OpenStage 15/15G, OpenStage Key Module 15
HiPath 3000, OpenScape Business,
OpenScape Office

Operating Instructions

Unser Qualitäts- und Umweltmanagementsystem ist entsprechend den Vorgaben der ISO9001 und ISO14001 implementiert und durch ein externes Zertifizierungsunternehmen zertifiziert.

unify.com

Important information

⚠	For safety reasons, the telephone should only be supplied with power:
	• using the original power supply unit.
	  Part number: L30250-F600-C14x (x: 1=EU, 2=UK, 3=US) or
	• in a LAN with PoE (Power over Ethernet), which complies
	  with the IEEE 802.3af standard.

⚠	Never open the telephone or a key module. Should you encounter any problems, consult your administrator.
⚠	Use only original accessories. The use of other accessories may be hazardous and will render the warranty, extended manufacturer's liability and the CE marking invalid.

Trademarks

CE The device conforms to the EU Directive 1999/5/EC as attested by the CE marking.

All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

The correct disposal and separate collection of your old appliance will help prevent potential negative consequences for the environment and human health. It is a precondition for reuse and recycling of used electrical and electronic equipment.

For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service, the shop where you purchased the product or your sales representative.

The statements quoted above are only fully valid for equipment that is installed and sold in the countries of the European Union and is covered by the European Directive 2002/96/EC. Countries outside the European Union may have other regulations regarding the disposal of electrical and electronic equipment.

Location of the telephone

- The telephone should be operated in a controlled environment with an ambient temperature between 5°C and 40°C.
- To ensure good speakerphone quality, the area in front of the microphone (front right) should be kept clear. The optimum speakerphone distance is 50 cm.
- Do not install the telephone in a room where large quantities of dust accumulate; this can considerably reduce the service life of the telephone.
- Do not expose the telephone to direct sunlight or any other source of heat, as this is liable to damage the electronic components and the plastic casing.
- Do not operate the telephone in damp environments, such as bathrooms.

Software update

> During a software update, the phone must not be disconnected from the power supply unit, the LAN line or the phone line.
> An update action is indicated by messages on the display and/or by flashing LEDs.

Product support on the Internet

Contents

General information

About this manual

we highlighted the variables in red. You will see, that quite a bit of display texts are no variables.

This document contains general descriptions of the technical options, which may not always be available in individual cases. The required features must therefore be individually defined in the terms of the contract.

If a particular function on your phone is not available to you as described, this may be due to one of the following reasons:

• The function is not configured for you and your telephone. Please contact your system administrator.
• Your communication platform does not feature this function. Please contact your Unify sales partner for information on how to upgrade.

This user guide is intended to help you familiarize yourself with the OpenStage phone and all of its functions. It contains important information on the safe and proper operation of the OpenStage phone. These instructions should be strictly complied with to avoid operating errors and ensure optimum use of your multifunctional telephone.

These instructions should be read and followed by every person installing, operating or programming the OpenStage phone.

> For your own protection, please read the section dealing with safety in detail. Follow the safety instructions carefully in order to avoid endangering yourself or other persons and to prevent damage to the unit.

These operating instructions are designed to be simple and easy to understand, providing clear step-by-step instructions for operating the OpenStage phone.

Administrative tasks are dealt with in a separate manual. The Quick Reference Guide contains quick and reliable explanations of frequently used functions.

Service

> The Unify service department can only help you if you experience problems or defects with the phone itself.
> Should you have any questions regarding operation, your specialist retailer or network administrator will gladly help you.
> For queries regarding connection of the telephone, please contact your network provider.

If you experience problems or defects with the phone, please dial the service number for your country.

Intended use

The OpenStage phone is a desktop or wall-mounted unit designed for voice transmission and for connection to a LAN. Any other use is regarded as unintended.

Telephone type

The identification details (exact product designation and serial number) of your telephone can be found on the nameplate on the underside of the base unit.
Specific details concerning your communication platform can be obtained from your administrator. Please always have this information to hand when you contact our service department regarding faults or problems with the product.

Speakerphone quality and display legibility

• To ensure good speakerphone quality, the area in front of the microphone (front right) should be kept clear. The optimum speakerphone distance is 50 cm.
• Proceed as follows to optimize display legibility:
  – Turn the phone to tilt the display to ensure you have a frontal view of the display and avoid light reflexes.
  – Adjust the contrast as required → Page 104.

Voice encryption

On HiPath 3000/OpenScape Business (from R 4), OpenScape Office (V1), your OpenStage 15/15G supports voice encryption from software release 2 (V1 R2.xxxx). This allows you to use your OpenStage to conduct calls without the risk of eavesdropping. Voice transmission is encrypted and then decrypted again on the call partner's phone and vice versa.

If "Secure Mode" is enabled on your phone and a connection is established to a phone that does not support voice encryption, the call is not encrypted and is thus not secure.

Your administrator can define in your communication system whether you are notified of unencrypted calls and how → Page 63.

Multi-line telephone, executive/secretary functions

Your OpenStage 15/15G is a "multi-line telephone". This means that multiple lines can be configured by your administrator, which is not the case with single-line phones. Each line is assigned an individual phone number that you can use to make and receive calls.
The programmable keys function as line keys on multi-line phones → Page 86.

When using a multi-line phone to make and receive calls, certain particularities must be taken into account → Page 87 ff.
The executive-secretary configuration is a special case. This is a multi-line telephone with special features (e.g. "Ring transfer" and "Pick up call"), configured especially for executive/secretary use → Page 86ff.

Group functions
For even more efficient telephone functionality, your administrator can configure various team functions such as call pickup, hunt groups and call distribution groups.

Getting to know the OpenStage

The following sections describe the most frequently used controls and displays.

The user interface of your OpenStage 15/15G
1	You can make and receive calls as normal using the **handset**.
2	The **display** permits intuitive operation of the phone → Page 18.
3	**Audio keys** are also available, allowing you to optimally configure the audio features of your telephone → Page 16.
4	☑ **mailbox key** and ☰ **menu key**.
5	The **dialpad** is provided for entering phone numbers/codes.
6	The **navigation keys** are used to operate the phone → Page 16.
7	The **programmable keys** can be assigned functions (e.g. Release) → Page 55.

Using network ports more efficiently

OpenStage 15 has a built-in 10/100 Mbps Ethernet switch.
OpenStage 15G has a 1000 Mbps Ethernet switch. This means that you can connect a PC to the LAN directly via the phone. The option for connecting the telephone and PC must first be activated on the telephone by your administrator.

Network switch   OpenStage 15/15G   PC
Using this connection option saves one network port for each switch used and requires fewer or shorter network cables when arranged correctly.

OpenStage Key Module 15

The OpenStage Key Module 15 is a key module attached to the side of the phone that provides an additional 18 illuminated keys that can only be programmed for phone numbers.
Like keys on the phone, these keys can be programmed with phone numbers and used according to your needs → Page 17.
You can only attach one OpenStage Key Module 15 to your OpenStage 15/15G.

Keys
Audio keys
Key	Function when key is pressed
−	Reduce volume and set contrast brighter → Page 104.
⊲⟩⟩	Turn speaker on/off (with red key LED) → Page 24.
+	Increase volume and set contrast darker → Page 104.

Mailbox key and Menu key
Key	Function when key is pressed
✉	Open mailbox (with red key LED) → Page 19.
≡	Open menu (with red key LED) → Page 21.

Navigation keys

These are used to manage most of your phone's functions and displays.
Key	Function when key is pressed
▲	Open the idle menu → Page 18 or browse back in the menu.
OK	Perform action.
▼	Open the idle menu → Page 18 or browse forward in the menu.

Programmable function keys

Your OpenStage 15/15G has eight illuminated keys to which you can assign functions or phone numbers.

> Increase the number of programmable function keys by connecting a key module → Page 15.

| Peter Fox | |

Depending on how they are programmed, you can use the keys as follows:
- Function keys → Page 55
- Repdial/Direct station selection keys → Page 59

Each key can be programmed with one function.

> The configuration of direct station selection keys must be activated by your administrator.
>
> Direct station selection keys can be assigned an internal number from the HiPath 4000 network.
Press the key briefly to activate the programmed function or dial the stored number.

Hold the key to open the key programming menu → Page 55.

Your OpenStage is delivered with label strips. Write functions or names in the white fields on the label strips.

The status of a function is shown by the LED display for the corresponding function key.

Meaning of LED displays on function keys and DSS keys
LED		Meaning of function key	Meaning of DSS key
▬	Off	The function is deactivated.	The line is free.
☼	Flashing[1]	Indicates the function status.	The line is busy.
▭	On	The function is activated.	There is a call on the line.

1   In this manual, flashing keys are identified by this icon, regardless of the flashing interval. The flashing interval represents different statuses, which are described in detail in the corresponding sections of the manual.

> The programmable keys on multi-line phones function as trunk keys → Page 86.

Dialpad

In cases where text input is possible, you can use the dialpad to input text, punctuation and special characters in addition to the digits 0 to 9 and the hash and asterisk symbols. To do this, press the numerical keys repeatedly.

Example: To enter the letter "h", press the number ⌷4ghi key on the keypad twice.

▌▌▌➡ To enter a digit in an alphanumerical input field, hold down the relevant key.

Alphabetic labeling of dial keys is also useful when entering vanity numbers (letters associated with the phone number's digits as indicated on the telephone spell a name, e.g. 0700 - PATTERN = 0700 - 687837).

Display

Your OpenStage 15/15G comes with a black-and-white LCD display. Adjust the contrast to suit your needs → Page 104ff.

Idle mode

Your phone is in idle mode when there are no calls taking place or settings being made. Example:

```
                                          Time
┌─────────────────────────────┐
│ 10:59            Wed 08 01.14 ─── Date
│ 220870           HiPath 4000 ⬍│
└─────────────────────────────┘
                              Open the idle menu

                              Own phone number
```
Idle menu

In idle mode press the ▲ or ▼ key on the 3-way navigator → Page 16 to display the idle menu. You can call up various functions here. The idle menu includes selected functions from the Program/Service menu → Page 21.

The idle menu may contain the following entries:
- Caller list
- Forwarding on
- Lock phone
- DND on[1]
- Advisory msg. on
- Ringer cutoff on
- Send message
- View sent message[2]
- View callbacks[3]
- Phonebook (system phonebook)
- HF answerback on
- Suppress call ID
- Waiting tone off
- DISA internal

---

1. Must be activated by the administrator.
2. Only appears when there are messages that the recipient has not yet viewed.
3. Only appears if callback requests are saved.

Mailbox

Depending on the type and configuration of your communication platform (consult the relevant administrator), messages from services, such as HiPath Xpressions, are displayed in this application in addition to messages received.

Messages

You can send short text messages to individual internal stations or groups.

In idle mode (→ Page 18) the following signals alert you to the presence of new messages:
- ☐ key LED lights up
- "Messages received" is displayed.

Press the mailbox key ☐.

Example:

Caller ID

Msg. from: Coco, Chanel
Text?

Function menu

Display message
||▶ For a description of how to edit the entries → Page 70.

Voicemail

If your telephone is connected to a voicemail system (such as Entry Voice Mail), the Mailbox key will also light up to alert you to any messages that have arrived.
An appropriate message also appears on the display (for instance, in Entry Voice Mail: „X new messages").

To listen to your voicemail, follow the instructions on the display.

Caller list

If you are unable to accept an external or internal call, the call attempt is stored in the caller list. Answered calls can also be saved (consult your administrator).

Your telephone stores up to ten calls in chronological order. Each call is assigned a time stamp. The oldest entry not yet deleted in the list is displayed first. Multiple calls from the same caller do not automatically generate new entries in the caller list. Instead, only the most recent time stamp for this caller is updated and its number incremented.

The caller list is automatically displayed → Page 38 in the idle menu → Page 18.

▐▐▌➤ Callers with suppressed numbers cannot be saved in the call list.

Information is displayed regarding the caller and the time at which the call was placed.

Example:

Caller ID

10168 PETER
Busy   21.02.   16:25 ⬍

Function menu

	Changeover?	⬍
	Follow-me?	⬍
⊞	Call forw. - follow me?	⬍
⊞	Administrator (Admin)	▲

Further entries are available
The menu structure comprises several levels. The first line in this structure shows the menu currently selected while the second line shows an option from this menu.

Control and monitoring function

A control or monitoring function can be activated on your phone for service purposes by remote maintenance.

Control function

Your administrator has the option to activate and deactivate features of the phone via remote maintenance. During maintenance, the handset, microphone, loudspeaker and headset are deactivated. You are additionally informed on the display that the control function is active.

Monitoring function

In order to detect malfunctioning of a phone, for example, your administrator can install a monitoring function. You can use your phone as normal during monitoring. However you will first be informed about the operation with a message on the display and prompted to allow monitoring.

Basic functions

▐▐▐▶ Please read the introductory chapter "Getting to know the OpenStage"
→ Page 13 carefully before performing any of the steps described here on
your phone.

Accepting a call

Special default ring signaling is set for your telephone:
• When you receive an internal call, your telephone rings once every four
  seconds (single-tone sequence).
• When you receive an external call, your telephone rings twice in rapid
  succession every four seconds (dual-tone sequence).
• When you receive a call from the entrance telephone, your telephone rings
  three times in rapid succession every four seconds (triple-tone sequence).
• If a call is waiting, you hear a short tone (beep) every six seconds.

▐▐▐▶ Your administrator can adjust the ring cadence for external and internal
calls for you. In other words, different ring cadences can be set for
different internal callers.
The number or the name of the caller appears on the display.

Accepting a call via the handset

The phone rings. The caller appears on the screen[1].

➤ Lift the handset.

⊏+⊐ or ⊏−⊐   Raise or lower the volume. Keep pressing the key until the desired volume is set.

---

1. Pay attention to the notes on voice encryption → Page 63.
Accepting a call via the loudspeaker (speakerphone mode)

Suggestions for using speakerphone mode:
- Tell the other party that you are using speakerphone mode.
- The speakerphone works best at a low receiving volume.
- The ideal distance between the user and the telephone in speakerphone mode is about 50 cm (approx. 20 inches).

The phone rings. The caller appears on the screen[1].

◁)) Press the key shown. The LED lights up.

if nec + or − Raise or lower the volume. Keep pressing the key until the desired volume is set.
Ending the call

◁)) Press the key shown. The LED goes out.

Switching to speakerphone mode

Prerequisite: You are conducting a call via the handset.

◁)) ➤ Hold down the key and replace the handset. Then release the key and continue the call.
if nec + or − Adjust the call volume. Keep pressing the key until the desired volume is set.

U.S. mode

If the country setting is set to U.S. (consult your administrator), you do not have to hold down the loudspeaker key when replacing the handset to switch to speakerphone mode.

◁)) Press the key shown.

➤ Replace the handset. Proceed with your call.

if nec + or − Adjust the call volume. Keep pressing the key until the desired volume is set.

Switching to the handset

Prerequisite: You are conducting a call in speakerphone mode.

➤ and ➘ Lift the handset. Proceed with your call.

1. Pay attention to the notes on voice encryption → Page 63.

Open listening in the room during a call

You can let other people in the room join in on the call. Let the other party know that you have turned on the speaker.

Prerequisite: You are conducting a call via the handset.

Activating

◀⊕ Press the key shown. The LED lights up.

Deactivating

◀⊕ Press the key shown. The LED goes out.

Making calls

Off-hook dialing

➤ Lift the handset.

