SYLVANIA QUICKTRONIC

High Efficiency ballasts

maximum energy savings

- · RoHS compliant
- Lead-free solder and manufacturing process

SYLVANIA QUICKTRONIC High Efficiency (QHE) energy-saving electronic T8 ISH (PLUS) ballasts offer several advantages:

- 1. Same Light, Less Power!
- Up to 6% in energy savings compared to standard T8 low power electronic ballasts without compromising light output
- Maximum energy savings when compared to F40T12 magnetically ballasted systems
- 2. High Light Output:
- Higher lumens per fixture
- Fewer fixtures required for same light output
- 3. Parallel Circuitry: keeps remaining lamps lit if one or more go out.
- 4. Lamp Striation Control (LSC):

 T8 energy saving lamps should be operated above 60°F, but under certain conditions the lamps may striate. LSC circuitry may minimize or eliminate this condition; however there are limited applications where LSC circuitry may not entirely mitigate lamp striations

These ballasts are also RoHS compliant and feature lead-free solder and manufacturing process.

SYLVANIA QUICKTRONIC High Efficiency

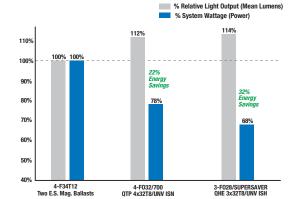

(QHE) systems are covered by the QUICK 60+® warranty, the first and most comprehensive lamp & ballast system warranty in the industry.
