WWW.IUSEELITE.COM

Introducing the Elite Lighting and EnOcean partnership; a combination of the world's first lighting control system for sustainable buildings, with no wires, no batteries, no limits, and the innovative Elite Lighting product line. The basis for this innovative technology is the use of miniaturized energy harvesting devices and ultra-low power radio technology, resulting in maintenance-free, wireless sensor solutions. Because the self-powered wireless switches and sensors do not require any wires or batteries, they add unparalleled flexibility to time saving and energy efficiency, while minimizing investment and operating costs.

By incorporating EnOcean technology, the wireless networks controlling Elite Lighting products can now operate for decades without maintenance. The harvested energy is used for transmitting sensor data within a building to control lighting, without the need for cabling. By utilizing this intelligent, self-powered wireless control system, Elite Lighting products can be controlled through the use of a mobile phone or the Internet, and provide your customers the flexibility to create unlimited lighting scenes. The energy drawn from movement, light, and changes in temperature is the smart way to control Elite Lighting products, optimizing your customer's lighting control system. This technology saves energy, raw materials, and reduces operating costs, while increasing comfort and security.

With the expected growth in GREEN buildings, the EnOcean self-powered wireless sensors and switches are ideal for sustainable building applications. For buildings pursuing LEED certification in achieving efficiency and sustainability, this technology offers unique features and advantages, providing a cost-effective solution for office buildings, industrial facilities, hotels, schools and hospitals.

Elite Lighting has long been committed to developing energy-efficient lighting products that help meet strict energy codes, while saving energy and the environment. In addition, we have achieved GREEN lighting design by committing to all energy conservation and government economy programs. When paired with EnOcean technology, Elite Lighting can meet the needs of strict energy codes with our extensive line of LED products. For facilities that operate 24/7, such as hotels and hospitals, the attention to sustainability is vital.

Elite Lighting has an array of aesthetically pleasing LED products for hotel applications such as the 'HH' recessed architectural downlight series, offered in a 4" to 10" aperture, and numerous trim options to accommodate any space.

For the ever-increasing number of existing facilities that are looking to upgrade to more energy efficient lighting products, Elite Lighting can provide your customer with an extensive line of retrofit products as well.

In conjunction with EnOcean technology, Elite Lighting is continuing the advancement of this self-powered interoperable wireless building control system. With more than 300 interoperable products already installed in tens of thousands of buildings globally, the combination of Elite Lighting and EnOcean provides the perfect source for the optimal lighting and control solution.

Easyfit for EnOcean lighting systems Comprehensive LED controls portfolio with EnOcean radio standard for North America

Self-powered sensors and switches, combined with LED fixture controllers and a commissioning tool, permit easy configuration, intelligent local control, and seamless integration into building automation systems.

The wireless LED controls portfolio is ideal for both, new buildings and retrofits. They can be easily introduced into intelligent building technology: in residential buildings, all you need to do is connect a transmitter to a receiver – and you're done. This basic installation can be easily combined with existing systems and extended at will.

Why Easyfit?

Easyfit products are self-powered switches, sensors and actuators that use wireless standards to make LED lighting solutions more energy-efficient, more flexible and lower in cost.

No wires

With wireless technology solutions, you have complete flexibility in how you arrange your room layouts.

No batteries

Self-powered wireless switches and sensors harvest and manage a minimum amount of energy from their environment.

No limits

Maintenance-free and wireless solutions allow the system to be expanded at any time with unlimited flexibility.

HOW DOES IT WORK?

Elite Lighting is glad to introduce EasyFit by EnOcean. Now you can develop any type of project that involves a control system using the Elite Lighting architectural line of products in addition to the EasyFit control system by EnOcean to archive today's standards. After you decide what luminaire you will be using in your project you can select the control system that better fits you. Elite Lighting will ship those fixtures with the corresponding control system pre-installed ready to be configured in the workplace. Just visit our website (www.iuseelite.com) and download the specification sheet with the technical information of the luminaire and the available control system for the selected fixture. Don't waste more time and money looking into a control system for your new project, Elite Lighting is now **THE MOST COMPREHENSIVE LINE OF LIGHTING FIXTURES WITH CONTROLS IN NORTH AMERICA**

FIRST STEP

CHOOSE YOUR FIXTURES

Elite Lighting has a complete line of architectural lighting products to give you the freedom to design any projects.