▦ Internal calls: Enter the phone number.
External calls: Enter the external code and the phone number[1].

The called party does not answer or is busy:

➤ Replace the handset.

On-hook dialing

▦ Internal calls: Enter the phone number.
External calls: Enter the external code and the phone number[1].

> Your system may also be programmed so that you have to press the "internal" key before you dial the internal number.
> You then do not have to enter an external code to call the external party (automatic trunk seizure/prime line is not active; consult your administrator).

The other party answers with speaker:

➤ Lift the handset.

or On-hook dialing: Speakerphone mode.

The called party does not answer or is busy:

◀⊕ Press the key shown. The LED goes out.

---

1. Pay attention to the notes on voice encryption → Page 63.

Dialing with repdial keys

Prerequisite: You have saved a number on a repdial key → Page 59.

Press the key with the saved number.
If the number is saved at the second level, press the "Shift" key first[1].

> You can also press the repdial key during a call and automatically initiate a callback → Page 27.

Redialing a number

The last ten external phone numbers dialed are stored automatically.

> If this feature is configured (consult your administrator), account codes entered are also saved → Page 61.

You can redial them simply by pressing a key.

Displaying and dialing saved station numbers

Prerequisite: The "Redial" key is configured.

Press the "Redial" key.

Next?

Keep confirming until the phone number you want appears.

Call?

Select and confirm the option shown[1].

Ending a call

⊲⟩) Press the illuminated key.

or

\   Replace the handset.

---

1. Pay attention to the notes on voice encryption → Page 63.

Rejecting calls

You can reject calls you do not wish to take. The call is then signaled on another definable telephone (consult your administrator).

Prerequisite: The "Release" key is configured. The phone rings. The caller appears on the screen.

▬   Press the "Release" key.

If a call cannot be rejected, your telephone will continue to ring. The message "currently not possible" is displayed (e.g. in the case of recalls).

Turning the microphone on and off

To prevent the other party from listening in while you consult with someone in your office, you can temporarily switch off the handset microphone or the handsfree microphone. You can also switch on the handsfree microphone to answer an announcement via the telephone speaker (speaker call, → Page 34).

Prerequisite: A connection is set up, the microphone is activated. The "Microphone" key is configured

▬   Press the "Microphone" key. The microphone is switched off.

or

▭   Press the illuminated "Microphone" key. The microphone is switched on.

Calling a second party (consultation)

You can call a second party while a call is in progress. The first party is placed on hold.

| Consultation? |

Confirm the option shown.

📳 Call the second party[1].

Return to the first party, the second party does not answer:

| Return to held call? |

Confirm the option shown.

or

End the consultation:

| Quit and return? |

Select and confirm the option shown.

Switching to the held party (alternating)

| Toggle/Connect? |

Select and confirm the option shown[1].

Combining the call parties in a three-party conference

| Conference? |

Select and confirm the option shown.

> ⫸ If voice encryption is not activated or not available on a conference party's phone, the entire conference is not secure. It may be indicated that the call is not secure → Page 63.

Leaving a conference

| Leave conference? |

Select and confirm the option shown.

⫸ For more information on conferences, see → Page 50.

Transferring a call

If the person you are speaking to wants to speak to another colleague of yours, you can transfer the call to that colleague.

| Consultation? |

Confirm the option shown.

📳 Enter the number of the party to whom you want to transfer the call.

📞 Announce the call, if necessary.

📞 Replace the handset.

or

| Transfer? |

Select and confirm the option shown[2].

---

1. Pay attention to the notes on voice encryption → Page 63.
2. "Differing display views in a HiPath 4000 environment" → Seite 111

Forwarding calls

Using variable call forwarding

You can immediately forward internal or external calls to different internal or external telephones (destinations). (External destinations require special configuration in the system.)

▌▶ When call forwarding is active, a special dial tone sounds when you lift the handset.

If DID DTMF is active (consult your administrator), you can also forward calls to this destination. Destinations: Fax = 870, DID = 871, Fax-DID = 872.

If you are a call forwarding destination, your display will show the number or the name of the originator on the upper line and that of the caller on the lower line.

▌▶ Special features must be taken into consideration if your telephone operates with system networking via LAN → Page 100!

▬▬ If configured: Press the "Forwarding" key.

or

▼   Open the idle menu → Page 18.

| Forwarding on? |

Select and confirm the option shown.

| 1=all calls? |

Confirm the option shown.

or

| 2=external calls only? |

Select and confirm the option shown.

or

| 3=internal calls only? |

Select and confirm the option shown.

▥   Enter the destination number.

| Save? |

Confirm the option shown.

| ↳ 100168 |

The call forwarding symbol as well as the phone number and possibly also the forwarding destination name are displayed.

Deactivating call forwarding

▬▬ If configured: Press the "Forwarding" key.

or

▼   Open the idle menu → Page 18.

| Forwarding off |

Select and confirm the option shown.
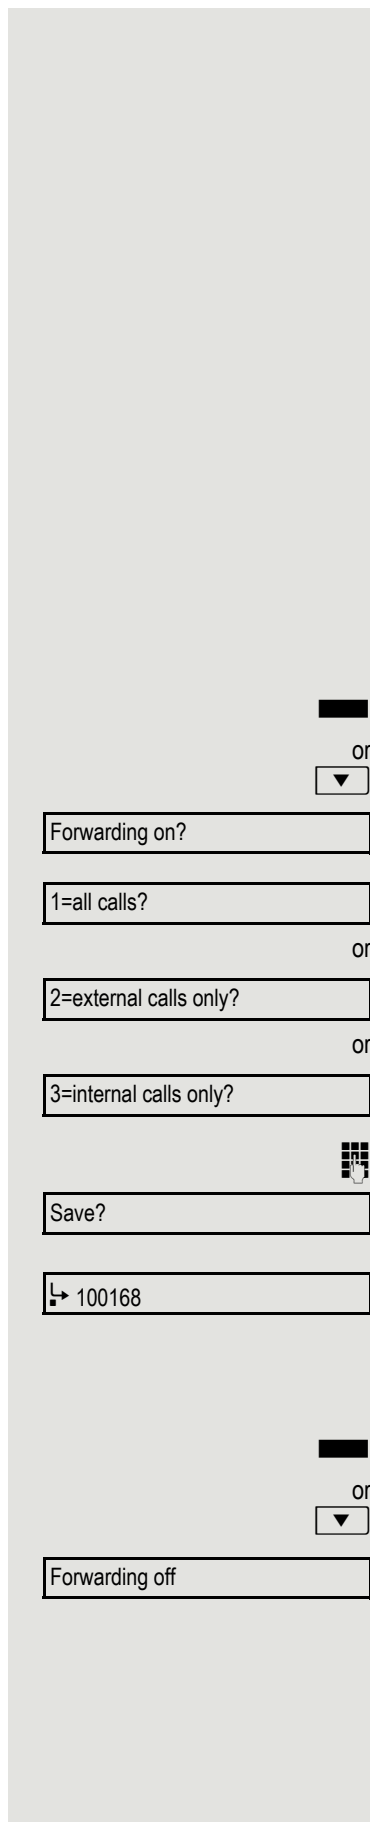

Using call forwarding no reply (CFNR)

Calls that are not answered after three rings (=default, can be adjusted by administrator) or that are received while another call is ongoing can be automatically forwarded to a specified telephone.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Program/Service?	▾

Select and confirm the option shown.

*495=CFNR on?	

Select and confirm the option shown.

📟   Enter the destination number.

- Enter the internal station number for internal destinations
- Enter the external code and the external station number for external destinations

Save?	

Confirm the option shown.

Deactivating call forwarding no reply

Confirm the option shown.

Deactivating call forwarding

Trunk FWD off?

Select and confirm the option shown.

Confirm the displayed call forwarding type.

📱 Enter your DID number.

Using callback

You can request a callback if the internal station called is busy or if nobody answers. This also applies for external calls via ISDN exchanges. This feature saves you from having to make repeated attempts to reach the user.
You receive a callback:

• When the other party is no longer busy,
• When the user who did not answer has conducted another call.

▐▐▶ When configured (consult your administrator), all callback requests are automatically deleted overnight.

Saving a callback

Prerequisite: You have reached a busy line or no one answers.

Callback?

Confirm the option shown.

Accepting a callback

Prerequisite: A callback was saved. Your telephone rings and the following message appears on the display "Callback: ...".

^ Lift the handset.

or

🔊 Press the key shown. The LED lights up.

or

Answer?

Select and confirm the option shown.

You hear a ring tone[1].

2. Pay attention to the notes on voice encryption → Page 63.
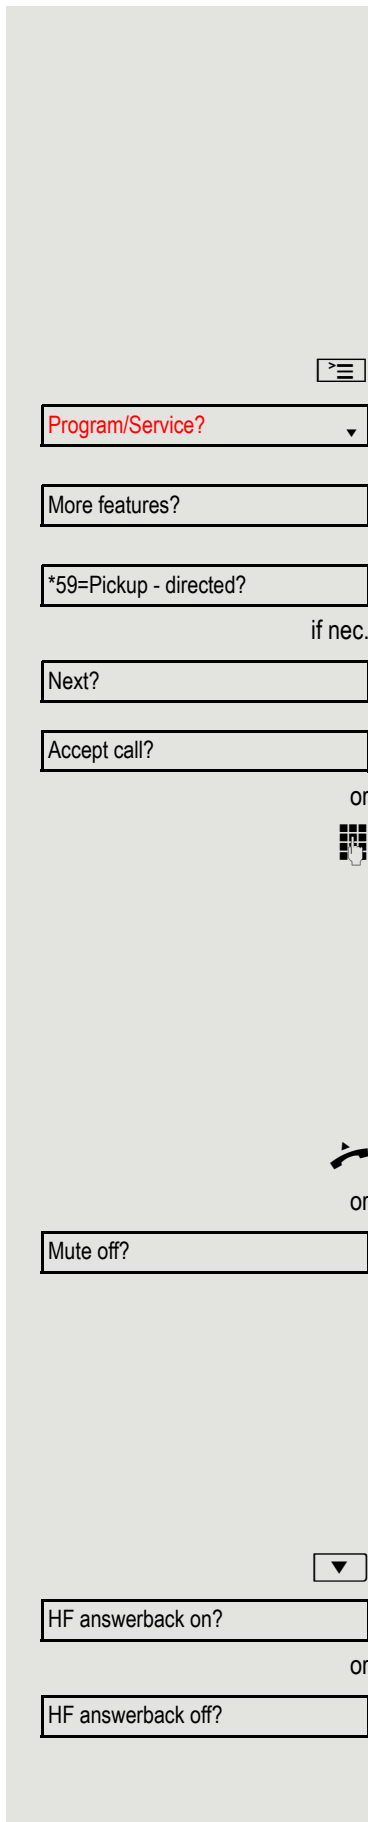

Answering calls from the entrance telephone and opening the door

If an entrance telephone has been programmed, you can use your telephone to speak to someone at the entrance telephone and to activate a door opener. If you have the proper authorization (consult your administrator), you can activate the **door opener**, enabling visitors to open the door themselves by entering a 5-digit code (e.g. using a DTMF transmitter or the keypad installed).

Speaking to visitors via the entrance telephone

Prerequisite: Your telephone rings.

➤ Lift the handset within thirty seconds. You are connected to the entrance telephone immediately.

or

➤ Lift the handset after more than thirty seconds.

📞 Dial the entrance telephone number.

Opening the door from your telephone during a call from the entrance telephone

Open door?

Confirm the option shown.

Opening the door from your telephone without calling the entrance telephone

⊡ Open the menu → Page 21.

Program/Service?	▾

Select and confirm the option shown.

*61=Open door?

Select and confirm the option shown.

📞 Dial the entrance telephone number.

> Special features must be taken into consideration if your telephone operates with system networking via LAN → Page 103!

Opening the door with a code (at the door)

📞 After ringing the bell, enter the five-digit code (using the keypad or a DTMF transmitter). Depending on how the door opener has been programmed, a doorbell call signal may or may not be forwarded.
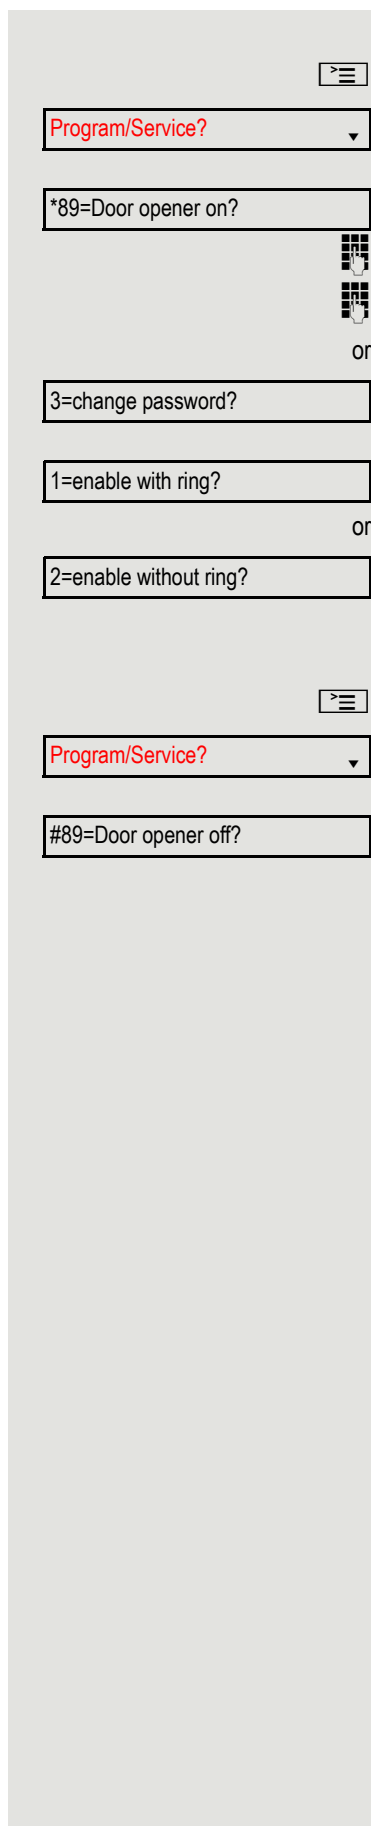

Activating the door opener

⌐≡⌐   Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

*89=Door opener on?   Select and confirm the option shown.

📱   Dial the entrance telephone number.

📱   Enter the five-digit code. Default code = "00000".

or

3=change password?   Select the displayed function and press "OK" to change the code.

1=enable with ring?   Select and confirm the option shown.

or

2=enable without ring?   You can also open the door without a doorbell ring.

