## 1. General Information

#### 1.1. Legal Information

The contents of this document are provided "as is". Except as required by applicable law, no warranties of any kind are made in relation to the accuracy and reliability or contents of this document, either expressed or implied, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. Westermo reserves the right to revise this document or withdraw it at any time without prior notice.

Under no circumstances shall Westermo be responsible for any loss of data or income or any special, incidental, and consequential or indirect damages howsoever caused.

More information about Westermo can be found at www.westermo.com.

#### 1.2. About This Guide

This guide is intended for installation engineers and users of the Westermo products.

It includes information on safety and regulations, a product description, installation instructions and technical specifications.

#### 1.3. Software Tools

Related software tools are available at www.westermo.com/support/software-tools.

## 1.4. License and Copyright for Included FLOSS

This product includes software developed by third parties, including Free/Libre Open Source Software (FLOSS). The specific license terms and copyright associated with the software are included in each software package respectively. Please visit the product web page for more information.

Upon request, the applicable source code will be provided. A nominal fee may be charged to cover shipping and media. Please direct any source code request to your normal sales or support channel.

## 1.5. WeOS Management Guide

This product runs WeOS (Westermo Operating System). Instructions for quick start, configuration, factory reset and use of USB port are found in the WeOS Management Guide at www.westermo.com.

## 2. Safety and Regulations

## 2.1. Warning Levels

Warning signs are provided to prevent personal injuries and/or damages to the product. The following levels are used:

| Level of warning  | Description   | Consequence personal injury | Consequence material damage    |
|---|---|-----------------------------|--------------------------------|
| <u></u>   | Indicates a potentially hazardous situation                 |                             | Major damage to the product    |
| WARNING   |   |                             |                                |
|   | Indicates a potentially<br>hazardous situation              | Minor or moderate injury    | Moderate damage to the product |
| CAUTION   |   |                             |                                |
| Provides information in order to avoid misuse of the product, confusion or misunderstanding |   | No personal injury          | Minor damage to the product    |
| NOTICE  |   |                             |                                |
| 0   | Used for highlighting general,<br>but important information | No personal injury          | Minor damage to the product    |
| NOTE  |   |                             |                                |

Table 1. Warning levels

#### 2.2. Safety Information

#### Before installation:

Read this manual completely and gather all information available on the product. Make sure it is fully understood. Check that your application does not exceed the safe operating specifications for the product.

This product relies on convection cooling. Make sure that it is installed so that the ambient temperature is within the specified temperature range, e.g. by avoiding obstruction of the airflow around the product. Also see EN 45545-2 Mounting Notes [17] chapter.

#### **WARNING - PREVENT ACCESS TO HAZARDOUS VOLTAGE**

Before mounting, using or removing this product: Prevent access to hazardous voltage by disconnecting the product from all power supply.

#### **WARNING - HAZARDOUS VOLTAGE**

Do not open the connected product. Hazardous voltage may occur within this product when connected to power supply.

#### **CAUTION - HOT SURFACE**

Be aware of that the surface of this product may become hot. When this product is operated at high temperatures, the external surface of the product may exceed Touch Temperature Limit according to EN/IEC/UL 60950-1.

#### **NOTICE - REDUCE RISK OF FIRE**

To reduce the risk of fire:

- 1. Use only No. 18 AWG or larger power cable for Viper LV units
- 2. Use only No. 21 AWG or larger power cable for Viper HV units
- 3. Use only No. 26 AWG or larger telecommunication line cord

Additionally, any cable used for Power over Ethernet must fulfill requirements specified in IEEE 802.3.

#### **NOTICE - CONNECT EXTERNAL FUSE**

The product has no internal fuse and should be connected via an external fuse for protection. The fuse must be UL approved and rated for at least 160 VDC / 7.5 A.

## NOTICE - MECHANICAL FORCE ON VENTILATION MEMBRANE

Do not cover or bring mechanical force to the ventilation membrane on the back of the product.

#### **NOTICE - ADDITIONAL EMC TYPETESTS**

For additional EMC typetests with powering via a CDN or similar high inductive filters, please contact Westermo for correct test setup.

