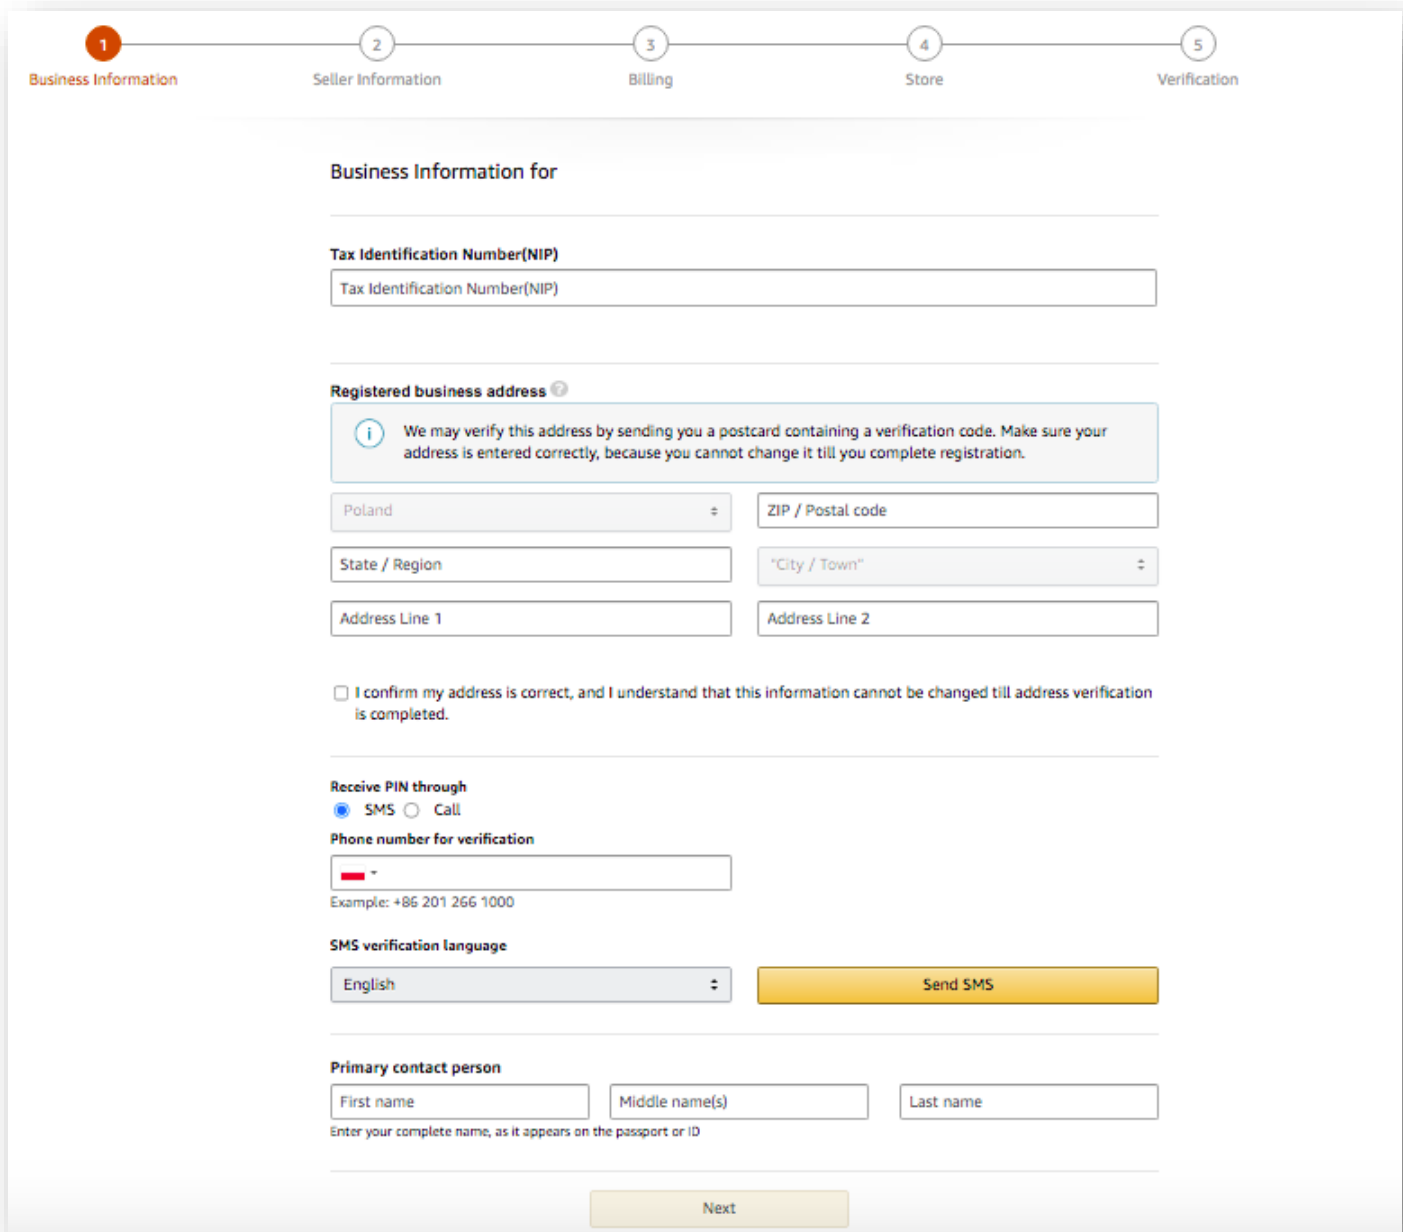

When you click on 'Agree and continue,' we use the information you provide during the account registration to create selling accounts in Amazon's stores in North America, Europe, Australia, and Japan, and you are providing this registration information to Amazon.com Services LLC and its affiliates in those regions. For more information about how we manage your personal information, see our [Privacy Notice](#).

if you use the selling services offered in Amazon's stores other than in the European Union or United Kingdom, you also agree to the additional terms listed on the [International Selling Agreements](#) page with respect to those services.

[Agree and continue](#)

After clicking on “Agree and Continue”, you will be asked to provide your company registration number, your business address, phone number and primary contact person.

If you are registering as an individual, then you will be asked for seller information (see next section). After you have inserted all the information, click on “Save and Continue”.

The screenshot shows a registration form with a progress bar at the top containing five steps: 1. Business Information (highlighted in orange), 2. Seller Information, 3. Billing, 4. Store, and 5. Verification.

SMS verification language

Primary contact person

First name Middle name(s) Last name

Enter your complete name, as it appears on the passport or ID

1.4 Seller Information

1.4.1 Primary Contact Person

In this screen, you will need to provide information for a Primary Contact Person. The Primary Contact Person is the person who has access to the Selling on Amazon payment account, provides the registration information on behalf of the account holder (the registered seller) and initiates transactions such as disbursements and refunds. Actions taken by the primary point of contact are deemed to be taken by the account holder.

The screenshot shows a multi-step registration process. At the top, a progress bar indicates five steps: 1. Business Information (completed, green checkmark), 2. Seller Information (current step, red circle), 3. Billing (grey circle), 4. Store (grey circle), and 5. Verification (grey circle).

The main content area is titled "Personal Information for" and contains the following fields:

- Country of citizenship:** A dropdown menu with "Select country" and a downward arrow.
- Country of birth:** A dropdown menu with "Select country" and a downward arrow.
- Date of birth:** Three separate dropdown menus for "Day", "Month", and "Year", each with a downward arrow.
- Residential address:** A radio button (selected) and a link "+ Add another address".
- Mobile number:** A radio button (selected) and a link "+ Add a new mobile number".
- Legal representative:** A checkbox followed by the text "is a legal representative of the business".

At the bottom of the form, there are two buttons: "Previous" (grey) and "Save" (yellow).

