

Visual Tagging Solutions

Immediate asset identification

Visual Tagging Solutions

Safety. Maintenance. Identification.

Think about any item of equipment on your site:

- How do you know it is fit for use?
- When was it last inspected?
- How do you identify it among the hundreds of similar items?

Without the latest information, people are prone to make assumptions. Assumptions can lead to potentially damaging decisions for both them and your business. The identity, maintenance and inspection status of equipment is therefore critical.

What are visual tags?

Visual tags help:

- Communicate the latest equipment inspection and test status clearly at the point of use
- Record an audit trail of recent equipment maintenance, tests and inspections
- Uniquely identify equipment
- Comply with Health and Safety Legislation
- Reduce accidents in the work place

We can help you with Visual Tagging for Work at Height, Plant, Vehicles, Machinery & Tools, Workspace Control and Process & Pipelines.

In fact! Whatever your equipment – we can tag it!

Visual Tagging Solutions

Holder and Insert System

Our visual tags typically comprise of two components:

Holder

Attaches to the equipment being tagged.

Insert

Placed in the holder and used to record and display the latest equipment status.

Holder and Insert Work Together in a Looped Process

1 Attach

The empty holder displays 'DO NOT USE SCAFFOLD' symbol and is attached to equipment.

2 Inspect

Equipment is inspected periodically, as deemed appropriate by risk assessment, and the results recorded on the insert.

3 Insert

If the equipment passes inspection then the insert is placed in the holder, displaying the latest equipment information to any users. If equipment fails inspection at any point, then simply remove the insert from the holder to display the 'DO NOT USE...' sign.

Attachment Methods

Magnetic Strip

Adhesive Strip

Split Ring

Hang Loop

Cable Ties

Stop

Fully recyclable resources

Scafftag's Visual Tagging inserts for equipment inspection management and 99% of the holders are fully recyclable. We are proud to do our part in protecting our planet's valuable resources.

The materials used in your holders and inserts lose only 1-2% of their physical properties when first recycled. They are reused to make parts for burglar alarms, switch cases, window lock systems, lift gibs and wheels.

Customisation

Customise your Visual Tagging

We can custom design Visual Tagging Solutions to help you manage virtually any issue and fit seamlessly with your business and systems. A wide range of customisation options are available including:

- Tag size and shape
- Data to be displayed/recorded
- Visual design including logo, colours and fonts to reflect corporate branding
- Adapt to site requirements e.g. metal strips for magnetic detection in food plants
- Attachment methods e.g. cable tie, split ring, magnetic, adhesive

A Library of Ideas

We have thousands of designs developed for other clients offering unique solutions which may be of interest to your business.

We do not charge any consultancy fees for working with you to develop your customised design. All you pay is a one off artwork set up charge with your first order. You can then reorder paying the price of the standard insert and when you reprint your bespoke insert, the artwork fee is never reapplied unless you amend your design.

So whatever your issue, contact us for a no-obligation solution.

1 Fork/Pallet Truck Inspection Checklist

An inspection checklist spanning a range of Fork/Pallet trucks, utilised on one insert. Easily identify which checks are applicable for which asset, all branded in line with corporate colours.

2 Machinery and Guard Pre-use Inspections

Clear and concise pre-use inspections to be carried out - with 32 inspection boxes on the reverse. Space left for unique checks on each machine to be added.

3 Colour Coded Safety System

A custom designed colour coded system indicating a safe working period on site. Prominent use of your logo enforces the concept that the safe working policy originates with the company itself and not a third party.

4 Bilingual Tags for the Chemical, Oil and Gas Industry

Request a sample tag

Customise your tag

Full colour printing

We have the capacity to digitally print full colour images and photographs on our polypropylene insert materials, whether you require individualised tags identifying members of staff, machinery and equipment, or sequentially numbered and coded to comply with an auditing system.

For more information on creating unique custom tagging systems or simply adding more colour to your tags with digital printing, please contact Customer Services:

Tel: +44 (0)845 089 4060

Email: customer.services@scafftag.com

Personalise your Visual Tagging Solution

Scafftag's personalisation service allows you to add your company logo to our range of standard visual tags, while the design of the tagging system remains unchanged.