DOWNLIGHTING | SMALL APERTURE | COMBO LIGHTING | CYLINDER

ARCHITECTURAL SLOT | SUSPENDED | RECESSED LINEAR | SURFACE MOUNT

www.iuseelite.com

SECOND STEP

SELECT YOUR CONTROLS

Fixture can ship with pre-installed EnOcean relay control, or relay control can ship separate to be installed in the field.

LEDRU
LED Relay Zone
Controller 0-10V
(120/277V)

LEDDU
LED Zone
Controller 0-10V
(12V)

THIRD STEP

CHOOSE YOUR SENSOR & SWITCHES

After selecting the control system choose how are you going to control your fixtures using occupancy/ daylight sensors or the corresponding wall mount switches.

EOSCU

ELLSU

EOSWU

ESRPU/ EDRPU

WSS0S-S9W/ WSS0S-D9W

FOURTH STEP

SET UP THE CONTROL SYSTEM

With Navigan Wireless Commissioner you can simply setup your projects using EnOcean's energy harvesting technology, and easily configure EnOcean controllers.

www.easyfit-controls.com

Select the control system

How to set it up?

With Navigan Wireless Commissioner you can simplify installation of building automation projects using EnOcean's energy harvesting technology, and easily configure EnOcean controllers. It can be used to define link tables, change parameters and settings, and to edit and store projects. Currently with NWC 300U the following EnOcean finished products are supported: LEDRU, and LEDDU.

The Intellect Sensor Control Module (SCM) is designed for mounting directly into lighting fixtures for use in an Intellect-enabled Intelligent Fixture Control System. The SCM integrates PIR occupancy sensing and photocell technology in a single compact unit. Integrate with downlights, track fixtures and other general lighting to create an advanced intelligent lighting control system that complies with energy codes.

LEDRU

LEDRU

Features & Benefits

Interoperable. Communicates wirelessly with other devices using the EnOcean wireless standard.

Enables wireless dimming of a single fixture or a zone of multiple daisy chained LED fixtures (e.g. 20 each 30W or 10 each 60W).

Supports California Title 24 daylight harvesting scenarios, occupancy control and manual dimming with input from self-powered wireless switches and sensors. Implements load shedding initiated by separate demand response controllers.

Compact size enables flexible installation inside or next to electrical boxes and fixtures.

Electric surge protection exceeds IEC61000-4-5 installation class 4.

Commission your LED lighting with EnOcean's intuitive, easy-to-use wireless Navigan™ software to link devices and set parameters (e.g. timeouts, ramp speeds) from a laptop computer. Manual push buttons may also be used for linking and simple commissioning.

Two molded buttons and one LED indicator light can be used to configure or manually control the device.

NOTES

Up to 15 Fixtures per one receiver or one receiver per fixture for individual control of each luminaire.

Specification

Power Supply	120/277VAC, 60Hz
Maximum Load	General Purpose: 16A @ 120/277VAC Resistive: 16A @ 120/277VAC Tungsten: 960W @ 120VAC Ballast: 600W @ 120VAC
0-10V output	Current sinking 35mA / sourcing 4mA For high sinking current and dim values below 10%, the output voltage may exceed the selected output value and reach 1V max.
Power Consumption	1.1W full load, 550mW quiescent
Surge Protection	Exceeding IEC61000-4-5 installation class 4
Inputs/Outputs	Flying-lead style wires 2 power input wire 1 switched output wire 2 output wires for 0-10V control 2 Buttons, one LED for device configuration & manual control
RF Communications	EnOcean 902 MHz
Transmission Range	80ft. (25m)
Dimensions	2.78" H x 1.65" W x 1.1" D (73mm x 42mm x 28mm)
Weight	3.2oz. (90g)
Mounting	Install inside standard electrical box Connect to electrical boxes and fixtures using threaded nipple
Environment	Indoor use only 32° to 140° F (0° to 60° C) 20% to 85% relative humidity (non-condensing)
Agency Compliance	UL: UL 2043, UL 1472, CSA C22.2 No. 184.1-96, UL 244A FCC: 902 MHz Contains: FCC: SZV-STM300U
EnOcean Equipment Profile	D2-40-00
Interoperable Products / EEPs (EnOcean Equipment Profiles)	Rocker Pad Switch (F6-02-02) Occupancy Sensor (A5-07-01) Occupancy Sensor (A5-07-02) Occupancy Sensor (A5-07-03) Light Level Sensor ((A5-06-02) Light Level Sensor (A6-06-03) Central Controller (A5-38-08) Demand Response (A5-37-01)

LED Controller 0-10V

2

A simple solution for wireless control and daylight harvesting.