Deactivating the door opener

2. Pay attention to the notes on voice encryption → Page 63.
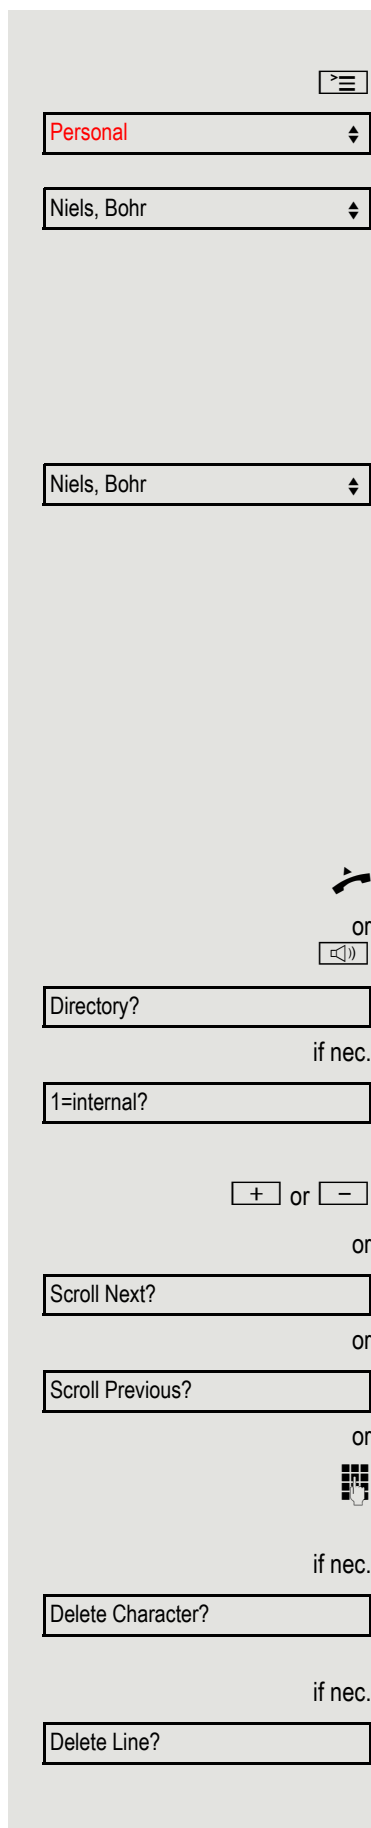

Calling a subscriber from the personal phonebook

‖≣‖ Open the menu → Page 21.

| Personal ‖ ↕ |

Select and confirm to open the local phonebook.

| Niels, Bohr ‖ ↕ |

Select and confirm the relevant entry. The connection is set up (see also → Page 80).

Calling a subscriber from the corporate directory

Prerequisite: You have searched for and selected a subscriber in the corporate directory → Page 83.

| Niels, Bohr ‖ ↕ |

Confirm the subscriber. The connection is set up.

Calling a subscriber from the internal system phonebook

The internal system phonebook of your communication system contains all station numbers and system speed-dial numbers assigned to a name. Consult your administrator to find out if one was configured for your system.

Prerequisite: Names have been assigned to the station numbers stored in the system.

➜ Lift the handset.

or

🔊 Press the key shown. The LED lights up.

| Directory? |

Confirm the option shown.

if nec. If several phonebooks have been configured:

| 1=internal? |

Confirm the option shown.

The first entry is displayed on the screen.

[+] or [−] Scroll to next or previous entry.

or

| Scroll Next? |

Select and confirm the option shown.

or

| Scroll Previous? |

Select and confirm the option shown.

or

📟 Enter the name you want to find, or just the first few letters, using the keypad → Page 18.

if nec.

| Delete Character? |

Select and confirm each letter to be deleted. The last letter entered is deleted. If all letters are deleted, the first entry in the phonebook will be displayed again.

if nec.

| Delete Line? |

Select and confirm the option shown. All entered letters are deleted and the first entry in the phonebook is displayed again.
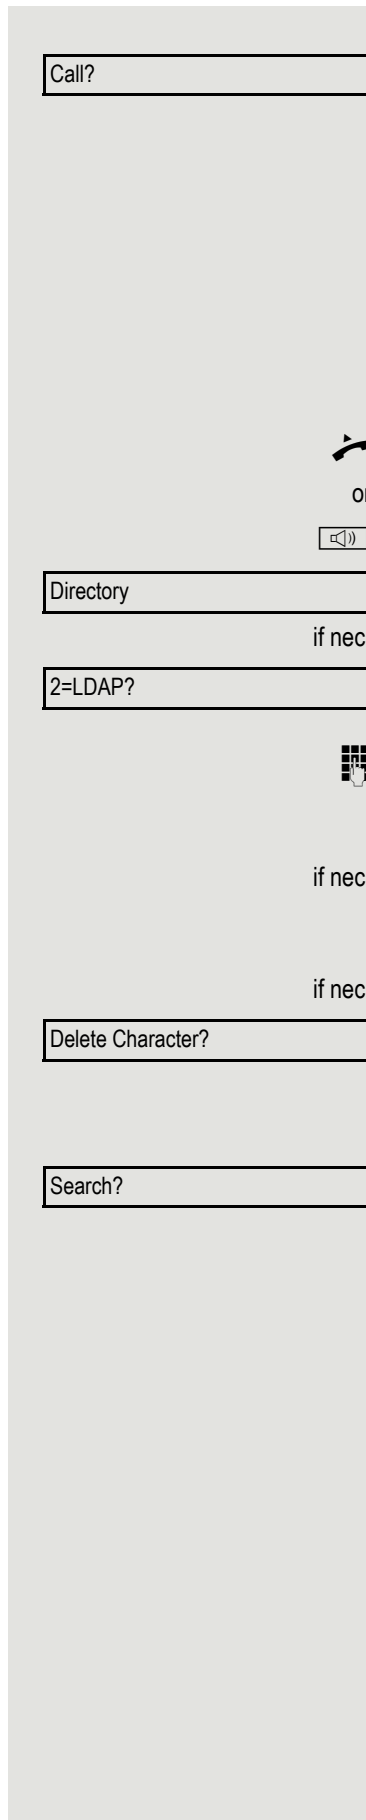

The entry you wish to dial appears on the screen

Call?

Select and confirm the option shown[1].

Using the LDAP directory from the system phonebook

If configured (consult your administrator), you can search for directory data in the LDAP database via the system phonebook of the communication system and dial the number of any subscriber you find there.

Prerequisite: The LDAP search feature has been configured in the system.

➝ Lift the handset.

or

🔊 Press the key shown. The LED lights up.

Directory

Confirm the option shown.

if nec. If several phonebooks have been configured in the system:

2=LDAP?

Select and confirm the option shown.

🎹 Enter the name you wish to search for using the keypad (max. 16 characters) ➝ Page 18.
Partial entries are accepted, for example "Mei" for Meier.

if nec. If configured (consult your administrator), you can also search for last name and first name. To separate last name and first name by a space, enter "0". Partial entries are accepted, for example "Mei P" for "Meier Peter".

if nec.

Delete Character?

Select and confirm each letter to be deleted. The last letter entered is deleted.

> In large databases, the results of the search may be incomplete if too few characters are entered ➝ Page 41.

Search?

Confirm the option shown.
The name is searched for. This may take a few seconds.

---

1. Pay attention to the notes on voice encryption ➝ Page 63.

The result is displayed

If only one name is found, it is displayed.

Call?

Confirm the option shown.

If several names are found (max. 50), the first name is displayed.

⌊ + ⌋ or ⌊ − ⌋   Scroll to the next or previous entry.

or

Scroll Next?

Confirm the option shown.

or

Scroll Previous?

Select and confirm the option shown.

Call?

Select and confirm the option shown[1].

If no name is found

If your search does not yield any name corresponding to your query, you can extend the range of the search, for example by deleting characters.

Modify search?

Select and confirm the option shown.
For further procedure, see above.

If too many names are found

If more than the maximum of 50 names are found corresponding to your query, only an incomplete list of results can be displayed.

You can view these results, select any of the names or change the search (e.g. narrow the search by entering more characters).

> In this case it is advisable to narrow down the search so that all corresponding names can be displayed.

Show matches?

Confirm to view the incomplete list.
For further procedure, see above.

or   Narrow down the search.

Modify search?

Select and confirm in order to change the search.
For further procedure, see above.

1. Pay attention to the notes on voice encryption → Page 63.

Making calls using system speed-dial numbers

Prerequisite: You know the system speed-dial numbers (consult your administrator).

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

*7=Use speed dialing?   Select and confirm the option shown[1].

🕮   Enter a three-digit speed-dial number[2].

if nec.   ## Suffix dialing

🕮   If necessary, you can suffix-dial additional digits (for example, the user's extension) at the end of the saved station number.
If this feature is configured, a suffix is automatically dialed (for example, "0" for the exchange) if no entries are made within 4 or 5 seconds.

Dialing with speed-dial keys

Prerequisite: You have configured speed-dial keys → Page 42.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

*7=Use speed dialing?   Select and confirm the option shown[1].

$\boxed{\ast}$ Press the key shown.

🕮   Press the required speed-dial key[2].

Configuring a speed-dial key

You can program the keys $\boxed{0+}$ to $\boxed{9_{wxyz}}$ with ten frequently used phone numbers.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

*92=Change speed dial?   Select and confirm the option shown[1].

Change?   Confirm the option shown.

$\boxed{\ast}$ Press the key shown.

🕮   Press the required speed-dial key. If the key is already in use, the programmed phone number appears on the screen.

Change   Confirm the option shown.

🕮   First enter the external code and then the external station number.

Save   Confirm the option shown.

---

1. "Differing display views in a HiPath 4000 environment" → Seite 111

Exit?	Select and confirm the option shown.

Talking to your colleague with a speaker call

You can make a speaker announcement through a loudspeaker if connected (consult your administrator) or to an internal user with a system telephone without any action on their part.

▼ Open the idle menu → Page 18.

*80=Speaker call? Select and confirm the option shown.

Enter the phone number.

Responding to a speaker call → Page 34.

Talking to your colleague with discreet calling

If this function has been configured (consult your administrator), you can join an ongoing call conducted by an internal user on a system telephone with display. You can listen in unnoticed and speak to the internal user without being overheard by the other party (discreet calling).

➤ Lift the handset.

`✳ 9wxyz 4ghi 5jkl` Enter the code.

▓ Enter your internal station number.

▐▐▶ Your administrator can protect your telephone against discreet calling.

Automatic connection setup (hotline)

If this function is configured (consult your administrator), the system automatically sets up a connection to a preset internal or external destination.

➤ Lift the handset.
Depending on the setting, the connection is either set up **immediately** or only **after** a preset **period of time** (= hotline after a timeout).

Reserving a trunk

If configured (consult your administrator), you can reserve an occupied line for yourself. When the line is free, you receive a call and a note on the display.

Prerequisite: "Currently busy" appears on the display.

| Reserve trunk |

Confirm the option shown.

Reserved line is free:

Your telephone rings. "Trunk is free" appears on the display.

➤ Lift the handset. You will hear the dial tone.

▓ Enter the external phone number.
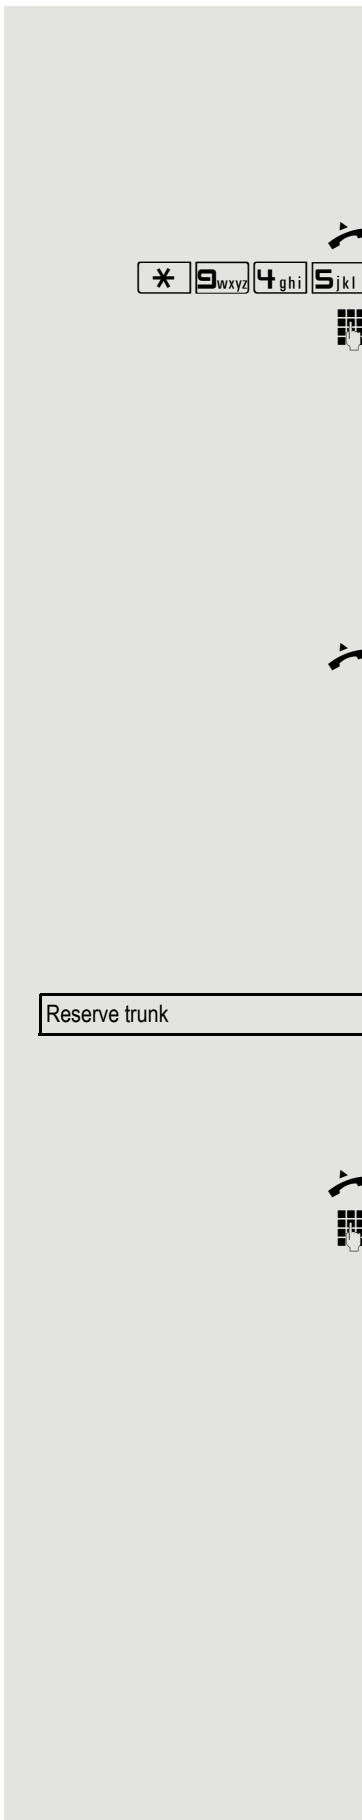

Assigning a station number (not for U.S.)

If this function has been configured (consult your administrator), you can selectively assign a specific number (DID number) to your telephone before making an external call. The assigned number then appears on the called party's display.

$\boxed{\geq}$ Open the menu → Page 21.

Program/Service?	▾

Select and confirm the option shown.

*41=Temporary MSN?	

Select and confirm the option shown.

📟   Enter the DID number you wish to use.

📟   Dial the external number.

Associated dialing/dialing aid

If this function has been configured (consult your administrator), you can use a dialing aid to dial numbers and set up calls for your telephone.
The operating procedure depends on whether the dialing aid is connected to the **S$_0$ bus** or the **a/b (T/R) port.**

You can also use your system telephone as a dialing aid for other telephones.

Dialing aid on the S0 bus

On the PC, select a destination and start dialing.

↰   The speaker on your telephone is switched on. Lift the handset when the other party answers.

Dialing aid at the a/b (T/R) port

On the PC, select a destination and start dialing.

"Lift the handset" appears on the PC screen.

↰   Lift the handset.

Dialing aid from your telephone for another telephone:

$\boxed{\geq}$ Open the menu → Page 21.

Program/Service?	▾

Select and confirm the option shown.

*67=Associated dialing?	

Select and confirm the option shown.

📟   Enter the internal station number ("Call for:").

📟   Enter the number you wish to dial.

During a call

Using call waiting (second call)

Callers can still reach you while you are conducting another call. A signal alerts you to the waiting call.
You can ignore or accept the second call.
When you accept the waiting call, you can either end the first call or place it on hold and resume the call later on.
You can also block the second call or the signal tone → Page 47.

Prerequisite: You are conducting a phone call and hear a tone (approx. every six seconds).

Ending the first call and answering the waiting call

⌒ Replace the handset. Your phone rings[1].

☎ Answer the second call. Lift the handset.

Placing the first call on hold and answering the second call

| Call waiting? |

Select and confirm the option shown[1].

You are connected to the second caller. The first party is placed on hold.

Ending the second call and resuming the first one

| Quit and return? |

Confirm the option shown.

or

⌒ Replace the handset.

| ↩● 23189 Coco |

Recall the first party.

☎ Lift the handset.

---

1. Pay attention to the notes on voice encryption → Page 63.

Preventing and allowing call waiting (automatic camp-on)

If this function has been configured (consult your administrator), you can prevent or allow a second call → Page 46 from being signaled by automatic camp-on during an ongoing call.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service? ▾

#490=Call wait.trm.off?

Select and confirm the option shown[1].

or

*490=Call wait.trm.on?

Select and confirm the option shown.

Turning the call waiting tone on and off

You can suppress the call waiting tone (approx. every six seconds) for second calls. A single special dial tone then alerts you to the waiting call.

Activating

$\boxed{\blacktriangledown}$ Open the idle menu → Page 18.

Waiting tone off?

Select and confirm the option shown.

Deactivating

$\boxed{\blacktriangledown}$ Open the idle menu → Page 18.

Waiting tone on?

Select and confirm the option shown.

Saving a number

You can save your call partner's station number for subsequent redialing from the caller list → Page 38.