Logo printed on holder hang loop

Logo printed at the top of holder body

Logo printed on white strip at head of insert

Add your logo to:

- Our standard inserts - most of our inserts are designed with a white band ready to accommodate your branding
- To the holder - Typically printed at the top of the holders main body
- The upper curve of the holders hang loop where applicable.

▶ How Do you Get your Artwork Personalised?

A logo needs to be supplied in the correct file format and suitable quality for artwork personalisation. Ideally all logos will be supplied in vector format and any colours e.g. Pantone references, need to be specified.

Colour Information

When sending your artwork files, you will also need to supply the correct colour information for your product. Please indicate the PMS (Pantone Matching System) colour required, but if in doubt this can be discussed with our artwork department beforehand.

Image Resolution

We require high quality black and white line artwork, printed at a minimum of 300 dpi, must be 100% of the actual imprint size. Artwork must have crisp, sharp edges and needs no further touch up. Some thin lines, small copy and reverses may not reproduce as submitted and may need to be altered to print clearly.

PLEASE DO NOT SUPPLY EITHER SCANNED OR IMAGES WHICH HAVE BEEN PLACED IN OTHER DOCUMENTS SUCH AS WORD, POWERPOINT ETC.

General Information

Reduce the file size if possible, particularly if you plan to send the artwork by e-mail. Use one of the following programs to compress your file: WinZip, 7-Zip. Using compression software is essential when e-mailing vector graphics (AI, EPS, CDR).

WE REQUIRE ALL VECTOR GRAPHICS/PHOTOSHOP DOCUMENTS TO BE SAVED IN ADOBE CREATIVE SUITE VERSION 3 (CS3) FORMAT. ALL CORELDRAW DOCUMENTS NEED TO BE SAVED AS SINGLE PAGES. ALL EPS FILES NEED TO BE SAVED IN AN EDITABLE FORMAT.

Plant, Vehicles, Machinery and Tools

Forkliftag®

Forklift inspection system to help control pre-shift inspections, maintenance and identification of forklift trucks.

- Easy-to-follow pre-use operator checklist
- Record up to 42 daily inspections
- Attach to forklift by cable tie or adhesive

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip, Magnetic Strip

Insert

- Dimensions: 193mm (height) x 144mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Combi-tag

Combilift inspection system provides you with all the tools you need to inspect, maintain and identify your combilift, improving safety in the workplace. Ensure all important inspection information is clearly displayed in a prominent position on the combilift.

Use the Combi-tag inspection insert to help control pre-use checks, inspections, maintenance and identification. The insert contains an easy-to-follow pre-use operator checklist on the front and the facility to record up to 32 inspections on the reverse.

- Ease of use and visibility ensures daily inspections are carried out
- Remove the insert and the holder alone puts the combilift immediately into prohibition with an "Inspection Required" status
- Holder is permanently attached to the combilift in a prominent position with either a cable tie, adhesive, screw or rivet

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip, Magnetic Strip

Insert

Cherry Picker-tag

Purpose designed status tagging system to help control frequent inspections, maintenance and identification of your Cherry Picker a MEWP variant (Mobile Elevating Work Platforms).

Helps you to comply with legislative requirements and good practices of:

- Completing a pre-work inspection before each use of the equipment and ensuring this is recorded
- Inspecting and maintaining equipment at suitable periods as deemed appropriate by a risk assessment
- Ensuring employees are informed if equipment is not safe to use

Holder

- Dimensions: 260mm (height) x 153mm (width)

Plant, Vehicles, Machinery and Tools

Tractor-tag

Give your employees the tools they need to identify, maintain and inspect tractors, improving safety in the workplace. Ensure the equipment is instantly identifiable, the pre-use checks are clear and easily carried out.

Inserts have the facility to record up to 32 inspections, are weatherproof and robust.

- Holder is permanently attached to the tractor in prominent position with either cable tie, adhesive or rivet
- Remove the insert and the holder immediately specifies 'Inspection Required'

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip, Magnetic Strip

Insert

- Dimensions: 193mm (height) x 144mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Plant, Vehicles, Machinery and Tools

Vehicle-tag

Company used vehicles are working areas. As such, under the Provision and Use of Work Equipment Regulations 1998 (PUWER), it is important that company vehicles are maintained in an efficient state, good working order and in good repair.