#### 2.3. Care Recommendations

Follow the care recommendations below to maintain full operation of the product and to fulfill the warranty obligations:

- Do not drop, knock or shake the product. Rough handling above the specification may cause damage to internal circuit boards.
- · Do not use harsh chemicals, cleaning solvents or strong detergents to clean the product.
- Do not paint the product. Paint can clog the product and prevent proper operation.

If the product is used in a manner not according to specification, the protection provided by the equipment may be impaired.

If the product is not working properly, contact the place of purchase, nearest Westermo distributor office or Westermo technical support.

#### 2.4. Maintenance

No maintenance is required, as long as the product is used as intended within the specified conditions.

#### 2.5. Product Disposal

This symbol means that the product shall not be treated as unsorted municipal waste when disposing of it. It needs to be handed over to an applicable collection point for recycling electrical and electronic equipment.

By ensuring the product is disposed of correctly, you will help to reduce hazardous substances and prevent potential negative consequences to both environment and human health, which could be caused by inappropriate disposal.

Figure 1. WEEE symbol for treatment of product disposal

## 2.6. Compliance Information

#### 2.6.1. Agency Approvals and Standards Compliance

| Туре                                     | Approval/Compliance  |

<sup>&</sup>lt;sup>a</sup>Applicable only for Viper-x12A-P8-LV, Viper-x12A-T3G-P8-LV and Viper

Table 2. Agency approvals and standards compliance

#### 2.6.2. FCC Part 15.105

This product has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the product is operated in a commercial environment.

This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the user manual, may cause harmful interference to radio communications. Operation of this product in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at the users own expense.

#### 2.6.3. Simplified Declaration of Conformity

Hereby, Westermo declares that this product is in compliance with applicable EU directives. The full EU declaration of conformity and other detailed information is available at <a href="https://www.westermo.com/support/product-support">www.westermo.com/support/product-support</a>.

Figure 2. The European conformity marking

## 3. Product Description

#### 3.1. Product Description

The Viper-12A-PoE series is a series of managed 12 port switches optimised for the needs of the railway rolling stock market. PoE ports offer effective powering of end-devices. Gbps ports cope with high bandwidth devices such as access points and NVRs (Network Video Recorders).

The Viper is designed to withstand the tough environment on-board trains, exposing the switch to constant vibration, extreme temperatures, humidity and a demanding electrical environment.

A GORE-TEX® membrane prevents internal condensation. Threading integrated in chassis provides for additional vibration resistance. High-level isolation between all interfaces enables direct connectivity to vehicle auxiliary power and protects against overvoltage and flashover. IP67 protection prevents ingress of water and dust. An overall optimised design results in an extremely compact package in combination with very high MTBF for easy integration and low lifecycle cost.

Thorough type testing at independent ISO/IEC 17025 and ILAC MRA certified labs, accredited to a wide range of standards, show that the Viper series fulfills EN 50155 and other requirements. The state-of-the-art Westermo production facility ensures the quality of each individual unit, e.g. through temperature cycling burn-in testing.

Meeting the requirements of the railcar market, the Viper is very well suited for deployment in any other application with severe operating conditions and tough environments, for instance in the mining industry.

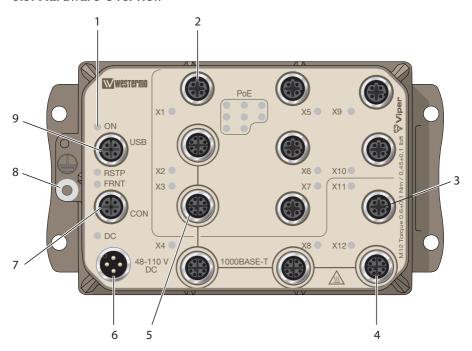

#### 3.2. Available Models

All switches are managed and have eight PoE ports. Viper x12A-PoE is used when referring to both models 112A-PoE and 212A-PoE.

