## DIRECT SUPPORT, AND GENERAL SUPPORT MAINTENANCE

### REPAIR PARTS AND SPECIAL TOOLS LIST (INCLUDING DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST)

#### SECTION I. INTRODUCTION

##### 1. Scope.

This RPSTL lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TM DE); and other special support equipment required for performance of direct support, and general support maintenance of the AN/GRC-106(A). It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance and recoverability (SMR) codes.

##### 2. General.

In addition to Section I, Introduction, this Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in alphanumeric ascending sequence, with the parts in each group listed in ascending item number sequence. Items listed are shown on the associated illustration(s)/figure(s).

b. Section III. Special Tools List. Not applicable.

c. Section IV. Cross-reference Indexs. A list, in National item identification number (NIIN) sequence, of all National stock numbered items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration/figure and item number appearance. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, FSCM, and part numbers.

##### 3. Explanation of Columns (Sections II and III).

a. ITEM NO. (Column 1). Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column 2). The Source, Maintenance, and Recoverability (SMR) code is a five-position code containing supply/requisitioning information, maintenance level authorization criteria, and disposition instruction, as shown in the following breakout:

\*Complete Repair: Maintenance capacity, capability, and authority to perform all corrective maintenance task of the "Repair" function in an use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code is the first two positions of the SMR code. It tells item needed for maintenance, repair, or overhaul of an end item/equipment.

Explanations of source codes follows:

Explanation

PA  
PB  
PC\*\*  
PO  
PE  
PF  
PG

Stocked items; use applicable NSN to request/requisition items with these source codes. They are authorized to the level indicated by the code entered in the 3rd position of the SMR code.

\* \* NOTE: Items coded PC are subject to deterioration.

KD  
KF  
KB

Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance level indicated in the 3rd position of the SMR code. The complete kit must be requisitioned and applied.

Explanation

AO- (Assembled by org/AVUM level)  
AF- (Assembled by DS/AVIM level)  
AH- (Assembled by GS level)  
AL- (Assembled by SRA)  
AD- (Assembled by Depot)

Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION AND USABLE ON CODE (UOC) column and listed in the Bulk Material group of the repair parts list in this RPSTL. If the item is authorized to you by the 3rd position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.

Explanation

MO-	(Made at erg/ AVUM level)
MF-	(Made at DS/ AVIM level)
MH-	(Made at GS level)
ML-	(Made at Spe- cialized Repair Act (SPA)
MD-	(Made at Depot)

Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the 3rd position of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher level, order the item from the higher level of maintenance.

Code Explanation

- XA Do not requisition an "XA"-coded item. Order its next higher assembly. (Also, refer to the NOTE below.)
- XB If an "XB" item is not available from salvage, order it using the FSCM and part number given.
- XC Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
- XD Item is not stocked. Order an "XD" coded item through normal supply channels using the FSCM and part number given, if no NSN is available.

NOTE: Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA" or those aircraft support items restricted by requirements of AR 750-1.

( 2 ) Maintenance Code. Maintenance codes tells you tile level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered as follows:

( a ) The maintenance code entered in the third position tells you the lowest level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to the following levels of maintenance.

Code Application/Explanation

- C Crew or operator maintenance done within organizational or aviation unit maintenance.
- O Organizational or aviation unit level can remove, replace, and use the item.
- F Direct support or aviation intermediate level can remove, replace, and use the item.
- H General support level can remove, replace, and use the item.
- L Specialized repair activity can remove, replace, and use the item.
- D Depot level can remove, replace, and use the item.

( b ) The maintenance code entered in the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions). (NOTE: Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes:

<u>Code</u>	<u>Application/Explanation</u>
O	Organizational or aviation unit is the lowest level that can do complete repair of the item.
F	Direct support or aviation intermediate is the lowest level that can do complete repair of the item.
H	General support is the lowest level that can do complete repair of the item.
L	Specialized repair activity (designate the specialized repair activity) is the lowest level that can do complete repair of the item.
D	Depot is the lowest level that can do complete repair of the item.
Z	Nonrepairable. No repair is authorized.
B	No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" coded item.) However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

( 3 ) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition on unserviceable items. The recoverability code is entered as follows:

<u>Recoverability Code</u>	<u>Application/Explanation</u>
Z	Nonrepairable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in 3rd position of SMR Code.
O	Repairable item. When uneconomically repairable, condemn and dispose of the item at organizational or aviation unit level.
F	Repairable item. When uneconomically repairable, condemn and dispose of the item at direct support or aviation intermediate level.
H	Repairable item. When uneconomically repairable, condemn and dispose of the item at the general support level.
D	Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.
L	Repairable item. Condemnation and disposal not authorized below specialized repair activity (SRA).

