Under normal circumstances a notice shall be published at least twice in a newspaper of general circulation in the town with the first such publication occurring at least fourteen (14) days before the date of opening bids and the last such publication occurring at least five (5) days before the date of opening bids. In special circumstances where time is of the essence and authorized by consent of at least three (3) members of the Town Council, notice shall be published at least once in a newspaper of general circulation in the town with the publication occurring at least five (5) business days before the date of opening bids. Sealed bids shall be solicited from all responsive and responsible prospective bidders whose names are on any bidders list maintained by the town for the article or service being purchased. Where applicable, notice shall contain the town engineer's estimate of cost or advise as to its availability whenever such cost estimate has been made.
- B. **Bid Opening:** Sealed bids shall be submitted as designated in the notice with the statement "Bid for (Item)" on the envelope. Bids shall be opened in public at the time and place stated in the notice. A tabulation of all bids received shall be open for public inspection during regular business hours for a period of not less than thirty (30) days after the bid opening.

- D. **Tie Bids:** If two (2) or more bids received are for the same total amount or unit price, with quality and service being equivalent, and if the public interest will not permit the delay of re-advertising for bids, the town shall accept the lowest bid made after negotiations with the bidders at or after the time of the bid opening.
- E. **Award Of Contracts:** Contracts under one thousand dollars (\$1,000.00) shall be awarded by the department head of the department intending to purchase the supplies or services. exceeded. In such event, the Town Manager shall follow applicable bidding requirements before award of the bid.

- F. Local Preference: In awarding bids for public work or the procurement of supplies or services, preference shall be given to residents of Iron County when quality, suitability and performance are equal. If the bid or offering from a non-preferred bidder submitted in response to an invitation to bid is the low bid and there is a preferred bidder, then the supplies, services or construction shall be obtained from or awarded to the preferred bidder if the lowest bid of a preferred bidder is within five percent (5%) of the low non-preferred bid and if he agrees to meet the low bid, in writing, within seventy two (72) hours after the notification to him that he is a qualifying preferred bidder. Such notice shall contain the exact price or bid submitted by the non-preferred bidder, and the town shall enter into no contract until seventy two (72) hours have elapsed after notification to the qualifying low preferred bidder. For purposes of this subsection a "resident" is one who maintains its principal place of business in Iron County on the date of award and for at least ninety (90) consecutive days prior to such date. - A. Uniqueness: Contracts which by their nature are not adapted to an award by competitive bidding, such as contracts for items available from a single source only, contracts for repair and maintenance of equipment already owned by the town which may be most efficiently performed by the originator of the equipment or its agent, contracts for the purchase of used equipment or items that are unique as to quality, condition and price, or contracts for a particular brand of equipment or product which is uniquely suited to the town's needs by reason of training of its personnel or compatibility with existing equipment, shall not be subject to the competitive bidding requirements of this chapter. - C. Necessity Of Council Approval: An exception to bidding requirements under this section shall not eliminate the necessity of town council approval of any contract in excess of twenty five thousand dollars (\$25,000.00) and for which a line item appropriation has not been made in the town budget. The only variation in the requirement for such approval shall be in the event of urgent time constraints creating an emergency, in which event an expenditure in excess of twenty five thousand dollars (\$25,000.00) may be authorized upon personal verbal approval of a majority of the council members, after explanation of the circumstances, subject to formal ratification at the first public council meeting after authorization of the expenditure. (Ord. 02-002, 2-12-2002)

 2. The ability, capacity and skill of the bidder to perform the contract or provide the supplies or service required;
 3. Whether the bidder can perform the contract or provide the supplies promptly, or within the time specified, without delay or interference;
 4. The sufficiency of the bidder's financial resources and the effect thereof on his ability to perform the contract or provide the supplies or services;
 5. The character, integrity, reputation, judgment, experience and efficiency of the bidder;
 6. The quality of the bidder's performance on previous orders or contracts for the town or others;

