# L-SERIES WHEEL LOADERS

524L / 544L / 624L DEERE VERSATILITY MEETS CAPABILITY

#### NEW FRONT-END FEATURES AND MORE

### MEET THE NEW FRONT-RUNNERS.

L-Series Loaders lead the way with new production-boosting features up front, along with a host of other enhancements that help dramatically increase performance.

#### More performance up front

Boasting new bucket and linkage designs that improve load leveling, material retention, and visibility, these loaders deliver more productivity and performance than previous models.

#### **Enhanced production buckets**

A wide selection of enhanced production buckets with integrated spill guards, curved side cutters, and

#### Redesigned cab

New operator station is more spacious and comfortable, and features extra legroom, an improved HVAC system, additional storage, and a more adjustable seat. Or opt for a premium cab with a larger monitor and a heated and ventilated premium seat.

#### New EH controls

Seat-mounted right-hand joystick features two programmable multifunction buttons and new electrohydraulic (EH) controls that are more intuitive to operate compared to our K-Series controls.

### GO ABOVE AND BEYOND

#### LOAD MORE.

Boasting near-parallel lift along with new High-Lift Plus and Tool Carrier configurations, these versatile loaders put more productivity within reach.

#### Standard Z-Bar with parallel lift

Lift path on all Z-Bar linkages has been improved to near parallel for better load-leveling capability. This boosts productivity by minimizing load rollback, reducing material spillage, and requiring fewer manual adjustments.

#### **New Tool Carrier configuration**

Tool Carrier configuration on the 524L and 624L enables a clear view of the coupler and forks, making it easier to quickly move pipes, logs, and pallets.

#### Improved visibility to front tool

Cross-tube and boom geometry of the Z-Bar linkage has been streamlined to provide a better view to the front attachment.

#### New High-Lift Plus configuration

Need even more reach for dumping into higher feeders, hoppers, trucks, and wagons? New High-Lift Plus configuration provides an additional 24 inches in hinge-pin height over standard lift height and 12 inches over the High-Lift model. All three lift heights feature near-parallel lift.

### TONS OF COMFORT

#### TAKE A LOAD OFF.

With redesigned cab and controls, more storage and power ports, and a better HVAC system than earlier models, L-Series Loaders make it easy to work harder with less effort.

#### Get in and get comfortable

All-new cab boasts three more inches of legroom than previous models. Joystick controls, foot pedals, and sealed-switch module are all ergonomically placed for optimal comfort and convenience. Additional 12-volt and USB power ports and mounting points keep all your devices charged up and within easy reach.

#### Stowaway storage

HVAC system has been relocated outside the cab to provide more storage area. There's plenty of space for a powered cooler, along with a handy 12-volt outlet. There's also a Thermos® holder with a Velcro® strap, plus a conveniently placed cupholder. There are even coat hooks.

#### Sit back and relax

Updated in stain-resistant cloth, the standard high-back air-ride seat is even more adjustable, for daylong comfort and support. Or choose the optional heated and ventilated premium seat (standard in the premium cab) with heavy-duty air suspension and adjustable seat pan for even more comfort.

#### Keep things cool

HVAC system is easier to maintain, with convenient filter and service locations. Brushless motor is more reliable and provides infinite fan speeds, quieter operation, and improved airflow. Blower vent behind the seat further improves airflow and defrosts the rear window. Premium cab features automatic temperature control (ATC).

#### See more, do more

Improved visibility to the work tool helps reduce spillage, cycle times, and tool-changeover time. It also helps minimize machine damage when working on crowded jobsites or up against walls.

#### Multi-language color LCD display

A large seven-inch in-cab display with easy-on-the-eyes clarity enables intuitive push-button access to key info. Standard rearview camera displays the activity behind the machine on the LCD screen. Add a dedicated seven-inch rearview display to see the action behind and still have access to vital machine data at all times.

## MORE PRODUCTIVITY, HANDS DOWN

GET IN TOUCH WITH YOUR PRODUCTIVE SIDE.

With redesigned joysticks and expanded, customizable electrohydraulic (EH) controls, maximum productivity is close at hand in an L-Series Loader.

#### Integrated joystick control

Operators can easily control up to six functions without removing their hand from the ergonomically designed joystick. A larger F-N-R button provides convenient direction and full-range gear changes. Two industry-exclusive multifunction buttons can each be programmed to handle any of 10 functions selected through the monitor.

#### Single-axis controls

New low-effort, short-throw control includes two multifunction buttons on the bucket lever that can be programmed to handle any of 10 functions.

#### **Expanded EH functionality**

Operators can easily enable the following EH functions using the multifunction buttons and adjust them through the monitor:

- Soft or hard hydraulic stops for both the boom and bucket can be enabled to prolong machine life or temporarily disabled when the application calls for it.
- Hydraulic-function flow can be used to customize flow for specific attachments without needing special plumbing or valves.
- Bucket vibrate creates a slight vibration when dumping loose materials into hoppers or feeders, or when sprinkling rock over pipe.
- EH Precision mode allows fine metering of the bucket and boom when precise movement is required, for example, laying pipe, moving heavy objects such as road barriers, or placing manholes.
- Attachment configuration allows settings such as hydraulic flow and responsiveness for up to 10 different attachments to be conveniently stored.

#### **New SSM functionality**

Sealed-switch module (SSM) has been repositioned under the monitor so it's in the operator's line of sight. Updated or new functions include:

- Return-to-dig now allows leveling of the bucket from both dump and curl positions, for quick and easy leveling.
- Constant-flow hydraulics allow the operator to continuously run attachments without having to hold a lever or roller at full stop.
- Throttle lock maintains a specified rpm so the operator can warm up a machine, run a continuous-flow attachment, or road the machine without having to hold the throttle pedal down.

