PURPOSE-BUILT PERSONALIZATION.

The 2020 Colorado is the midsize truck with full-size capability. It's ready for work and always up for play. When it comes to personalization, Chevrolet Accessories offers sporty accents, bike carriers, utility racks, innovative storage systems and more. To enhance things even further, Chevrolet Performance offers a lineup of true factory off-road racing parts to elevate the capabilities of Colorado ZR2. Whatever you choose, you can be confident you're getting personalization options that have been purpose-built for Colorado, with many accessories and parts that have been designed, engineered, tested and backed by Chevrolet.

Start making Colorado all your own at chevrolet.com/accessories, which offers a convenient way to shop, select and ship thousands of choices.

ACCESSORIES

On the Cover: Preproduction 2021 Chevrolet Colorado ZR2 model shown with available accessories. Production model may vary. Available Spring 2020.

GM reserves the right to make changes at any time, without notice, in prices, colors, materials, equipment, features, specifications, models, accessories and availability. The Colorado Accessories Brochure features accessories that are designed, engineered, tested and backed by Chevrolet. An additional offering of Associated Accessories is also available which are engineered, tested and backed by third-party manufacturers. The Associated Accessories symbol  denotes that the accessory is engineered and sourced by third-party companies, each with its own individual warranty coverage.

Printed in October 2019.

Most Chevrolet Parts and Accessories sold and installed on a Chevrolet vehicle by a Chevrolet Dealer or a Chevrolet-approved Accessory Distributor/Installer (ADI) before delivery to the customer are covered under the applicable limited warranty. If Chevrolet Accessories are installed after vehicle delivery, or are replaced under the New Vehicle Limited Warranty, they will be covered, parts and labor, for the longer of the following: a) 12 months/12,000 miles (whichever comes first), or b) the balance of the applicable portion of the New Vehicle Limited Warranty. Chevrolet Parts sold over the counter, or those not requiring installation, will continue to receive the standard Chevrolet Dealer Parts Warranty of 12 months from the date of purchase, parts only, regardless of miles. Chevrolet warranties do not apply to Associated Accessories. See your dealer for details.

¹Manufacturer's Suggested Retail Price. Tax and installation extra. See dealer for details.

²At peak rated airflow of 240 grams per second.

³Estimated power based upon SAE test procedure J1349.

ZR2 OFF-ROAD PERFORMANCE PARTS

WE FINISH WHAT WE START.

"...Here you have a manufacturer offering legitimate trophy-truck-style off-road parts for their production truck."

Chad Hall, Driver — Hall Racing Chevrolet Colorado ZR2

11 Best in the Desert Races.

It's a simple mantra – finish what you start. With Chad Hall and the Hall Racing Team, it's a professional objective. A total of 434 vehicles have competed in all 11 races in the Best in the Desert series since the ZR2's race debut. As a testament to the grueling nature of off-road racing, the ZR2 is one of only four vehicles – fewer than 1% of total entrants – that completed each of these 11 competitions. For the third time in three years, the Chevrolet Performance Hall Racing ZR2 completed the demanding 500+ mile Vegas to Reno Race and with a finishing time of 14 hours, 1 minute and 29 seconds, a testament to the design, integrity and durability of parts from Chevrolet Performance.

DESERT-TOUGH TO DUST THE COMPETITION.

A new lineup of true factory off-road racing parts is ready to elevate the capabilities of Colorado ZR2 even further. The outcome of decades of off-road racing expertise, they're developed by engineers and racers as passionate about performance as you are. Over 10,000 combined off-road race and development miles are proof that the Hall Racing Chevrolet Colorado ZR2 – and the Chevrolet Performance Parts that power it – has made the grade.

1.5-Inch Body Lift System¹

Increases front and rear fender clearance, enabling the use of popular off-road tire options. With 16 body spacers, impact beam, parking brake, and rear bumper relocation brackets, bed spacer blocks, a rear bumper step spacer, and a set of intake spacers, plus fastener hardware, the system is a direct bolt-on for 2017–2020 Colorado ZR2 V6 models. P/N 84429026. MSRP²: \$1,000.00.

