DAYMAKER® LED LIGHTING

Daymaker® LED Projector Headlamps were developed to provide light where you need it most. With a combination of superior nighttime performance and modern signature styling, these brilliant LED headlamps push out a bright-white beam that lights up the surroundings and draws the attention of oncoming traffic. The long-life, solid-state LED headlamps are housed in sealed shock and vibration-resistant lamp assemblies that mount into the existing light housing. Installation is simple, and the plug-in headlamps require no rewiring.

7" DAYMAKER PROJECTOR LED HEADLAMP

Offering best-in-class punch of light, these headlamps illuminate the road in front of you, yet are directed slightly downward to avoid blinding oncoming drivers, making them perfect for highway riding situations.

- Extensive engineering and testing to ensure the road in front of you is equally lit
- No dark spots or streaks in light illumination
- Plug and play headlamps can be installed easily

7" DAYMAKER ADAPTIVE LED HEADLAMP

Delivering the right amount of usable light exactly where you need it most – you will see ditch to ditch, and down the road with lean angle controlled bank lighting for improved line of sight through corners.

- Includes all features and benefits of the 7" Daymaker Projector LED Headlamp
- Automatically projects light into corners to illuminate areas of previously unlit road
- Patented sensors and electronics determine lean angle of the motorcycle
- Adaptive technology works in both low beam and high beam

LUMENS VS LUX

Lumen is a unit of light, while Lux is a unit of light measurement where the area is also taken into account. The number of Lumens is not the only factor when choosing a headlamp, but also the usable light, or Lux. The Daymaker LED Headlamps have been perfected to utilize both Lumens and Lux, giving you the best visibility of the road.

A. COOLFLOW™ FAN

Keep your cool on a sweltering summer day. Engineered to maximize rider and passenger comfort in high temperature situations, the CoolFlow™ Fan is the perfect addition if your bike is subjected to parade duty, rush hour traffic, or extreme temperature environments. Unlike traditional fan kits that try to cool the engine by blowing air across the cylinders and often onto your legs, the CoolFlow Fan Kit keeps the riders comfortable by pulling air away from the rear cylinder and exhaust pipe, and directing it toward the ground. The fan suction generates a low pressure region near the riders to balance the natural “up and out” convection air flow in the area behind the engine. The wind-tunnel tested fan is tucked away above the transmission, and when combined with midframe air deflectors, significantly drops the temperature the seated rider experiences.

The CoolFlow Fan features switched On/Off/Auto operation on '17-later models and On/Off on '09-'16 models. In the “ON” mode, the fan is active at low speeds, and will turn off when the bike reaches 40mph. As speed drops, the fan turns back on at 35mph. This logic program prevents the fan from cycling on and off during low speed changes. On '17-later models, the AUTO setting operates based on a combination of speed parameters and specific engine and ambient temperatures.

Built to withstand the harsh motorcycle environment, the all-weather CoolFlow Fan is 100% waterproof and includes everything you need for installation. The plug-and-play design is integrated with the vehicle electronics, so “On/Off” fan operation is indicated in the odometer screen. Your dealer will enable this function in the Electronic Control Module (ECM) and you’re ready to roll. Odometer fan status display feature availability varies by model and may not be available for your vehicle.

Designed for severe duty and extreme temperature applications, these Color-Matched Mid-Frame Air Deflectors attach to the frame and surround the top of the rear cylinder head. The scoop shape captures the moving air and uses the flow to direct the heat down and away from the rider to improve comfort. Kit includes all required mounting hardware.

B. COLOR-MATCHED VENTED FAIRING LOWER KIT*

Control the airflow to your lower legs for maximum riding comfort. Original Equipment on many Touring models, these Color-Matched Fairing Lower feature a venting system that allows you to adjust the amount of air that circulates across the engine. On hot days, open the vent to direct additional cooling air and on cold or rainy days, close the vents for maximum protection from the elements. The ratcheting friction lock pivot allows you to easily set the position. The complete kit includes left and right Fairing Lower, convenient glove box and lid and all necessary mounting hardware. NOTE: Fairing Lower Kits are painted in a single color and do not feature pinstriping.

Fits '14-later Air-Cooled Touring and Trike models. Does not fit Twin-Cooled™ models or '18 FLTRXSE. Freewheeler® models require separate purchase of Engine Guard P/N 49184-09A or 49050-09A and Steering Stabilizer Bracket P/N 83865-09. Does not fit with Mustache Engine Guards, Chopped Engine Guards or Knockout Wheel Kit P/N 43300494 or 43300496.

C. CUSTOM STRETCHED SIDE COVERS

Add a long, lean look to the profile of your Touring bike. These Stretched Side Covers are sculpted to smooth the visual transition from the side of the bike to the front of the saddlebag, and trade the traditional stepped look for a rearward flowing design. Shaped to flare out and down the saddlebag face, the sleek side covers complement the body lines and eliminate the saddlebag guard clearance notch at the lower corner for a seamless flow. And unlike some aftermarket designs, these side covers fit without significantly compromising the available passenger foot space. The covers are a snap-in replacement for the Original Equipment covers, and require no bonding or modification for installation. Available in Color-Matched, Vivid Black or primed and ready-to-paint finish.

Fits '14-later Touring models. Does not fit with Auxiliary Power Port P/N 69201099.

B. COLOR-MATCHED CAFÉ CUSTOM TAIL SECTION

Create your own link to the Sportster®-based racing and performance bikes of the '60s and '70s. This fast-back solo seat and tail section mirrors the look and feel of the iconic 1977-78 Harley-Davidson® XLCR Café Racer model, and re-imagines the style for the modern era. Ideal for use with Clip-On or Sportster Clubman Handlebars and mid- or rear-set foot controls, this seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners. The seat's upturned tail and longer nose positions the solo rider closer to the tank for better weight balance, quicker steering and added front-end feedback. The Tail Section is a true bolton design that wraps the fender struts, so unlike other café bike kits, there is no cutting, welding or frame modifications required. Installation is reversible – you can return easily your bike to the stock look. The complete kit features a sweeping composite tail section with a steel inner support, a deep solo bucket seat with backstop pad, and all necessary installation hardware.