EXCLUSIVE

MULTIFUNCTION

JOYSTICK BUTTONS

### **TIGHTFISTED**

#### EASYGOING ABOUT EVERYTHING BUT THE BOTTOM LINE.

#### Reliable electrical and hydraulic systems

Routing for electrical wire harnesses and hydraulic hoses has been improved over the K-Series to reduce rubbing and eliminate leak points, boosting durability and reliability.

#### Same-side ground-level service

All daily service points including fuel are conveniently grouped on the left side of the machine for easy access.

#### Innovative Quad-Cool™ system

Quad-Cool places the radiator, air-conditioner condenser, intercooler, and hydraulic, transmission, and axle coolers (standard on the 624L, optional on the 524L and 544L) in a unique boxed configuration that's isolated from engine heat, boosting efficiency and durability.

#### Diagnostic messaging

Easy-to-navigate LCD monitor displays diagnostic messages if problems occur and even offers possible solutions to help get you back up and running quickly.

#### Efficient cooling

Hydraulically driven fan runs only as needed for better cooling and fuel efficiency. Optional programmable fan automatically reverses at predetermined intervals to eject debris from the radiator and cooler cores. Or set individual cleaning cycles through the monitor.

#### JOHN DEERE WORKSIGHT™

The John Deere WorkSight suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently. The in-base, five-year JDLink™ telematics subscription provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. Other productivity solutions including grade-management and payload-weighing options are also available.

To maximize uptime and lower costs, JDLink telematics also enables John Deere Connected Support.™ John Deere's centralized Machine Health Monitoring Center analyzes data from thousands of connected machines, identifies trends, and develops recommended actions, called Expert Alerts, to prevent downtime. Dealers use Expert Alerts to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | •                                                                                                                                                                                                                                                                                                                                                                            | iance with the local regulations of those countrie Loader operating information is based on machine with identified linkage and standard equipment, PowerTech PVS 6068 (EPA Final Tier 4/EU Stage V) engine, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator. This information is affected by changes in tires, ballast, and different attachments.

| Loader operating information is based on m                                                                                 | achine with identii       | fied linkage and st       | andard equipment          | , PowerTech PVS 6         | 5068 (EPA Final Tie       | er 4/EU Stage V) e        | ngine, ROPS cab, i        | rear cast bumper/         |

Loader operating information is based on machine with identified linkage and standard equipment, PowerTech PVS 6068 (EPA Final Tier 4/EU Stage V) engine, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator. This information is affected by changes in tires, ballast, and different attachments.

\*Rated operating capacity based on Deere attachments only.

Adjustments to Operating Weights and Tipping Loads with Buckets

Adjustments to operating weights, tipping loads, and tires are based on Z-Bar machine with pin-on 2.1-m<sup>3</sup> (2.75 cu. yd.) general-purpose bucket with bolt-on cutting edge, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator\*

Loader operating information is based on machine with identified linkage and standard equipment, PowerTech PVS 6068 (EPA Final Tier 4/EU Stage V) engine, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator. This information is affected by changes in tires, ballast, and different attachments.

Loader operating information is based on machine with identified linkage and standard equipment, PowerTech PVS 6068 (EPA Final Tier 4/EU Stage V) engine, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator. This information is affected by changes in tires, ballast, and different attachments.

#### Adjustments to Operating Weights and Tipping Loads with Buckets

Adjustments to operating weights, tipping loads, and tires are based on Z-Bar machine with pin-on 2.3-m³ (3.0 cu. yd.) general-purpose bucket with bolt-on cutting edge, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator\*

Loader operating information is based on machine with identified linkage and standard equipment, PowerTech PVX 6068 (EPA Final Tier 4/EU Stage V) engine, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator. This information is affected by changes in tires, ballast, and different attachments, and assumes no tire deflection per the standard ISO 14397-1 section 5.

<sup>\*</sup>Rated operating capacity based on Deere attachments only.

Loader operating information is based on machine with identified linkage and standard equipment, PowerTech PVX 6068 (EPA Final Tier 4/EU Stage V) engine, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator. This information is affected by changes in tires, ballast, and different attachments.

<sup>\*</sup>Rated operating capacity based on Deere attachments only.

### Adjustments to Operating Weights and Tipping Loads with Buckets 624L Z-BAR / HIGH-LIFT / HIGH-LIFT PLUS / TOOL CARRIER

Adjustments to operating weights, tipping loads, and tires are based on Z-Bar machine with pin-on 2.7-m<sup>3</sup> (3.5 cu. yd.) general-purpose bucket with bolt-on cutting edge, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator\*

 $While \ general \ information, \ pictures, \ and \ descriptions \ are \ provided, some \ illustrations \ and \ text \ may \ include \ product \ options$ 

while general information, pictures, and oescriptions are provided, some illustrations and text may include product options and accessories NOT AVAILABLE in all regions, and in some countries products and accessories may require modifications or additions to ensure compliance with the local regulations of those countries.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions per ISO 9249.

No derating is required up to 3050- m (10,000 ft.) altitude. Specifications and design subject to change without notice. Specifications with the exception of bucket capacity are in accordance with all applicable ISO standards. Except where otherwise noted, these specifications are based on units with applicable linkage and standard equipment, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full firel tank and 72-kg. (175 lb.) be prestor. full fuel tank, and 79-kg (175 lb.) operator.
