AGENDA

1. What challenges do we solve?
2. Clients and what they have achieved
3. How we help our customers
4. Summary & Next steps

BARIUM AND OUR OFFERING

- Barium supports all organizations in their desire to achieve operational excellence much faster than traditional way of working.
- We use our long term experience within process automation and provide a platform designed to create tailor made business applications that eliminates poor business processes and manual routines.
- We challenge traditional IT-vendors and their long and costly IT-projects with an agile approach with focus on quality and speed of implementation.
- We are strong believers in the low code platform segment reducing dependency on IT-developers, hence providing a tool for the business side to drive efficiency improvements in an ever changing environment.
- We are trusted by 100 + customers including some of the leading brands in the world.
- We drive digitalization beyond expectations!

WHAT PROBLEM DO WE SOLVE?

Uncoordinated activities
with manual handouts
using Excel, mail, and more

Agile and structured way
of catching current and
future state

Control, transparent and effective way
of working tailored for your unique
needs, automate based on ROI

VASAKRONAN

*"Barium is a puzzle piece in our digital platform that is of
strategic importance and an enabler for us to continuously
create new innovative solutions for a more efficient and
streamlined way of working"*

- Sören Sandell, VASAKRONAN

*"We've created over 20 applications in Barium without writing a
single line of code, and without the help of developers"*

- Anders Gustafsson, ONE NORDIC

barium

COMMON SOLUTION PATTERNS

DIGITAL FORMS

Replace manual or .pdf forms with digital forms, which are also integrated with the underlying process.

ORCHESTRATE

Orchestrate the overall process “on top” of one or more underlying systems

FILL THE GAP AND COMPLETE

Complete functionality to existing IT systems that are often so difficult to change, that the cost will be too high or that the lead time will be too long.

REPLACE OR IMPLEMENT

Replace existing solutions or introduce new digital system support

PROTOTYPE

Quickly test ideas and concepts and then decide if they should continue to be developed and if so, if they should be in Barium Live or be introduced in another system or be completely rejected.

“THE TAIL”

When introducing a large system such as SAP or Oracle, there are needs from the business that are not met until after a long time.

THE GLOBAL RETAIL COMPANY

BUSINESS MUCH FASTER WITH
BARIUM'S **LOW CODE PLATFORM**

barium

EXAMPLE OF **APPLICATIONS** THAT THE GLOBAL RETAIL COMPANY HAVE DEVELOPED USING BARIUMS LOW CODE PLATFORM

HR

- On & Off-boarding
- Competence Mapping

IT/Finance

- Service Transition ITIL
- IT investment request

Supply Chain

- CORS (Communicate Optimal Replenishment Solution)

R&D

- New Product Request
- Request For Order
- Trader Quotation
- Quotation to supplier
- Mapping Market Requirements
- Prototype Shop

Internal services

Several processes digitized

IT INVESTMENT REQUEST

CHALLENGES

- Existing way of working was not sustainable
- Long lead times
- Much paper work with loosely connected documents
- Large geographic distribution of users
- Lack of access to necessary information
- Lack of Information
- Lack of control

VALUE

- User-friendly solution
- Improved processes
- Information security
- Relevant information is always available
- The same solution for all geographies
- Coherent documentation
- No frustration
- 70% more efficient processes
- Implementation time two months from the start to rolled out solution

THE PROJECT – IT INVESTMENT REQUEST

Less than **5 weeks** of consulting work that included:

- Process modelling
- Application construction
- The solution included 13 different roles and 250 employees

PRODUCT INNOVATION

CHALLENGES

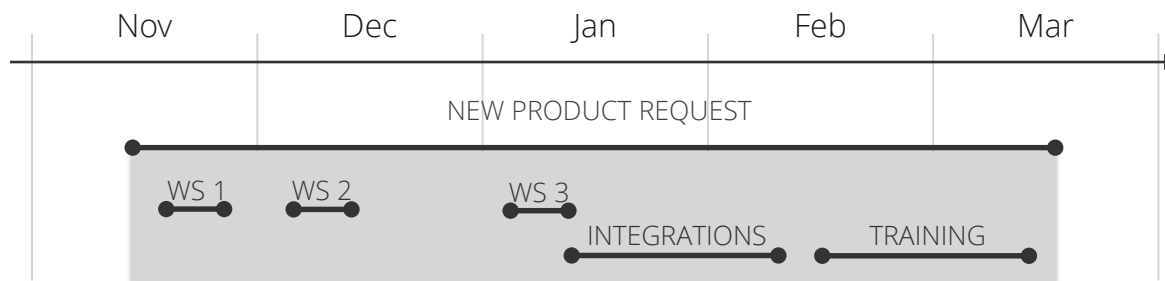

- No overall growth
- Long lead times
- Low delivery precision
- No transparency in product requests from different regions
- Unnecessary work -same product requested and designed for different stores
- Low information quality
- Lack of control

