i.MX 8QM CPU Card

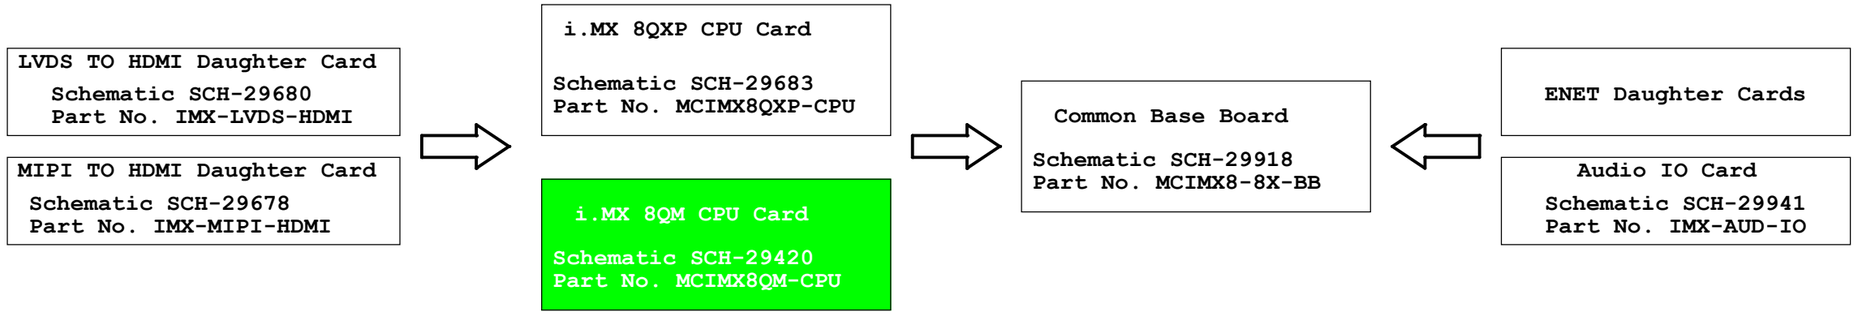
Part Number: MCIMX8QM-CPU

This board was designed for maximum flexibility in software development and demonstrates multiple functions possible with i.MX processors. Although best design practices have been applied, some areas may not be suitable for a mass production design. For an added resource, refer to Hardware Development Guide document.

Consumer devices were utilized in this design when lead time for equivalent automotive-grade devices conflicted with production schedules. NXP suggests consulting component suppliers for equivalent automotive-grade device information.

DNP appearing near a component signifies "do not populate."
These parts are not installed

REV	Revision Notes	Date
C1	1. Sheet No. 8 : Pull-Up Resistors removed from PMIC pin 1. Pin 44 tied to Pin 41, to minimize quiscent current 2. Sheet No. 17 : SATA Boot Option removed from the boot mode list 3. Sheet No. 22 :1uF Capacitor is added in series with HDMI_RX0_ARC_P (For fixing HDMI RX side issues) 4. Sheet Nos. 9 & 16: Changed R383 from 1K to 100E, SD Card Power Changed from VCC_PER_3V3 to VCC_EXT_3V3 and Discharge Circuit for EXT_1V8 Added (For fixing power discharge issues while Processor reset) 5. Sheet No. 24 : Changed Headphone Jack Pinout to AHJ (Pins 1 & 4 Swapped) and added AHJ Graphic (Headphone JacK reconfiguration) 6. Sheet No. 19 : FTDI Chip updated to FT4232H 7. Sheet No. 30 : Connector J20 symbol updated 8. Sheet Nos.12 & 19 : Option provided for connecting SCU UART signals to FTDI Chip for debug 9. Sheet No . 21 : PCIe clock selection (internal / external) option provided 10. Sheet No 9 : PMIC2 WDI disconnected as per PMIC errata ER023 (R113 Unmounted) 11. Sheet Nos 14 & 15 : DDR_CH0_RST_B & DDR_CH1_RST_B Pulldown to Ground with 10K (Added R1481 & R1482) 12. Sheet Nos 12: Added R1483 & R1484 for ANA_TEST_OUT 0 and 1	08-08-2018
C2	1. Processor part number updated to "PIMX8QM6AVUFFAB"	17-09-2018
C3	C3 is internal release, not used for layout update. 1. PMIC_1 (U10) P/N updated to MC33PF8100EPES PMIC_2 (U23) P/N updated to MC33PF8100EQES 2. Following obsolete P/N updated: DA1,DA2 - BAV99LT1G (ON SEMICONDUCTOR) J1,J6 - 47659-1100 (MOLEX) U17,U18 - MT53E768M32D4DT-053 AIT:E (MICRON)	22-Nov-2019
C4	No electrical changes. 1. Classification changed to Public Information. 2. Note updates. 3. U15 Processor and U10/U23 PMICs updated to production part numbers. 4. Following P/N updated back to: DA1,DA2 - BAV99 (FAIRCHILD) J1,J6 - 47659-1000 (MOLEX)	24-Jan-2020



Additional information on compatible daughter cards, cameras, etc. is provided on the nxp.com website.