Use the Vehicle-tag inspection insert to help control pre-use checks, inspections, maintenance and identification. The insert contains an easy-to-follow pre-use operator checklist on the front and the facility to record up to 32 inspections on the reverse.

- Help create and control pre-use inspections, maintenance and identification of vehicles
- Holder and insert are very flat and are easily stored in the side pocket or glove compartment
- Ease of use and visibility ensures daily inspections are carried out

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip, Magnetic Strip

Insert

- Dimensions: 193mm (height) x 144mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Van-tag

Company used vans are working areas. As such, under the Provision and Use of Work Equipment Regulations 1998 (PUWER), it is important that company vehicles are maintained in an efficient state, good working order and in good repair.

Use the Van-tag inspection insert to help control pre-use checks, inspections, maintenance and identification. The insert contains an easy-to-follow pre-use operator checklist on the front and the facility to record up to 32 inspections on the reverse.

- Help create and control pre-use inspections, maintenance and identification of vehicles
- Holder and insert are very flat and can easily store in the side pocket or glove compartment
- Ease of use and visibility ensures daily inspections are carried out

Multitag® Weekly (Weekly Inspection Tag)

The Weekly Inspection Tag enables companies to increase compliance and workplace safety by showing on the equipment itself, it's in date and fit for use.

- Recording 'date inspected' to ensure ease of use. Notes inspection frequency is every 7 days.
- Increase workplace safety by sharing inspection information at the asset with every worker
- Stay compliant in any weather. Robust, weather and tear proof. Remains legible in outdoor conditions when written on with a thin-nibbed permanent marker

Holder

- Dimensions: 210mm (height) x 55mm (width)
- Material: Polycarbonate
- Temperature Range: -20 °C to +130 °C

Eyewash Station/Emergency Shower Tag

Eyewash stations and Emergency Showers tagging system provide you with all the tools you need to inspect, maintain and improve safety in the workplace. We recommend a weekly check of Eyewash stations and Emergency Showers. One tag covers 12 weeks.

- Help create and control regular inspections, maintenance and identification of Eyewash stations and Emergency Showers
- Ease of use and visibility ensures regular inspections are carried out
- Remove the insert and the holder alone puts the asset immediately into prohibition with a "DO NOT USE THIS EQUIPMENT" status
- Holder is permanently attached to the Eyewash stations and/or Emergency Showers in a prominent position with either a cable tie, adhesive, screw or rivet

Holder

- Dimensions: 210mm (height) x 55mm (width)
- Material: Polycarbonate
- Temperature Range: -20 °C to +130 °C
- Attachment Method: Cable Tie, Adhesive Strip

Insert

- Dimensions: 164mm (height) x 50mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Working at Height

Scafftag® MK1

The world leading Visual Tagging System for scaffolding to help prevent working at height hazards and manage scaffolding inspection procedures.

- A Scafftag should be fitted at all access points (normally ladder access) from first build stage and remain on the structure until dismantle
- Record all important details relating to the scaffold class, contact details etc.
- Record the signature, time and date of up to 12 inspections per insert
- Holder loop compatible with both Tube and Clip and System scaffolding

Holder

- Dimensions: 356mm (height) x 91mm (width)
- Material: Nylon
- Temperature Range: -20 °C to +80 °C
- Attachment Method: Hung, Cable Tie

Insert

- Dimensions: 208mm (height) x 85mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

STSIP ETS	Prohibition Notice - Do Not Use Scaffold	1 MK2 Insert

Barrier Tag

Scaffolding Barrier specific inserts are designed to operate with Scafftag MK1 holders (page 28), helping to identify and control barriers, efficiently managing inspection procedures.

Insert

- Dimensions: 208mm (height) x 85mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Order Reference	Text/Legend	Quantity
STSI 366	Erection and Inspection Record - For Use On Scaffold Barriers Only	1 Insert

Working at Height

Eyebolt Test Tag

Eyebolt Test Tag is specifically designed for anchor points and provides a visual representation of the SWL (safe working load), Test Value and Date Tested.