VALUE

- Lead time reduction, from 14-15 to 7-8 months
- Delivery precision improved from 22% to 70%
- Increase from 1,5% to 7% of total sales!
- More than doubled the amount of requests managed
- Total transparency
- Reuse of products already designed/produced
- Stronger control

THE **PROJECT** - PRODUCT INNOVATION

Less than 20 weeks for deploying the first version globally including these activities:

- Process Modelling
- Application Configuration
- Integration with two internal systems
- Employee training at 10 sites around the globe

APOTEKET DEVELOPS APPLICATIONS

BARIUMS **LOW CODE PLATFORM**

barium

DIGITALIZATION AND REPLACEMENT

CHALLENGES

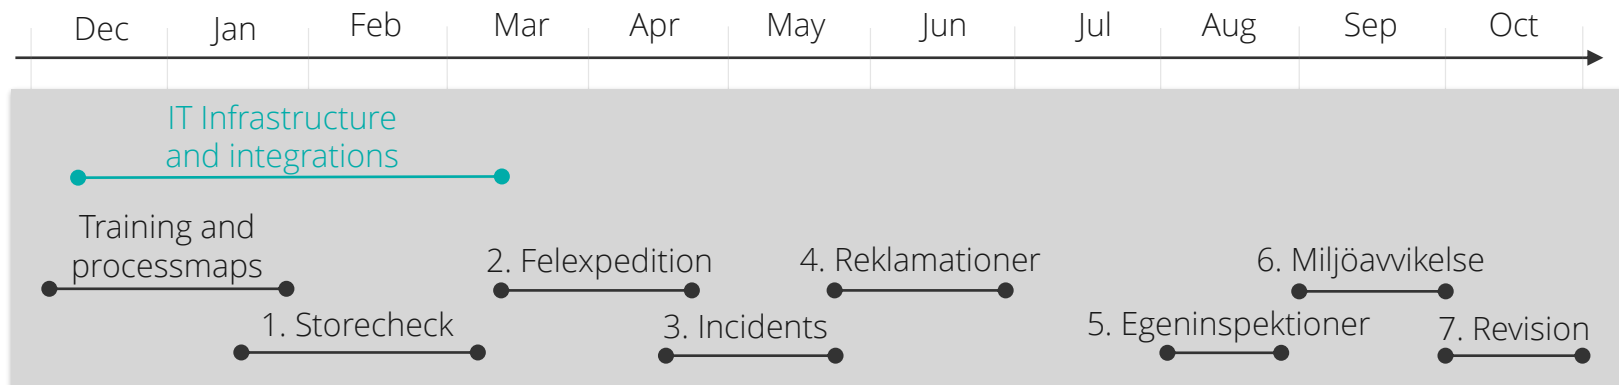

- Old systems
- Not user friendly
- Lack of transparency
- Manual processes
- Lack of control
- Long time from idea to development and implementation of new IT solutions for the business

VALUE

- Develops application to support the business much faster
- More time to support the customers
- Consolidation of IT landscape (shut down 2 old systems)
- Total transparency
- Better control and follow up
- The business is involved and owns and prioritize the backlog
- Modern and future proof tool

THE PROJECT – DIGITALIZATION AND REPLACEMENT

Deployment of **7 applications during 10 months** including these activities:

- Process modelling
- Configuration of the applications
- Integration with two different internal systems for employee and product data.
- Tests, approvals and implementation

HR COMPETENCE MAPPING SOLUTION **REPLACED IN 8 WEEKS**

A.P. Moller - Maersk is an integrated transport and logistics company with multiple brands and is a global leader in container shipping and ports. Including a stand-alone Energy division, the company employs roughly 88,000 employees across operations in 130 countries.

barium

An aerial view of a large Maersk container ship sailing on the ocean. The ship is filled with colorful shipping containers and has "MAERSK LINE" written on its side. The ship is moving from the top right towards the bottom left, leaving a white wake in the dark blue water.