1.4.2 Phone Verification

When entering the phone number for the Primary Contact Person, you will be asked to verify it. Here, you will have the option to receive an automated call or text from Amazon that includes a 6-digit PIN to authenticate your account.

Start by choosing the country of your phone operator from the drop-down menu, and then enter a valid telephone number, excluding the country code. You will then have the option to select the language in which you would like to receive the call or text and your preferred method of contact.

Within a few seconds, you will receive a call or text from Amazon that includes your one-time PIN. Enter this number and click on the "Verify" button. Once you enter your PIN successfully, you will receive confirmation that the verification was successfully completed.

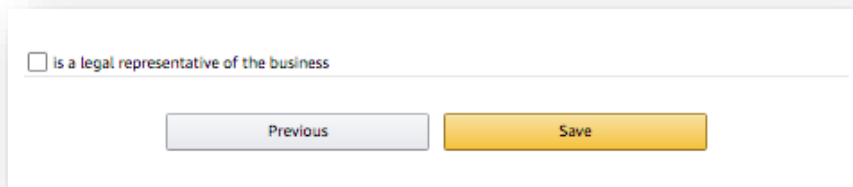

1.4.3 Beneficial Owner Information

At this point, you will also have the opportunity to specify if the Primary Contact Person is a beneficial owner of the business and/or a legal representative of the business.

Beneficial owner is a natural person 1) who owns the business, 2) who controls it through direct or indirect ownership of over 25% or more of the shares or voting rights of the business, or 3) who otherwise exercises control of the management of the business.

Both national and EU regulations contain more detailed information on which persons should be considered as beneficial owners. Consult your financial or legal advisor for further details.

In case beneficial owner information does not correspond with that of the Primary Contact Person, you will need to provide details for each of the beneficiary owners of the company. Once you have entered all the information required, you will need to tick the box at the bottom of the page confirming that you have added all the beneficial owners of the business in order to be able to click on "Save and Continue".

is a legal representative of the business

Previous Save

1.5 Specify a Charge Method

Here, you will be required to add a valid credit card. Amazon will first validate your credit card and will then charge your subscription fee. You will be able to edit your credit card information or add another bank account for billing purposes after the registration process.

After filling in the required information, select "Save and Continue" to move to the next screen.

The screenshot shows the 'Billing Information' step in a five-step registration process. The steps are: Business Information (checked), Seller Information (checked), Billing (active), Store, and Verification. The 'Billing Information' section is titled 'Credit card details' and includes a 'Global Selling Fee' warning box. Below this are input fields for 'Credit card number', 'Expires on' (month and year), and 'Card holder's name'. There is also a 'Billing address' section with a radio button and links to 'View all saved addresses' and '+ Add a new address'. At the bottom are 'Previous' and 'Next' buttons.

Billing Information
Credit card details

Global Selling Fee
You will be charged a Professional selling subscription fee of 25 GBP for the first month. You will continue to be charged this fee each month if you have active listings. If you do not have active listings, you will not be charged a subscription fee in that month. If you expand to sell in other stores, you will pay the equivalent of 39.99 USD per month, split proportionately across each country or region in which you have an active listing and charged separately in each local currency. You can downgrade at any time. For more information, see [this page](#).

Credit card number

Expires on
1 2021

Card holder's name

Billing address

[View all saved addresses](#)
[+ Add a new address](#)

[Previous](#) [Next](#)

In the first month, a gross fee will be charged. Add the VAT number information so that further payments are collected as a net amount. You can add the VAT number in your account settings: "Settings" → "Account Info" → "Tax Information". Amazon will issue an invoice and send it by email to the address provided during registration.

1.6 Set up Your Store Name

In this page, you will be asked to enter a name for your Amazon store. This is the name that will be displayed to Amazon customers who purchase your products. This does not have to match your own business name.

After completing this information, select "Next" to complete the registration process.

If your store name is already in use, you will be asked to provide another one.

The screenshot shows a registration progress bar at the top with five steps: Business Information (checked), Seller Information (checked), Billing (checked), Store (active, highlighted in orange), and Verification (5). Below the progress bar is the 'Store Information' section, which includes a text input field for the 'Store name' with a green checkmark and the word 'Available' to its right. Below the input field are three radio button questions:

- Do you have Universal Product Codes (UPCs) for all your products?**
 - Yes
 - No
- Are you the manufacturer or brand owner (or agent or representative of the brand) for any of the products you want to sell on Amazon?**
 - Yes
 - No
 - Some of them
- Do you own government-registered trademark for the branded products you want to sell on Amazon?**
 - Yes
 - No
 - Some of them

At the bottom of the form are two buttons: 'Previous' (disabled) and 'Next' (active).

1.7 Additional Information Required

In accordance with EU regulations, Amazon Payments Europe requires sellers to provide information about themselves and their business so that they can begin to sell on Amazon and receive the proceeds of their transactions on Amazon EU marketplaces.

In order to comply with applicable law, Amazon Payments Europe is required to collect and verify certain information in order to open and maintain a payment account for sales on Amazon. Amazon Payments Europe will only use your data in the manner specified in the [Amazon Payments Europe Privacy Notice](#) document.

Amazon collects information that may be required to verify your identity through the KYC (Know Your Customer) process and to ensure compliance with anti-money laundering laws or similar. This means that Amazon may require to verify the information you provide during the account registration process by requesting specific documentation such as personal identification documents and/or bank statements as proof of ownership.

In accordance with EU regulations, Amazon Payments Europe requires sellers to provide information about themselves and their business so that they can begin to sell on Amazon and receive the proceeds of their transactions on Amazon EU marketplaces.

The ID card image should be in colour (either scan or photo format), while the bank statement must contain the bank logo, must not be more than 180 days old and cannot be a screenshot. Only credit card transaction statements or bank account statements are accepted. No other document will be accepted (such as a transfer confirmation or a bank letter confirming the opening of an account or the holding of an account).

Documents are already accepted in the Polish language. Please see an example of an authorisation template below:

[Company letterhead or corporate stamp]

AUTHORISATION TO ACT ON BEHALF OF THE ENTITY

I, the undersigned (name, surname and profession of the signatory), acting on behalf of [full name of the Entity, address, registered office and details of its entry in the commercial register, i.e. at least the designated court/registration authority and registry number] (the "Entity"), hereby authorise [full name of the contact person] to open a payment account on behalf of the Entity under Sales on Amazon with Amazon Payments, to accept the User Agreement and other regulations, to have access to the Amazon sales payment account and to initiate transactions on behalf of the Entity.

Date, Signature (of the person representing the entity indicated above*):

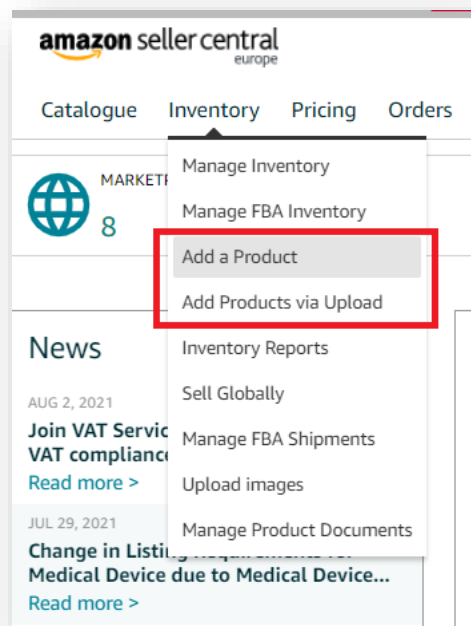

* if the document is signed by a person authorised to represent the entity on the basis of a separate document (e.g. power of attorney), such a document must also be attached to the letter.

1.10 Welcome to Amazon

Congratulations! You have now set up your Amazon Seller Central Account. Please proceed to the next step to start selling on Amazon.

