

DMS Rapid Response Kits

Now includes
EMT3

Enhanced Method • Triage • Treatment • Transport

The **Rapid Response Kit™** was created to support the efforts of first responders when challenged with the aftermath of any multi-casualty event. The kit is based on the (NIMS), National Incident Management System, and **START** triage protocols. These DMS kits have been tested utilizing automatic and mutual aid resources and have proven effective in reducing radio traffic, minimizing operational area confusion and reducing patient traffic lines.

Rapid Response™ Kits

- Support the ICS Medical Division/ Group Organization
- Identifies Key Personnel
- Supports (START) Triage Protocol
- Can be Used by Civilians Prior to Fire or EMS Arrival for Effective Integration
- Provides Agency Standardization
- Provides Individual Patient Care and Accountability