Prerequisite: You are conducting a call.

Save number?

Select and confirm the option shown.

---

1. "Differing display views in a HiPath 4000 environment" → Seite 111

Parking a call

You can park up to ten internal and/or external calls. Parked calls can be
displayed and picked up on another telephone. This feature is useful,
for example, if you want to continue a call at another phone.

Prerequisite: You are conducting a call.

| ⌐≡ | Open the menu → Page 21.

Select and confirm the option shown.

Select and confirm the option shown.

| ⬜+ ... ⑨wxyz | Enter the number of the park position (0 - 9) and make a note of it. If the park
position number you entered is not displayed, it is already in use; enter another
one.

Retrieving a parked call

Prerequisite: One or more calls have been parked. The phone is idle.

| ⌐≡ | Open the menu → Page 21.

Select and confirm the option shown.

Select and confirm the option shown[1].

| ⬜+ ... ⑨wxyz | Enter the park position number you noted earlier.
If the park position number you enter is not in use, you cannot retrieve the call.

> If a parked call is not picked up, after a specific period of time the call is
> returned to the telephone from where it was parked (recall).

Holding external calls

If you have programmed a hold key on your phone → Page 55, you can put external calls on hold.
All other stations can then pick up the call on the assigned line.

▬   Press the "Hold" key.

Held on line: 801

The message of the relevant trunk appears (e.g. 801); note the trunk number.
If available, the LED of the assigned trunk key flashes slowly.

if nec.

➣ or ⌫   Replace the handset or press the key shown.
Depending on the configuration, this may be necessary so other members can also pick up the call on hold.

Accepting call on hold

Prerequisite: One or more calls are on hold. The phone is idle.

▤≡   Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

Retrieve line   Select and confirm the option shown.

or

▬   If the "Retrieve" key → Page 55 is available, press it.

▦   Enter the noted trunk number.

or

☀   If there is a "Line:" key available for the relevant trunk, the LED flashes slowly.
Press the key shown.

Conducting a conference

In a conference call, you can talk to as many as four other parties at the same time. These may be internal or external users.

▥▶ You can only add parties to or remove them from a conference if you initiated the conference.

::: Call the first party.

| Start conference? |

Select and confirm the option shown.

::: Call the second party. Announce the conference.

| Conference? |

Select and confirm the option shown.

A tone sounds every 30 seconds to indicate that a conference is in progress (can be disabled, consult your administrator).

▥▶ If voice encryption is not activated or not available on a conference party's phone, the entire conference is not secure. It may be indicated that the call is not secure → Page 63.

If the second party does not answer

| Return to held call? |

Confirm the option shown.

Adding up to five parties to a conference

| Add party? |

Confirm the option shown.

::: Call the new party. Announce the conference.

| Conference? |

Select and confirm the option shown.
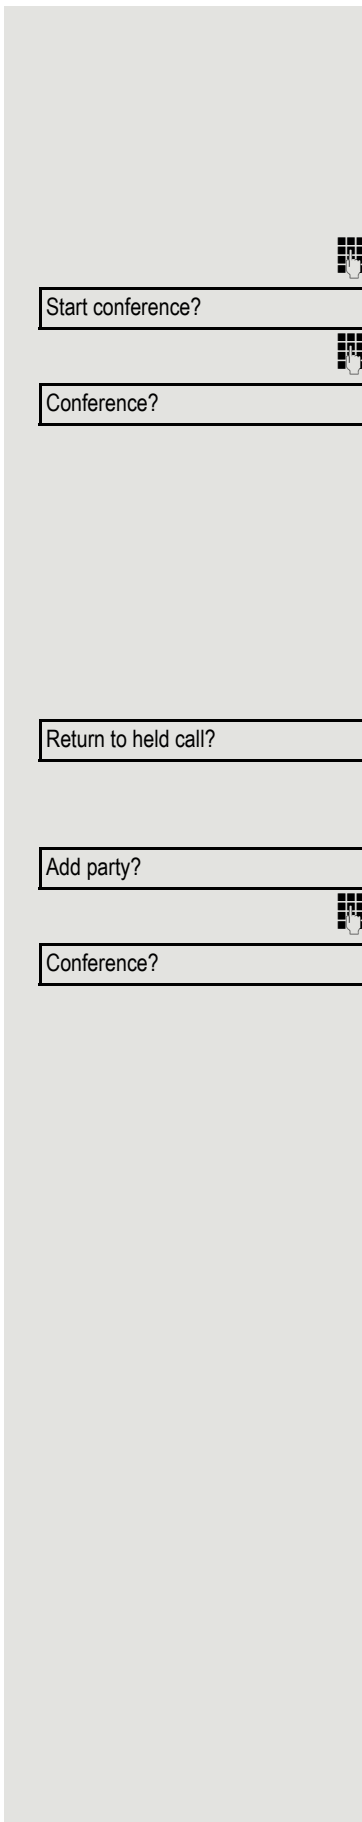

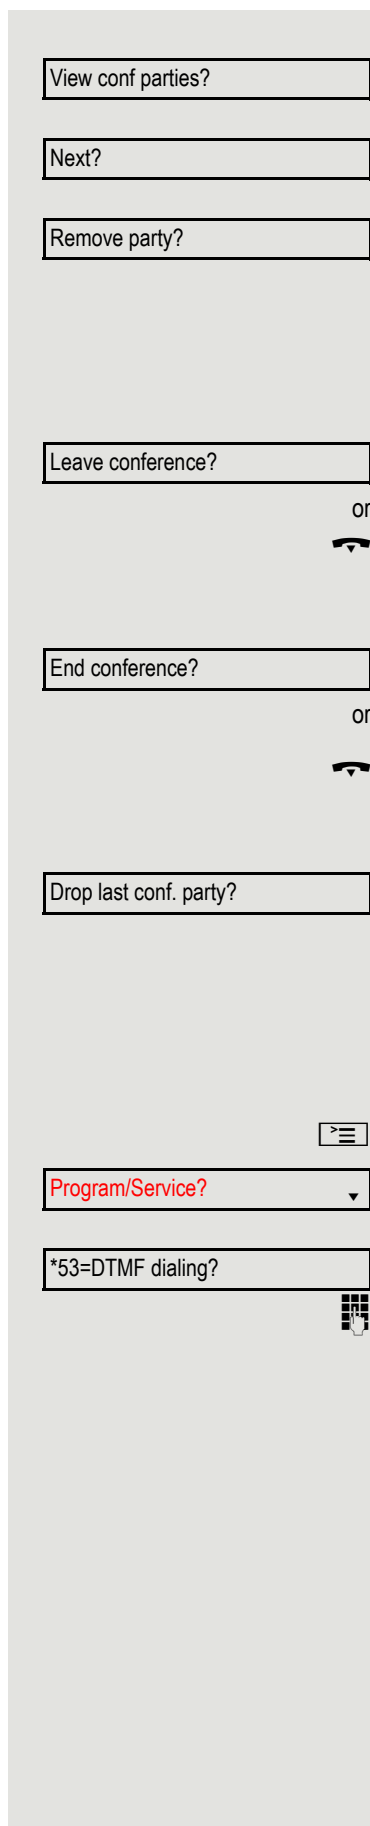

Removing parties from the conference

| View conf parties? |

Select and confirm the option shown. The first party is displayed.

| Next? |

Confirm as often as required until the desired party appears.

| Remove party? |

Select and confirm the option shown.

> If a participant who was connected to the conference via an unencrypted line leaves, the conference remains unsecured.

Leaving a conference

| Leave conference? |

Select and confirm the option shown.

or

🔚 Replace the handset if this feature is configured (consult your administrator).

Ending a conference

| End conference? |

Select and confirm the option shown.

or

🔚 Replace the handset if this feature is configured (consult your administrator).

Removing the central office party from the conference

| Drop last conf. party? |

Select and confirm the option shown.

Activating tone dialing/DTMF suffix dialing

You can transmit **d**ual-**t**one **m**ultifrequency (DTMF) signals to control devices such as an answering machine or automatic information system.

$\boxed{\geq}$ Open the menu → Page 21.

| Program/Service? ▾ |

Select and confirm the option shown.

| *53=DTMF dialing? |

Select and confirm the option shown.

📲 You can use the keys $\boxed{0+}$ through $\boxed{9_{wxyz}}$, $\boxed{*}$ and $\boxed{\#}$ to transmit DTMF signals.

> Ending the call also deactivates DTMF suffix dialing.
> Your system may be configured so that you can start DTMF suffix dialing immediately after setting up a connection.

Recording a call

If configured (consult your administrator for details), you can record an active call.

Prerequisite: You are on a call, the "Recording" key is configured → Page 55.

Press the "Recording" key. The LED lights up.

You and the other party hear an announcement that recording has started and as long as recording is still running, you hear an acoustic signal approx. every 15 seconds.

▌▌▊▶ During recording, it is not possible to add further call parties.

Stopping recording

Press the illuminated "Recording" key. The LED goes out.

Listening to a recording

Playback of the recording depends on the voice recording system used (see the relevant user manual).

Transferring a call after a speaker call announcement in a group

If this function has been configured (consult your administrator), you can use a speaker call (announcement → Page 43) to announce a call in progress to a group of users → Page 94.
Once a member of the group has accepted the call request, you can transfer the waiting party.

Prerequisite: You are conducting a call.

Consultation?

Confirm the option shown. The other party is placed on hold.

▼

Press the key shown.

*80=Speaker call?

Select and confirm the option shown.
Enter the group's station number.

Announce the call.
When a member of the group accepts the call → Page 34, you are connected to this party.

Replace the handset.

or

Transfer?

Select and confirm the option shown[1].

▌▌▊▶ If the connection between the two other parties is not established within 45 seconds, the call from the first party returns to you (=recall).

---

1. "Differing display views in a HiPath 4000 environment" → Seite 111

Sending a trunk flash

To activate ISDN-type services and features through the network carrier's analog trunks or those of other communication platforms (such as "consultation hold"), you must send a signal to the trunks before dialing the service code or telephone number.

Prerequisite: You have set up an external connection.

$\boxed{\ni}$ Open the menu → Page 21.

Program/Service? Select and confirm the option shown.

*51=Trunk flash? Select and confirm the option shown.

Enter the service code and/or telephone number.

If you cannot reach a destination

Call waiting (camp-on)

Prerequisite: You have dialed an internal number and hear a busy signal. It is important that you reach the called party.

Camp-on Wait (approx. 5 seconds) until "Camp-on" appears on the display and the busy tone is followed by the ring tone.

The called party can then respond → Page 46.

The called party can prevent this automatic call waiting → Page 47.

If this feature is configured (consult your administrator), you will hear the ring tone and the message "Camp-on" is immediately displayed.

Busy override - joining a call in progress

This function is only available if it has been configured (consult your administrator).

Prerequisite: You have dialed an internal number and hear a busy signal. It is important that you reach the called party.

Override? Select and confirm the option shown.

The called party and person to whom this party is talking hear an alerting tone every two seconds.
If the called party has a system telephone with display, the following appears on the screen: „Override: (Number or name)".

You can now start talking.
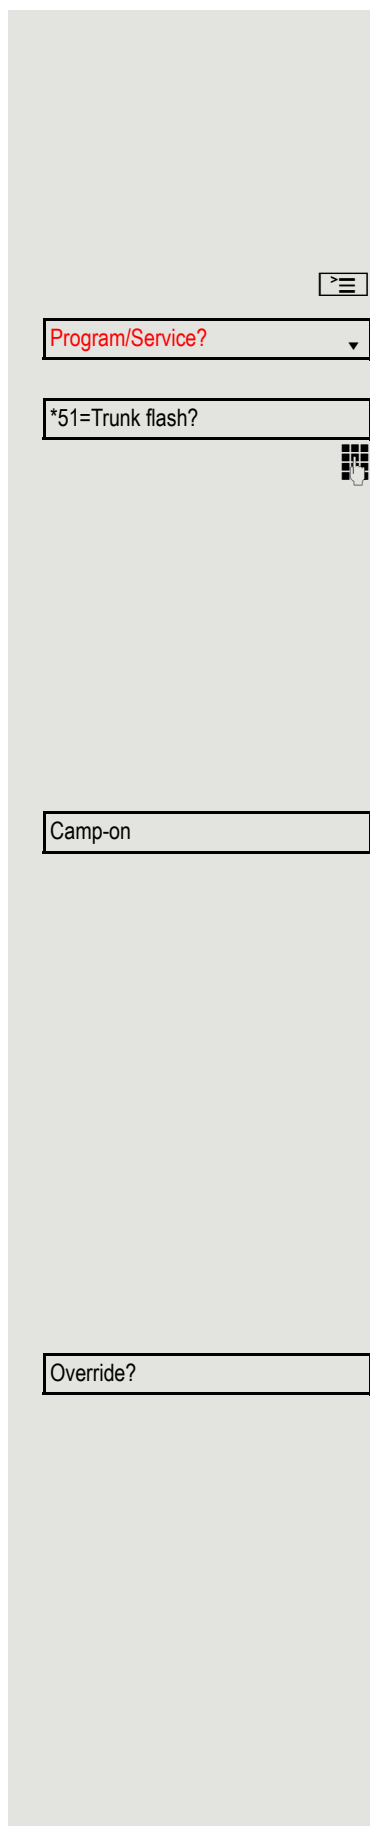

Using night answer

When night answer mode is active, for example during a lunch break or after office hours, all external calls are immediately forwarded to a specific internal telephone (night station). The night station can be defined by your administrator (= standard night answer service) or by you (= temporary night answer service).

▮▮▶ Special features must be taken into consideration if your telephone operates with system networking via LAN → Page 101!

Activating

Night answer on?

Select and confirm the option shown.

*=default?

Press the "OK" dialog key to confirm (= standard night answer service).

or

$\boxed{\ast}$ Enter the code (= standard night answer service).

or

📱   Enter the destination number (= temporary night answer service).

Save?

Confirm the option shown.

Deactivating

Night answer off?

Select and confirm the option shown.

The administrator can also configure an "automatic night answer service". The automatic night answer service activates at specific times for your telephone depending on how it is programmed.
You can deactivate the automatic night answer service or replace it with a night answer service you configured (see above).

Programming the function keys

You can program frequently used functions, station numbers or procedures onto the function keys on your OpenStage 15 or key module.

Configuring function keys

See also → Page 17.

▥▶ A list of all available functions is displayed, see the overview → Page 56.

Example: Programming the Shift key

⊡ Open the menu → Page 21.

| Program/Service? ▾ |

Select and confirm the option shown.

| *91=Prog. feature key |

Select and confirm the option shown.

▬ Press the key shown.

| Change key |

Confirm the option shown.

| More features ➔ |

Select and confirm the option shown.

| Shift key |

Confirm the option shown.

if nec.

| Save incomplete |

Select and confirm the option shown.

Some functions (e.g. with "Call forwarding") can be saved even if they are incomplete. This means that when later initiating the function by pressing the button, further inputs are required.

| Exit |

Confirm the option shown.

or

| Another key |

Select and confirm the option shown.

The label appears automatically and cannot be changed for the Shift key. It can be changed for all other functions.