The system can work in conjunction with Scafftag's unique electronic monitoring and recording system, Safetrak, saving time and costs associated with managing and reporting on equipment inspections

Eyebolt Tag helps you to comply with legislative requirements and good practices, ensuring:

- Equipment is inspected and maintained at suitable periods
- Employees are informed that equipment is within it's inspection period

Eyebolt Test Tag

- Dimensions: 70mm (diameter)
- Material: Polypropylene

Order Reference	Quantity
MISC 115	100 Tags

Do Not Use - Eyebolt Tag

Eyebolt Do Not Use - clearly identify your eyebolt is left in prohibition, on what date and who to contact. Clear, concise and visible. The system can work in conjunction with Scafftag's unique electronic monitoring and recording system, Safetrak, saving time and costs associated with managing and reporting on equipment inspections

- Tear resistant material
- Water and weather proof

Eyebolt Tag

- Dimensions: 70mm (diameter)
- Material: Polypropylene

SUND-MISC DNU PK50	50 Tags

Quarantine Tag

Quickly leave equipment, tools or scaffold in prohibition and clearly communicate who did it and why. Quarantine Tag is a great source of safety communication and compliance in the workplace.

Write with **any pen** in the comments box, wrap it around the asset and pull off the paper strip, revealing a see through sticky strip - it then seals over the text; hangs like a flag, showing 'quarantined' on one side and the details on the other.

Order Reference	Quantity
MISC 160	50 Tags

Working at height

Towertag®

Towertag is designed to monitor the movement, build and inspection of a Tower at the point of use. Easily identify the user and/or the contractor responsible for the tower.

- Make information regarding the mobile towers build easily available
- Record up to 8 Mobile Tower movements
- Up to 10 records of inspections

Holder

- Dimensions: 356mm (height) x 91mm (width)
- Material: Nylon
- Temperature Range: -20 °C to +80 °C
- Attachment Method: Hung, Cable Tie, Insert can be secured to the holder for added security.

▶ What is RFID Technology?

Radio Frequency Identification (RFID) is an automatic identification system which utilises radio waves to transfer a unique ID from a storage medium to a device configured to read it. RFID does not require physical contact between the reader and the storage medium for data transfer to occur, the signal is also able to pass through different objects dependent on their physical properties i.e. low frequency radio waves are more effective in environments where there is a lot of metal present.

What is Safetrak?

Safetrak is a digital system that supports businesses with inspection planning, equipment inspections and inspection reporting to maximise safety, improve resource performance and minimise costs. The Safetrak software, combined with devices which can read our RFID enabled tags, uniquely identify assets and their inspection status.

See **page 54** more information about Safetrak.

Working at height

Podiumtag

Purpose designed status tagging system for podiums to control inspections, maintenance and identification, making it instantly visible at the point of use.

Contains a handy, quick-reference podium inspection checklist to run through each time before using a podium.

Helps you to comply with legislative requirements and good practices of:

- Inspecting and maintaining equipment at suitable periods as deemed appropriate by a risk assessment
- Ensuring employees are informed if equipment is in date, safe (not safe) to use

Holder

- Dimensions: 210mm (height) x 55mm (width)
- Material: Polycarbonate
- Temperature Range: -20 °C to +130 °C

Man In...

Used in conjunction with Entrytag, each authorised person(s) has a dedicated Man in Confined Space or Man in Tank Tag (containing their details). The tag attaches to the Entrytag before entering a confined space, removing the tag when leaving. By counting the number of Man in Tags at the point of entry, it is instantly clear how many people are working in the confined space.

- Dimensions: 164mm (height) x 50mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Order Reference	Text/Legend	Quantity
EITL 577	Man in Confined Space	1 Tag
EITL 529	Man in Tank	1 Tag

▶ Entrytag® holder metal fixing ring

The metal fixing rings enable the attachment of Man in... tags to the Entrytag holder (Order Ref. ENT-CLIP). See **page 51** for more details.

Workspace Control

Permit Wallets

Permit Document Wallets provide ultimate protection and full visibility of permits/documents at the point of use.