2 List Your Product

Amazon offers different options for creating listings and adding your offers. Start by selecting the “Add a Product”, or “Add Products via Upload” if you have a Professional selling plan, from the drop-down menu located in the Inventory tab at the top of your Seller Central homepage.

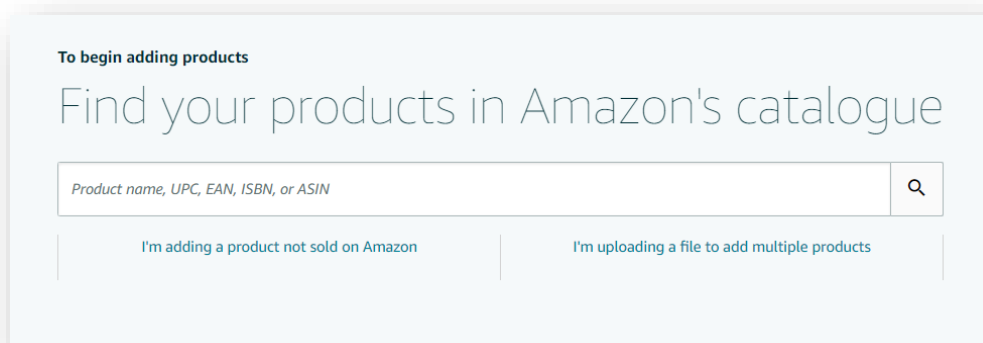

2.1 Add a Product

The “Add a Product” feature allows you to add and maintain your inventory. This is a very easy way to create a few listings or product pages.

2.1.1 Listing an Existing Product in Amazon’s Catalogue

Start by searching in Amazon’s catalogue for the product you want to add. You can search using the product name or the external product identifier also known as UPC, EAN, ISBN or other. After entering your search criteria, click on the “Search” button. If the product is already in Amazon’s catalogue, the item you have searched will appear on the page after it refreshes.

Once you locate the item that matches the one you want to sell, double check the product details to make sure that your item is an exact match. Then select the "Sell yours" for that listing and fill in additional details.

An incorrect match could result in poor customer experience and negative feedback.

Find your products in Amazon's catalogue

Cancel **Save and finish**

You will then be able to locate and edit your listing offer by going to the "Manage Inventory" page in the "Inventory" tab of your Seller Central account.

2.1.2 Listing a New Product in Amazon's Catalogue

If you are adding an own-brand product or an article that is not yet in Amazon's catalogue, you will need to click on "Create a new product listing".

To begin adding products

Find your products in Amazon's catalogue

Product name, UPC, EAN, ISBN, or ASIN

[I'm adding a product not sold on Amazon](#) | [I'm uploading a file to add multiple products](#)

Next, you will need to classify your product category using the navigation filters. Once you have located your item, click "Select".

Select a product type

Choosing the best product type ensures that you see the most appropriate data fields for your product. Browse the product types directly or use search. See if your product already exists on Amazon.

Favourites

You haven't added any favourite categories yet.

Search [What is a product type?](#)

Search for a category

Browse [What is a product type?](#)

Shelf Life

* Manufacturer part number — additional information for products in the automotive category

Products with rich information such as properly formatted titles, high quality images on white backgrounds, detailed product descriptions and bullet points will help customers and make your offers attractive to them. Failure to supply the correct product data could result in quality alerts and your products being suppressed from Amazon’s catalogue.

2.1.3 Product Variations

If you have a product that varies in size or colour, you do not need to add each of these variations separately. You can select the “Variation Theme” option, choosing how your product varies.

Such variations are also called parent-child relationships between products.

Let's use the example of one style of t-shirt that comes in four different sizes. In this case, you would select the variation theme of “SizeName”. The parent item is the t-shirt, and there are 4 child items to add: one for each size option (S, M, L and XL).

List all your variation terms for the themes below.

For the fields below, list the variations that exist for your products. For example, if you're selling Pirate Shirts in the sizes Small, Medium, and Large, and in the colors White and Black, list all those terms. This is necessary even if you don't carry every combination, or are temporarily out of stock on some. On the next page, you'll be able to remove any invalid variations. See an example, and [Learn more](#).

Size ?

S	M	L	XL	
---	---	---	----	--

Example: 2T, 6X, 12, Mały, XL, 18 miesięcy, 14 Wysoki, 28Wx32L

Add Variations

Next, you can update each child item with your offer information including seller SKU, price, quantity and condition. The product information that you fill out on the other tabs will be copied to each child.

Your variation child ASINs have been created. To complete your listings, find the variation child listings in your inventory and select 'Edit' to add an image for each variation child. Please note that each variation child listing requires an image to be active on the Amazon website.

Apply Changes Delete selected Undelete selected 4 variations Condition Note Sale Price

* Colour	Seller SKU	* Product ID	* Product ID Type	* Condition	* Your price	* Quantity	Colour Map
<input type="checkbox"/>			-Select-	-Select-	zł		
<input type="checkbox"/> White			-Select-	New	zł		
<input type="checkbox"/> Black			-Select-	New	zł		
<input type="checkbox"/> Gray			-Select-	New	zł		
<input type="checkbox"/> Red			-Select-	New	zł		

When adding variations by colour, be sure to provide an image for each child listing. In our t-shirt example, you would need to provide an image for each colour option (e.g. white and black).

Your image recommendations

Upload your recommendations for product images.

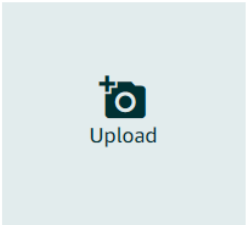

See image guidelines ▶

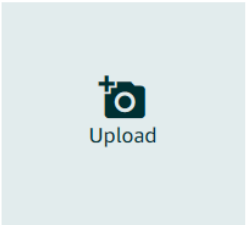

+ Upload multiple files or drag and drop 1 or more files below.

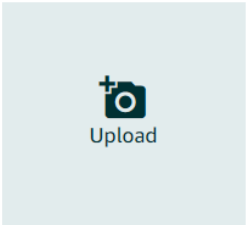

Uploaded: 0 of 9 images. Maximum 9 images are allowed. You can arrange the order after uploading.

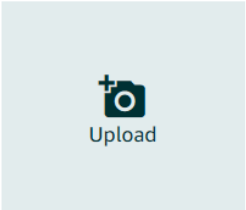

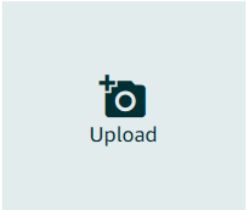

MAIN

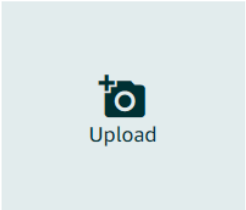

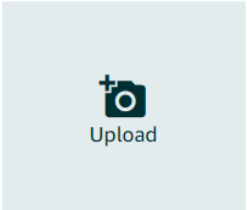

Once you have finished providing your product information, click "Save and finish" to create your offer. Please allow few minutes for your offer to go live on Amazon's website.

2.2 Add Products via Upload

You can find this tool in Seller Central located underneath "Add a Product" in the "Inventory" tab of your main navigation menu. This is a very easy way to list your products in bulk.

2.2.1 Already Have a Product File?

If you have your own e-commerce website or use another system to manage product information, you can export your product details into a file (excel, text or csv format). Ensure that the first line includes the names of the necessary product attributes, such as: title, description, colour, size, photo (image URL).

Each product should be described in a separate line.

Next, upload the file in the tab "Upload your Inventory File".

Add Products via Upload [Learn more](#) [Seller University](#) [Selling application status](#)

[Download an Inventory File](#)**Upload your Inventory File**[Monitor Upload Status](#)

Email Alert Send an email alert when my upload is complete.

2.2.2 Need to Create a Product File?

If you wish to download an Amazon Inventory template, go to the „Download an Inventory File” tab.