The LED displays show the status of the function → Page 17 and → Page 56.
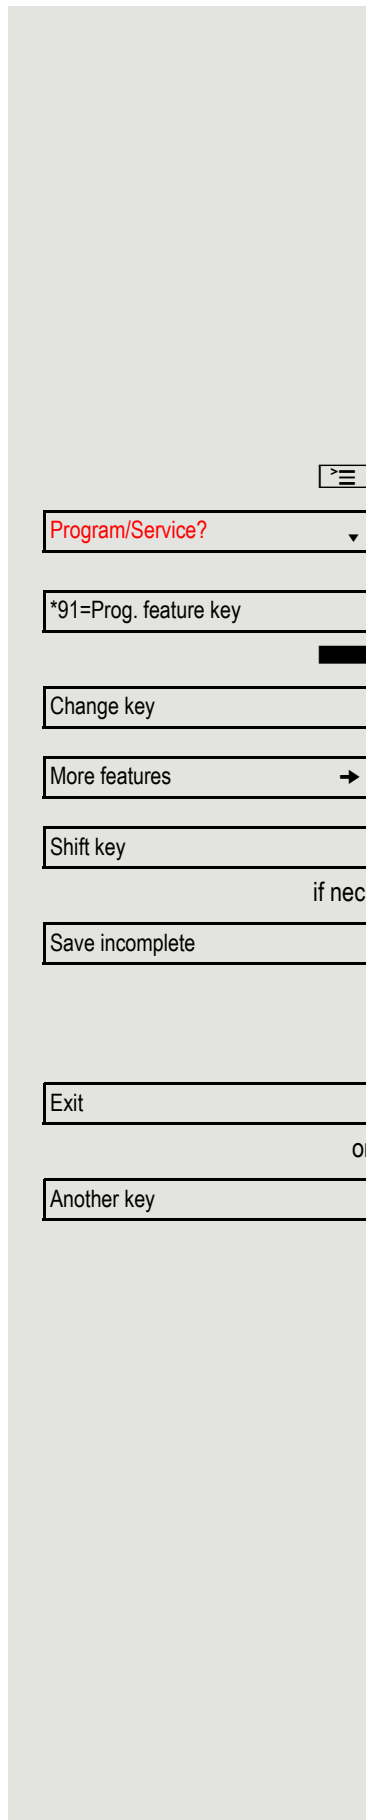

Overview of functions

The functions are split into the following menus:

• Destinations
• Control Relay
• PIN and Authorization
• Calls
• More Features

▬▶ The available functions depend on your configuration. If a function is missing, consult your administrator.

Saved function LED messages

Call forwarding, Forwarding - trunk, Forward line, Night answer, Do not disturb, Telephone lock, Advisory message, Ringer cutoff, HF answerback on/off, Join/leave group, Caller ID suppression, Call wait.trm., Waiting tone off, Ring transfer, Recording, Door opener on/off, Control relay (only for HiPath 3000), Ringing group on, Shift key, UCD (Available on/off, Work on/off), Night answer on/off, MULAP privacy release:

Displaying and assigning call charges

Displaying call charges (not for U.S.)

For the current call:

Call charges are shown by default on the display when a call ends.
If you want to display call charges as they occur during a chargeable call, your administrator must request this option from the network operator.
Call charge display must be requested from the network operator and configured by the relevant administrator.
Depending on the setting, call charges are displayed during or after a call.
Depending on the network operator, free external calls are also displayed. The message "Free of Charge" appears on the screen either before or during the call.
If the cost indication facility has not been installed, the display will show the dialed number and/or the duration of the telephone call.

> If a call is forwarded, call charges are assigned to the destination of the call transfer operation.

For all calls and for the last call

Connection charges for the last chargeable call made are displayed first. After five seconds, the accumulated connection charge (total) is displayed.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

*65=Show call charges?   Select and confirm the option shown[1].

Displaying call charges for another telephone (not for U.S.)

If configured (consult your administrator), you can also display and print information on chargeable calls for other phones (such as a pay phone).

Prerequisite: You have programmed the function "Show call charges" on a key → Page 55.

The LED lights up to indicate that you have conducted a chargeable call since the last time you viewed the charges.

━━   Press the "Call Charges" key. Chargeable calls are displayed.

**Next**   Press to display further chargeable calls.

Print   Select and confirm the option shown.

       or

Activating/deactivating "Do not disturb"

If you do not wish to take calls, you can activate do not disturb. Internal callers hear the busy tone, external callers are connected to another phone, which you can specify (consult your administrator).

Activating

▼ Open the idle menu → Page 18.

DND on?

Select and confirm the option shown.

Deactivating

▼ Open the idle menu → Page 18.

DND off?

Confirm the option shown.

> When you lift the handset, you will hear a special tone (continuous buzzing) reminding you that "Do not disturb" is activated.
>
> Authorized internal callers automatically override the DND feature after five seconds.

Caller ID suppression

You can prevent your station number or name from appearing on the displays of external parties you call. The feature remains active until you deactivate it.

Activating

▼ Open the idle menu → Page 18.

Suppress call ID?

Select and confirm the option shown.

Deactivating

▼ Open the idle menu → Page 18.

Restore caller ID?
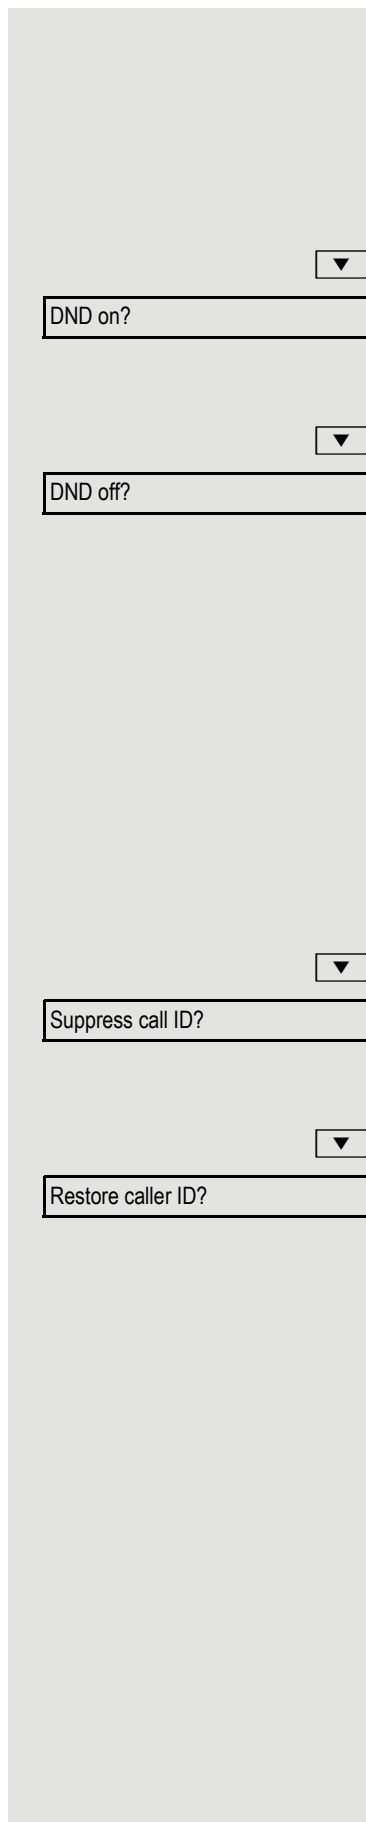

Select and confirm the option shown.

> Your administrator can activate/deactivate caller ID suppression for all phones.

Monitoring a room

You can use a phone to monitor a room. This function must be enabled on the monitoring phone.
When you call this phone, you can immediately hear what is happening in that room.

Activating the telephone to be monitored

$\boxed{>≡}$ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service?

*88=Room monitor?

Select and confirm the option shown.

You can either leave the telephone in speakerphone mode or lift the handset and leave it directed towards the noise source.

Deactivating the telephone to be monitored

$\boxed{>≡}$ Press the illuminated key. The LED goes out.

or

←   Replace the handset.

Monitoring the room

Enter the internal station number of the phone located in the room that you wish to monitor.

Trace call – identifying anonymous callers (not for U.S.)

You can identify malicious external callers. You can record the caller's phone number during a call or for up to 30 seconds after a call. You should not hang up in the process.
$\boxed{>≡}$ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service?

*84=Trace call?

Select and confirm the option shown.

> If the trace is successful, the transmitted data is stored by your network operator. Consult your administrator.

Locking the telephone to prevent unauthorized use

You can prevent unauthorized parties from accessing certain functions on your phone during your absence, for example you can prevent external phone numbers being dialed or your mailbox being accessed. Consult your administrator to determine which functions are locked.
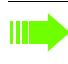

Locking the phone

▼   Open the idle menu → Page 18.

Lock phone?

Select and confirm the option shown.

or

Unlock phone?

Select and confirm the option shown.

📟   Enter code (telephone lock) → Page 67.

> When the phone is locked, a special dial tone sounds when the handset is lifted. Internally, users can make calls as normal.
>
> Your phone can also be locked or unlocked by an authorized party → Page 66.

Unlocking the phone

▼   Open the idle menu → Page 18.

Unlock phone

Select and confirm the option shown.

📟   Enter code (telephone lock) → Page 67.

Locking another telephone to prevent unauthorized use

If configured (consult your administrator), you can lock and unlock other telephones to prevent unauthorized access.

If a phone user locks his or her phone and forgets the PIN code, you can use this function to unlock the phone.
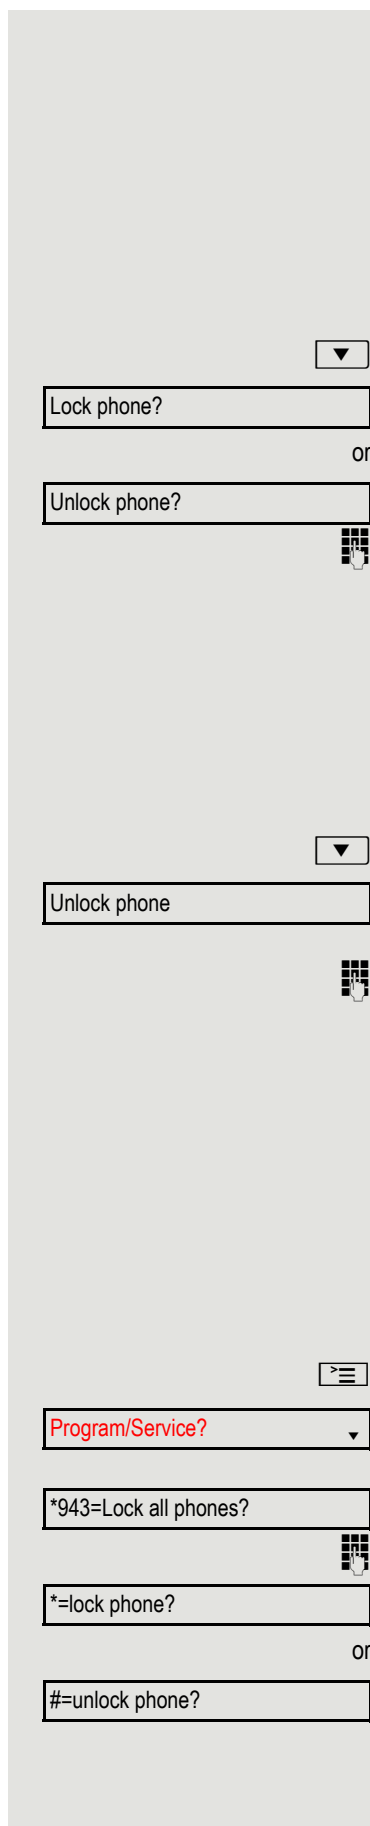

▤   Open the menu → Page 21.

Program/Service?	▾

Select and confirm the option shown.

1. "Differing display views in a HiPath 4000 environment" → Seite 111

Using a mobile phone number at a random phone

You can program a mobile phone number that was set up especially for you by your administrator at a system-based OpenStage phone of your choice. The original "guest telephone" setting is deactivated. The mobile phone number remains available until you log off from the "guest telephone".

Logging on to the "guest telephone"

Log on to the "guest telephone" with a mobile phone number.

Prerequisite: You received a mobile phone number and, where applicable, a password (consult your administrator).

📳 Enter the code for "Mobile Login (Log on)", see → Page 123).
You see the prompt "New number".

📳 Enter the mobile phone number.
You are prompted to enter the "Code for **nnn** (e.g. 834):

if nec. 📳 Enter the password and confirm.

or

| # | Press the key shown.

or

| Entry complete | Confirm the option shown.

The logon procedure begins.

Your mobile phone number will appear on the left of the display when you are correctly logged on → Page 18.

You can no longer see the original user settings for the "guest telephone" but you can now use your mobile connection. Entries are only temporarily saved in the call lists and personal phonebook, in other words they are no longer there the next time you log on.
Moving the connection to the next telephone

If you want to move your connection from the first "guest telephone" to a second "guest telephone", log on to the second "guest telephone" in the usual fashion (see → Page 72).

The message "Log off successful" is output on the first "guest telephone". The second "guest telephone" is now blocked. You can now use the second "guest telephone" in the same way as the first one.

Logging off from the "guest telephone"

📟 Enter the code for "Mobile Login (Log off)", see → Page 123).
The logoff procedure begins.

The "guest telephone" is now available again with its original phone number, features and functions.

Your old and new telephone are the first telephones at each connection. The telephones are in idle state.

The following procedure is carried out on the new phone.

⌑ Open the menu → Page 21.

| Program/Service? ▾ |

Select and confirm the option shown.

| Relocate |

Select and confirm the option shown.

📟 Enter own station number.

📟 Enter code (telephone lock) → Page 67.
(Not necessary if you have not set a code.)

| Complete relocate |

Confirm the option shown.

▐▌▶ If you change numbers of different system phones, programmed keys are replaced with the default assignment.
You can however connect your phone to a different port and then carry out the procedure.

Fax details and message on answering machine

If a fax or answering machine is connected to your system and you have assigned the "Fax details" function to a programmable key → Page 55, the key lights up when a fax or a message has been received.

Deactivating signaling

▭ Press the illuminated "Fax service" key. The LED goes out.
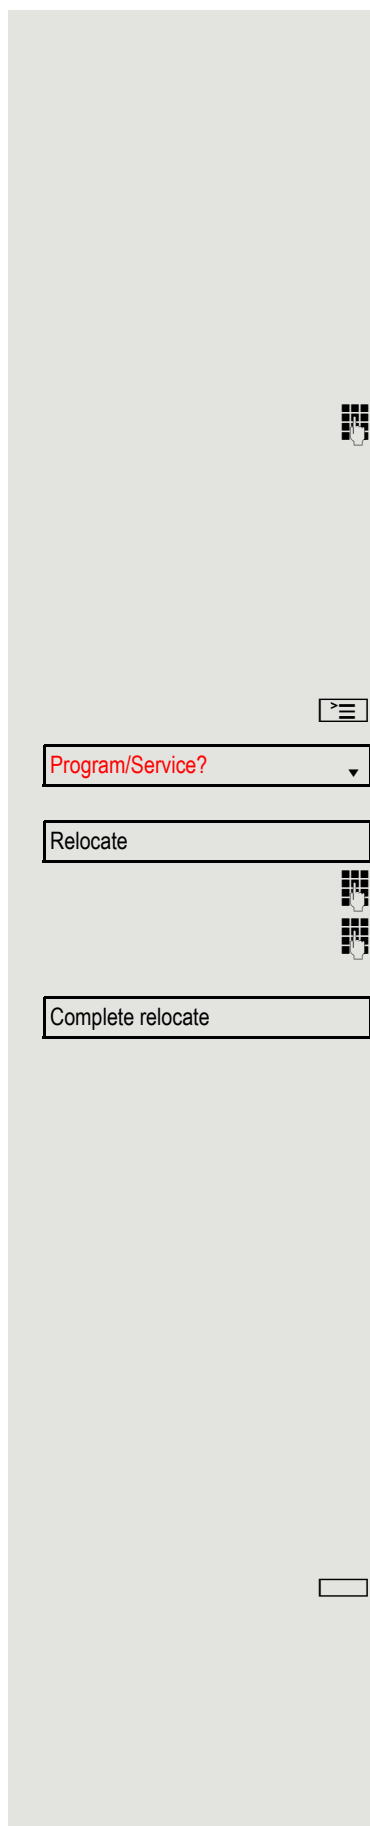

Resetting services and functions (system-wide cancellation for a telephone)

A general reset procedure is available for initiated functions. The following functions are deleted, if enabled:

- Forwarding on
- Advisory msg. on
- Ringing group on
- Hunt group off
- Suppress call ID
- Waiting tone off
- DND on
- Ringer cutoff on
- Received messages:
- View callbacks

$\boxed{\geq}$ Open the menu → Page 21.

| Program/Service? | ▾ |

Select and confirm the option shown.

| #0=Reset services? |

Select and confirm the option shown[1].