- UV and water resistant
- Transparent front and back reducing the need to remove displayed documents
- Accessed by zip closure (bottom to top) to ensure maximum water resistance
- Available in A4 and A5 sizes

Order Reference	Quantity
PW1	1 A4-Permit Wallets
PW2	1 A5-Permit Wallets

Pen Clip Holder

The Pen Clip Holder is unobtrusive (13 mm width) and suitable for attachment to Entrytag, Forkliftag, Chemtag and MEWP Tag.

The Pen Clip Holder attaches to the side of the holder to ensure you always have a suitable pen at hand while completing your inspection and maintenance checks.

Pens are not included, they must be ordered separately. The pen clip holders accommodate the Edding 141 F pen supplied as standard with certain products.

Order Reference	Quantity
SUND-PENHOLDER	10 Pen Clip Holders

Chemtag®

The Chemtag insert contains all the pertinent (from MSDS) information specific to the risks that hazardous substances pose, in case of emergency. (remove such as) Information includes:

- Substance type
- Details of hazards and precautions
- Action to be taken in case of emergency
- Supplier's name and emergency telephone number
- Details of how to dispose of the item

Holder

- Dimensions: 260mm (height) x 153mm (width)

Workspace Control

Excavation-tag (2 options available)

Excavation-tag enables you to increase compliance and workplace safety by communicating vital information at an excavation entrance regarding hidden services identified, who is the TWC and what PPE is required, where it can be seen by all workers.

- Visually communicate daily/weekly inspections for your excavation
- Stay compliant in any weather: the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker
- By removing the insert you immediately display the 'Do Not Enter' sign, helping you comply with your duty of care

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip, Magnetic Strip

Insert

- Dimensions: 193mm (height) x 144mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

ETSH	10 Holders, 1 Pen

TempWorks-tag

The TempWorks Tag (temporary works) consists of a robust insert and holder which can be attached directly to a broad variety of temporary works. On the insert, workers can immediately see when the temporary works were last inspected. See the owner of the Temporary Works, the SWL (if applicable) and the inspection data. Record the Installation Date; Temp. Works Ref; Level and Location; Installed by; Owner/Company; Temporary Works Co-ordinator; Additional comments. A single insert can record up to 21 inspections

- Increase workplace safety by sharing vital information on the temporary works itself with every worker
- The durable tag will stay attached and remain legible in outdoor conditions when written on with a permanent marker
- By removing the insert, you immediately identify that an inspection is required

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS

Workspace Control

Fencing-tag

Our Fencing-tag enables you to increase compliance and workplace safety by communicating vital information on the fencing itself where it can be seen by all workers.

- Increase workplace safety by sharing vital information within the fenced area with every worker
- Stay compliant in any weather: when applied correctly, the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker
- When the insert is removed it clearly states on the holder that the fencing may be unsafe. Do not store or lean materials against the structure.

Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip, Magnetic Strip

Insert

Hoarding-tag

The Hoarding-tag enables companies to increase compliance and workplace safety by communicating vital information about the hoarding and within the hoarded area where it can be seen by all workers.

- Increase workplace safety by sharing vital information on the hoarding and within the hoarded area with every worker
- Stay compliant in any weather: when applied correctly, the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker
- When the insert is removed it clearly states on the holder that the hoarding may be unsafe. Do not store or lean materials against the structure.

Asbestos Tag (Asbestos Asbestos Management Tagging)

A complete asbestos tagging system to ensure latest status is instantly visible at all areas at risk of having Asbestos Containing Materials (ACMs) present. Helps you comply with legislative requirements and good practices of:

- Working alongside your Asbestos Register, inspecting ACM at periods denoted by your risk assessment.
- Visually display warnings at each location that ACM's are present and have been visually inspected.
- Holder denotes area is not asbestos free and NO remedial works should be carried out without further investigation

Holder

- Dimensions: 210mm (height) x 55mm (width)
- Material: Polycarbonate
- Temperature Range: -20 °C to +130 °C
- Attachment Method: Cable Tie, Adhesive Strip

Insert

- Dimensions: 164mm (height) x 50mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Order Reference	Quantity
Kits - Holders, Inserts & Pen

Workspace Control

Covid-19 Cleaning Compliance

In times of COVID19 clean areas are most important to protect customers, employees and business partners.