| Art. no.  | Model                | Software | Gbps ports | HV         | LV        |
|-----------|----------------------|----------|------------|------------|-----------|
| 3635-0110 | Viper-112A-P8-HV     | L2       | -          | 48 - 110 V |           |
| 3635-0120 | Viper-212A-P8-HV     | L3       | -          | 48 - 110 V |           |
| 3635-0210 | Viper-112A-P8-LV     | L2       | -          |            | 24 - 38 V |
| 3635-0220 | Viper-212A-P8-HV     | L3       | -          |            | 24 - 38 V |
| 3635-0410 | Viper-112A-T3G-P8-HV | L2       | 3          | 48 - 110 V |           |
| 3635-0420 | Viper-212A-T3G-P8-HV | L3       | 3          | 48 - 110 V |           |
| 3635-0510 | Viper-112A-T3G-P8-LV | L2       | 3          |            | 24 - 38 V |
| 3635-0520 | Viper-A12A-T3G-P8-LV | L3       | 3          |            | 24 - 38 V |
| 3635-0710 | Viper-112A-T5G-P8-HV | L2       | 5          | 48 - 110 V |           |
| 3635-0720 | Viper-212A-T5G-P8-HV | L3       | 5          | 48 - 110 V |           |

| 3635-0820 | Viper-212A-T5G-P8-LV | L3       | 5          |            | 24 - 38 V |

Table 3. Available Viper x12A-P8 models

## 3.3. Hardware Overview

| No. | Description   | No. | Description                 |
|-----|---------------|-----|-----------------------------|
| 1   | LED indicator | 2   | 100 Mbps PoE port           |
| 3   | 100 Mbps port | 4   | Gbps port                   |
| 5   | Gbps PoE port | 6   | Power connection            |
| 7   | Console port  | 8   | Protective earth connection |
| 9   | USB port      |     |                             |

Figure 3. Location of interface ports and LED indicators

#### 3.4. Connector Pinout

| Pin<br>no. | Signal | Illustration |
|------------|--------|--------------|
| 1          | +DC1   | 2 1          |
| 2          | +DC1   |              |
| 3          | -COM   |              |
| 4          | -COM   | 3 4          |

The Viper-12A-PoE series has single power connection. Dual pins shall be connected to the power supply (+DC1 for positive terminal, -COM for negative terminal) in order to distribute the current over two pins.

Table 4. Power connector HV

| Pin<br>no. | Signal | Illustration |
|------------|--------|--------------|
| 1          | +DC1   | 3 2          |
| 2          | +DC1   |              |
| 3          | -COM   |              |
| 4          | -COM   | 4            |

The Viper-12A-PoE series has single power connection. Dual pins shall be connected to the power supply (+DC1 for positive terminal, -COM for negative terminal) in order to distribute the current over two pins.

Table 5. Power connector LV

| Pin no. | Signal | Illustration |
|---------|--------|--------------|
| 1       | NC     |              |
| 2       | TX     |              |
| 3       | RX     | 5            |
| 4       | NC     | (4) (3//     |
| 5       | GND    |              |

Table 6. Console connector

| Pin no. | Signal | Illustration            |
|---------|--------|-------------------------|

## 3.5. LED Indicators

| LED       | Status         | Description   |
|-----------|----------------|---|
| ON        | OFF            | Product has no power  |
|           | GREEN          | All OK, no alarm condition  |
|           | RED            | Alarm condition, or until product has started up. (Alarm conditions are configurable, see WeOS Management Guide)  |
|           | BLINK          | Location indicator ("Here I am!"). Activated when connected to WeConfig tool, or upon request from web or/and CLI. RED BLINK during boot indicates pending cable factory reset. |
| RSTP      | OFF            | RSTP disabled   |
|           | GREEN          | RSTP enabled  |
|           | BLINK          | Product selected as RSTP/STP root switch  |
| FRNT      | OFF            | FRNT disabled   |
|           | GREEN          | FRNT OK   |
|           | RED            | FRNT error  |
|           | BLINK          | Product configured as FRNT focal point  |
| DC        | OFF            | Product has no power  |
|           | GREEN          | Power OK. Input voltage > 70% of minimum nominal voltage  |
|           | RED            | Power failure. Input voltage < 70 % of minimum nominal voltage  |
| X1 to X12 | OFF            | No link   |
|           | GREEN          | Link established  |
|           | GREEN<br>FLASH | Data traffic indication   |
|           | YELLOW         | Port alarm, or port is set in blocking state by link redundancy protocol  |
| PoE       | OFF            | Port does not consume PoE power   |
|           | GREEN          | Port consumes PoE power   |

Table 10. LED indicators

## 3.6. Dimensions

Dimensions are stated in mm and are regardless of HV or LV model.