Activating functions for another telephone

If configured (consult your administrator), you can activate and deactivate the following functions for other phones (associated service):

- Do not disturb, code *97/#97 → Page 64
- Call forwarding, code *11, *12, *13/#1 → Page 28
- Lock and unlock phone, code *66/#66 → Page 66
- Ringing group, code *81/#81 → Page 94
- Leave message/advisory message, code *69/#69 → Page 70
- Group call, code *85/#85 → Page 94
- Reset services and functions, code #0 → Page 74

1. "Differing display views in a HiPath 4000 environment" → Seite 111

Using system functions from outside DISA (Direct Inward System Access)

If configured (consult your administrator), you can use an external phone like an internal station to set up an outgoing external connection via the system. You can also activate or deactivate the following system functions:

- Reset services and functions, code #0 → Page 74
- Call forwarding, code *1/#1 → Page 28
- Lock and unlock phone, code *66/#66 → Page 66
- Save your PIN code, code *93 → Page 67
- Send a message, code *68/#68 → Page 69
- Leave message/advisory message, code *69/#69 → Page 70
- Ringing group, code *81/#81 → Page 94
- Group call, code *85/#85 → Page 94
- Caller ID suppression, code *86/#86 → Page 64
- Camp-on tone, code *87/#87 → Page 47
- Open door, code *61 → Page 35
- Release door opener, code *89/#89 → Page 36
- Control relays, code *90/#90 → Page 78
- Do not disturb, code *97/#97 → Page 64
- Ringer cutoff, code *98/#98 → Page 63
- Dial using speed dial, code *7 → Page 42
- Associated service, code *83 → Page 74

Prerequisite: Your phone supports tone dialing (DTMF) or you can switch your phone to tone dialing. The phone is not connected to the system.

Establish a connection to the system. Enter the station number (consult your administrator).

Wait for the continuous tone (if necessary, switch phone to tone dialing) and enter the internal number assigned to you and the corresponding PIN code.

Enter the code (only required if programmed in the system).

Wait for the dial tone and enter the code for example, *97 for Do not disturb on. If necessary, make further entries; refer also to the user guide for dial pulse/DTMF phones.

or

Dial the external number.

You can only perform one function/establish one outgoing connection at a time.
The connection is cleared as soon as the function is successfully activated.
In the case of an external call, the connection is cleared as soon as one of the call partners hangs up.

Using functions in ISDN via code dialing (keypad dialing)

If authorized (consult your administrator), you can access ISDN functions in some regions using codes.

⌤ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service?   ▼

Confirm the option shown.

*503=Keypad dialing?

Enter the required trunk number (consult your administrator).

Enter a code for the required ISDN function (consult your administrator).

⫸ Contact your network provider to find out which ISDN functions can be code-operated in your country.

Unify GmbH & Co. KG shall not be liable for damages/costs that may be incurred by fraudulent activities or remote operation (such as toll fraud).
Controlling connected computers/programs/ telephone data service

If this function has been configured (consult your administrator), you can control connected computers or programs running on them, such as hotel services or information systems, from your telephone.

Prerequisite: You have set up a connection.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service? •

*42=Tel. data service?   Confirm the option shown.

For entering data, you are guided by the connected computer. However, depending on the configuration (consult your administrator), you have to enter your data in one of the following ways:

Input in en-bloc mode:

$\boxed{\text{0}+}$ ... $\boxed{\text{9}_{wxyz}}$ Enter data.

$\boxed{\#}$ Complete entry.

or

Entry complete?   Confirm the option shown.

or   ## Input in online mode:

The connected computer processes your entries directly.

$\boxed{\#}$ Enter the code.

$\boxed{\text{0}+}$ ... $\boxed{\text{9}_{wxyz}}$ Enter data.

Communicating with PC applications over a CSTA interface

If configured (consult your administrator), you can use your phone to communicate with PC applications (CSTA = **C**omputer **S**upported **T**elecommunications **A**pplications). You send information to the application and receive information from the application, for example, via your phone display.

`[*] [4ghi] [9wxyz] [4ghi]`   Enter the code.

Enter the three-digit ID for the application you wish to control.

`[+] [-] [0+] ... [9wxyz] [▼]`   Use the relevant keys to communicate with the application.

Temporarily interrupting communication with the application

The phone rings. You answer the call.

The "Data I/O" key flashes: Communication with the application was automatically interrupted.

Resuming communication with the application

Press the flashing "Data I/O" key. The LED lights up.

Ending communication with the application

Select and confirm the relevant CSTA message.

or

Lift the handset and replace it again.

Controlling relays (only for HiPath 3000)

If this function has been configured (consult your administrator), you can use up to four relays to enable/disable different devices (such as a door opener). Depending on how you program the relays, you can activate and deactivate them manually or configure them to activate and deactivate automatically (after timeout).

> Special features must be taken into consideration if your telephone operates with system networking via LAN → Page 103!

| *90=Control relay on? |

Select and confirm the option shown.

or

| #90=Control relay off? |

Select and confirm the option shown.

`[1␣] ... [4ghi]`   Enter the relay.
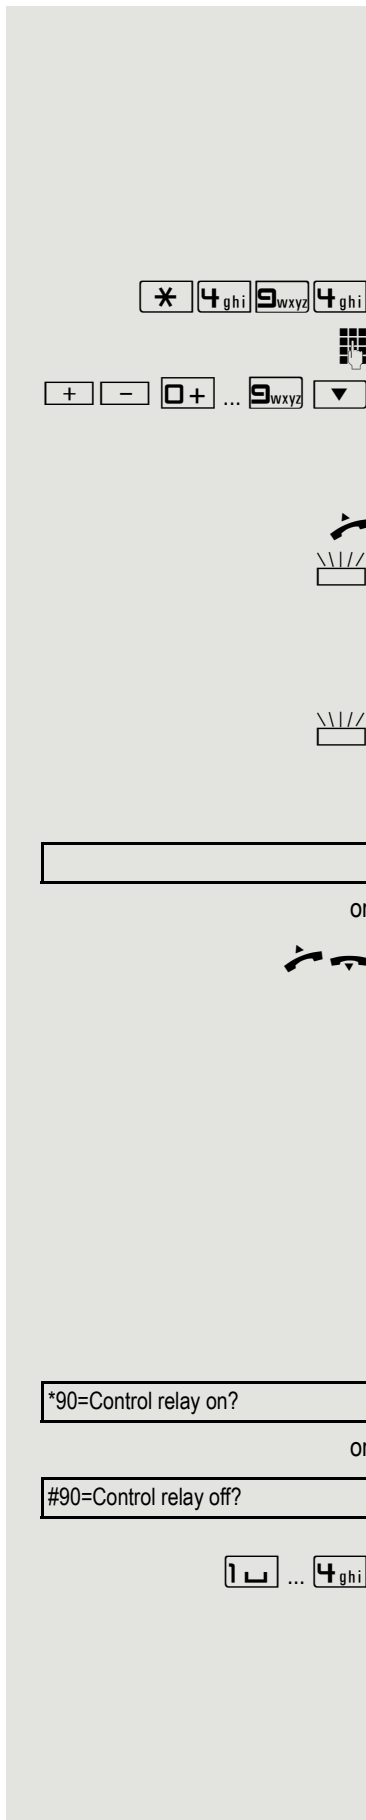

Sensors (HiPath 33x0/35x0 only)

If configured (consult your administrator), sensors are able to recognize signals, call your phone and display an appropriate message on the screen.

Paging persons (not for U.S.)

If radio paging equipment (PSE) is connected to your system (consult your administrator), you can locate people via their pocket receivers.

Pocket receivers signal a call request to the person you want to page. This person can then answer the page at the nearest phone.

Paging persons

To ensure that you can be found, you must have enabled a ringing group → Page 96, call forwarding → Page 28 or call forwarding-no answer (service engineer) to the internal station number of your PSE.
A call request is signaled automatically.

Answering the page from the nearest telephone

➙ Lift the handset.

`* 5jkl 9wxyz` Enter the code.

📟 Enter own station number.

```

| Kirsch, Erika | ⬍ |
The first name found with the initial letter K is displayed after a short time. If you are looking for a name that begins with Kr, also enter the second letter in the search field:

```
QK       (5)
p q r s7ß(abc)
```

| Kramer, Elisabeth | ⬍ |
The first name with the initial letters Kr is displayed.

You can also browse the phonebook with the navigation keys until you reach the required party → Seite 17.

Corporate directory

The corporate directory is an LDAP database. You can search the database for contact entries if you can access this database over your network and your access was correctly configured by your administrator.

You can search for contacts using the name (simple search) or different criteria for an entry (advanced search), for example job title or address.

Searching for a contact

| ☰ | Open the menu → Seite 22. |

| Corporate ◆ | Select and confirm to open the company-wide "Corporate" directory. |
| Find ◆ | Select and confirm the option shown. |

The following 11 search fields can be used:
- Last name
- First name
- Office 1
- Office 2
- Mobile
- Home
- Company
- Address 1
- Address 2
- Professional role
- E-mail

| Last name ◆ | Select and confirm the required search field (e.g. "Last name"). |

Enter a search text. If you for example only enter the first letter of the last name, all entries with this initial letter are displayed.

| Find ◆ | Select and confirm when you have completed one or more search fields. The search begins. If the entry you searched for is found, you can dial or view the entry details. |
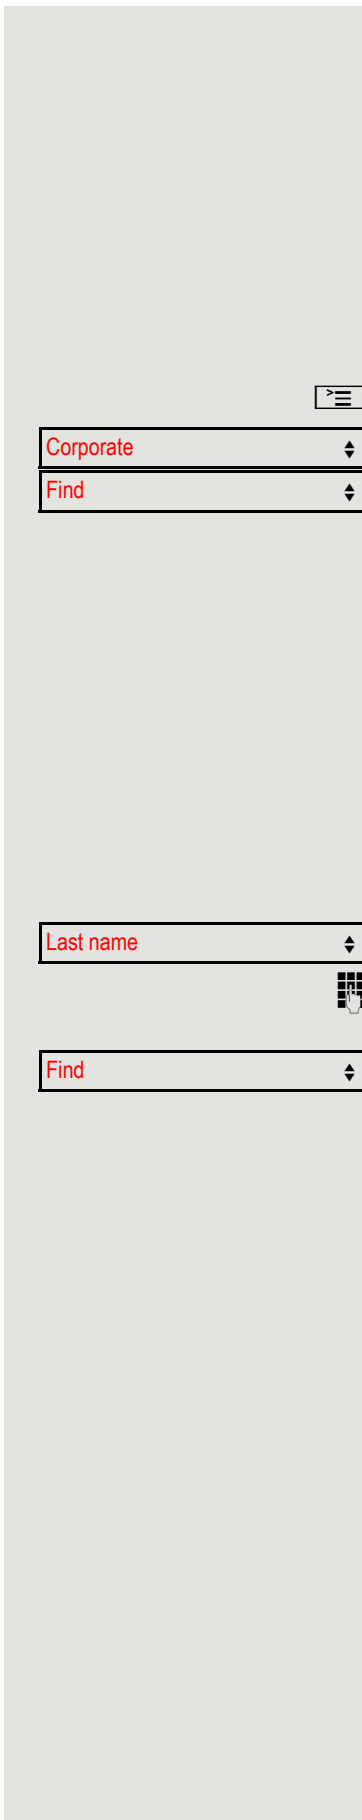

Advanced phonebook editing

Viewing entries

Prerequisite: You found and selected an entry (see above).

Details	⬍

Select and confirm the option shown. All fields of the entry are displayed.

Resetting the search fields

Prerequisite: The search fields are listed.

Delete	⬍

Select and confirm the option shown. You can now enter new search criteria for a search.

Defining a qualifier before a search

Prior to a search, you can select which qualifiers should also appear in the output list.

Qualifier	⬍

Select and confirm the option shown. You may choose between the following criteria:

- No qualifier
- Job function
- Address 1
- Email
- Business 1
- Mobile
- Business 2
- Private
- Company
- Address 2

Select and confirm the desired qualifier.

Back	▾

Select and confirm to close the list.
Quick search

▢≡ Open the menu → Seite 22.

Corporate	↕

Select and confirm to open the company-wide phonebook.

```
Q
Enter the name (Abc)
```

📳 Enter the first letter of the name you are looking for, e.g. "K".

```
QK
J KL5   (Abc)
```

Kirsch, Erika	↕

If you do not enter any further characters, all available names with the corresponding initial letter are displayed after a predefined period of time or after pressing ⊙ʷ to confirm.