The LED controller uses wireless technology to communicate with other self-powered EnOcean-based products and provides an amazingly simple solution for dimming control of LED lighting. **It is directly supplied from the auxiliary 12V supply output of a connected LED driver.** The compact size enables flexible installation inside of or next to electrical boxes and fixtures so it can be easily wired out of sight using standard wiring practices. Simply link the module to an EnOcean-based motion sensor, light sensor, switch or rocker pad and experience levels of efficiency and convenience that can only be achieved through wireless controls. It is also possible to link the LED controller to a central controller or via a gateway to building automation systems like BACnet.

LEDDU

LEDDU

Features & Benefits

Interoperable. Communicates wirelessly with other devices using the EnOcean wireless standard.

Enables wireless dimming of LED fixtures.

Supports daylight harvesting scenarios, occupancy control and manual dimming with input from self-powered wireless switches and sensors. Implements load shedding initiated by separate Demand Response controllers.

Compact size enables flexible installation inside or next to electrical boxes and fixtures.

Commission your LED lighting with EnOcean's intuitive, easy-to-use wireless ReComm software to link devices and set parameters (e.g. timeouts, ramp speeds) from a laptop computer. Manual push buttons may also be used for linking and simple commissioning.

Two molded buttons and one LED indicator light can be used to configure or manually control the device.

NOTES

Up to 15 Fixtures per one receiver or one receiver per fixture for individual control of each luminaire.

Specification

Power Supply	12V (11.0 - 13.2V) DC, 20mA* (max.) from LED driver * plus 0-10V sourcing current if needed
0-10V output	Current sinking / sourcing 20mA
Power Consumption	220mW (typ.) / 500 mW (max, incl. sourcing current)
Surge Protection	Exceeding IEC61000-4-5 installation class 4
Inputs/Outputs	Flying-lead style power input wires 2 output wires for 0-10V control Radio Frequency (RF) transceiver 2 Buttons, 1 LED for device configuration & manual control

Occupancy Sensor Ceiling Mounted

3

Choose Sensors

Saving energy without sacrificing comfort can be effortless with occupancy based controls. The Ceiling Mounted Occupancy Sensor enables a new level of energy saving control for rooms, hallways and other common areas. The Occupancy sensor uses radio frequency technology to communicate wirelessly with other EnOcean-enabled devices to set back temperature and turn off lights and electrical loads when a space has been unoccupied for a set period of time. Because the sensors are wireless there is no need to run additional wiring and installation can be completed in a matter of minutes. The sensor is self-powered by harvesting energy from indoor light, eliminating the need for periodic battery changes. The clean, contemporary styling makes it an attractive addition to any décor.

EOSCU

Features & Benefits

Interoperable. Communicates wirelessly with other devices using the EnOcean wireless standard.

Self-powered. Two integrated solar cells enable indoor light energy harvesting to power the device and eliminate the need for wires or batteries.

PIR motion sensor with 360 degree viewing angle lens for maximum efficiency in different room settings.

Two molded buttons with LED indicator lights can be used to link and configure the device.

Internal tray accommodates supplemental coin cell battery for use in low light environments.