 2. Format:
 - a. Such electronic database, whether provided by the state or the designated database provider, shall be provided in a format approved by the American National Standards Institute's accredited standards committee X12, which, allowing for de minimis deviations, designates for each street address in the town, including, to the extent practicable, any multiple postal street addresses applicable to one street location, the appropriate taxing jurisdictions, and the appropriate code identified by one nationwide standard numeric code.
 - b. Such electronic database shall also provide the appropriate code for each street address with respect to political subdivisions that are not taxing jurisdictions when reasonably needed to determine the proper taxing jurisdiction.
 - c. The nationwide standard numeric codes shall contain the same number of numeric digits, with each digit or combination of digits referring to the same level of taxing jurisdiction throughout the United States, using a format similar to FIPS 55-3 or other appropriate standard approved by the federation of tax administrators and the multistate tax commission, or their successors. Each address shall be provided in standard postal format.
- B. - D. Procedure If No Electronic Database Provided:
1. Safe Harbor: If neither the state nor the designated database provider provides an electronic database, a home service provider shall be held harmless from any tax, charge or fee liability in the town that otherwise would be due solely as a result of an assignment of a street address to an incorrect taxing jurisdiction, if the home service provider employs an enhanced zip code to assign each street address to a specific taxing jurisdiction and exercises due diligence to ensure that each such street address is assigned to the correct taxing jurisdiction. If an enhanced zip code overlaps boundaries of taxing jurisdictions of the same level, the home service provider must designate one specific jurisdiction within such enhanced zip code for use in taxing the activity for such enhanced zip code. Any enhanced zip code assignment changed is deemed to be in compliance with this section. For purposes of this section, there is a rebuttable presumption that a home service provider has exercised due diligence if the home service provider demonstrates that it has:
 - a. Expended reasonable resources to implement and maintain an appropriately detailed electronic database of street address assignments to taxing jurisdictions;
 - b. Implemented and maintained reasonable internal controls to promptly correct misassignments of street addresses to taxing jurisdictions; and
 - c. Used all reasonably obtainable and usable data pertaining to municipal annexations, incorporations, reorganizations, and any other changes in jurisdictional boundaries that materially affect the accuracy of such database.

 - a. Eighteen (18) months after the nationwide standard numeric code has been approved by the federation of tax administrators and the multistate tax commission; or
 - b. Six (6) months after the state or a designated database provider in the state provides such database. (Ord. 00-007, 11-28-2000, eff. 1-1-2001)

 - 1. May rely upon the applicable residential or business street address supplied by the home service provider's customer.
 - 2. Is not liable for any additional taxes, charges or fees based on a different determination of the place of primary use for taxes, charge or fees that are customarily passed on to the customer as a separate address under existing agreements.
- B. A home service provider may treat the address used by the home service provider for tax purposes for any customer under a service contract or agreement in effect two (2) years after the date of this amendment to this chapter as that customer's place of primary use for the remaining term of such service contract or agreement, excluding any extension or renewal of such service contract or agreement, for purposes of determining the taxing jurisdiction to which taxes, charges or fees on charges for mobile telecommunication services are remitted. (Ord. 00-007, 11-28-2000, eff. 1-1-2001)

2-8-6: TAX AGAINST CUSTOMER:

Each customer shall accurately report the customer's place of primary use. The customer shall be liable for any taxes not paid by the home service provider as a result of the customer's failure to accurately report the customer's place of primary use. (Ord. 00-007, 11-28-2000, eff. 1-1-2001)

After January 1, 2001, a home service provider shall have a minimum of sixty (60) days' notice before being obligated to collect the tax described in this chapter. 2-8-9: SEVERABILITY:

If the monthly tax levied, section [2-8-2](#) of this chapter, is for any reason determined to be, or is rendered, illegal, invalid or superseded by other lawful authority, including any state or federal, legislative, regulatory or administrative authority having jurisdiction thereof, or determined to be unconstitutional, illegal or invalid by any court of competent jurisdiction, such section shall be deemed a separate, distinct and independent provision, and such determination shall have no effect on the validity of any other section; provided, however, upon such event and in lieu of such tax, there is levied upon every home service provider a tax equal to six percent (6%) of the annual gross revenue of the home service provider generated from services and products to customers. 2-10A-8: ADMINISTRATIVE PROVISIONS:

2-10A-1: PURPOSE:

This impact fee policy is promulgated pursuant to the requirements of the impact fees act, Utah Code Annotated section 11-36-101 et seq. (the "act"). (Ord. 99-001, 3-23-1999)

2-10A-2: DEFINITIONS:

Words and phrases that are defined in the act shall have the same definition in this impact fee policy. The following words and phrases shall have the following meanings:

CAPITAL FACILITIES PLAN: The plan required by Utah Code Annotated section 11-36-201 of the act. In section 11-36-201(2)(e), there is an exception to the capital facilities plan for towns of five thousand (5,000) or less in population, based on the latest census. The town does meet this exception; therefore, the town has completed a limited scope capital facility plan, adopted in October 1998 (exhibit A attached to ordinance 99-001, "Capital Facility Plan").