```
QKr
p q r s7ß(abc)
```

You can restrict the output by entering the second and other letters. The ⌗ key is used to switch between letters and numbers. The ▲ ▼ keys are used to delete individual characters again.

You can control the search individually by entering extended characters. To select extended characters, first press the ✳ key.

Rule list:

Character	Description
#	Searches for the exact string before the extended character.
*	Wildcard. This searches for the character entered and all possible subsequent characters.

You enter this character by selecting it in the extended characters.

Making calls in the team/executive/secretary configuration

If configured (consult your administrator), you belong to a team of subscribers with multiple lines (MultiLine → Page 12). Your phone features trunk keys (MULAP keys) → Page 86.

Lines

A distinction is made between primary and secondary lines. Each of these line types can be used on a private or shared basis → Page 86.

Primary line

All multi-line telephones have a primary line. This line can be reached in the usual manner via your public phone number. Incoming calls to your number are signaled on this line.

Secondary line

A secondary line on your phone is used as a primary line by another subscriber. Your primary line, which is configured on another telephone, simultaneously functions as the secondary line on that telephone.

Line utilization

Private line

A line that is used by a single telephone. This line cannot be used as a secondary line by another telephone.

Shared line

A line that is configured on multiple telephones. The line status is displayed for all telephones that share this line (if configured). If, for example, a shared line is being used by a telephone, a status message indicating that this line is busy is displayed on all other telephones that share this line.

Direct call line

A line with a direct connection to another telephone.
You can see the status of the line from the LED display.

Line seizure

Line seizure must be configured (consult your administrator). If automatic line seizure is configured, a trunk is automatically assigned when you lift the handset or press the speaker key.

Line/trunk keys
The programmable keys on multi-line phones function as line or trunk keys. Every key programmed as a "Trunk key" (key label: Transfer Trk) corresponds to one trunk with the result that you can configure up to eight trunks in OpenStage 15.

As a team member, you can independently program the following functions on keys → Page 55:
• Direct station select
• Join/leave group
  (not available on executive phone in an executive / secretary team)
• Ring transfer: On/Off
  (only in an executive/secretary team)

You can also program a key with the function "Forward Line" (call forwarding) for each line.

LED displays on trunk keys

LED		Meaning
▬	Off	– The line is in idle mode.
☼	Flashing[1]	– Incoming call on the line. – Hold reminder is activated. – The line is on "Hold".
▭	On	– The line is busy.

1 In this manual, flashing keys are identified by this icon, regardless of the flashing interval. The flashing interval represents different statuses, which are described in detail in the corresponding sections of the manual.

Accepting calls with the trunk keys

Prerequisite: Your phone rings and/or a trunk key flashes quickly.

if nec. ☼ Press the trunk key that is flashing quickly.
(not necessary for automatic trunk seizure/prime line is not active).

➤ Lift the handset.

or On-hook dialing: Speakerphone mode.

Dialing with trunk keys

if nec. ▬ Press the free trunk key you wish to use to establish the connection
(not necessary for automatic trunk seizure/prime line is not active).

▦ Dial the phone number.

➤ If the party answers: Lift the handset.

or On-hook dialing: Speakerphone mode.

Placing a call on hold on a trunk key and retrieving the held call

Prerequisite: You are conducting a call via one of your group's trunks. The "Hold" key has been programmed on your telephone → Page 55.

Holding

Press the "Hold" key.

if nec.
← or ⌫   Replace the handset or press the disconnect (release) key.

Depending on the configuration (consult your administrator), this may be necessary so other team members can also pick up the call on hold.

Retrieving the call

Press the trunk key that is flashing slowly.

Making calls on multiple lines alternately

Prerequisite: You are conducting a call via one of your group's trunks. Another trunk key is flashing.

Press the flashing line key. The first call party is on hold on the other trunk.

Press the trunk key that is flashing slowly. The second call party is on hold.

You can switch between lines as often as you wish. Press the trunk key flashing slowly each time.

MULAP conference release

If configured (consult your administrator), you can program a key on your phone with the function "MULAP Privacy Release" → Page 55. The default label is "Priv Release".

If you program this key, you do not have to use the menu to set up a conference. Your team partner only has to press the flashing trunk key associated with your trunk on his or her phone to immediately join the conference.

You are conducting a call.

Press the "Priv Release" key. The LED lights up.

Up to three team members can now join the conference.

Prerequisite: The trunk on which you are speaking is configured on the other phone as a trunk key.

Press the flashing line key.

Direct station selection keys

Each team member has a direct station selection key for every other team member.
This means that each team member can be reached directly by other team members at the touch of a button.

Understanding LED messages from DSS keys

LED on the DSS key is off - the team member is not conducting a phone call.

or

LED on the DSS key is lighting – the team member is conducting a phone call or has activated do not disturb.

or

LED on the DSS key is flashing **quickly** - a call has arrived for you and needs to be answered.

or

LED on the DSS keys is flashing **slowly** – a caller is trying to reach another member of your team, who has not yet answered.

Using DSS keys to answer calls

Prerequisite: Your telephone rings or the DSS key flashes.

if nec.   Press the flashing DSS key.
This is not necessary if you are called directly (DSS key flashes quickly).

➤ Lift the handset.

or   On-hook dialing: Speakerphone mode.

Calling a team member directly

Press the DSS key.

or

If the team member you wish to reach is conducting another call, the DSS key on your telephone lights. You can still make the call in this case.
➤ If the party answers: Lift the handset.
or   On-hook dialing: Speakerphone mode.

Transferring a call in progress

S   Press the DSS key and announce the call if necessary.

\ Replace the handset.

or

⊶ Press the key shown.

Accepting a call for another team member

☼ Press the flashing DSS key or trunk key.

➤ Lift the handset.
or   On-hook dialing: Speakerphone mode.

Forwarding calls on trunks

You can immediately forward internal and/or external calls to your lines to different internal or external telephones (destinations) (external destinations are also possible if the system is configured accordingly).
Activating call forwarding for one trunk activates the function for all trunk keys assigned to this trunk in your group.

≥☰ Open the menu → Page 21.
| Program/Service? ▾ |

Select and confirm the option shown.

| Forward Line: ON |

Select and confirm the option shown.

or

S   If available, press the "CFW MULAP" key. (You have programmed a key with the incomplete " CFW MULAP" function, excluding the call forwarding type and destination → Page 55).

S   Press the required line key.

or

j Enter the required trunk number.

| 1=all calls |

Select and confirm the option shown.

or

| 2=external calls only |

Select and confirm the option shown.

or

| 3=internal calls only |

Select and confirm the option shown.

j Enter the destination number.

| Save |

Confirm the option shown.

or
If available, press the "CFW MULAP" key. (You have stored the call forwarding type and destination on the "CFW MULAP" key, → Page 55.)
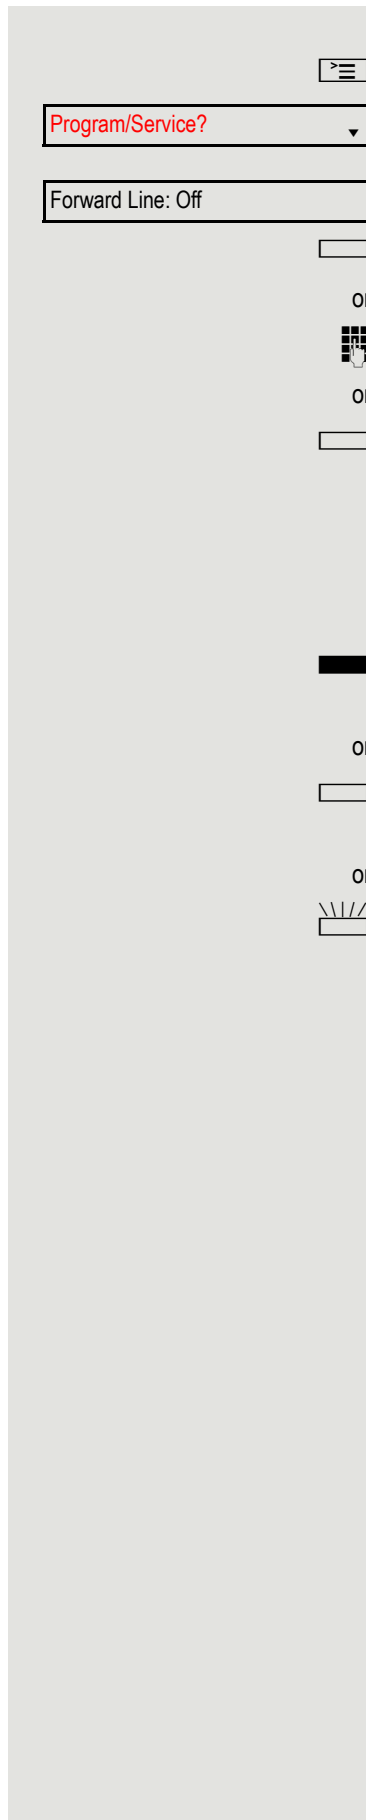

Deactivating call forwarding

▷≡   Open the menu → Page 21.

Program/Service?   ▾   Select and confirm the option shown.

Forward Line: Off   Select and confirm the option shown.

▭   Press the required line key.

or

▦   Enter the required trunk number.

or

▭   If available, press the "CFW MULAP" key.

> If you have activated call forwarding for a trunk, a special dial tone sounds when the line is seized.

Understanding LED messages of the "CFW MULAP"

▬   The LED on the "CFW MULAP" key is off – call forwarding is not active for this trunk.

or

▭   The LED on the "CFW MULAP" key lights up – call forwarding is active for this trunk.

or

☼   The LED on the "CFW MULAP" key flashes **slowly** - the trunk is the destination of call forwarding.

Transferring calls directly to the executive phone

Normally, all calls for the executive are audibly signaled only by the secretary phone.
You can set audible signaling so calls are only signaled acoustically by the executive phone or by a second phone assigned to it.

Prerequisite: There is a key programmed with the function "Ring Transfer" on your phone. The default label is "Ring xfer".

Activating

Press the "Ring xfer" key. The LED lights up.

or

$\boxed{\geq}$ Open the menu → Page 21.

Program/Service? ▾

Select and confirm the option shown.

Ring Transfer: On

Select and confirm the option shown.

Press the required line key.

or

Enter the required trunk number.

Deactivating

Press the "Ring xfer" key. The LED goes out.

or

$\boxed{\geq}$ Open the menu → Page 21.

Program/Service? ▾

Select and confirm the option shown.

Ring Transfer: Off

Select and confirm the option shown.

Press the required line key.

or

Enter the required trunk number.
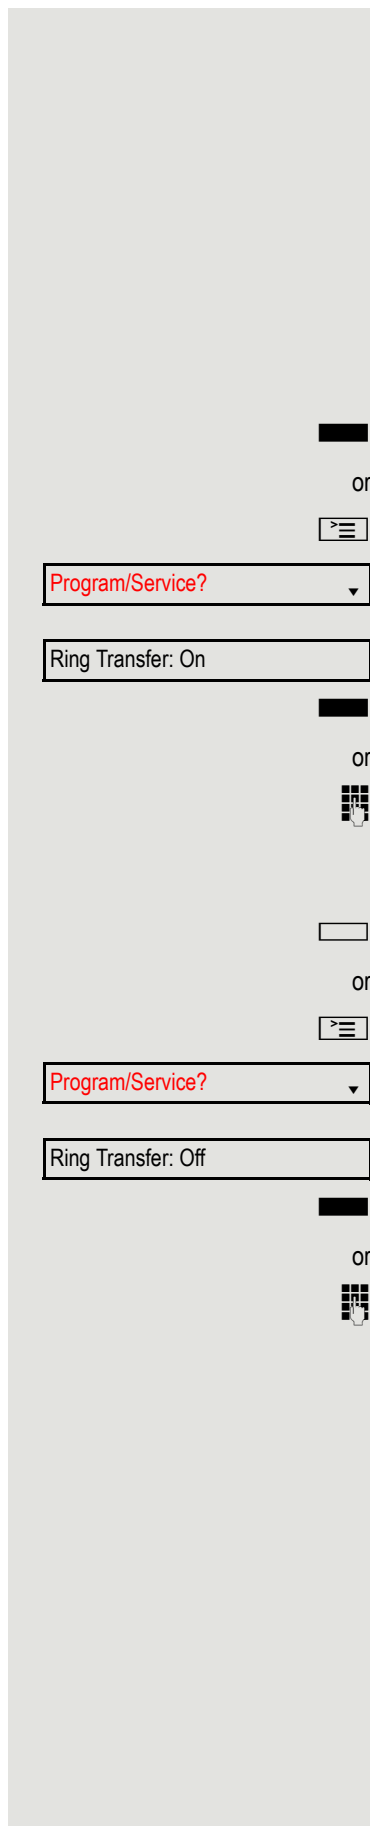

Using team functions

If configured (consult your administrator), your telephone is part of a team. The team consists of internal phones that are able to use certain functions.

Activating/deactivating a group call

> ⫸ Special features must be taken into consideration if your telephone operates with system networking via LAN → Page 99!

If configured (consult your administrator), you belong to one or more groups of stations, which can be reached via hunt group or group call station numbers. Incoming calls are signaled one after the other (= hunt group) or simultaneously (= group call) on all phones in the group, until a group member answers the call.

Each station in the group can still be reached via its own station number.

You can activate and deactivate the audible signal for a hunt group, group call or individual trunks in a group.

You are part of a hunt group or call group

| ▼ | Open the idle menu → Page 18. |

Leave group?

Select and confirm the option shown[1].

or

Join group?

Select and confirm the option shown.

◼ or ▭   Press the "Group call" key.

Open the idle menu → Page 18.

| Leave group? |

Select and confirm the option shown[1].

or

| Join group? |

Select and confirm the option shown.

■ or ▭

Press the "Group call" key.

| 301 X Group name |

If an "X" appears between group/trunk number (such as 301) and group name, the audible tone is active for this group or trunk.

or

| 301   Group name |

No "X" means that the audible tone is deactivated.

| Next? |

Confirm the option shown. The next group/trunk number is displayed with a group name.

or

| Leave group? |

Select and confirm the option shown[1].
The audible tone for the group/trunk displayed is deactivated.

or

| Join group? |

Select and confirm the option shown[1].
The audible tone for the group/trunk displayed is activated.

or

| #=Leave all groups? |

Select and confirm the option shown.
The audible tone for all groups and trunks is deactivated.

or

| *=Rejoin all groups? |

Select and confirm the option shown.
The audible tone for all groups and trunks is activated.

> If you have activated the audible tone for another group/trunk or deactivated the audible tone for all groups/trunks you belong to, you will hear a special dial tone when you lift the handset.

---

1. "Differing display views in a HiPath 4000 environment" → Seite 111

Picking up a call for another member of your team

You can use your own telephone to pick up calls for other telephones in your team, even while on a call (call pickup groups; consult your administrator).

Prerequisite: Your telephone rings briefly. "Call for:" appears on the upper display line with the station number or name of the originator; the station number or name of the caller appears on the lower line.

Pickup - group?

Confirm the option shown.

Ringing group