NOTES

Motion Detection Range of 34ft at 10ft high with a transmission range of 80ft. Self-powered. Two integrated solar cells

Sensor Range and Coverage Diagrams

sensor coverage based on 10ft. mounting height

Specification

Power Supply Optional	Indoor light energy harvesting Supplemental battery (CR2032) or 2-wire connector for external power or remote solar cell (3 - 5 VDC)
RF Communications	EnOcean 928 MHz, 902 MHz, 868 MHz
Transmission Range	80ft. (25m)
Motion Detection Range	34ft. (10m) diameter (refer to coverage diagrams)
Minimum Operating Light	50 lux (for auto-off only)
Startup Charge Times* (from empty)	First motion transmission / Linking=5 min @ 200 lux Motion LED blink Light/Walk Test Modes=1.5 hours @ 2000 lux Note: Bright light or a battery can be temporarily used to significantly shorten startup charge times.
Charge Time to Full	25 hrs @ 200 lux
Sustaining Charge Time	3 hours per 24 hours @ 200 lux
Motion Transmission Interval	2 minutes
Unoccupied Transmission	10 and 30 minutes since last motion detection
Heartbeat Transmission	default = disabled / enabled = 1 hr intervals
Environmental conditions	14° to 104°F (-10° to 40°C), 20% to 95% relative humidity (non-condensing), indoor use only
Operating Life in Darkness	80 hours (after full charge)
Optional Battery Life:	Continuous battery-free operation standard
Infrequent Bright Light	20 yrs (with 200 lux for 2 hrs/day, 7 days/week)
Consistent Low Light	15 yrs (with 65 lux for 5 hrs/day, 7 days/week)
Total Darkness	6.5 yrs
EnOcean Equipment Profile (EEP)	A5-07-01
Dimensions	6.5" H x 2.36" W x 1.47" D (160mm x 60mm x 37mm)
Mounting Height	7 - 10 feet (2 - 3m) recommended
Agency Compliance	902 MHz: Contains FCC: SZV-STM300U IC: 5713A-STM300U 868 MHz: CE certified, R&TTE conform 928 MHz: Module inside conforms to ARIB STD-T108

Occupancy Sensor Wall Mounted

3

Choose Sensors

Saving energy without sacrificing comfort can be effortless with occupancy based controls. The Wall-Mounted Occupancy Sensor is wireless and self-powered making it one of the most cost-effective ways to control energy-use in unoccupied rooms. They can be installed in minutes because there are no additional wires to run and they require no batteries so on-going maintenance costs are eliminated. The sensor harvests solar energy from indoor light and uses radio frequency technology to communicate wirelessly with other EnOcean-enabled devices, setting back temperature and turning off lights and electrical loads when it detects that a space has been unoccupied for a set period of time. The sensor features clean contemporary styling, making it an attractive addition that's sure to compliment any decor.

EOSWU

EOSWU

Features & Benefits

Interoperable. Communicates wirelessly with other devices using the EnOcean wireless standard.

Self-powered. Integrated solar cell harvests indoor light to power the device and eliminates the need for wires or batteries.

PIR motion sensor with both wide angle and long range options for maximum efficiency and flexibility in different room settings.

Two molded buttons with LED indicator lights can be used to link and configure the device.

Internal tray accommodates supplemental coin cell battery for use in low light environments.

NOTES

Motion Detection Range of 100ft at 7ft high with a transmission range of 80ft. Self-powered. Integrated solar cells

Daylight Sensor Ceiling Mounted

3

Choose Sensors

Easyfit Light Level Sensor measures and reports the level of available natural light.

Used in conjunction with suitable controllers such as EnOcean LEDR and LEDD, it enables implementation of energy saving daylight harvesting control systems.

Daylight harvesting is a great way to save energy and cost while enhancing worker satisfaction by allowing personal control of light levels.

Lighting control systems employing this technique measure natural light available in a building and only add as much artificial light as necessary.

ELLSU

ELLSU

Functional Principle

EnOcean Light Level Sensor uses a solar cell both to measure the amount of available natural light and to generate the required energy for its operation.

Natural light level is measured every minute and significant changes (> 50 lux) are transmitted immediately. In addition, a heartbeat message containing the current light level is transmitted at random intervals between 20 ... 30 minutes.

EnOcean Light Level Sensor is interoperable with other devices using the EnOcean Wireless Standard.

EnOcean Light Level Sensor can be quickly deployed without wiring and is maintenance free thanks to the ability to harvest the energy required for operation.

EnOcean Light Level Sensor is optimized for operation together with the EnOcean LED Controllers LEDD and LEDR.