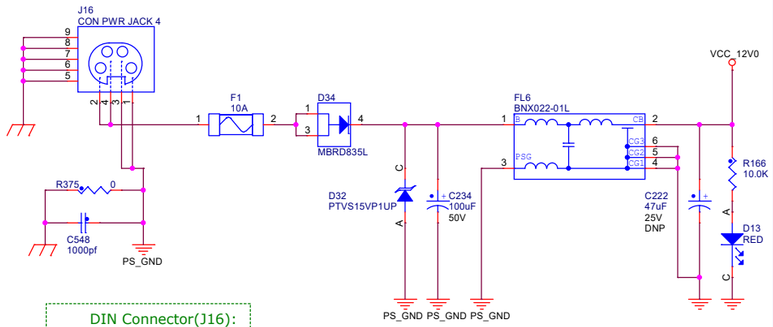
POWER SUPPLY

12V DC INPUT DIN CONNECTOR

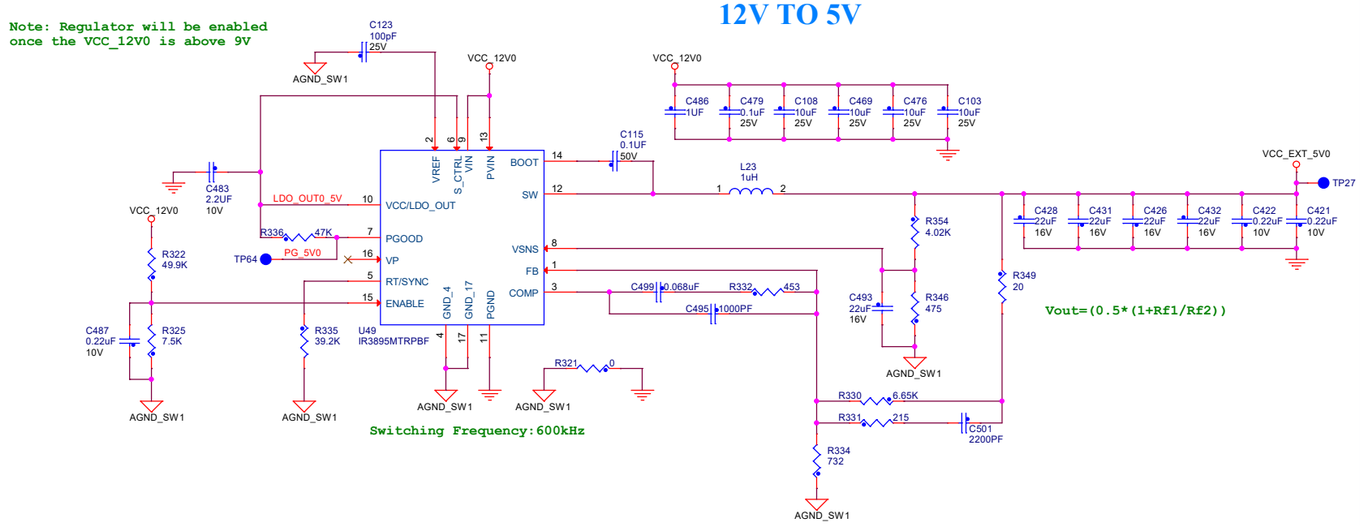


DIN Connector(J16):