Front and Rear Jounce Shock Systems

Front and Rear Jounce Shock Systems (Front and Rear systems sold separately) incorporate nitrogen-charged hydraulic secondary suspension bump shocks developed for off-road racing and rock crawling. They greatly enhance gross vehicle motion control, increase suspension capacity, and provide exponential bottoming protection for extreme off-road conditions. Separate front and rear bolt-on systems include Jounce Shocks for each side, required mounting brackets and all required fasteners. For the Rear Jounce Shock System, Chevrolet Performance recommends pairing with the Cross Car Beam System (P/N 84403779) for all V6-equipped off-road applications. Requires Jounce Striker/Leaf Spring Mount System (P/N 84422116), available separately. MSRP²: \$2,200. Front P/N 84403780. MSRP²: \$1,313.33. Rear P/N 84422546. MSRP²: \$1,646.67.

Cross Car Beam System¹

Designed to increase the rigidity of the rear frame assembly, the Cross Car Beam helps counteract loads from the ZR2 Rear Jounce Shock System. Includes the beam assembly, end plates and required fasteners. Chevrolet Performance recommends use with the Rear Jounce Shock System (P/N 84422546). P/N 84403779. MSRP²: \$613.33.

FRONT

REAR

Rear Differential Cover

The Chevrolet Performance ZR2 Rear Differential Cover is precision-machined from 6061-T6 billet aluminum. It provides a robust mounting platform for the Anti-Wrap Link System and looks great doing it, thanks to the clear anodized finish and unique Chevrolet Performance logo plate. Can be used with the optional Anti-Wrap Link System (P/N 84402369) or alone. P/N 84401895. MSRP²: \$950.00.

Long-Travel Leaf Spring System

The Chevrolet Performance ZR2 Long Travel Leaf Spring System is an optimized single-rate leaf spring that replaces the stock ZR2 Dual-Rate Spring. The spring design relocates the rear axle for a better system-directed path of the rear tire to center in the rear wheelhouse in extreme travel conditions. The spring system also increases the rear ride height approximately 30mm to allow for a typical off-road payload to be carried during off-road events. Overall suspension travel is increased up to 11" when paired with Long Travel Rear DSSV shocks, P/N 84402367. A direct bolt-on, the system includes both rear leaf springs, longer off-road shackles and all mounting fasteners. Chevrolet Performance recommends use with the Jounce Striker/Leaf Spring Mount System (P/N 84422116), Long Travel Rear DSSV Shocks (P/N 84402367), Anti-Wrap Link System (P/N 84402369) and Rear Jounce Shock System (P/N 84422546) for optimum off-road performance. P/N 84402368. MSRP²: \$3,546.67.

Anti-Wrap Link System¹

Helps prevent axle wrap under acceleration and braking while improving suspension control in extreme off-road conditions. A direct bolt-on to V6-equipped 2017+ Colorado ZR2 models, the system includes a front frame attachment, anti-wrap link with bushing and sealed rod end bearing, a differential cover bracket and mounting fasteners. Requires the Rear Differential Cover (P/N 84401895) and Long Travel Rear Leaf Spring System (P/N 84402368). Chevrolet Performance recommends use with the 1.5-Inch Body Lift System (P/N 84429026) for optimal performance. P/N 84402369. MSRP²: \$1,300.00.

Front Leveling Kit with High-Angle Upper Control Arms

Increases front ride height by up to 1 1/4 inches, levels vehicle stance and provides a greater approach angle, all of which helps enable the use of popular off-road tire combinations³. High-angle upper control arms maintain optimal joint articulation for increased front suspension travel, and upgraded ball joints increase cross car articulation by up to 18%. The sealed ball joint and boot design based on Chevrolet Performance standards provides a protected environment from off-road elements. This system provides additional integration with the DSSV dampers to maintain the factory stock ZR2 ride quality. Not compatible with ZR2 Front Long Travel DSSV Shocks (P/N 84402367). Chevrolet Performance recommends pairing with Ball Spline Half Shafts (P/N 84429060), Front Jounce Shock System (P/N 84403780) and Tie Rod Sleeve System (P/N 84419134). P/N 84621360. MSRP²: \$793.33.