- Clearly highlight which areas are clean and observed
- Quickly show that checks have been carried out
- If the insert is removed, the holder instantly shows that cleaning is required
- Adds a level of safety beyond the basics of verbal information
- Documentation of a hygiene plan via a tagging system is seen as best practice.

Flange and Leak Test Tag

Flange Tag helps control inspection, modification and maintenance throughout the flange break / inspection process.

The system is three part perforated and assists the user to clearly identify the various stages of the operation from the initial break to the re-energisation of the system.

Both Flange and Leak Test Tags can be supplied with unique ID numbers for enhanced control and tracking.

- Dimensions: 200mm (height) x 83mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

STSI 422DS Joint Tag

Order Reference	Quantity
STSI 522 A	10 3-Part Flange Tag
STSI 422 DS	10 3-Part Leak Test Tag

Isolation-tag

Isolation Tag is designed to help control mechanical and electrical isolation procedures and prevent inadvertent re-energising of the system.

Isolation Tag is a perforated tag and consists of two identical sections which are completed by the person in charge. The top half is attached to the isolation point, the bottom is removed and stapled to the Permit to Work. The isolation is lifted when the attached half is removed and re-united with the other on the Permit to Work.

- Dimensions: 200mm (height) x 83mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Order Reference	Quantity
ISO 08	10 Isolation Tag

Unitag® for Valves

A purpose designed insert for valve identification. A choice of different colour inserts are available providing the option of additional visual qualification.

Designed to operate alongside Unitag holder.

Insert

- Dimensions: 41mm (diameter)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C
- Design: Identical both sides

Process & Pipelines

Process Tags

Easily communicate work equipment process management and control using highly practical and eye-catching colour-coded tags.

- Visualise management and control of work equipment processes
- Applications include cylinders and tanks, equipment, leaks and contamination, hoses and valves
- Share important safety information where it matters
- Reliable, chemical resistant, and easy to apply with cable ties
- Material: 0.5mm polypropylene.

Order Reference	Quantity	Expiration Time
SIT7	1 Inspection Timer for Scaffolding	7 Days

Includes: 3 - AAA Alkaline Batteries

▶ Please turn to **page 28** more information on Scafftag holders and inserts.

Innovative Inspection Timer for Scaffolding

The innovative Inspection Timer for Scaffolding can help save lives by clearly showing when the scaffold inspection is required. The LED lights grab the attention of users, inspectors and other workers alike, helping to ensure that the scaffold inspection 'due date' is not exceeded.

Time for inspection

The Inspection Timer for Scaffolding clearly highlights when the next scheduled scaffold inspection is required. The timer is equipped with a series of identifying LEDs which flash regularly, indicating the current status of the inspection due period.

Easy and practical

The Inspection Timer for Scaffolding can easily be attached to the Scafftag holder and is exclusively designed to fit to all existing MK1 Scafftag holders. At the end of the 7 day scaffold inspection interval and after re-inspection of the scaffold the timer can be reset for the following 7 day inspection. The batteries will allow up to 1 year constant use. A battery status indicator will display the remaining battery charge.

Save lives

Unlike other scaffold inspection solutions, the Inspection Timer's LED lights can be seen from a distance and actively draw attention to the upcoming inspection due schedule. By using the Inspection Timer for Scaffolding you further reduce the potential for a scaffold inspection being missed, helping you make your workplace a safer environment for your employees.

The Inspection Timer for Scaffolding is compatible with the Scafftag MK1 and the Towertag MK1 holders.

Inspection Timer (7, 30 or 365 days)

Scafftag's Inspection Timer clearly highlights when the next planned maintenance intervention is due.

Versions are available that count down 7 days, 30 days and 365 days. (90 and 180 day versions are available on request).