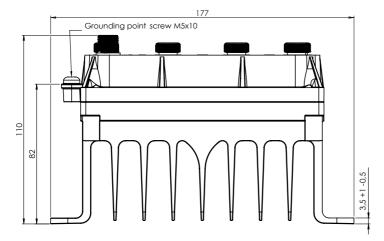

Figure 4. Dimensional drawing

## 4. Installation

## 4.1. Wall Mounting

The product can be wall mounted vertically or horizontally. There are four pieces of 7 mm bores for this. Use four M5, M6 or 1/4" screws with 12 mm washers on a flat and stable surface.

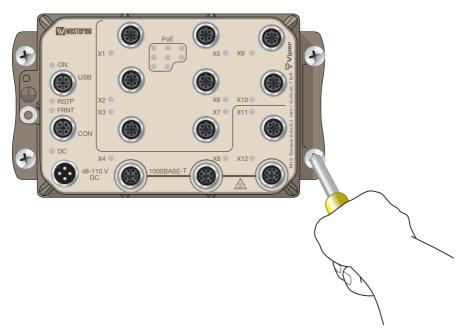

Figure 5. Wall mounting

#### 4.2. Connection of Cables

Recommended tightening torque for the M12 connectors is 0.6 Nm. All M12 connections are screw connections.

When connecting the power cable, ensure that the pins are connected correctly before tightening the power cable to the unit.

#### **NOTE - CONNECT EXTERNAL FUSE**

This product has no internal fuse and should be connected via an external fuse for protection. The fuse must be UL approved and rated for at least 160 VDC / 7.5 A.

#### **NOTE - UNUSED CONNECTORS**

Unused connectors must be covered by a protective cap (delivered with the product), tightened to the specified torque in order to fulfill the specified ingress protection code.

#### 4.3. Cooling

This product relies on convection cooling. Make sure that it is installed so that the ambient temperature is within the specified temperature range, e.g. by avoiding obstruction of the airflow around the product.

#### 4.4. Replacement of Product

Disconnect all cables and unscrew the product from the wall. Mount the replacement product and reconnect all cables, observing the instructions in Connection of Cables [16]. For easy replication of the configuration of the original product, it is recommended to have the Westermo USB plug permanently connected to the USB port and move it over to the replacement product before it is powered up.

MTTR (Mean Time To Repair), i.e. time for replacement of product is: < 10 minutes.

#### **CAUTION - HOT SURFACE**

Be aware of that the surface of this product may become hot. When it is operated at high temperatures, the external surface may exceed Touch Temperature Limit according to the product's relevant electrical safety standard.

Westermo's products are fanless and use convection cooling. To avoid obstructing the airflow around the product, follow the spacing recommendations.

## 4.5. EN 45545-2 Mounting Notes

Two product can be mounted together and as a single interior non-listed group in the sense of EN 45545-2 definitions. For multiple product, the spacing requirements for interior non-listed groups must be met.

## 5. Specifications

## 5.1. Interface Specifications

| DC, Power port                   |  |  |  |
|----------------------------------|--|--|--|
| Rated voltage                    | Viper-x12A LV units: 24 to 38 VDC<br>Viper-x12A HV units: 48 to 110 VDC  |  |  |
| Operating voltage                | Viper-x12A LV units:<br>16.8 to 49.9 VDC (14.4 to 53.2 VDC for 100 ms)<br>Viper-x12A HV units:<br>33.6 to 143 VDC (28.8 to 154 VDC for 100 ms)   |  |  |
| Rated current                    | Viper-x12A LV units: max 4.6 A at 24 VDC, max 2.9 A at 38 VDC Viper-x12A HV units: max 2.4 A at 48 VDC, max 1.0 A at 110 VDC   |  |  |
| Rated frequency                  | DC   |  |  |
| Inrush current, I <sup>2</sup> t | Viper-x12A LV units: 540 mA $^2$ s at 24 VDC, 410 mA $^2$ s at 38 V Viper-x12A HV units: 190 ma $^2$ s at 48 VDC, 160 mA $^2$ s at 110 V   |  |  |
| Startup current <sup>a</sup>     | Viper-x12A LV units: 1.5 A at 16.8 VDC<br>Viper-x12A HV units: 750 mA at 33.6 VDC  |  |  |
| Polarity                         | Reverse polarity protected   |  |  |
| Redundant power input            | No   |  |  |
| Isolation                        | 2250 VDC to all other ports  |  |  |
| Connector                        | Viper-x12A LV units: 4-pin, male, M12, T-coded, recommended Westermo cable: 3146-1108 for 5 m Viper-x12A HV units: 4-pin, male, M12, A-coded, recommended Westermo cables: 3146-1106 for 1.5 m 3146-1107 for 5 m |  |  |
| Cable size                       | For Viper-x12A HV units: M12, recommended cable area 0.5 mm² (minimum 0.25 mm²) For Viper-x12A LV units: M12, recommended cable area 1 mm² (minimum 0.75 mm²) Cable dimensions depend on choice of M12 connector |  |  |