Add Products via Upload [Learn more](#) [Seller University](#) [Selling application status](#)

[Download an Inventory File](#) [Upload your Inventory File](#) [Monitor Upload Status](#)

Create your inventory file template
You can now generate customised inventory templates specific to the type of products you sell.

Key Benefits:
-List information for different types of products across multiple categories in one template
-Pick and choose what information to include in your template, specific to your business needs

You need to obtain approval from Amazon to list in [certain product categories](#). To apply for approval for a particular category, click the corresponding link and follow the instructions to submit your application.

In Step 1, select the types of products you want to sell by choosing their categories and subcategories.

Step 1: Select the types of products you want to sell

Search tool: [Search](#) [Clear Search](#) [What is a product type?](#) [Variation Wizard](#)

OR

Product Classifier:

Arts & Crafts	>	
Artykuły dla zwierząt	>	
Artykuły papiernicze i biurowe	>	
Dom i kuchnia	>	
Elektronika	>	
Gry wideo	>	
Instrumenty muzyczne	>	
Książki	>	

In Step 2, choose the marketplaces on which you would like to offer your products.

Step 2: Select marketplaces

Select from your available marketplaces below. Selecting additional marketplaces will add offer data columns such as price for each. Product data you provide will apply to the listing in the marketplace in which you submit your template. If a detail page for your listing does not yet exist in the other marketplaces, Amazon will attempt to translate and create it automatically, which can take up to 48 hours. If you use Build International Listings, please review your connection settings as they may overwrite selections made in individual file uploads.

- Europe
 - Amazon.pl
 - Amazon.co.uk
 - Amazon.de
 - Amazon.fr
 - Amazon.it
 - Amazon.es
 - Amazon.nl
 - Amazon.se

In Step 3, select the type of file you wish to use. Since each type of product has different detail information, you can choose an "Advanced" option if you need all attributes groups, or a "Custom" one if you wish to manually select the attributes that are most adequate for your products. Next, click on "Generate Template".

Step 3: Select the type of template

Please select a mode

Advanced Custom

The Advanced option contains **all** attributes groups associated with the above selected products. This option includes "Required", "Preferred" and "Optional" attribute groups.

Once you have located and generated the inventory template you need, and you have filled it in, you can upload it via “Upload your Inventory File”.

2.3 Products Requiring Approval

We want customers to be able to shop with confidence on Amazon. The products you offer for sale on Amazon must comply with your seller agreements, including all applicable Amazon policies, and all applicable laws and regulations. The sale of illegal, unsafe or other restricted products listed on Amazon pages, including products available only on prescription, is strictly prohibited. Before listing products on Amazon, please ensure that you understand what is and is not allowed by reading your seller agreements and a more extensive list of related policies in your Seller Central account. For more information, click [here](#).

For certain products and categories, sellers are required to obtain approval from Amazon before listing. To check if a product has restrictions, click on "Request approval" to go to the Selling applications tool.

Sony Alpha 7 R II | Pełnoklatkowy aparat bezlusterkowy (42,4 MP, szybki system AF, 5-osiowa optyczna stabilizacja obrazu w korpusie, 4K HLG) EAN: 4548736017719 Offers: 1 Used & New

Apply to sell
Show limitations ▾

Selling Application

You need approval to sell:

- Other Sony branded products in New, Used, Refurbished, Collectible conditions

[Request approval](#)

However, we are not accepting applications to sell:

- products in the Camera category in Used, Refurbished, Collectible conditions

You will be then required to submit specific documentation. Documents are now accepted also in Polish.

Pay close attention to what documents are needed and what requirements they must meet.

Selling application for Brand

You are requesting approval to sell Sony brand items.

Submit documents

Select one of the document types below:

- At least 1 purchase invoice for products from a manufacturer or distributor
- 1 letter from Sony authorising you to sell their products

Provide your contact information

E-mail addresses Best e-mail to contact you for questions

Use comma to separate addresses

Optional **Phone** Best number to call you for questions

[Save draft](#)

[Submit](#)

2.4 Request a GTIN Exemption

You must have Global Trade Item Numbers (GTIN) such as UPC, EAN, JAN or ISBN for products that you want to list on Amazon. If your products do not have a GTIN, you can submit a request for GTIN exemption. There are specific criteria you will need to meet in order to obtain approval. The below Seller Central form enables you to request a GTIN exemption and check its status.

For non-branded products, enter "Generic" in the "Brand/Publisher" box.

Apply for GTIN exemption

You need to share the barcode number (GTIN/UPC/EAN/JAN/ISBN) for the products that you want to sell on Amazon. If your product does not have a barcode, apply for exemption below.

Note: Exemption is provided for brand and category and you do not have to apply for exemption for each product. You will be able to add as many of your products on Amazon without applying for exemption again for that brand and category.

Product category *

E.g. Electronics

Brand/Publisher *

For unbranded items or bundles, enter "Generic"

For unbranded items or bundles, enter "Generic"

For unbranded items or bundles, enter "Generic"

[+ Add Category](#) [+ Add brand](#)

If you own a brand, you have two options:

- 1) You can register your brand and take advantage of [Amazon Brand Registry](#) benefits
- 2) You can request an exemption for your own-brand product. How do I do this? Find out using the instructions below.

2.4.1 How do I request an exemption for an own-brand product?

1. Apply for a GTIN exemption ([the form can be found here](#))
2. Include the GTIN exemption authorisation for the brand (example below)
3. Wait for Seller Support response (up to 24 h)
4. Enter in "Your Cases and Requests Log" ("Help" → "Case Log")

5. Open the message from Support and respond to it by adding photos of your product (including logo).

Note: Print and sign this form, then send it back as a scanned PDF or photo.

Statement regarding GTIN exemption for the brand

Acting on behalf of the brand rights owner as indicated below, I hereby confirm that the products with the trade name specified below do not have a GTIN (UPC, EAN or JAN) number. The seller indicated below is authorised to sell these products on Amazon.

BRAND RIGHTS OWNER CONTACT DETAILS:
Name of contact person:
Role of contact person:
Contact person's email:
Contact person's phone number:

SIGNATURE OF THE PERSON AUTHORISED TO REPRESENT THE BRAND RIGHTS OWNER*: _____

DATE AND LOCATION: _____

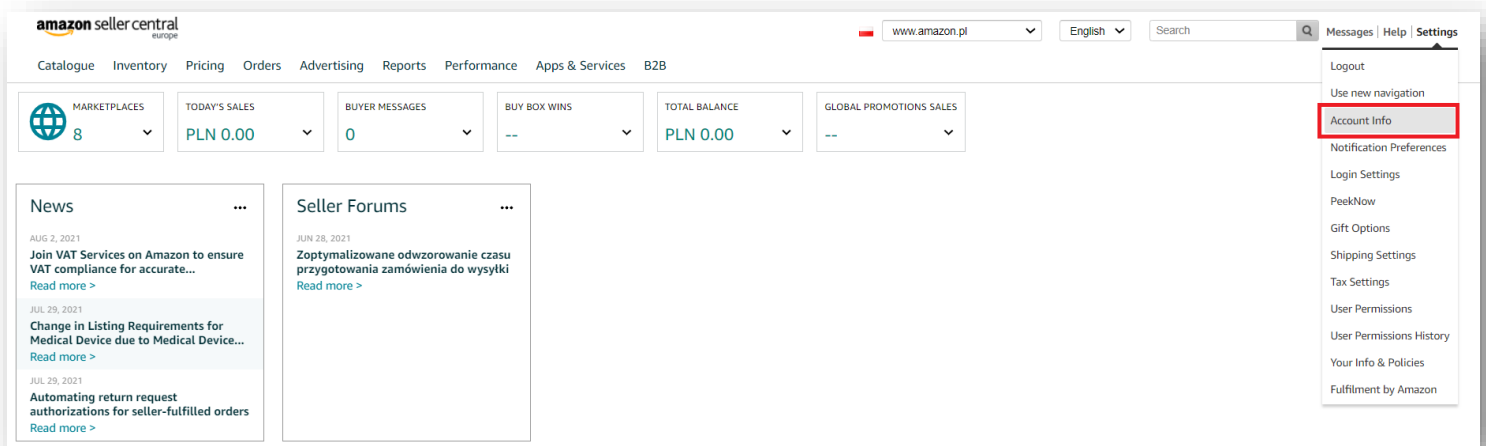

* if the document is signed by a person authorised to represent the entity on the basis of a separate document (e.g. power of attorney), such a document must also be attached to the letter.