"We choose Barium because it is a cost-efficient,
flexible, easy-to-use, cloud-based solution that
only took weeks to implement"

- Anand Bunsee, Maersk

barium

COMPETENCE MAPPING

CHALLENGES

- Unable to use competence mapping efficiently
- Old software that hindered rather than enabled them
- Time consuming processes
- Impossible to consolidate data
- Large international conglomerate spanning over a vast number of countries with different ways of working

VALUE

- Structured and digital processes for competence mapping
- New and future proof software
- Low code platform that allows the departments to save time
- Ability identify the skills and competence gap in the departments
- It also helps to identify competence map at an individual level
- New assessment tool used worldwide

// It was a challenge to have individual and departmental assessments – therefore we were looking for a **tool that could provide that kind of assessment and overview.**

- Anand Bunsee, Special Advisor Internal Audit.

Arand continues

We still have a legacy application in place for competence mapping from an in-house mapping tool. But when we replaced the old suite, we were forced to change to a new application platform, and that was the time when we chose Barium and their Low Code platform. This was driven mainly from a cost perspective (licenses, services and maintenance costs) but also time to market.

FROM THE DECISION TO IMPLEMENTATION

The IT department was already familiar with the Low Code platform and did not see it as a problem, among other solution alternatives (such as rule playing).

The project group was quite small and consisted of Arand himself, a member of his team, an HR representative plus external IT. The IT department was mainly involved in the procurement process, and since they were in need of a cost-efficient solution, fast they did eventually choose Barium.

The most important factors were as follows:

- Cost
- Flexibility (adapt & change)
- Ease of use
- Accessible around the globe (cloud based)

When the final decision was made, the project could begin, and, already within 2 months, the new solution could be launched globally.

The implementation project involved a small department team (procurement) and one Barium Consultant and technicians and configurations.

THE RESULTS

The new assessment tool is now in operation and used and relied on by the whole department worldwide.

It has helped Maersk identify the skills & competence gap in the department, and it helps them identify the extent of the gap and what improvements that are required in order to meeting requirements etc. It also helps them identify competence gaps at an individual level and to create structured individual development plans. This helps create objective discussions around personal development plans.

The solution enhances the mobility towards the rest of the organization and makes the team more "transparent" in terms of professional and more structured. Arand summarizes the situation in short: It has helped us close the competence gap in our department.

We wish Arand and Maersk good luck on their ongoing voyage to innovation, digitalization and continually improve operations.

barium

HR COMPETENCE MAPPING SOLUTION REPLACED IN 8 WEEKS

Maersk Internal Audit replaces legacy Skills and Competency assessment model in only 8 weeks with Barium's Low Code platform.

At Maersk, Maersk is a truly international conglomerate with around 88,000 employees worldwide and consists of multiple brands within container shipping and associated services such as port operations and energy. In total, the company can be found in approximately 180 countries.

Maersk was founded in Denmark 1904 and has been the largest container ship and supply vessel company in the world since 1976. In 2016, the company consolidated its various business activities under two divisions in Transport & Logistics and Energy.

A global player such as Maersk is always facing fierce competition and challenging demands from its customers. Therefore, the company has deployed lots of initiatives to drive the digital transformation. For example, they have arranged hackathons, created a Digital capability center, launched Maersk Digital and created heavily in software and new technology.

As an example of this movement to new technology, we can relate a successful story from the Department of Internal Audit at the Maersk headquarters.

The Internal Audit department provides assurance over governance, risk and control matters to the board of directors and the audit committees. Their job requires strong knowledge and trust within the organization since the audit committees and the board rely on its assurance that the governance, risk and control processes in place are robust and effective.

THE NEED FOR A NEW SOLUTION

Special Advisor to the head of internal audit at Maersk, Arand Burman, saw an immediate need to replace the current Competence Mapping solution since their shift to a new HR system forced them to re-evaluate the old solution.

The main objective of the solution was to support the personal development plans for each team member and to identify competence gaps for the department.