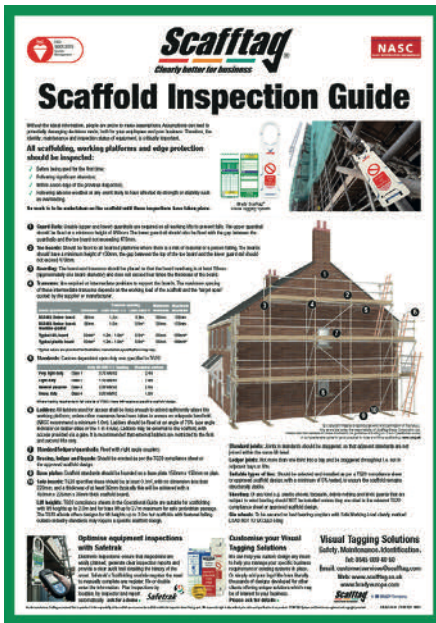

Each version is equipped with a dark green, light green, yellow and flashing red LED light that indicate a recently inspected up to an uncertain equipment status.

SUND-REL 100	100 Reusable Cable Ties - 100mm
SUND-REL 140	100 Reusable Cable Ties - 140mm
SUND-REL 250	100 Reusable Cable Ties - 250mm

Accessories

Adhesive Strips

Our double-sided adhesive strips are applied to the back of the tag holders for attachment to a flat, clean surface.

Order Reference	Quantity
ADHPAD	10 Adhesive Pads

Split Ring Attachment for Nanotag

Split Rings work alongside Nanotag as an attachment option, perfect for harnesses.

Order Reference	Quantity
NAN-RING	10 Split Ring for Nanotag

Metal Fixing Clip for Man in Tank Tag

Our Metal Fixing Clips are designed to attach 'Man in Tank / Confined Space' Tags to the Entrytag holder.

Order Reference	Quantity
ENT-CLIP	1 Man In Tag Fixing Clip

Wire Strops

Ends of Wire Strop screw together to create a looped secure tie. Used for secure attachment of Visual Tags to equipment.

Order Reference	Quantity
SUND-WIRE PH 20	20 Wire Strop

Permit Wallets

Permit Document Wallets provide ultimate protection and ease of viewing any documents, onsite.

- UV and moisture resistant
- Transparent front and back reducing the need to remove displayed documents
- Accessed by zip closure (bottom to top) to ensure maximum water resistance
- Available in A4 and A5 sizes

Order Reference	Quantity
PW1	1 A4-Permit Wallets
PW2	1 A5-Permit Wallets

Permanent Marker Pens

Thin nibbed Permanent Marker Pens to write equipment reference and inspection information on our entire range of standard and bespoke visual tags.

Order Reference	Quantity
STSM	10 Permanent Marker Pens

Pen Clip Holder

The Pen Clip Holder is unobtrusive (13mm width) and suitable for attachment to any ETSH style holder including, but not limited to, Vehicle Tags, Entrytags, Chemtags, Excavation-tags, TempWorks-tags, Fencing-tags and Hoarding-tags.

The Pen Clip Holder attaches to the side of the holder to ensure you always have a suitable pen at hand while completing your inspection and maintenance checks.

Pens are not included, they must be ordered separately (Order ref: STSM). The pen clip holders accommodate the Edding 141 F pen supplied as standard with certain products.

Order Reference	Packaging
SUND-PENHOLDER	10 Pen Clip Holder

Accessories

Worker ID Tag (ICE: In Case of Emergency)

Worker Emergency ID Tag securely stores the workers critical and potentially lifesaving information, essential in the event of an accident or medical emergency.

- Adhesive strip attaches securely to exterior of the workers hard hat
- 100% waterproof: can be used in extreme conditions
- Helmet safe: will not weaken or damage the workers hard hat in any way
- Weighs less than 5 grams
- Security flap protects the workers information
- Clear name window identifies the owner of the PPE, ideal when a number of workers are together and superior to the non-window option

Order Reference	Quantity
WSID 01	Pack of 1 Worker Emergency ID Tag - No Window
WSID 02	Pack of 1 Worker Emergency ID Tag - With Window

Universal Fit ID

Universal Fit ID is suitable for all industries and all employees and contractors. Invaluable to first responders and/or paramedics in the event of an accident or medical emergency.

The unique silicone 'stretch-ring' fitting system allows this product to be so flexible in how the system is used.

It can be fitted to lanyards, key-rings, belts, fall restraints etc. It is ideal for use in non-helmet wearing industries / occupations or a perfect supplement to our Hard Hat ID products.