2.5 Amazon Brand Registry

You can protect your registered trademarks through Amazon Brand Registry, creating a more accurate and trusted experience for customers. Amazon Brand Registry gives you access to powerful brand-management tools, including predictive automation based on your reports of suspected intellectual property rights violations, proprietary text and image search and increased authority over product listings with your brand name. You can learn more about it [here](#).

3 Modify Your Account Settings

You can manage your account information in Seller Central “Settings”. Click “Settings” in the upper-right corner, and then click “Account Info” to see details about your selling plan, your charge and deposit methods, your business and personal information, and your shipping configuration.

3.1 Add a Bank Account

In case you did not specify a deposit method during the registration process, you will then need to add your bank account details in order for Amazon to deposit money into your bank account when you sell. Payments cannot be made to a credit card or online payment system such as PayPal. Amazon uses electronic transfers to pay your sales proceeds to you.

At the end of each billing period (every 14 days), the amount of generated turnover will be transferred to your bank account, less subscription fees (PLN 165.91) and sales commissions. If the balance in your seller account is negative, your credit card will be charged.

More information about billing is available [here](#).

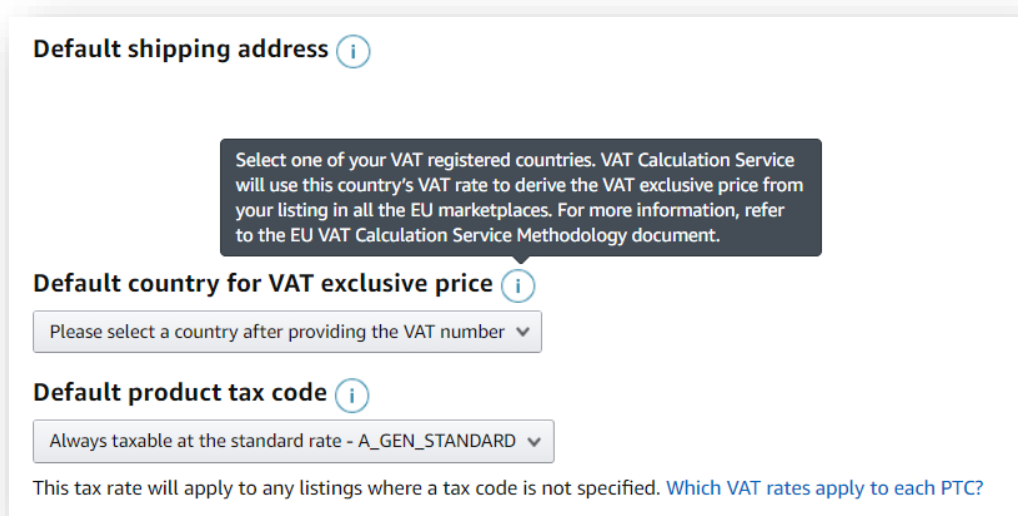

To add a bank account, go to “Payment Information” section and click on “Bank Account Information”. On this page, you will be able to add your bank account or multiple bank accounts to each individual European marketplace where you intend to sell.

Please note that disbursements can only be made in the local currency of the country where the bank account is located. For example, if your bank account is located in Poland, then disbursements can only be made in PLN even if your bank account is capable of accepting deposits in both PLN and EUR currencies.

3.2 Add a VAT number and set up free invoicing

If you pay VAT, be sure to set up your tax settings correctly. Enter "Settings" in the upper right corner and go to your account information ("Account Info"). At the bottom of the page, you'll find a section on tax information. Click "VAT/GST Number" to add all the VAT/GST registration numbers you have.

VAT payers can opt for free automatic invoicing of orders across all of Amazon's European services. To set up free invoicing, complete the information on the "VAT calculation settings" page. If you are unsure of what information to provide, hover over the "i" icon and view detailed instructions. By activating the free invoicing service, Amazon will generate VAT invoices on your behalf. Both you and your customers will be able to download them.

Default shipping address ⓘ

Select one of your VAT registered countries. VAT Calculation Service will use this country's VAT rate to derive the VAT exclusive price from your listing in all the EU marketplaces. For more information, refer to the EU VAT Calculation Service Methodology document.

Default country for VAT exclusive price ⓘ

Please select a country after providing the VAT number ▼

Default product tax code ⓘ

Always taxable at the standard rate - A_GEN_STANDARD ▼

This tax rate will apply to any listings where a tax code is not specified. [Which VAT rates apply to each PTC?](#)

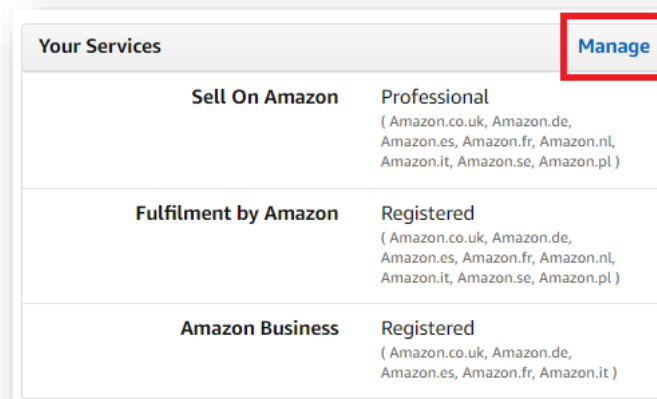

If you use Amazon Business (the marketplace for business customers), your listings will show VAT-free prices. Details on VAT calculation can be found [here](#).

3.3 Display Your Store Details

On the Account Info page, Business Information section, you can click on "Display name" to configure your store name and logo, and customer service details to buyers. You also have the opportunity to customize these details per EU marketplace.

3.4 Change Your Selling Plan

You have the option to modify your selling plan at any time after completing registration. To switch your selling plan, locate "Your Services" at the bottom left of the Account Info page and select "Manage". You will then see your current Sell on Amazon selling plan (Professional or Individual) and can decide whether to upgrade or downgrade. In Your Services page, you will also be able to see other Amazon Services, such as VAT Services on Amazon, and configure the subscription to these services.

3.5 International VAT

- If you sell or store your goods in another European Union country, as a rule, you must register your VAT number there — unless the total value of your sales to that country in the tax year does not exceed the established threshold (please see details in the table below).

For further information, consult your financial advisor.

VAT limits in European Union countries:

COUNTRY	DOMESTIC SALES	INTERNATIONAL SALES
UK	GBP 85,000	GBP 70,000
DE	EUR 22,000	EUR 100,000
FR	EUR 82,800	EUR 35,000
IT	EUR 65,000	EUR 35,000
ES	No limit	EUR 35,000
PL	PLN 200,000	PLN 160,000
CZ	CZK 1,000,000	CZK 1,140,000
NL	No limit	EUR 100,000

Click [here](#) to take a free test that will help you determine if and in which countries you may be required to register for VAT. This test was created in collaboration with partners from KPMG, which is why the link leads to an external website.

3.5.1 Amazon VAT Services

Amazon VAT services are a convenient and cost-effective solution that will help you register and account for international VAT. **This service is free for the first year.** In subsequent years, the annual fee is EUR 400 per country. Learn more about VAT services [here](#).

