

NOTE: Bluetooth settings may vary by device

3. Then click on the newfound device named "PowerLocus Moonly".

4. For wired connection: Use the included audio cable to connect.

Charging

Wired Charging: Please plug in the USB-C into headphones charging port and connect the other side with USB wall charging adapter or computer. The LED indicator turns red while charging, and turns off when fully charged. When the battery power is below 10%, the Bluetooth headset will remind you with a beeping sound every 15 minutes.

Product Maintenance

1. Do not use non-original accessories, because it may result in performance degradation, damage, electrical shock, or even void the warranty.

2. Do not use the headset in a wet environment. If the headset is wet, please dry it immediately. Do not use the headset by yourself, because it may cause damage and void the warranty.

3. Do not place the Bluetooth headphones in a dusty environment.

4. Do not allow children under 3 years to play with the Bluetooth headset unsupervised.

5. Do not place the product in an overheated or super-cooled environment; otherwise, it may not properly either temporarily or permanently.

6. Always clean the Bluetooth headphones with a clean, soft and dry cloth.

7. Place the Bluetooth headphones in the original package or keep it carefully when it is not in use.

Battery Maintenance

1. Go to a qualified repair center if you need to remove or replace the battery. (Rechargeable batteries will last for a long time if maintained carefully).

2. The charging temperature of the rechargeable battery is from 5 ~ 50 degrees Celsius.

3. Ensure to charge the Bluetooth headphones at least once a month if not used for a long time.

4. Battery usage time and standby time are related to specific conditions. Usage time and standby time are provided for reference only.

Notes

1. Other than the original package, please automatically save the headset in its original package after a first-time connection. If you cannot connect again, please delete the PowerLocus Moonly information (remove the paired device or ignore the connected device), then you can search and reconnect to PowerLocus Moonly again.

2. When the Bluetooth headphones fail to power on, it might be a result of low battery power. Please charge the Bluetooth headset.

3. Select the desired volume and be cautious of the playing time.

4. Do not disassemble the bluetooth headphones by yourself.

5. Do not place heavy objects on the product to prevent damage.

FCC Statement

The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates noise and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio communications, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.

— Increase the separation between the equipment and receiver.

— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

— Consult the dealer or a qualified technician for assistance.

The device complies with the following EMC standards and is adapted to the following test conditions:

(1) The device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Troubleshooting

Problem	Remedy
The indicator blinks red quickly (intermittent, 2s) or continuously?	It means the battery is low. Please charge the headphones as soon as possible.
Bluetooth headphones do not work.	This may be a result of low battery power. Please charge the headphones.
Bluetooth headphones do not connect.	1. Make sure the Bluetooth headphones are in pairing mode. 2. Make sure the Bluetooth headphones are in pairing mode. 3. Make sure the Bluetooth headphones are in pairing mode. 4. Make sure the Bluetooth headphones are in pairing mode. 5. Make sure the Bluetooth headphones are in pairing mode. 6. Make sure the Bluetooth headphones are in pairing mode.

Problem	Remedy
There is no sound in the headphones when in wired connection.	1. Make sure you insert the 3.5mm audio cable into the port properly. Note that the buttons and microphone of the headphones will not function during a wired connection. 2. Make sure the phone/device is in normal condition and without damage.
Bluetooth connection is not successful.	1. Make sure the Bluetooth headphones and the phone/device are not more than 10 meters/32.8 ft apart. 2. Make sure the headphones is in Bluetooth pairing mode (the indicator for blue and red light alternately). 3. Try to disconnect the previously connected Bluetooth devices and empty the Bluetooth list on the phone/device. Search for Bluetooth devices on the phone/device again.

How to connect?

1. To connect: Turn on your Bluetooth device. 2. To connect: Activate Bluetooth on your phone (or other devices) and set it to search for new devices. iPhone Settings > Bluetooth > On > Scan for devices