"We chose Barium because it is a cost-efficient, flexible, easy-to-use, cloud-based solution that only took weeks to implement."

— Arand Burman, Maersk

If Maersk wouldn't have implemented a new tool, they would have had to do all the assessments manually, and this would have been very time-consuming and almost impossible to consolidate all data.

DELIVERY METHODOLOGY -

SPEED OF IMPLEMENTATION ONE OF OUR USP'S!

- We deliver customer value within weeks or months, not months or years like traditional IT projects!
- A normal project consist of three different workshops, typical a day each with some work inbetween.

Summary & next steps

barium

WHY **BARIUM**?

A person is paragliding over a mountain range at sunset. The sky is a mix of blue and orange, and the mountains are silhouetted against the horizon. The paraglider's canopy is large and curved, with a red and white striped pattern. The person is hanging from the bottom of the canopy, and their silhouette is visible against the bright sky.

THANK YOU!

barium

A large, heavy-duty metal safe door is shown, set against a dark, textured background. The door is made of thick metal plates held together by numerous rivets. It features a complex locking mechanism with a central circular dial and several smaller dials and levers. The door is slightly ajar, revealing the interior of the safe. The lighting is dramatic, highlighting the metallic surfaces and the intricate details of the locking system.

BACKUP SLIDES

barium

MARKET DRIVERS

Digital transformation is prompting organizations across industries to look for new ways to meet challenges and drive business outcomes.

Operational Effectiveness

The business have started to work in new way's but the IT-systems don't support the new way of working . They end up with manual ways of working with e-mail, sending Excel spreadsheets to each others. With a low code platform they can accelerate the digitalization of these processes and increase their operational effectiveness.

Innovation

Low code platforms give business users the keys to unlocking process/workflow innovation without having to rely on overworked IT resources to support business change.

Legacy systems and a huge backlogs

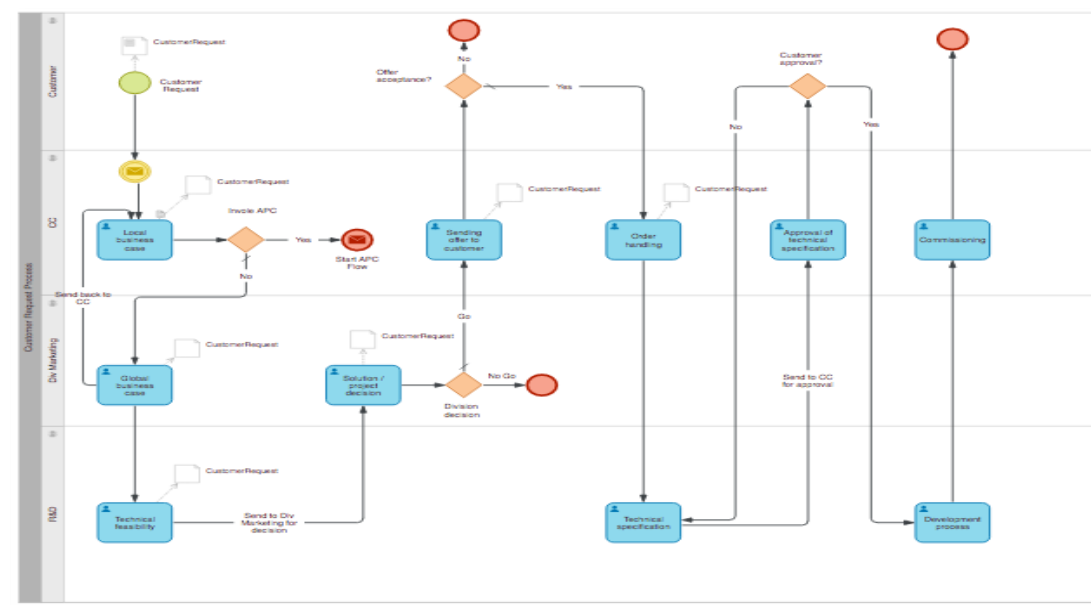

With the pressure on application development and delivery (AD&D) pros for new software to support digital transformation and coders in short supply, low code development platforms have become a solution to accelerate digitalization.

Customer Engagement

Demand for servicing customers more effectively place a significant pressure on many organizations to change. Low code platforms can support the business with digitalizing new ways of working much more effectively.