3.6 Define Your Shipping Settings

You can make the delivery yourself, through a selected carrier, or you can outsource it to Amazon. This second option is called FBA (more info [here](#)).

If you choose to fulfil customer orders yourself, you are responsible for the delivery, customer service and returns experience you provide to Amazon customers. Your return policy should be at least as favourable as Amazon return policy. It is also important to configure your shipping settings for each marketplace in your Seller Central account ([return policy](#)).

3.6.1 Shipping Settings

Go to the Shipping and Returns Information section in the Account Info page and click on “Shipping Settings”.

Start by clicking “Create New Shipping Template” and specifying a template name. Shipping templates allow you to define your preferences in terms of the geographical regions you wish to ship to, the shipping times you offer for each of those, and your respective shipping rates. Then choose your rate model that can be either Per item/weight-based, or Price banded. You can also create shipping rules by region (national and international) according to your shipping options (standard delivery, express delivery, etc.). You can also edit a region (i.e. add or remove specific geographic areas). You can create up to 20 shipping templates.

Create a new delivery template [Take the tour](#)

Shipping Template Name:

Rate Model: **Per Item / Weight-Based**
[Learn more](#) Shipping rates are per item or per kilogram plus a fixed per shipment charge.

Price Banded
 Shipping rates are determined by the total amount of the order.

When you're done choosing your preferences, save the template. Then go to the "Inventory", "Manage Inventory", click on "Migrated Template" and select your delivery template.

<input type="checkbox"/>	Status	Image	SKU Condition	Product Name ASIN	Date Created Status Changed Date	Available	Estimated fee per unit sold	Price + Postage	Lowest Price + Postage	Save all
<input type="checkbox"/>	Active		New					zł	✓ Lowest	Edit

Migrated Template

If you do not assign products to another created template, all new listings will automatically be assigned to the default template ("Migrated Template").

3.6.2 Returns Settings

You can access your returns settings through the Shipping and Returns Information section on the Account Info page. Here you can define your general returns settings, such as authorizing requests and generating postage labels.

- Domestic returns

In the event that your return address is in the country where the refund originates, the cost of the return delivery is borne by the consumer (the returning party). However, this does not apply if the consumer receives goods that are damaged or do not match the product description. The detailed return policy can be found [here](#).

- International returns

In the event that your return address is in a country other than the customer's address, the cost of the refund is borne by the seller. In such a situation you can:

- 1) Refund the money without shipping the goods that the customer wants to return (for example, this may apply to product that are very expensive to transport),
- 2) Generate a prepaid return label with the option to track the delivery,
- 3) Provide a return address in the country of sale.

4 Fulfilment by Amazon (FBA)

With FBA, choose which products you want to send to our Fulfilment Centres and we will store your inventory, and pick, pack and ship it across Europe when customers order. Using this service means that you don't have to worry about logistics or storing your products — Amazon will do it for you. Amazon will also handle refunds and complaints on your behalf and provide customer service in the customer's own language.

With FBA, there are no minimum quantity requirements, setup charges or subscription fees. You only pay fulfilment and storage fees for the services you use.

4.1 Convert Your Listings to FBA

4.1.1 While Creating Listings

At the listing creation stage, you can choose whether you want to ship a product yourself or would prefer to have Amazon do it. Go to the "Inventory" tab → "Add a Product" and fill in the information about the product you want to add. Once the listing details are displayed, you can select "Amazon will dispatch and provide customer service" as Fulfilment Channel.

The screenshot shows a form for creating a listing on Amazon. The form includes the following fields and options:

- Seller SKU**: A text input field containing "101MyKolekcjonowania1". A lock icon is present on the right. Below the field, it says "Once submitted, this field cannot be changed".
- Condition**: A dropdown menu set to "New". A lock icon is present on the right. Below the field, it says "Once submitted, this field cannot be changed".
- Your price**: A text input field with "zł" on the left and "Ex: 50,00" inside. To the right, it says "Match lowest price: zł399,55".
- Fulfilment Channel**: A section with two radio button options:
 - I will ship this item myself (Merchant Fulfilled)
 - Amazon will dispatch and provide customer service (Fulfilled by Amazon)

Below the Fulfilment Channel options, there is a warning icon and text: "You have chosen to have Amazon fulfill orders for this item. Your item will be available for sale, when Amazon receives it. Fulfillment by Amazon fees will apply. [Learn More](#)".

At the bottom of the form, there is a checkbox labeled "Remember this setting for next time".

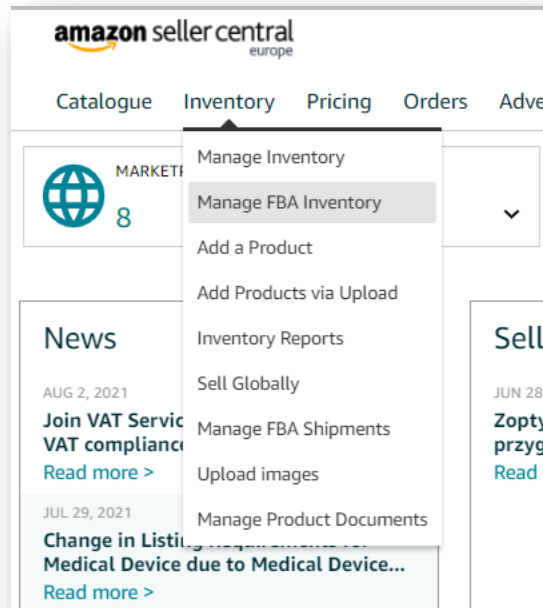

At the bottom right of the form, there are two buttons: "Cancel" and "Save and finish".

4.1.2 Once Your Listings Are Created

Alternatively, you may choose to ship any previously listed products using Fulfilment by Amazon. Start by going to your Seller Central homepage, and select “Manage Inventory” from the drop-down menu of the “Inventory” tab. From there, go to the product you want to ship using FBA and select “Edit > Convert to Fulfilled by Amazon”.

You will be able to manage all your FBA listings through the “Manage FBA Inventory” section of the “Inventory tab” in the main Seller Central navigation menu.

4.2 Create an Inbound Shipment

Before you send inventory to Amazon fulfilment centre, you need to create a delivery plan. On the “Manage FBA Inventory” page, select each product you want to send to Amazon, and then select “Send/Replenish Inventory”.

The screenshot shows the Amazon Manage FBA Inventory interface. At the top, there are filters for Listing Status (All, Active, Inactive, Incomplete, Listing removed) and an 'Additional filters' dropdown. Below this is a table with columns: Status, Image, SKU Condition, Product Name ASIN, Date Created / Status Changed Date, FNSKU, Price + Postage, Inbound, Available, Unfulfillable, Reserved, Estimated fee per unit sold, and a 'Save all' button. Five rows of 'Active' products with 'New' condition are listed. A context menu is open on the right side of the table, listing actions such as 'Edit', 'Manage Images', 'Copy listing', 'Add another condition', 'Change to Fulfilled by Merchant', 'Send/Replenish inventory' (highlighted with a red box), 'Set Replenishment Alerts', 'Create removal order', 'Create fulfilment order', 'Print item labels', 'Close Listing', and 'Delete product and listing'.

On the next page, you will be able to create a delivery plan in a few simple steps.

The screenshot shows the 'Send to Amazon' page, Step 1: Choose inventory to send. The page has a breadcrumb trail: 'Send to Amazon | Find out more | View intro | Shipping Queue | Inbound performance summary'. There are links for 'Current workflow', 'Active workflows', and 'Start new'. Below the breadcrumb, there are tabs for 'All FBA SKUs', 'Pre-selected SKUs (1)', and 'SKUs ready to send (0)'. The main content area is divided into sections: 'Ship from' with a 'Marketplace destination' dropdown set to 'Poland'; 'SKU details' with 'Display preferences'; 'Packing details' with a dropdown and a warning icon; 'Information/action' with a warning message: 'Data is missing for ASIN weight, dimensions or both. Please provide the missing data.'; and 'Quantity to send' with 'Boxes' and 'Units' input fields. At the bottom, there is a 'Confirm and continue' button and a progress indicator showing '1' of 3 steps.