The Chevrolet Performance ZR2 Off-Road Performance Parts listed here are intended for off-road use.

¹ Not available for diesel ZR2 models.

² Manufacturer's Suggested Retail Price. Tax and installation extra. See dealer for details.

³ Use only GM-approved tire and wheel combinations. See chevrolet.com/accessories for important wheel and tire information or see your dealer.

Steel Driveshaft

Offers superior resistance to impact damage during extreme off-road and rock crawling events. Reduced 0.5 inches from the production aluminum driveshaft, this 3.5-inch diameter steel shaft allows for increased clearance over obstacles, has a maximum driveshaft speed of 5,000 RPM and improves packaging with additional and optional off-road suspension components. Delivered assembled with 1350 U-joints. P/N 84401894. MSRP¹: \$553.33.

High-Angle Upper Control Arm Ball Joint System
Enables increased upper ball joint articulation to allow for increased front suspension travel. A direct replacement for the production parts, the High-Angle Ball Joint System increases cross car articulation by up to 18%. A sealed design helps prevent water intrusion and a dust boot helps keep dirt and dust out of the joint. Includes front upper control arms, control arm bolts and nuts, and new ball joint nuts for a direct bolt-on installation. P/N 84402363. MSRP¹: \$687.50.

Ball Spline Half Shafts
Features fixed inner and outer Double Offset Joints and a plunging Ball Spline Shaft allowing for larger joint angles compared to production ZR2 half shafts, accommodating lifted or leveled 2017+ Colorado ZR2 models. These half shafts provide improved articulation while reducing feedback forces through the steering system during hard cornering and off-road events. Designed and validated for severe-duty, off-road use where speeds and loading conditions are pushed to extremes, the system includes both Ball Spline Half Shafts and Wheel Nuts. P/N 84429060. MSRP¹: \$3,840.

Heavy-Duty Tie Rod Sleeves
This affordable solution for 2017+ Colorado ZR2 owners provides increased buckling strength for handling increased loads and suspension travel during severe-duty, off-road and race conditions. Tested and validated in extreme off-road races, the Tie Rod Sleeve System is a proven addition to the ZR2 and is a direct addition into the factory ZR2 steering system. P/N 84419134. MSRP¹: \$253.33.

Front and Rear Long-Travel DSSV Shocks
Designed and tuned specifically for off-road racing by Chevrolet Performance and Multimatic, the Dynamic Suspension Spool Valve Shocks (Front and Rear shock sets sold separately) provide up to a 15% increase in overall suspension travel in the front and up to 10% in the rear when paired with the available Performance ZR2 Rear Long-Travel Leaf Spring System (P/N 84402368). Rod diameters measure 18mm thick for front shocks and 16mm for rear shocks to accommodate higher side loads. Both kits feature Viton Seals to handle higher shock temperatures, stronger Heim Joint Lower Attachments and optimized Spool Valve Tuning. Front shocks feature a threaded shock body to allow for ride height adjustments via the lower spring seat. The front system includes both front shocks, top mounts, upper and lower rate washers, upper spring seats, dust boots and mounting fasteners. NOTE: Does not include springs. Chevrolet Performance recommends the use of a flat ground coil over type 3" ID spring, 14" in length, with two optional rates, 650 lbs./in. or 700 lbs./in. Requires High-Angle Upper Control Arm Ball Joint System (P/N 84402363) and Plunging Ball Spline Half Shaft System (P/N 84429060). The rear system includes both rear shocks and mounting fasteners. Chevrolet Performance recommends use with the Long-Travel Leaf Spring System (P/N 84402368), Rear Jounce Shock System (P/N 84422546) and Jounce Shock Striker/Leaf Spring Mount System (P/N 84422116) for optimum off-road performance. Front P/N 84402367. MSRP¹: \$4,466.67. Rear P/N 84402366. MSRP¹: \$4,266.67.