NOTES

80 hours operation after full charge with a transmission range of 80ft. Self-powered. integrated solar cells

Specification

Power Supply	Solar energy harvesting
Measurement Range	0 – 1020 lux
Resolution	0 – 4 lux
Typical Accuracy	+ 5% @ full scale, 68°F
Measurement interval	1 minute
Transmission interval	After measurement if change > 50 lux since last transmission Heartbeat every 20 ... 30 minutes (affected at random)
Startup charge time to first transmission*	5 minutes @ 200 lux for operation from empty energy store
Sustaining charge*	3 hours per day @ 200 lux
Time to full charge*	30 hours @200 lux
Operation time in total Darkness	80 hours (after full charge)
Configuration Interface	2 Buttons, 2 LED for device configuration & manual control
RF Standard	EnOcean 902 MHz
Transmission Range	80 ft. (25 m)
EnOcean Equipment Profile	A5-06-02
Dimensions	6.30" L x 2.36" W x 1.15" D (160 mm x 60 mm x 37 mm)
Weight	4.4oz. (125g)
Mounting Position	At the ceiling, close to the ambient light source (window)
Environment	Indoor use only 32° to 140° F (0° to 60° C) 20% to 85% relative humidity (non-condensing)
Agency Compliance	FCC, IC, RoHS

Rocker Pad (single, double) Self-powered, Wireless Switch

3

Self-powered wireless controls are simple to install. The Single and Double Rocker Pads use EnOcean energy harvesting technology to communicate wirelessly with other wireless devices and provide convenient control of lighting, temperature and miscellaneous electric loads. The rocker pads are self-powered and never require batteries because the simple act of pressing the rocker generates enough energy to send a wireless signal to other EnOcean-based devices. Use them in conjunction with sensors and controls to maximize efficiency and provide a level of comfort and convenience you cannot achieve with traditional switches. The rocker pad features a clean contemporary styling, making it an attractive addition that's sure to compliment any decor.

EDRP/ESRP

EDRP / ESRP

Features & Benefits

Interoperable. Communicates wirelessly with other devices using the EnOcean wireless standard.

Self-powered. Integrated kinetic harvester provides the energy to power the device and eliminates the need for wires or batteries.

Wireless. No additional wire to run so installation is fast and easy. Install them where you want them and then move them anytime.

Decorator style rocker pads capable of performing switching and dimming functions.

NOTES

Transmission range up to 80ft
Works with LEDRU (OEM) and
LEDDU (OEM) Receivers

Specification

Power Supply	Mechanical Energy Harvesting (power is generated by the motion of pressing the switch)
Inputs/Outputs	1 or 2 button rocker switch options Radio Frequency (RF) transmitter
RF Communications	EnOcean 902 MHz
Transmission Range	80ft. (25m)
RF Transmission	On press and release of rocker button
EnOcean Equipment Profile (EEP)	F6-02-02
Dimensions	Single: 4.95" H x 3.21" W x 0.74" D (126mm x 82mm x 19mm) Double: 4.95" H x 4.52" W x 0.72" D (126mm x 115mm x 18mm)
Weight	Single: 3.98oz. (112g) Double: 5.3oz. (150g)
Mounting	Surface mounted on wall (using included mounting screws) Can also be flush mounted by optional use of electrical wall box or low-voltage ring
Environment	• Indoor use only 32° to 131° F (0° to 55° C) 5% to 95% relative humidity (non-condensing)

Single or Dual Rocker Self-powered Wireless Light Switch

3

WSS0S-S9W

WSS0S-D9W

LEVITON®

The Single or Dual Rocker Self-Powered Wireless Light Switch is a battery-free wireless transmitter that communicates with a wide variety of receivers. Every time the switch is pressed a micro-generator produces a small electrical current that powers a built-in transmitter. This transmitter sends wireless signals that command the receiver to turn a device off or on. With an appropriate receiver, the switch can also be used to control the dimming of lights.

WSS0S-S9W / WSS0S-D9W

WSS0S-S9W / WSS0S-D9W

Features & Benefits

Zero Power Consumption

Zero External Power Required

Zero Charge Time to Operation

No Additional Wiring

Rocker Style ON/OFF Switching

Convenient Multi-Location (3-way or 4-way) Switching

Save Energy

Use with multiple line voltage or low voltage LevNet RF Receivers to control an unlimited number of LevNet RF Receivers within range for wireless dimming or ON/OFF control

NOTES

Transmission range up to 150 ft.
