AT&T Invests Nearly \$625 Million Over 3-Year Period To Boost Local Networks in Arkansas

LITTLE ROCK, AR, November 12, 2019 — At [AT&T](#)¹, we've invested nearly \$625 million in our Arkansas wireless and wired networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've improved critical services that support Public Safety and first responders using the FirstNet communications platform. And, we've helped meet the needs of customers in largely rural areas through our participation in the FCC's Connect America Fund.

AT&T's wireless network covers more than 99% of all Americans and has become the fastest wireless network in the nation, according to the second quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®. ²

In 2018, AT&T made more than 900 wireless network upgrades in Arkansas, including new cell sites and additional network capacity.

"Our investments in Arkansas enhance coverage for our customers and FirstNet subscribers," said Ronald Dedman, president of AT&T Arkansas. "We are dedicated to the communities we serve, and our ongoing investments help to keep Arkansans connected when and where they need it most."

"AT&T's continued investment in Arkansas' communications infrastructure drives business growth and economic opportunity across our state. Robust connectivity benefits every aspect of our economy," Arkansas Secretary of Commerce Mike Preston said.

Following the passage of recent state legislation, AT&T will continue its investment in Arkansas with additional upgrades.

By building out our 4G LTE network, we're boosting network speeds and capacity, as we continue to expand the availability of our network and upgrade our technology.

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

Transforming Public Safety Communications

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first

responders connect to the critical information they need – every day and in every emergency.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.

Building upon our current and planned investments in Arkansas, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Deployed Band 14 spectrum in more than 600 markets nationwide, including multiple locations in Arkansas, including Little Rock, Fayetteville, Springdale, Jonesboro, Conway, Bentonville, Rogers, Van Buren, Hot Springs, Pine Bluff, Texarkana, Fort Smith, Stuttgart and West Helena. Band 14 is high-quality spectrum provided by the First Responder Network Authority. Its signal covers larger geographic areas with less infrastructure to better support rural communities, and it can better reach in-building in more urban areas as compared to higher-MHz spectrum.
- Arkansas first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network, thanks to the specialized capabilities enabled by the physically separate and dedicated FirstNet network core, like always-on priority and preemption. 3
- Public safety agencies subscribed to FirstNet have 24/7 access to a nationwide fleet of 72 dedicated deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

Our commitment to rural America

Through our participation in the FCC’s Connect America Fund universal service program, AT&T has been helping to meet the connectivity needs of customers in largely rural areas and to expand the opportunities enabled by internet access. By the end of 2020, AT&T will have used funds from this FCC program to help deploy, maintain and offer internet access and voice services to more than 1.1 million mostly rural homes and small business locations in FCC-identified areas. By the end of 2018, we offered high-speed internet access to over 31,000 locations across Arkansas in mostly rural areas through technologies like Fixed Wireless Internet.

We are the largest U.S.-based provider of fiber for business services. There are over 500,000 U.S. business buildings lit with AT&T fiber, and we’re adding thousands more each month.

Within those buildings, AT&T now enables high-speed fiber connections to over 2.2 million U.S. business customer locations. And if you count businesses near our fiber network, that number quadruples. Nationwide, more than 8 million business customer locations are on or within 1,000 feet of our fiber.⁵

To learn more about our wireless coverage in Arkansas, or anywhere in the U.S., visit the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).