DEVELOPMENT ACTIVITY: Any construction or expansion of a building, structure or use, any change in the use of a building or structure, or any change in the use of land that creates additional demand and need for public facilities.

DEVELOPMENT APPROVAL: Any written authorization from the town that authorizes the commencement of development activity, including, but not limited to, line extension agreements (LEAs).

HOOKUP FEES: Reasonable fees, not in excess of the approximate average costs to the town for services provided for and directly attributable to the connection to services provided by the town.

IMPACT FEE: A payment of money imposed upon development activity as a condition of development approval. "impact fee" includes development impact fees, but does not include a tax, a special assessment, a hookup fee, a building permit fee, a fee for project improvements, or other reasonable permit or application fees.

MUNICIPALITY: A local political subdivision of the state of Utah and herein shall mean Brian Head Town or "town".

PROJECT IMPROVEMENTS: Site improvements and facilities that are planned and designed to provide service for development resulting from a development activity and are necessary for the use and convenience of the occupant or users of development resulting from a development activity. "Project improvements" do not include "system improvements", as defined in this section.

PROPORTIONATE SHARE OF THE COST OF PUBLIC FACILITY IMPROVEMENTS: An amount that is roughly proportionate and reasonably related to the service demands and needs of a development activity.

PUBLIC FACILITIES: Transportation improvements, and parks and recreation facility improvements of the town.

SERVICE AREA: Refers to a geographic area designated by the town based on sound planning or engineering principles in which a defined set of the town's public facilities provides service. The "service area", for purposes of this transportation and parks and recreation impact fee policy, includes all of the area within the jurisdictional boundaries of the town.

SYSTEM IMPROVEMENTS: Refer both to existing public facilities designed to provide services to service areas within the town at large and to future public facilities identified in reasonable plans for capital improvements adopted by the town that are intended to provide service to service areas within the town at large. "System improvements" do not include "project improvements", as defined in this section. (Ord. 99-001, 3-23-1999; amd. 2010 Code)

2-10A-3: IMPACT FEE CALCULATIONS:

A. Ordinance Enacting Impact Fees: The town council will, by this article, approve an impact fee in accordance with the impact fee analysis set forth in exhibit B attached to ordinance 99-001, "Impact Fee Study", for transportation, and parks and recreation facilities.

1. Elements: In calculating the impact fee, the town may include the construction contract price, land acquisition costs, costs of improvements, material costs, the cost of fixtures, fees for planning, surveying and engineering services provided for and directly related to the construction of system improvements, and debt service charges if the town might use impact fees as revenue stream to pay principal and interest on bonds or other obligations to finance the cost of system improvements.
2. Notice And Hearing: Before adopting the ordinance, the town shall follow the notice and hearing requirements of Utah Code Annotated section 11-36-202(1)(F).
3. Contents Of Ordinance: The ordinance adopting or modifying an impact fee will contain such detail and elements as deemed appropriate by the town council, including a

designation of the service area or service areas within which the impact fee is to be calculated and imposed. The ordinance will include: a) a schedule of impact fees to be imposed for each type of system improvement; or b) the formula to be used by the town in calculating each impact fee, or both. A copy of this requirement is included in exhibit B attached to ordinance 99-001, "Impact Fee Study".

