RangeBoost Technology for Improved Connectivity

The new ROG Strix laptops are the world's first gaming laptops to feature multi-antenna Wi-Fi for more stable connections during online combat. Patented ROG RangeBoost technology utilizes hardware and unique algorithms to boost Wi-Fi throughput and provide 30%-wider coverage than dual-antenna configurations. The latest 802.11ac 2 X 2 Wave 2 Wi-Fi standard delivers speeds of up to 1.7Gbps - twice that of 802.11ac 2 X 2 and 12x that of 802.11 b/g/n!

Patented Anti-Dust Cooling System

The Anti-Dust Cooling system is a patented centrifugal fan module with two anti-dust tunnels. It works on the principle of centrifugal force, which acts on any object moving in a circular path, pushing it away from the center from which it is moving. Dust particles and dirt in the fan module are blown along the fan walls, and eventually expelled out of the chassis through the anti-dust tunnels. This prevents buildup on the heatsink fins and improves dust removal rate by an astounding 240%!

Side-Firing Speakers With Smart Amp Technology

Smart-amplifier technology monitors the audio output and makes real-time adjustments.

Stay cool — even after hours of use

Laptop cooling is important because it directly affects performance and, more importantly, your comfort. ASUS IceCool technology uses smart fan control, thin heat pipes and clever engineering to create an efficient cooling system that keeps the average palm rest surface temperature below 36°C lower than body temperature — so your laptop stays cool, and you stay comfortable.

Colorful, pixel-perfect worlds

Our exclusive display technologies ensure you enjoy only the very best visual experience. ASUS Splendid optimizes color and contrast to ensure photo-realistic visuals. It features four display modes: Normal Vivid, Eye Care and Manual, all of which can be accessed with a single click. ASUS ZenBook SUX391 Review - digit

The ASUS ZenBook S nails it as a lifestyle product that's also high on performance.

Designed for ultimate comfort

With any ZenBook, your comfort is one of our top priorities, ZenBook S goes the extra mile with its exclusive ErgoLift hinge, an engineering masterpiece designed to automatically tilt the keyboard to the most comfortable typing position. But that's not all: the carefully calculated tilt improves cooling and audio performance, too.

NanoEdge display

Our amazing NanoEdge display technology just keeps evolving, and in ZenBook S we've made the alreadyslim bezel even slimmer to give you more display in the smallest space possible. With a higher screen-tobody ratio, there's less distracting bezel for more immersive visuals.

Work longer, charge faster

ZenBook S uses a high-capacity battery that won't let you down, however long and demanding your working day is. And its fast-charge technology lets you recharge ZenBook S up to 60% capacity in as little as 49 minutes5, so you can be up and running quicker than ever.

Seriously portable

As a seasoned traveler, you'll appreciate the way ZenBook S slips effortlessly into your bag, with its svelte profile taking up the bare minimum of space and adding hardly any weight. Less bothersome bulk, more room for the really important stuff.

When you're on the go, no-compromise connectivity is essential. ZenBook S delivers the ultimate speed of Thunderbolt™ 3 in two of its three USB-C™ ports, and all three ports support fast charging, data transfers and display connectivity. And for desktop-grade connectivity, simply connect the handy ASUS Mini Dock.

Ultratough: military-grade durability

ZenBook S meets the ultra-demanding MIL-STD 810G military standard for reliability, and durability, undergoing a punishing test regime that includes extended tests for operation in harsh environments including extreme altitudes, temperatures and humidity. It has also passed ASUS internal laptop tests that far exceed the standards set by the industry.

NanoEdge display with ultra narrow bezel

The ultrathin bezel of the NanoEdge display on the VivoBook 15 allows a 15.6-inch Full HD display to fit into a frame size that's only slightly larger than those typically used in 14-inch laptops. The 7.7mm bezel on the NanoEdge display also results in an incredible 81% screento-body ratio – so you get more screen for more immersive viewing.

Amazing performance

ASUS VivoBook 15 is powered by up to the latest generation AMD Ryzen™ 5 processor with up to 8GB DDR4 RAM and AMD Radeon™ Vega8 processor graphics for smooth visuals and great gaming experiences. It also features dualband 2x2 802.11ac Wi-Fi — so you'll enjoy super-fast online performance.

This allows for robust cooling performance and ultimate user comfort.

Slim, stylish, lightweight

ASUS VivoBook Flip 14 is thinner and lighter than ever — with an amazingly thin 17.6mm profile, it weighs just 1.5kg*. It's one of the most portable 14-inch convertible laptops around, keeping you productive and entertained - anywhere. To ensure ultimate durability, the precision-engineered stepless 360° metal hinge of the VivoBook Flip 14 was subjected to 20,000-cycle open-and-close tests.

A safe fast-charging and longer-lasting battery

VivoBook Flip 14 features a 3x the lifespan of standard lithium-ion batteries. With ASUS fast-charge technology, a low battery can be charged to 60 percent in just 49 minutes.

NanoEdge display

With an ultra-narrow 6.15mm NanoEdge bezel design, the VivoBook Flip 14 fits a 14-inch Full HD display into a typical 13-inch laptop frame with an incredible 82% screen-to-body ratio for more immersive viewing. The display also features 178° wide-view technology to ensure that colors and contrast remain vivid and bold, even when viewed at sharp angles.

Think it, write it!

VivoBook Flip 14 is designed for the ultimate touch experience, and detects the subtlest movements of your fingertips. Stylish design with a durable 360° hinge

To ensure ultimate durability, the precision-engineered stepless 360° metal hinge of the VivoBook Flip 14 was subjected to 20,000-cycle open-and-close tests. So you can rest assured that your VivoBook Flip 14 will be ready for any mode, anytime - for years to come! The stylish VivoBook Flip 14 has an eye-catching aluminum chassis, and is available in Galaxy Blue.