Features a fully waterproof ID card and new gasket sealed lid design to keep your personal recorded information safe and secure against the elements. The Universal ID is very durable / tough and can withstand extremes of temperature (heat or cold).

- Unique stretch-ring fitting system
- Weather-proof design with lid gasket
- Waterproof synthetic paper ID card
- Impact resistant casing, shielded hinge
- Supplied with spring loaded key-ring hook
- Strong 'Emergency Response' lid graphic

Order Reference	Quantity
WSID 05	1 Universal Fit ID Tag

Insert Clear Covers

Clear covers provide extra protection and increase durability of tag inserts in environments that are prone to dirt, chemicals or sprayed matter. Clear covers provide additional UV protection for the written text on the inserts.

Optimise equipment inspections with Safetrak

Too many workplace accidents are still caused by using equipment that is not fit for use. These accidents can have grave consequences. Imagine a scaffold collapsing: co-workers and passers-by might be seriously injured with colossal impact for themselves, their families and your business. Think about what happens when your fire extinguishers do nothing when they should, when valves suddenly break down, or when the reverse warning indicator on a forklift does not work.

Diligent inspection planning, thorough equipment inspections and clear inspection reports and histories can save lives, avoid suffering and major costs in a lot of industries.

What is Safetrak?

Safetrak is a digital system that supports businesses with inspection planning, equipment inspections and inspection reporting to maximise safety, improve resource performance and minimise costs.

To do this, Safetrak offers:

- Digital planning of regular equipment inspections
- Guided, step-by-step customisable equipment inspections
- Automated reporting on demand or at regular intervals
- Digital book in/out for equipment.

Safetrak benefits

Digital equipment inspections offer a number of advantages:

- Easy inspection planning complete with automated reminder emails
- Accurate, standardised, customisable equipment inspections
- Complete inspections on-the-job and immediately upload the completed template
- Auto-generate reports in one click including the latest inspection data
- Receive complete, auto-generated reports and audit trails at regular intervals via email.

Safetrak mobile app

The Safetrak Mobile App can easily be accessed in the field on any smartphone. Internet access is not required. Log out after an inspection and the app will automatically upload data for immediate reporting once internet connection is restored.

- **Reduced errors:** avoid retyping data by capturing field inspection results digitally, simply upload the data by logging out of the app
- **Immediate reporting:** the Safetrak web app automatically includes the data in predefined report templates

**Safetrak web app
30 day free trial.**

Safetrak solution components

A typical Safetrak package includes:

USERS

Customers can define different access rights in the Safetrak user management section. Supervisor users can use all functions, while other users have specific access.

IDENTIFICATION TAGS

Tags will vary depending on the style and size of equipment being tagged. Tags are equipped with RFID or Barcode technology to:

- Uniquely identify assets.
- Prove attendance at asset location.
- Or to book an item out of stores.

DATABASE

The Safetrak database holds all the records about assets and their individual histories. Various interfaces are available including administration client, booking system, web portal.

EQUIPMENT MODULES

Modules determine the questions that are asked on the handheld and the reports that are generated. There are a number of standard off the shelf modules available or Safetrak can be created to your specific requirements.

HANDHELDS

Mobile handhelds are used by operators in the field to perform and record tasks such as inspections. We offer a variety of handhelds to fit your environment including rugged devices for industrial working conditions and intrinsically safe models.

REPORTS

Reports and modules can be customised and branded to your business requirements. Exporting options include CSV, PDF.

Safetrak inspection modules

Safetrak already includes 24 off-the-shelf inspection modules for various types of equipment:

WORKING AT HEIGHT

- Fall protection Arrest
- Harnesses
- Ladder
- MEWP
- Forklift
- Lifting Equipment
- Scaffold

WORKSPACE CONTROL

- Asbestos Register
- Excavation
- Life Vest
- PPE
- Playground & equipment
- Safety Boards
- Safety Nets

PLANT, VEHICLES, MACHINERY & TOOLS

- Electrical
- Fire Door
- Fire Extinguisher / Fire Point
- General Asset
- General Tool
- Heavy Plant
- Safety Shower / Eyewash

PROCESS & PIPELINES

- Concrete Pipe
- Flange
- Site Audit