4. Adjustments: The standard impact fee may be adjusted at the time the fee is charged in response to unusual circumstances or to fairly allocate costs associated with impacts created by a development activity or project. The standard impact fee may also be adjusted to ensure that impact fees are imposed fairly for affordable housing projects, in accordance with the town affordable housing policy, and other development activities with broad public purposes.
 5. Previously Incurred Costs: To the extent that the new growth and development will be served by previously constructed improvements, the town impact fee may include public facility costs previously incurred by the town. The costs may include transportation and parks and recreation system improvements constructed with previously issued bonds and/or capital improvement reserve funds; the reimbursable costs under existing and future agreements with the developers for system improvements; and all projects included in the reasonable capital projects plan which are under construction or completed but have not been utilized to their capacity.
- B. Developer Credits: A developer may be allowed a credit against impact fees for any dedication of land or improvement to, or new construction of, system improvements provided by the developer provided that: 1) it is identified in the town reasonable capital projects plan; and 2) required by the town as a condition of approving the development activity. Otherwise, no credit may be allowed.
- C. Impact Fees Accounting:
1. Accounting, Reporting Requirements: The town shall follow the accounting and reporting requirements of Utah Code Annotated section 11-36-301. (Ord. 99-001, 3-23-1999; amd. 2010 Code)
 2. Impact Fee Expenditures: The town may expend impact fees covered by impact fees policy only for system improvements that are: a) public facilities identified in the town reasonable capital projects plan; and b) of the specific public facility type for which the fee was collected.
 3. Time Of Expenditure: Impact fees collected pursuant to the requirements of this impact fees policy are to be either expended, dedicated or encumbered for a permissible use within six (6) years of the receipt of those funds by the town, unless the town council otherwise directs. For purposes of this calculation, the first funds received shall be deemed to be the first funds expended.
 4. Extension Of Time: The town may hold previously dedicated or unencumbered fees for longer than six (6) years if it identifies in writing: a) an extraordinary and compelling reason why the fees should be held longer than six (6) years; and b) an absolute date by which the fees will be expended.

- D. Refunds: The town shall refund any impact fees paid by a developer, plus interest actually earned, when: 1) the developer does not proceed with the development activity and files a written request for a refund; 2) the fees have not been spent or encumbered; and 3) no impact has resulted. An impact that would preclude a developer from a refund from the town may include any impact reasonably identified by the town, including, but not limited to, the town having sized facilities and/or paid for, installed and/or caused the installation of facilities based, in whole or in part, upon the developer's planned development activity even though that capacity may, at some future time, be utilized by another development.
- E. Other Impact Fees: To the extent allowed by law, the town council may negotiate or otherwise impose impact fees and other fees different from those currently charged. Those charges may, in the discretion of the town council, include, but not be limited to, reductions or increases in impact fees, all or part of which may be reimbursed to the developer who installed improvements that service the land to be connected with the town systems.
- F. Additional Fees And Costs: The impact fees authorized hereby are separate from and in addition to user fees and offer charges lawfully imposed by the town, such as engineering and inspection fees, and other fees and costs that may not be included as itemized component parts of the impact fee schedule. In charging any such fees as a condition of development approval, the town recognizes that the fees must be a reasonable charge for the service provided.
- G. Fees Effective At Time Of Payment: Unless the town is otherwise bound by a contractual requirement, the impact fee shall be determined from the fee schedule in effect at the time of payment in accordance with the provisions of section [2-10A-5](#) of this article.
- H. Imposition Of Additional Fee Or Refund After Development: Should any developer undertake development activities such that the ultimate density or other impact of the development activity is not revealed to the town, either through inadvertence, neglect, a change in plans, or any other cause whatsoever, and/or the impact fee is not initially charged against all units or the total density within the development, the town shall be entitled to charge an additional impact fee to the developer or other appropriate person covering the density for which an impact fee was not previously paid. (Ord. 99-001, 3-23-1999)

2-10A-4: CAPITAL FACILITIES PLAN:

- A. Written Analysis: As part of each reasonable capital projects plan, the town shall prepare a written analysis of each impact fee adopted or modified under the requirements of the impact fees policy that identifies the impact on system improvements required by development activity, estimates the proportionate share of the costs of impacts on system improvements that are reasonably related to new development activity and identifies how the impact fee was calculated (impact fee study).
- B. Elements: The analysis may contain such elements as deemed relevant by the town. To the extent applicable and available, the analysis will identify the following: 1) the cost of existing facilities; 2) the manner of financing those facilities; 3) the relative extent to which newly developed properties and other properties have already contributed to the cost of existing public facilities; 4) the relative extent to which newly developed properties and other properties will contribute to the cost of existing public facilities in the future; 5) the extent, if

any, to which newly developed properties are entitled to a credit because the town is requiring the developer, by contractual arrangement or otherwise, to provide common facilities inside or outside the proposed development that have been provided by the town and financed through general taxation or other means, apart from user charges, in other parts of the town; 6) any extraordinary costs in servicing the newly developed property; and 7) the time-price differential that may be inherent in comparisons of amounts paid at different times (impact fee study). (Ord. 99-001, 3-23-1999)

2-10A-5: GROSS IMPACT FEE CALCULATIONS AND SCHEDULES:

Impact fee calculations and schedules shall be updated periodically through an updated capital facilities plan and impact fee analysis, and adopted by resolution in the consolidated fee schedule. (Ord. 99-001, 3-23-1999; amd. 2010 Code)

