

Cut Turn Times and Production Costs

Produce faster, more accurate impositions that maximize press sheet usage and boost productivity.

Imposition is at the heart of production costs, affecting throughput, material usage and labor. KODAK PREPS Imposition Software helps you take control of this critical step, saving time, controlling costs and improving productivity. With an intuitive interface, a comprehensive suite of powerful features optimized for commercial, publication and package printing, and a broad range of JDF functionality, PREPS Software has become one of the most widely used tools in today's printing industry.

Reduce costs

Template-based impositions eliminate opportunities for error and waste for both new and repetitive jobs, enabling you to tightly control both substrate and labor costs.

Accelerate cycle times

Leverage a library of templates to save time and create efficiencies, and minimize manual steps with a host of smart automation features, custom fold patterns and shingling and bottling rule management.

Improve accuracy

The world's leading imposition software eliminates opportunity for error, driving improved accuracy and faster turnaround time.

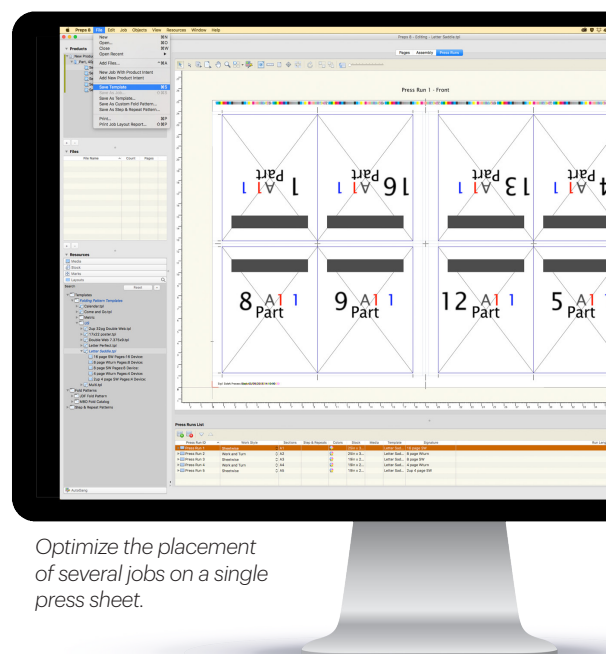

Increase productivity

Produce more jobs faster with reusable job templates, automatic adjustments on the fly from job to job, and features that maximize press sheet usage based on signature plans and job intent.

Expand your business

Layouts for both offset and digital label jobs can be easily handled in PREPS Software. If you are expanding into the packaging market, consider KODAK PANDORA Step-and-Repeat Software: it is specifically designed to automate layout creation for any type of packaging.

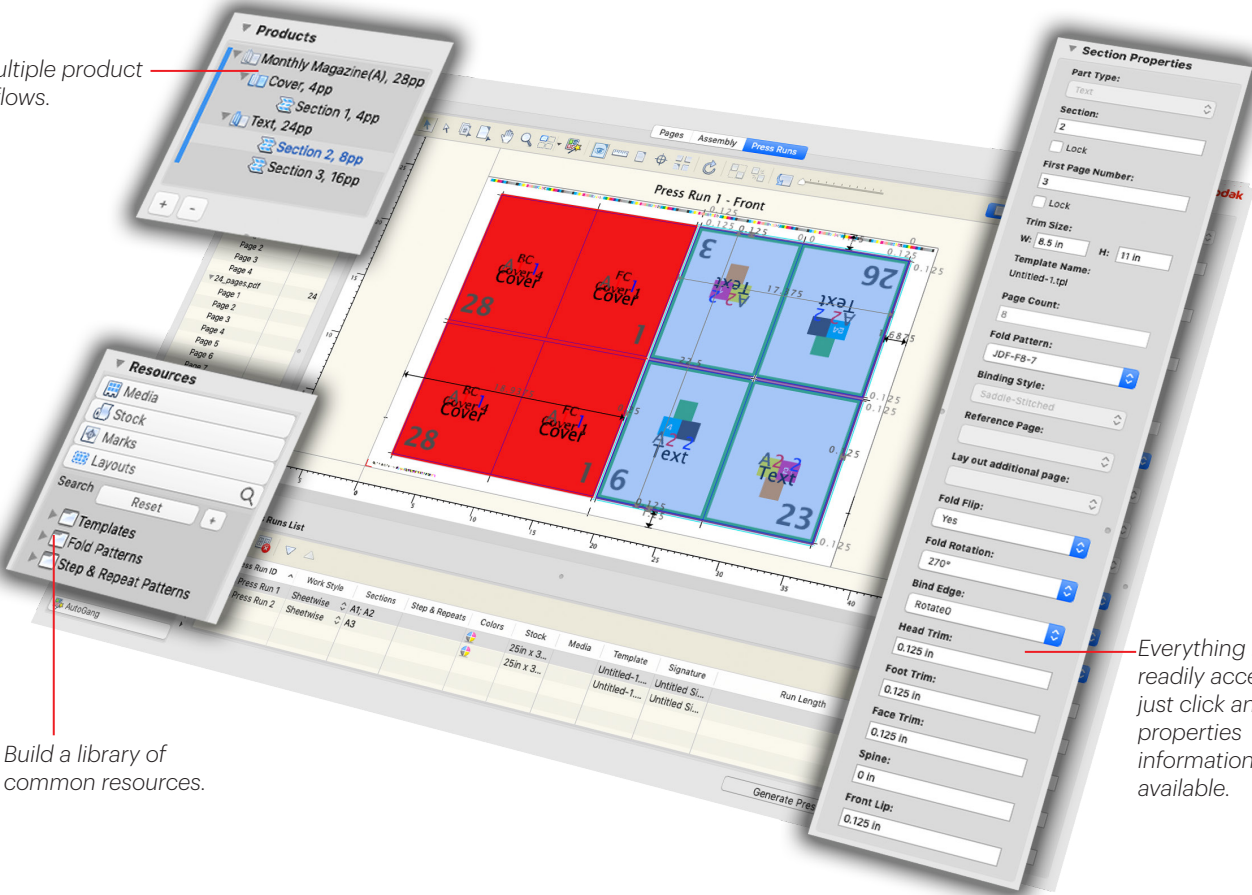

Optimize the placement of several jobs on a single press sheet.

Use “Generate Press Runs” to optimize press sheets based on job intent and signature plans.

Support for multiple product and part workflows.

Build a library of common resources.

Everything is readily accessible; just click and properties information is available.

KODAK PREPS IMPOSITION SOFTWARE

Operating system	WINDOWS or MAC
Key features	• Integrated Workflow • Intelligent Smart Marks • Job Template Support
Optional add-ons: Dynamic Print Planning	Radically optimize print planning and print more, spend less. Dynamic Print Planning allows you to: 1. Efficiently manufacture products that share similar production attributes within a given time window. • Due date and time • Plate type • Printing press • Colors (Inks or Coatings) • Substrate • Cutting equipment 2. Automate creation of the manufacturing plan and create a cost optimized set of print-ready production layouts 3. Seamlessly integrate with your PREPS & PRINERGY Workflow.