Recoverability

Code                      Application/Explanation

A                      Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. FSCM Column (3). The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

d. PART NUMBER (Column 4). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

**NOTE:** When you use a NSN to requisition an item, the item you receive may have a different part number from the part ordered.

e. DESCRIPTION AND USABLE ON CODE (UOC) (Column 5). This column includes the following information:

( 1 ) The Federal item name and, when required, a minimum description to identify the item.

( 2 ) Items that are included in kits and sets are listed below the name of the lot or set.

( 3 ) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.

( 4 ) Part numbers for bulk materials are referenced in this column in the line entry for the item to be manufactured/fabricated.

( 5 ) When the item is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before UOC).

( 6 ) The usable on code, when applicable (see paragraph 5, Special Information).

( 7 ) In the Special Tools List section, the basis of issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.

( 8 ) The statement "END OF FIGURE" appears just below the last item description in Column 5 for a given figure in both Section II and Section III.

f. QTY (Column 6). The QTY (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

4. Explanation of Columns (Section IV).

a. National Stock Number (NSN) Index

( 1 ) STOCK NUMBER Column. This column lists the NSN by National item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN. When using this column to locate an item, ignore the first four digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

( 2 ) FIG. Column. This column lists the number of the figure where the item is identified/located. The figures are in numerical sequence in Section II and Section III.

( 3 ) ITEM Column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. Part Number. Part numbers in this index are listed by part number in ascending alphanumeric sequence (i. e., vertical arrangement of the letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

( 1 ) FSCM column. The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

( 2 ) PART NUMBER Column. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, standards, and inspection requirements to identify an item or range of items.

( 3 ) STOCK NUMBER Column. This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left.

( 4 ) FIG. Column. This column lists the number of the figure where the item is identified/located in Sections II and III.

( 5 ) ITEM Column. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

c. Figure and Item Index.

( 1 ) FIG. Column. This column lists the number of the figure where the item is identified/located in Sections II and III.

( 2 ) ITEM Column. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

( 3 ) STOCK NUMBER Column. This column lists the NSN for the item.

( 4 ) FSCM Column. The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

( 5 ) PART NUMBER Column. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item range of items.

5. Special Information.

a. Associated Publications. The publications listed below pertain to Radio Sets AN/GRC-106(A) and its components.

<u>Publication</u>	<u>Short Title</u>
TM 11-5820-467-15	Antenna Group AN/GRA-50
TM 11-5820-467-24P	Antenna Group AN/GRA-50
TM 11-5820-520-20	Radio Sets AN/GRC-106 and AN/GRC-106A
TM 11-5820-520-34	Radio Sets AN/GRC-106 and AN/GRC-106A

b. National Stock Numbers. National stock numbers (NSN's) that are missing from P source coded items have been applied or and will be added to this TM by future change/revision when they are entered in the Army Master Data file (AMDF). Until the NSN's are established and published, submit exception requisitions to: Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-LC-MM, Fort Monmouth, NJ 07703-5000 for the part required to support your equipment.

6. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Not Known.

( 1 ) First. Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

( 2 ) Second. Find the figure covering the assembly group or subassembly group to which the item belongs.

( 3 ) Third. Identify the item on the figure and note the item number.

( 4 ) Fourth. Refer to the Repair Parts List for the figure to find the part number for the item number noted on the figure.

( 5 ) Fifth. Refer to the Part Number Index to find the NSN, if assigned.

b. When National Stock Number Number or Part Number is Know.

( 1 ) First. Using the National stock number or the part number index, find the pertinent National stock number or part number. The NSN index is in National item identification number (NIIN) sequence. The part number in the Part Number index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration/figure and item number of the item you are looking for.

( 2 ) Second. After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

1-7. Abbreviations.