2-10A-6: FEE EXCEPTIONS AND ADJUSTMENTS:

- A. The town council may, on a project by project basis, authorize exceptions or adjustments to the then impact fee rate structure for those projects the town council determines to be of such be projects may include facilities being funded by tax supported agencies, affordable housing project or facilities of a temporary nature.
- B. Applications for exceptions are to be filed with the town at the time the applicant first requests the extension of service to the applicant's development or property. (Ord. 99-001, 3-23-1999; amd. 2010 Code)

2-10A-7: APPEAL PROCEDURE:

- A. Application: The appeal procedure applies both to challenges to the legality of impact fees, to similar and related fees of the town and to the interpretation and/or application of those fees. By way of illustration, in addition to the legality of the impact fee schedule, determinations of the density of a development activity or calculation of the amount of the impact fee due will also be subject to this appeal procedure.
- B. Declaratory Judgment Action: Any person or entity residing in or owning property within the town and any organization, association or corporation representing the interests of persons or entities owning property within the town may file a declaratory judgment action challenging the validity of an impact fee only after having first exhausted their administrative remedies of this section.
- C. Request For Information Concerning Fee: Any person or entity required to pay an impact fee may file a written request for information concerning the fee with the town. Appeal To Town After Payment Of Impact Fee; Statute Of Limitations For Failure To File: Any person or entity who has paid an impact fee and wishes to challenge the fee shall file a written request for information concerning the fee within thirty (30) days after having paid the fee and proceed under the town appeal procedure. If thirty (30) days has passed after payment of the impact fee and a written request for information or challenge has not been filed with the town, the person or entity is barred from filing an appeal with the town or seeking judicial relief.
- F. Appeal To Town: Any developer, landowner or affected party desiring to challenge the legality of any impact fee or related fee or exaction may appeal directly to the town council by filing a written challenge with the town; shall affirm, reverse or take action with respect to the challenge or appeal as the town council deems to be appropriate in light of the town policies and procedures and any applicable law, rule or regulation. The decision of the town council may include the establishment or calculation of the impact fee applicable to the development activity at issue; any impact fee set by the town council may include the establishment or calculation of the impact fee applicable to the development activity at issue. Any impact fee set by the town council may be the same as or higher or lower than that being appealed; provided, that it shall not be higher than the maximum allowed under the town lawful impact fee rate or form which is either in existence on the effective date of the act or as promulgated under the impact fees policy, as appropriate. The decision of the town council will be issued within thirty (30) days after the date the written challenge was filed with the town as mandated by Utah Code Annotated section [11-36-401\(4\)\(b\)](#). In light of the statutory mandated time restriction, the town shall not be required to provide more than three (3) working days' prior notice of the time, date and location of the informal hearing and the inconvenience of the hearing to the challenging party shall not serve as a basis of appeal of the town's final determination.
- G. Denial Due To Passage Of Time: Should the town, for any reason, fail to issue a final decision on a written challenge to an impact fee, its calculation or application, within thirty (30) days after the filing of that challenge with the town, the challenge shall be deemed to have been denied and any affected party to the proceedings may seek appropriate judicial relief from such denial.
- H. Judicial Review: Any party to the administrative action who is adversely affected by the town's final decision must petition the district court for a review of the decision within ninety (90) days of a final town decision upholding an impact fee, its calculation or application, or within one hundred twenty (120) days after the written challenge to the impact fee, its calculation or application, was filed with the town, whichever is earlier.
- I. Record Of Proceedings: After having been served with a copy of the pleadings initiating the town court review, the town shall submit to the court the record of the proceedings before the town, including minutes, and, if available, a true and correct transcript of any proceedings. If the town is able to provide a record of the proceedings, the town court's review is limited, by Utah Code Annotated section [11-36-401\(5\)\(c\)](#), to the record. The court may not accept or consider evidence outside of the record of proceedings before the town unless the evidence was offered to the town and improperly excluded in the proceedings before the town. If the record is inadequate however, the court may call witnesses and take evidence. The court is to affirm the town's decision if the decision is supported by substantial evidence in the record. WASTEWATER FACILITIES: The town wastewater infrastructure systems, including, but not limited to, water treatment facilities, sewer lines and pipes, storage facilities, ditches, easements and rights of way, and all associated real property, structures and equipment used in connection with the town wastewater systems. "Wastewater facilities" does not mean water rights.