<sup>&</sup>lt;sup>a</sup>Recommended external supply current capability for proper startup

| 100 Mbps ports, non-PoEa  |   |  |
|---------------------------|---|--|
| Electrical specification  | IEEE std 802.3  |  |
| Data rate                 | 10 Mbps, 100 Mbps, manual or auto   |  |
| Duplex                    | Full or half, manual or auto  |  |
| Circuit type              | TNV-1   |  |
| Transmission range        | Up to 150 m with CAT5e cable or better  |  |
| Isolation                 | 2250 VDC, 1 min <sup>b</sup>  |  |
| Connector                 | 4-pin, female, M12, D-coded, auto MDI/MDI-X, recommended Westermo cables: 3146-1100 M12-M12 - 1 m 3146-1101 M12-M12 - 5 m 3146-1103 RJ45-M12 - 1 m 3146-1104 RJ45-M12 - 5 m |  |
| Shielded cable            | Required  |  |
| Conductive chassis        | Yes   |  |
| FRNT reconfiguration time | Typically below 20 ms   |  |

<sup>&</sup>lt;sup>a</sup>100 Mbps ports, non-PoE, are:

 $<sup>^{\</sup>mathrm{b}}$ 750 VDC after damp heat, according to EN 50155

| Gbps ports, non-PoE <sup>a</sup> |  |  |
|----------------------------------|--|--|
| Electrical specification         | IEEE std 802.3                               |  |
| Data rate                        | 10 Mbps, 100 Mbps, 1000 Mbps, manual or auto |  |
| Circuit type                     | TNV-1  |  |
| Transmission range               | Up to 100 m with CAT5e cable or better       |  |
| Isolation                        | 2250 VDC to all other ports <sup>b</sup>     |  |
| Connector                        | 8-pin, female, M12, X-coded                  |  |
| Shielded cable                   | Required                                     |  |
| Conductive chassis               | Yes  |  |
| FRNT reconfiguration time        | Typically below 20 ms                        |  |

<sup>&</sup>lt;sup>a</sup>Gbps ports, non-PoE are: X4, X8, X12 on Viper-x12A-TxG-P8-HV/LV

X4, X8, X11-X12 on Viper-x12A-P8-HV/LV

X11 on Viper-x12A-TxG-P8-HV/LV

 $<sup>^{\</sup>mathrm{b}}$ 750 VDC after damp heat, according to EN 50155

| PoE ports, 100 Mbps and Gbps <sup>a</sup> |   |  |
|---|---|--|
| Electrical specification                  | IEEE std 802.3  |  |
| Circuit type                              | TNV-1   |  |
| Transmission range                        | Up to 100 m with CAT5e cable or better                        |  |
| Isolation                                 | 2250 VDC to all other ports <sup>b</sup>                      |  |
| Output voltage                            | 54 VDC, ±5%   |  |
| Output power <sup>c</sup>                 | Max 30 W on one port (PoE+)<br>Max 80 W in total on all ports |  |

<sup>&</sup>lt;sup>a</sup>PoE ports are: X1-X3, X5-X7, X9-X10. X2 and X3 are Gbps for Viper-x12A-T5G-P8-LV/HV.