4.2.1 Step 1 — Choose inventory to send

This tab provides information about the first step of creating a delivery using the Send to Amazon service, including how to set up procedures, add packaging that contains individual SKUs and individual units, and create bulk packaging templates.

First, set up the procedure correctly. Select “**Ship from**”. This is the address from which you will send inventories. The address of your last delivery will be displayed by default. Select a value in the “**Marketplace destination**” field. This is an Amazon service where your inventory will be sent.

Step 1 - Choose inventory to send Your feedback is important 🗣️ | Need help?

All FBA SKUs **Pre-selected SKUs (1)** SKUs ready to send (0)

Ship from **Marketplace destination**

Next, select inventories to send. You can add inventory that you want to send to the logistics centres in two ways:

- as packages containing individual SKUs or packages with identical products
- as single units.

SKU details Display preferences	Packing details	Information/action	Quantity to send
	Individual units Individual units Create new case pack template	No labelling required Prep not required	Boxes: - Units: <input type="text"/>

Any product sent to the logistics centre should have a barcode. The FBA uses barcodes to identify and track inventories throughout the implementation process. More information can be found [here](#).

After you have added all the inventories you want to send and verified the packing, preparation and labelling details, go to the next step by clicking "Confirm and continue".

4.2.2 Step 2 — Confirm Delivery

After selecting SKU codes and confirming the number of each SKU for delivery, you can go to Step 2 in the Send to Amazon — Confirm Delivery procedure.

This page provides information on viewing the delivery, setting the delivery date and method for small packages and pallet deliveries.

When you create a delivery, make sure that the correct shipping method and the correct delivery address are selected. If you send a delivery by a method other than the selected one, the delivery may encounter problems when the carrier requests a delivery date. It can also be rejected on delivery.

More information on this step can be found [here](#).

4.2.3 Step 3 — Print Packaging Labels

After confirming the delivery in step 2, you can print labels for each package. This page provides information on how to print and place labels on packages for both small packages and pallet deliveries.

Each product that you send to Amazon Fulfilment Centres requires a label. Be sure to put the right label on your packaging to avoid unnecessary delays when we get your stock.

More information on this step can be found [here](#).

4.2.4 Step 4 — Confirm carrier and pallet information (for pallet deliveries only)

If you ship inventory on pallets, you must confirm the carrier and pallet information after printing and affixing the labels to the packages. In step 4, you will choose a carrier to send pallets to Amazon.

More information on this step can be found [here](#).

4.2.5 Shipping Queue

To monitor the status of your deliveries, click "Go to Shipping Queue" at the bottom of the page.

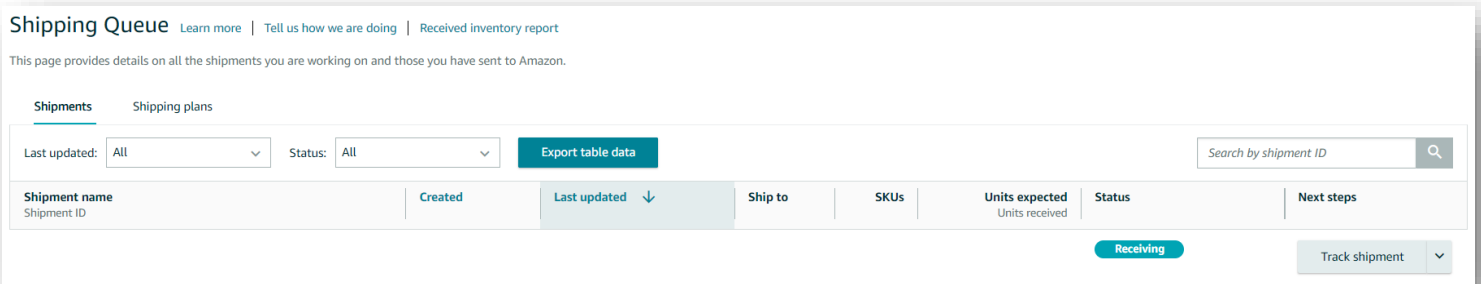

Or you can go into the "Shipping Queue" tab directly in the top panel.

Here, you can view products and quantities, track deliveries (where appropriate) and watch the progress of your products as they are picked up at Amazon's logistics centre.

Monitor the status of your delivery. When it changes to "Closed", it means that the delivery has been accepted by the logistics centre and requires no further action.

4.3 FBA Inventory Removal

You can request inventory you have stored in Amazon's Fulfilment Centres to be returned to you or disposed of. In that case, you will need to request a removal order (return or disposal) of product units via Seller Central. Removal fees are charged per item removed.

4.4 EU FBA Programs

4.4.1 European Fulfilment Network (EFN)

European Fulfilment Network enables retailers with an Amazon account and using FBA to store their products in a local logistics centre and to fulfil orders placed by consumers on other European services.

It is possible when your listings have been uploaded to each EU marketplace with the same SKU, and have been converted to FBA in each marketplace. With EFN, you ship your inventory to a Fulfilment Centre in the country of your home marketplace, and you pay FBA fees for in-country deliveries and EFN fees for cross-border EU marketplace deliveries.

More information about the EFN program can be found [here](#).

4.4.4 Multi-Country Inventory (MCI)

You can also ship your FBA inventory to Amazon Fulfilment Centres in multiple countries across Europe. Thanks to this:

- You will get their deliveries faster (by local carriers)
- Your listings will then qualify for accelerated shipping options including Amazon Prime 1-Day Delivery, FREE Delivery and Next-Day Delivery (where available),
- You will save on transportation costs when you send inventory in bulk to local Fulfilment Centres rather than shipping individual orders across borders.

More information about the MCI program can be found [here](#).

4.4.5 Pan-European Fulfilment by Amazon (PAN-EU FBA)

The Pan-European (Pan-EU) program allows you to fulfil offers on all European marketplaces from one inventory pool without incurring fulfilment fees for cross-border shipping. Amazon will locate your inventory at selected logistics centres across Europe (Germany, France, Italy, Spain, Poland and the Czech Republic) to ensure the best possible distribution. As the UK is no longer part of the European Union, it is not included in the Pan-EU program.

[Learn more](#) about the benefits that the Pan-EU program provides.

Details of the program can be found [here](#).

5 Appendix A: Selling in Europe

5.1 European Tax (VAT)

VAT (Value Added Tax) is a tax on consumer expenditure collected on business transactions, imports and goods that move between EU countries. Whilst each Amazon seller is solely responsible for making sure that they are VAT compliant, Amazon can provide resources such as [EU VAT Education](#) or [Amazon's VAT Knowledge Center](#).

Note it is also important to provide your tax registration number(s) associated with your business, since they will be used to determine the tax to be applied on your seller fees. This can be done via Settings / Account Info / Tax Information in your Seller Central account.

5.2 EU Regulatory Considerations

Your products, listings and offers must comply with all European laws and regulations.

For example, countries in Europe use different types of plugs. In addition, products you import into Europe might work on a different voltage. It is your responsibility to ensure you comply with the regulations on plugs and voltage in any European member state in which you list your products so that your customers are able to safely use your products.

Your Seller Central account provides information on European customs, commercial invoicing, intellectual property rights, parallel imports, CE marking and labels, EU environmental, health and safety regulations including Product Compliance as well as consumer rights in Europe. All you need to do is use your search browser at the top of the page.

5.3 Build International Listings (BIL)

When you register an Amazon EU Seller Central account, you are automatically enabled to sell on all five Amazon's EU marketplaces.