WASTEWATER IMPACT FEE: A payment of money imposed upon development activity as a condition of development approval to be used for the purpose of constructing and upgrading wastewater facilities necessitated by development activity. "Wastewater impact fee" does not mean a tax, a special assessment, a building permit fee, a hookup fee, a fee for project improvements, or other permits or application fee.

WATER METER: A device that measures the flow of water to a specific lot, parcel, structure, business or dwelling. "Water meter" does not mean a fire meter where the water passes through the meter only when there is a fire or immediate threat of fire to the structure or property serviced by the meter. (Ord. 04-006(B), 10-27-2004)

2-10C-3: IMPOSITION OF WASTEWATER IMPACT FEE:

- A. Any person who, after the effective date hereof, seeks to develop land in the town by making improvements to the land which will generate additional water use is hereby required to pay a wastewater impact fee in the manner and amounts set forth in this article. The fees shall be paid at the time of the building permit application. The amount of the wastewater impact fee shall be as set forth in the town schedule of fees and charges. The amount of the wastewater impact fee may be modified at any time by resolution of the Town Council. The amount of the wastewater impact fee shall be no more than that justified by the capital facilities plan for wastewater. (Ord. 04-006(B), 10-27-2004; amd. 2010 Code)
- B. No building permit shall be issued by the town unless or until the wastewater impact fee required by this article has been paid.
- C. The following shall be exempted from payment of the wastewater impact fee:
 1. Alterations or expansion of an existing residential building where no additional residential units are created and where no additional wastewater demand is added.
 2. The construction of accessory buildings or structures where no additional wastewater demand is added.

3. The replacement of a destroyed or partially destroyed building or structure with a new building or structure where no additional wastewater demand is added.
 4. Alterations or expansion of an existing commercial or manufacturing building not increasing the equivalent residential units of wastewater generated by such building.

The independent fee calculation study shall follow accepted professional hydro-engineering methodologies as approved by the Public Works Director. The independent study submitted shall show the basis upon which the independent fee calculation was made. If the public works director determines that the independent fee calculation study provides a more accurate and equitable basis upon which to calculate the wastewater impact fee, then the amount of the fee set forth in the independent fee calculation study shall be the fee that the fee payer is required to pay under this article. Any fees imposed under this article which are modified pursuant to an independent fee calculation as provided herein shall apply only to the fee payer who prepared and submitted the independent fee calculation.
- C. If the fee payer opts to have the wastewater impact fee determined according to subsection B of this section, and the public works director has approved the fee as determined in the independent fee calculation, the fee payer may not then choose to pay the fee under subsection A of this section. (Ord. 04-006(B), 10-27-2004)

2-10C-5: USE OF FUNDS:

2-10C-7: ADJUSTMENT OF FEES:

The Public Works Director may adjust either up or down the standard wastewater impact fee at the time the fee is charged in order to respond to the unusual circumstances in specific cases and to ensure that the fees are imposed fairly. The Public Works Director may also adjust the amount of the fees to be imposed upon a developer if the developer submits studies and data clearly showing that the payment of an adjusted wastewater impact fee is more consistent with the intent and purposes of the article as provided in subsection [2-10C-4B](#) of this article. If the Public Works Director makes an adjustment in the wastewater impact fee imposed, the Public Works Director shall make written findings that support the adjustment. (Ord. 04-006(B), 10-27-2004)

2-10D-3: WRITTEN IMPACT FEE ANALYSIS:

- A. Executive Summary: A summary of the findings of the written impact fee analysis that is designed to be understood by a lay person is included in the culinary water impact fee analysis and demonstrates the need for impact fees to be assessed on development activity. The executive summary has been available for public inspection at least fourteen (14) days prior to the adoption of this article.
- B. Written Impact Fee Analysis: The town has commissioned the written culinary water impact fee analysis for the culinary water impact fees that identifies the impacts upon the culinary water system and the facilities required by development activity, demonstrates how those impacts on system improvements are reasonably related to development activity, estimates the proportionate share of the costs of impacts on system

improvements that are reasonably related to the development activity, and identifies how the impact fees are calculated. A copy of written culinary water impact fee analysis has been available for public inspection at least fourteen (14) days prior to the adoption of this article.