 $<sup>^</sup>c$ As delivered by Power Sourcing Equipment, i.e. the Viper-x12A-PoE switch. Power available at Powered Device is depending on the cable resistance.

#### NOTE

PoE ports are not isolated to each other, except on a functional level.

| USB port                 |  |  |
|--------------------------|--|--|
| Electrical specification | USB 2.0 host interface   |  |
| Data rate                | Up to 480 Mbps (high-speed mode)                                     |  |
| Maximum supply current   | 500 mA   |  |
| Circuit type             | SELV   |  |
| Isolation                | To Ethernet and DC ports: 2250 VDC<br>No isolation to CON or chassis |  |
| Connector                | 5-pin, female, M12, A-coded, recommended Westermo USB plug 3641-0190 |  |

| Console port             |  |  |
|--------------------------|--|--|
| Electrical specification | RS-232   |  |
| Data rate                | 115.2 kbit/s   |  |
| Data format              | 8 data bits, no parity, 1 stop bit, no flow control  |  |
| Circuit type             | SELV   |  |
| Isolation                | To Ethernet and DC ports: 2250 VDC No isolation to USB or chassis                                    |  |
| Connector                | 5-pin, female, M12, B-coded, recommended Westermo cables: 1211-2215 (serial port) or 1211-4073 (USB) |  |

<sup>&</sup>lt;sup>b</sup>750 VDC after damp heat, according to EN 50155

## 5.2. Type Tests and Environmental Conditions

Table 12. Environmental and mechanical conditions

<sup>&</sup>lt;sup>b</sup>Operational at +85°C for a limited time

<sup>&</sup>lt;sup>c</sup>Provided all connectors are connected with IP67 cabling or fitted with protective caps (delivered with the unit) and tightened to the specified torque.

## 6. Revision Notes

| Revision | Date    | Change description  |  |  |
|----------|---------|---|--|--|
| Rev. I   | 2020-01 | 2.6.1 Agency Approvals and Standards Compliance - references to SBB requirements and ÖBB removed.   |  |  |
| Rev. H   | 2019-06 | Front page updated, "unit" changed to "product" throughout the user guide, 1.3 Software Tools text updated, 2.2 Safety Information: Notice - Mechanical force on ventilation membrane new information, 2.3 Care Recommendations text updated, 2.6.1 Agency Approvals and Standards Compliance updated (E-mark), 4.4 Replacement of Product text updated   |  |  |
| Rev. G   | 2018-12 | Viper-x12A-T5G-P8-HV and -LV added. 2.2 Safety Information with specific symbol for Caution - Hot surface, and text in Notice - Connect external fuse updated, 2.5 Environmental Protection updated to Product disposal, 2.6.1 Agency Approvals table updated, 2.6.3 Declaration of Conformity updated to Simplified Declaration of Conformity, 3.2 more models added, 3.3 Hardware Overview table updated, 4.2 updated with Notice - Connect external fuse, chapter 4.4 symbol for Caution - Hot surface updated, 5.1 Interface specifications - Gbps ports; Transmission range updated, PoE ports note A updated, Note updated, inrush current updated, 5.2 Type Tests and Environmental Conditions - enclosure updated, end page updated |  |  |
| Rev. F   | 2017-09 | 2.1 Definition of personal injury at Caution level updated, 2.2 Notice or additional EMC typetests added, 2.6.1 Mechanical data updated, 3.6 Dimensional drawing updated, 5.1 DC, Power port "Inrush current updated", Gbps ports, non-PoE "Isolation to" updated, PoE ports "Outpu power" updated to 30 W on one port, Transmission range for 100 Mbp ports and Gbps ports changed to 150 m, 5.2 Power frequency magnetic field test deleted, Enclosure updated, Radiated + Conducted RF emission updated  |  |  |
| Rev E    | 2017-07 | New layout for user guide with rearranged chapters, chapter 1 has updated texts and new chapter 1.5, new defining Warning levels in chapter 2.1, updated text in chapter 3.1, ± removed from ±2250 and ±750 VDC throughout the user guide, radiated RF immunity, service life and shock updated in chapter 5.2  |  |  |
|          |         | Old chapters Getting started, Configuration, Reference documents and Cable factory reset are deleted.   |  |  |