You can have calls for your telephone signaled audibly at up to five other internal phones. The phone that answers the call first receives the call.

▌▶ Special features must be taken into consideration if your telephone operates with system networking via LAN → Page 102!

Saving, displaying and deleting telephones for the ringing group

Ringing group off?   Select and confirm the option shown.

Controlling relays (only for HiPath 3000)

If this feature is configured (consult your administrator), you can also control relays → Page 78 in other HiPath 3000 communication platforms.

▼   Open the idle menu → Page 18.

DISA internal?   Select and confirm the option shown.

📟   Enter the (DISA) station number of the HiPath 3000 where you wish to control the relay.

⌜OK⌝ or ⌜#⌝   Confirm your entry.

📟   Enter the (DISA) station number of the phone you wish to use to control the relay.

⌜OK⌝ or ⌜#⌝   Confirm your entry.

*90=Control relay on?   Confirm the option shown.

or

#90=Control relay off?   Select and confirm the option shown.

⌜1␣⌝ ... ⌜4ghi⌝   Enter the relay.

Opening a door

If this feature is configured (consult your administrator), you can also activate the door opener → Page 35 in other HiPath 3000/OpenScape Business or **OpenScape Office MX/LX** communication platforms.

▼   Open the idle menu → Page 18.

DISA internal?   Select and confirm the option shown.

📟   Enter the (DISA) station number of the HiPath 3000/OpenScape Business or **OpenScape Office MX/LX** where you wish to control the relay.

⌜OK⌝ or ⌜#⌝   Confirm your entry.

📟   Enter the (DISA) station number of the phone you wish to use to control the door opener.

⌜OK⌝ or ⌜#⌝   Confirm your entry.

Door opener?   Select and confirm the option shown.

📟 🎵   Dial the entrance telephone number.
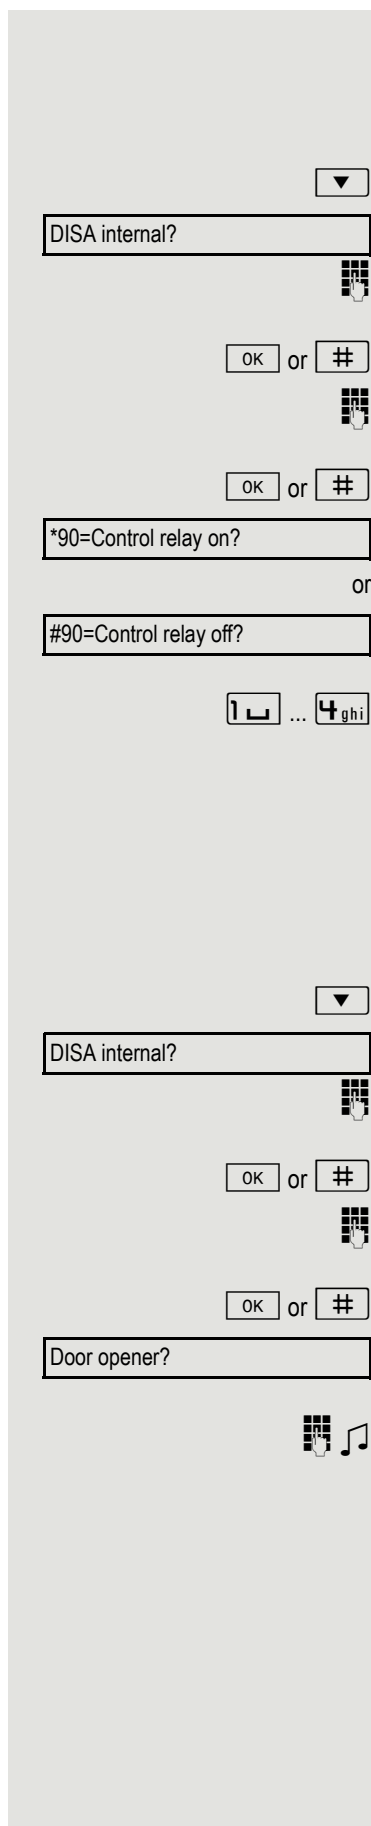

Individual phone configuration

Setting contrast

The display has four contrast levels that you can set according to your light conditions.

⌊ + ⌋ or ⌊ − ⌋   Press one of the keys shown in idle mode.

| Display contrast? |

Select and confirm the option shown.

⌊ + ⌋ or ⌊ − ⌋   Change the display contrast. Press the key repeatedly until the desired level is obtained.

| OK |

Save.

Audio
Setting the ring tone mode

You can use the two ring tone mode options

• HiPath
• Local ringer

to decide how the ring tone is generated on the telephone. With the setting "HiPath", the system sends the ring tone type and the dependent ring tone, which you can adjust subsequently → Page 105.

If "Local ringer" is selected, the system sends the ring tone type and you select which ring tone is required for the respective ring tone type in the "Local ringers" menu → Page 107.

You can also configure the following setting via the web interface → Page 112.

Open the menu → Page 21.

| User ?   ♦ |

Select and confirm the option shown.

if nec. ▦   Enter and confirm the user password.

| Ringer ?   ♦ |

Select and confirm the option shown.

| Ringer mode ?   ♦ |

Select and confirm the option shown.

| HiPath?   ♦ |

Select and confirm the option shown.

or

| Local ringer ?   ♦ |

Select and confirm the option shown.

| Options = Save & exit?   ♦ |

Select and confirm the option shown.

Adjusting audio settings

The ring tone mode "HiPath" is set. The OpenScape Business/HiPath 3000 sends the ring tone type and the ring tone setting to your telephone.

Optimize the audio settings on your OpenStage 15 E for your work environment and according to your personal requirements.

Adjusting the receiving volume during a call

You are conducting a call.

+ or −   Raise or lower the volume. Keep pressing the key until the desired volume is set.

OK   Save.

Adjusting the ring volume

+ or −   Press one of the keys shown in idle mode → Page 18.

Ring volume?   Confirm the option shown.

+ or −   Raise or lower the volume. Keep pressing the key until the desired volume is set.

OK   Save.

Adjusting the ringer pitch

+ or −   Press one of the keys shown in idle mode → Page 18.

Ring tone?   Select and confirm the option shown.

+ or −   To adjust the ringer pitch: Keep pressing the keys until the desired pitch is set.

OK   Save.

Adjusting the attention ring volume

If you are part of a team with trunk keys, other calls can be signaled acoustically in the team during a call. You will hear the attention ring.

+ or −   Press one of the keys shown in idle mode → Page 18.

Attention Ring Vol.   Select and confirm the option shown.

+ or −   Raise or lower the volume. Keep pressing the key until the desired volume is set.

OK   Save.
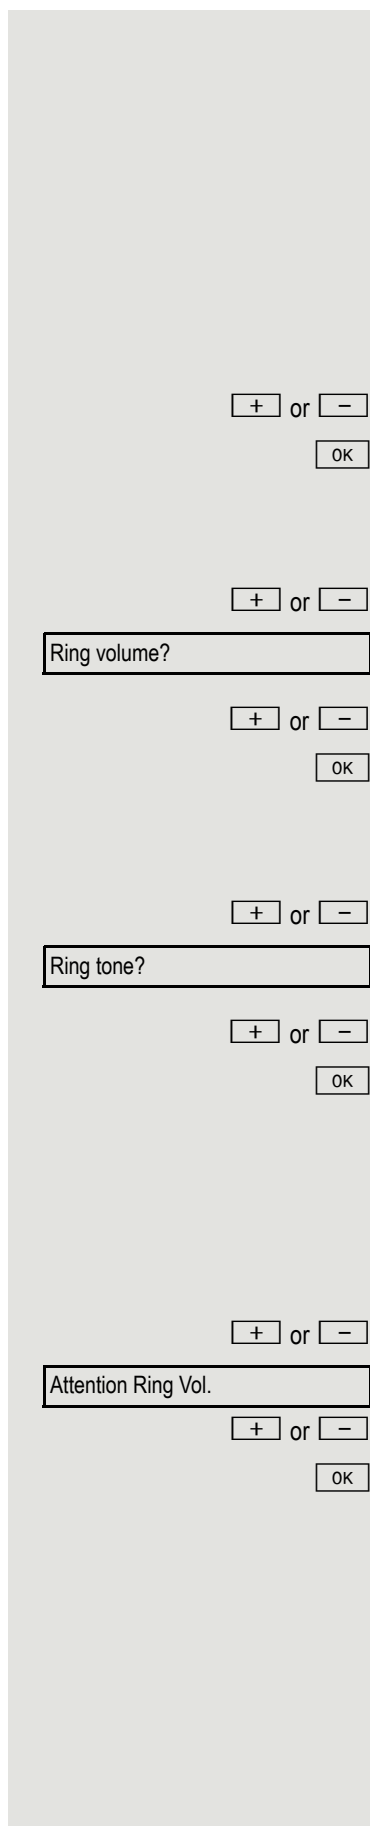

Adjusting the speakerphone to the room acoustics

To help the other party understand you clearly while you are talking into the microphone, you can adjust the telephone to the acoustics in your environment: „T0343 Quiet room," "T0344 Normal room" and "T0345 Noisy room."

| + | or | − | Press one of the keys shown in idle mode → Page 18.

Speakerphone mode?   Select and confirm the option shown.

| + | or | − | To set the room type: Keep pressing these keys until the setting you want appears on the screen.

| OK | Save.

Network information

This overview in the user area of the menu provides you with information about the IP address of the phone and the HTML address of the web interface. It also provides real-time data about the network activity of the phone.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

User $\quad\updownarrow$

Select and confirm the option shown.

if nec. ▦   Enter and confirm the user password.

Network information $\quad\updownarrow$

Select and confirm the option shown. You can browse the following overview:

IP address: Displays the IP address or name that was assigned to the phone in the network.

WBM URL: HTTP address of the web interface. This address is specified in the address line of the Internet browser and is used to call the web interface of the phone in the browser.

LAN/PC byte input: The network or PC interface data packets received are illustrated dynamically as columns.

LAN/PC byte output: The network or PC interface data packets sent are illustrated dynamically as columns.

LAN/PC autonegotiated: [Yes|No]: Displays whether the network or PC interface data transfer rate is set to automatic (**Yes**) or manual (**No**).

LAN/PC port speed: [10|100|1000] Mbit/s: Data transfer rate of the network or PC interface. If an interface is not in use, **Link down** is displayed.

Testing the phone

Testing the phone's functionality

You can test your phone's functionality.

Prerequisite: The phone is in idle mode.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service? ▾

Select and confirm the option shown.

More features? ⬍

Select and confirm the option shown.

*940=Phone test?

If everything is functioning correctly:

- all LEDs on the phone flash (only the menu key LED is continuously lit)
- your station number is displayed
- all pixels are active on the display
- the ring tone is audible.

Checking the key assignment

You can check the key assignment on your phone to determine which functions are assigned to which keys.

$\boxed{\geq\equiv}$ Open the menu → Page 21.

Select and confirm the option shown.

Program/Service? ▾

Select and confirm the option shown.

Prog. feature key

Press any key. The key assignment is displayed.

Exit

Select and confirm the option shown.
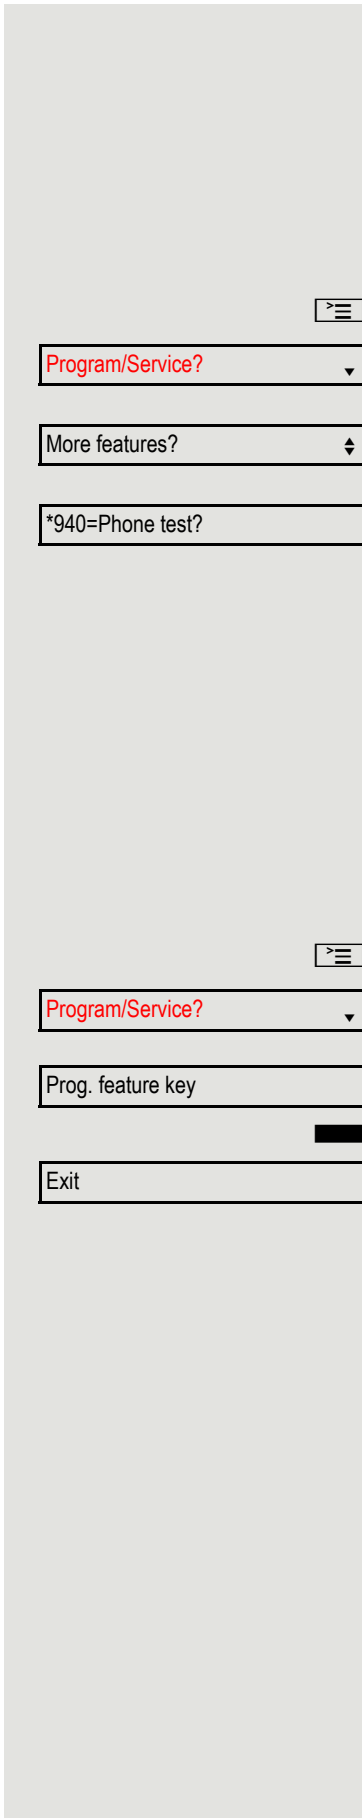

Differing display views in a HiPath 4000 environment

Depending on the system configuration, some functions may not always be offered in the display as described in this document.

In addition, display texts may differ from those described in this document depending on the system configuration.
The following table provides an overview:

HiPath 3000/OpenScape Business OpenScape Office display	HiPath 4000 display	Description
Program/Service	Service menu?	→ Page 21
Transfer	Transfer?	→ Page 27
View callbacks	Show callback destinations?	→ Page 33

Web interface

General

You can configure a number of settings for your phone via the web interface. Communication is via a secure HTTPS connection. Access to the web interface must be activated by your administrator.

Launching the web interface

For more information about the IP address, the web interface address and how to connect the telephone to the network, refer to the section entitled "Network information" → Page 109.

To launch the interface, open a web browser and enter the following:

https://[IP address of the phone]

[IP address of the phone] is the IP address of your phone.

or

https://[Name of the phone]

[Name of the phone] that was assigned by the administrator.

You might receive a certificate notification from the browser. Follow the instructions to download the certificate.

You will be prompted to configure a user password → Page 108 the first time you call up the web interface. You must log in with this password in future every time you want to open the User Pages.

Administrator Pages

This area lets you configure settings for administering your phone and the network environment. Access to the Administrator Pages is protected by the admin password. For further information, consult your administrator or refer to the administration manual.

User Pages

The web interface homepage opens once you have entered and confirmed the phone's IP address.

1. Click a menu heading to display the individual menu entries. Click the menu heading again to close the menu.
2. Click a menu entry to open the corresponding form.
3. Make the desired changes.
4. Click the corresponding button to save or discard your changes.

Button functions

• „Login": Log in to the phone after you have entered the user password
• „Submit": Apply changes
• „Reset": Reset original values
• „Refresh":Update the values.
• „Logout": Log out from the phone

User menu

All settings in the user menu of the web interface can also be made via the user menu on the telephone.

User Pages

Fixing problems

Responding to error messages

| Incorrect input |

Possible causes:

Station number is incorrect.

Possible reactions:

Enter correct station number.

| Not authorized |

Possible causes:

Locked function selected.

Possible reactions:

Apply to the administrator for authorization for relevant function.

| Currently not possible |

Possible causes:

Dialed a non-existent station number. Called phone is unplugged.

Possible reactions:

Enter correct station number. Call this station again later.

| Invalid station number |

Possible causes:

Dialed your own station number.

Possible reactions:

Enter correct station number.

Contact partner in case of problems

Consult your administrator if a fault persists for more than five minutes, for example.

Troubleshooting

Pressed key does not respond:

Check if the key is stuck.

Telephone does not ring:

Check whether the "Do not disturb" function is activated on your telephone (➔ Page 64).
If so, deactivate it.

You cannot dial an external number:

Check whether your telephone is locked.
If the phone is locked, enter your PIN to unlock it ➔ Page 66.

To correct any other problems:

First consult your administrator. If the problem still cannot be resolved, the administrator
has to contact Customer Service.

Care and cleaning instructions

- Never spray the phone with liquids as the penetrating fluids can lead to malfunctions
  or may damage the device.
- Clean the phone with a soft and slightly damp cloth.
- Do not use substances such as alcohol, chemicals, household cleaners or solvents,
  as these substances can lead to surface damage or cause the coating to peel.

Labeling keys
The following options are available for labelling keys on the OpenStage 15/15 G and/or
OpenStage Key Module 15 with the functions assigned to them or the saved numbers
on them:

Labeling
- By hand:
  Labeling strips are supplied with your OpenStage 15/15 G and
  OpenStage Key Module 15. Note the function or name in the white field on the
  strip and insert the strip on your OpenStage 15/15 G or
  OpenStage Key Module 15.
- With a computer via the Internet:
  You can find the "online labeling tool" together with the user interface at
  http://wiki.unify/index.php/Key_Labelling_Tool .
- Select the appropriate key labeling tool in your language. You can use the
  tool online via the browser or you can download it for local use.

Local user menu

Opening the user menu on the phone

To open the user menu, press the ⌸ key.

Select the **User** menu option. You are prompted to enter the User password → Page 108. Confirm this with **OK**. The options of the user menu are available.

User menu display

The majority of settings that can be made via the user menu on the phone can also be made via the web interface → Page 112.

Changes are usually confirmed using the **Save & exit** option or discarded using the **Exit (no save)** option.
