SURROUND VISION With an overhead virtual bird's-eye view of the scene around the vehicle shown on the centre-stack display, Surround Vision helps you park and avoid collisions with nearby objects during low-speed manoeuvring. Using a sophisticated suite of integrated cameras, Surround Vision helps you avoid obstacles, reduce blind spots and navigate even the tightest spaces with clarity and confidence.

ADVANCED SUSPENSION The available Continuously Variable Real-Time Damping suspension system helps enhance control of your vehicle to deliver a smooth, confident ride.

WHEN MICROSECONDS CAN MAKE ALL THE DIFFERENCE

With its suite of available advanced safety features, Enclave is designed to help you with the most important thing of all: keeping you and those close to you secure.

ADAPTIVE CRUISE CONTROL-ADVANCED¹ This available feature enhances regular cruise control. The cruise control speed is automatically adapted to maintain a selected gap between the vehicle and vehicles detected ahead while you steer, reducing the need for you to frequently brake and accelerate.

REAR VISION CAMERA To help you better navigate while backing up, the Rear Vision Camera shows you grid lines and live images of what's behind you on the 8-inch diagonal colour touch-screen.

REAR CROSS TRAFFIC ALERT When in Reverse, Rear Cross Traffic Alert is designed to provide alerts to help you avoid approaching detected left or right cross traffic, such as when you're backing out of your driveway or a crowded parking space.

LANE KEEP ASSIST WITH LANE DEPARTURE WARNING Available Lane Keep Assist with Lane Departure Warning provides gentle steering wheel turns, and if necessary, Lane Departure Warning is engineered to provide alerts to help you avoid crashes due to unintentionally drifting out of your detected lane when you are not actively steering and your turn signal is not activated.

LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT² Lane Change Alert with Side Blind Zone Alert is engineered to provide side-mirror alerts to help you avoid detected vehicles moving in, or rapidly approaching, your side blind zone during a lane-change manoeuvre.

SAFETY ALERT SEAT When a collision-avoidance technology such as available Rear Cross Traffic Alert triggers a warning, the left and/or right side of the driver seat cushion of the available Safety Alert Seat gently vibrates to signal the direction of the approaching hazard. For some types of alerts, both sides of the seat vibrate at the same time, for example, if the object is in front of the vehicle.

FORWARD COLLISION ALERT If this available system detects that a front-end collision situation is imminent while following a detected vehicle, the system alerts you to a potential crash. It also is designed to alert you if you are following a detected vehicle much too closely.

LOW SPEED FORWARD AUTOMATIC BRAKING³ If the vehicle is travelling at a low speed and the available system detects that a front-end collision situation is imminent while following a detected vehicle and you have not applied the brakes, the system is designed to automatically apply the brakes to help reduce the collision's severity. The system may even help avoid the collision at very low speeds.

FORWARD AUTOMATIC BRAKING⁴ If this available system⁵ detects that a front-end collision situation is imminent while following a detected vehicle and you have not applied the brakes, the system is designed to automatically apply the brakes to help reduce the collision's severity.