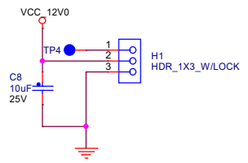
Part number: KPJX-4S-S
Vendor : Kycon

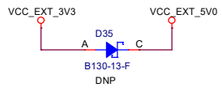
12V TO 5V

Note: Regulator will be enabled once the VCC_12V0 is above 9V

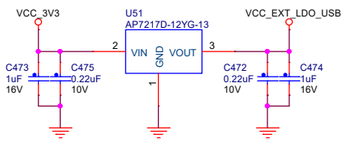


FAN CONNECTOR



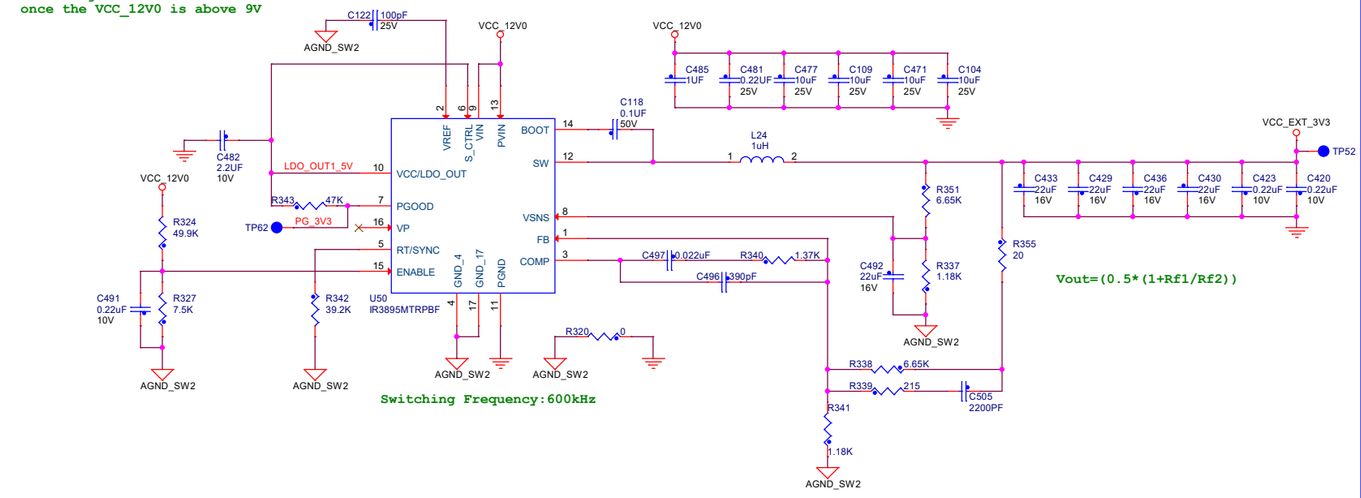


LDO FOR 1V2:VDD_USB_HSIC0_1P2

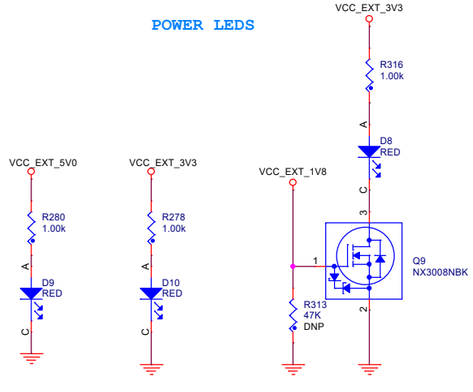


12V TO 3.3V

Note: Regulator will be enabled once the VCC_12V0 is above 9V



POWER LEDS



12V TO 1.8V

Note: Regulator will be enabled once the VCC_1V8 is UP

Three interrupts are connected to
M4_GPT1 configured as LSIO GPIO.
These are pulled to 1.8 V on Sheet 30 to avoid false
triggering when the Base Board is not installed.
The Base Board has voltage translation as needed.

CAN signals ERR, WAKE, and INT are combined together on
the Base Board to provide the CAN_INT_B signal.

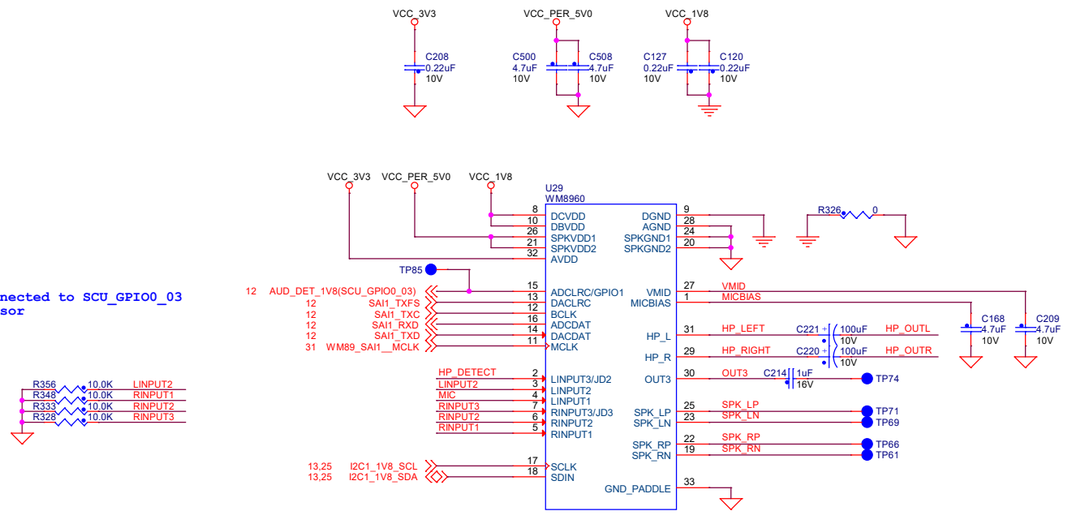
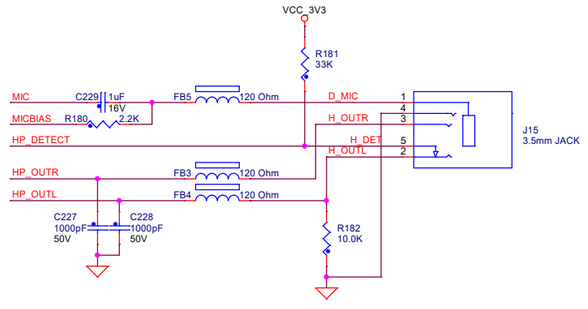
AUDIO CODEC WM8960

AHJ 'AV' Connector Interface	
PIN	**Description**
1	Microphone
4	Ground
3	Right Side Earpiece
2	Left Side Earpiece



7-bit I2C Address: "0011010"



Headphone Jack pinout changed from OMTP to AHJ on rev C1 schematic and rev C1 layout.
GND and MIC changed locations to accomodate a wider range of headsets.