The [Build International Listings \(BIL\)](#) tool allows you to issue a listing across other services. Your product will be identified across other services based on its Amazon Standard Identification Number (ASIN).

To access BIL, select "Sell Globally" from the Inventory section of your Seller Central navigation menu, and then select "Build International Listings".

The screenshot shows the Amazon Seller Central interface. At the top, there is a navigation bar with links: Catalogue, Inventory, Pricing, Orders, Advertising, Reports, Performance, Apps & Services, and B2B. Below this is a sub-navigation bar with links: Sell Globally, Understand the basics, Build International Listings (highlighted with a red box), and Find a Provider. The main heading is "Sell Globally" with sub-links: Take a tour, Learn more, and Rate this page. The main content area starts with a paragraph: "With Amazon Global Selling, you can reach hundreds of millions of new customers. List and sell your products on any of our marketplaces in North America, Europe, Asia-Pacific, Middle East and North Africa. Use the tabs below to help you get started. Note: The FBA Export programme enables international customers to order FBA products on Amazon and have them shipped to their international address. [Learn more](#)". Below this is a horizontal tabbed interface with four tabs: Americas, Europe (selected with a green checkmark), Asia-Pacific, and Middle East and North Africa. Under the "Europe" tab, it says "Amazon can help you sell in UK, Germany, France, Italy, Spain, Netherlands, Sweden, Poland". Below this text are eight small flag icons representing the countries: UK, Germany, France, Italy, Spain, Netherlands, Sweden, and Poland. At the bottom, there is a "Next steps" section with three bullet points: "To add your existing listings to another European marketplace, create a connection using [Build International Listings](#).", "To create new listings for unique items, use the [Add a Product](#) page.", and "To comply with your European VAT obligations, [review and complete your Tax settings](#)." A final note says "To stay informed of changes related to Brexit, visit the [Prepare your Amazon Business for Brexit](#) help page."

5.3.1 Select Your Source Marketplace

Now, you will need to select your source marketplace. If you currently only sell in one marketplace, that will be your source marketplace. If you sell in multiple marketplaces, choose the marketplace where you list the majority of your products to be your source marketplace.

Choose your source marketplace:

Tip: Select your marketplace with the most offers, which is likely to increase the number of offers connected in target marketplaces.

 Amazon.pl

0 total offers (Not all offers will be eligible in all marketplaces)

Choose your target marketplaces.

Europe

-  Amazon.co.uk
-  Amazon.de
-  Amazon.fr
-  Amazon.it
-  Amazon.es
-  Amazon.nl
-  Amazon.se

5.3.2 Select listings

Select the type of listings. By clicking the "Change offers" button, you can select the delivery method (independently or FBA) and product status (new or used) or indicate the specific products you want to sync.

Select offers to replicate in the target marketplaces.

Offers can only be created when an ASIN already exists in the target marketplaces. [Learn more about offer eligibility](#)

Region	Target marketplace	Offers selected
Europe	 Amazon.co.uk	All offers

You can change the offers that you want to replicate in the target marketplaces by setting rules or selecting specific SKUs.

5.3.3 Define price rules

Price rules and a currency exchange rate converter will help you adjust the prices of your products to the functionalities of a given site.

Define marketplace-price rules [How to price globally?](#)

Target marketplace price = (source price + price rule amount) x (currency exchange rate)

Example: For a target marketplace, you have a source price of 10, and define the price rule as 5% below the source price.

The currency exchange rate is 1 = 1.20

Target marketplace price = $(10 + (-5\% \times 10)) \times 1.20 = 11.40$

Apply same rules by region

Region	Target marketplace	Price synchronisation	Price rule
Europe	 Amazon.co.uk Applied currency exchange rate* 1 PLN = 0.187 GBP	<input checked="" type="radio"/> List Price and Sale price <input type="radio"/> List price only	FBA Same as the source marketplace, adjust for taxes and fees Adjust for estimated VAT, currency and fulfilment-fee differences between source and target marketplaces. Learn more Self-fulfilled Same as the source marketplace

*Please note that we cannot guarantee the accuracy of the currency exchange rate shown here.

Save and continue

6 Appendix B: Tips for Success

6.1 Create Quality Listings

When shopping on Amazon, customers discover and learn about your products from the Product Detail Page. If the Product Detail Page is incomplete or incorrect, it can be difficult for customers to find your product or it can impact your seller feedback and sales.

High-quality Detail Pages can help you build and manage your brand image on Amazon. They require good product titles, white-background product-only images – clearly identifying what is being sold, brief descriptive bullet points that summarize specific details of the product, and an extensive and well-structured product description – providing detailed product information. Additionally, make your products easy to find by classifying them accurately when listing them as well as by assigning key Search Keywords to them.

6.2 Price Competitively

The Buy Box is the box on a Product Detail Page where customers begin their purchasing process by adding items to their shopping cart. You have higher chances of becoming eligible to win the Buy Box by pricing your items competitively.

Since customers trust that they will find low prices on Amazon, we suggest that you search for other products and offers before deciding on the price. Competitive pricing is one of the key elements that helps you generate more sales. Amazon offers multiple tools that can help you manage your prices, such as pricing notifications or [rules](#).

6.3 Promote Your Products

Sponsored Products is a pay-per-click advertising solution for brand owners to promote their products with targeted ads. Sponsored Products helps customers discover your products by giving you the opportunity to display your listings on the first page of search results, helping increasing your sales.

Getting started with Sponsored Products is simple. Choose the products to advertise, decide how much to spend, and launch your first campaign within minutes.

Sponsored Products campaigns can be set up through the Advertising / Campaign Manager functionality in your Seller Central account for the Amazon stores in UK, Germany, France, Spain, Italy and the Netherlands..

You can find more information on sponsored products [here](#).

6.4 Ship Your Orders Promptly

We recommend you checking for orders daily in Seller Central. Under the Orders tab in your Seller Central account, you can view and manage the self-fulfilled orders you receive while setting up automatic order reports. This account section also enables you to manage customer order returns. Customers who submit orders for products that turn out not to be in stock are likely to leave negative feedback. This is why we recommend you to regularly keep an eye on the quantity of inventory you have in stock, especially if you sell through multiple channels. If you get into the situation of getting a customer order for an item out of stock, the best thing to do is to inform your customer promptly and, if appropriate, offer to compensate them for the inconvenience.

6.5 Monitor Your Performance

We strongly encourage you to monitor your performance regularly on the Performance section of your Seller Central account. This section provides data on all of your performance metrics as a seller so you can easily see if you are meeting our customer satisfaction targets. Detailed information can be found under the „[Account Health](#)“ tab and “[Performance Notifications](#)”.

Customers pay close attention to seller ratings and so does Amazon. The [A-to-Z Guarantee](#) is designed to handle situations where a customer either never received a product or received a product that differs from what the customer ordered or expected.

In order to avoid claims and chargebacks, follow best practices such as describing products accurately, responding promptly to customer emails, shipping with care while confirming shipments with tracking information for self-fulfilled orders, and refunding customers proactively as needed.

7 Appendix C: Learning Resources

7.1 Seller Central Help

A good place to continue learning more about all the features your Seller Central account offers is the „[Help](#)” section in the upper right corner of the navigation menu. Take time to examine all the content this section provides in order to make optimal use of your Amazon selling account.

7.2 Seller University

[Seller University](#) helps you gain detailed insight into Selling on Amazon and other Amazon Services such as Fulfilment by Amazon. Simply log into Seller Central with the email address and password associated to your account, and pick a course to get started.

7.3 Seller Forums

Discuss selling on Amazon with fellow sellers on our [Seller Forums](#). If you are new to the forums, please make sure you review forums guidelines and help content to learn more about participating in discussions.

7.4 Selling Partner Support

If you still have questions regarding Selling on Amazon, Fulfilment by Amazon or other inquiries related to your account, you can contact our [Seller Support](#) team via chat, email or phone.
