TYPICAL WEARABLE COMPONENTS LIFE EXPECTANCY

Driving conditions and your individual driving results will vary.

Tires

Hatchback – All Season	50,000km
JCW – Performance/All Season	25,000-40,000km

Flat tire warning light. Should this light appear, check the iDrive to identify the low tire. Correct the pressure to the specification on the door and reset the light. If the light returns, call us to inspect the tire – 204-897-6464.

Warning Signs you Need New Tires

- Tire tread depth is less than 3/32 of an inch, or 2.4 millimeters.
- Cracks in the sidewall or tread surface.
- Tire sidewall bulges or blisters. Bulges and blisters lead to blow outs, this should be attended to immediately.
- Excessive or abnormal vibration, especially on smooth roads. While it may not always be a tire issue, too much vibration is almost always a sign that something is wrong.

Brakes Life Expectancy

Hatchback	40,000-50,000km
JCW	20,000 + depending on use

Brake system warning light. Your vehicle will display this warning.

*Individual results may vary based on driving habits.