- C. Proportionate Share Analysis: The town has prepared a proportionate share analysis which analyzes whether or not the proportionate share of the costs of future public facilities is reasonably related to new development activity. The proportionate share analysis identifies the costs of existing public facilities, the manner of financing existing public facilities, the relative extent to which new development will contribute to the cost of existing facilities and the extent to which new development is entitled to a credit for payment towards the costs of new facilities from general taxation or other means apart from user charges in other parts of the town. A copy of the proportionate share analysis is included in the written culinary water impact fee analysis and has been available for public inspection at least fourteen (14) days prior to the adoption of this article. (Ord. 09-002, 2-24-2009, eff. 5-25-2009)

2-10D-4: IMPACT FEE CALCULATIONS:

- A. Article Enacting Impact Fees: The town council will, by this article, approve impact fees in accordance with the written impact fee analysis.
1. Elements: In calculating the impact fee, the town has included the construction costs, land acquisition costs, costs of improvements, fees for planning, surveying and engineering services provided for and directly related to the construction of system improvements, and outstanding or future debt service charges if the town might use impact fees as a revenue stream to pay principal and interest on bonds or other obligations to finance the cost of system improvements.
 2. Notice And Hearing: In conjunction with the approval of this article, the town held a public hearing on February 24, 2008, and made a copy of ordinance 99-002 available to the public, at least fourteen (14) days before the date of the hearing, all in conformity with the requirements of Utah Code Annotated section [10-9-103\(2\)](#). After the public hearing, the Town Council adopted this impact fee article as presented herein.
 3. Contents Of Article: This article adopting or modifying an impact fee contains such detail and elements as deemed appropriate by the town council, including a designation of the town wide service area within which the impact fees are to be calculated and imposed. The town wide service area will be the only service area included in this analysis, with a map defining their boundaries included in exhibit A, "Map Of The Brian Head Town wide Service Area", attached to ordinance 99-002. Ordinance 99-002 includes: a) a schedule of impact fees to be imposed for culinary water; and b) the formula to be used by the town in calculating the impact fee.
 4. Adjustments: The standard impact fee may be adjusted at the time the fee is charged in response to unusual circumstances or to fairly allocate costs associated with impacts created by a development activity or project. The standard impact fee may also be adjusted to ensure that impact fees are imposed fairly for affordable housing projects, in accordance with the local government's affordable housing policy, and other

development activities with broad public purposes. The impact fee assessed to a particular development may also be adjusted should the developer supply sufficient written information and/or data to the town showing a discrepancy between the fee being assessed and the actual impact on the system.

5. Previously Incurred Costs: To the extent that new growth and development will be served by previously constructed improvements, the town impact fees may include public facility costs and outstanding bond costs related to the culinary water improvements previously incurred by the town. These costs may include all projects included in the capital facilities plan which are under construction or completed but have not been utilized to their capacity, as evidenced by outstanding debt obligations. Any future debt obligations determined to be necessitated by growth activity will also be included to offset the costs of future capital projects.
- B. Developer Credits: A developer may be allowed a credit against impact fees for any dedication or improvement to land or new construction of system improvements provided by the developer; provided that it is 1) identified in the town capital facilities plan; and 2) required by the town as a condition of approving the development activity. Otherwise, no credit may be given.
- C. Impact Fees Accounting: The town will establish a separate interest bearing ledge account for the impact fees collected pursuant to this article, and will conform to the accounting requirements provided in the impact fees act. All interest earned on the collection of culinary water impact fees shall accrue to the benefit of the segregated account. Impact fees collected prior to the effective date hereof need not meet the requirements in the subsection.
1. Reporting: At the end of each fiscal year, the town shall prepare a report on each fund or account generally showing the source and amount of all monies collected, earned and received by the fund or account, and each expenditure from the fund or account.
 2. Impact Fee Expenditures: The town may expend impact fees covered by the impact fees policy only for system improvements that are: a) public facilities identified in the town capital facilities plan; and b) of the specific public facility type for which the fee was collected. Impact fees will be expended on a first in, first out ("FIFO") basis.
 3. Time Of Expenditure: Impact fees collected pursuant to the requirements of this impact fees article are to be expended, dedicated or encumbered for a permissible use within six (6) years of the receipt of those funds by the town, unless the town council directs otherwise. For purposes of this calculation, the first funds received shall be deemed to be the first funds expended.
 4. Extension Of Time: The town may hold previously dedicated or unencumbered fees for longer than six (6) years if it identifies in writing: a) an extraordinary and compelling reason why the fees should be held longer than six (6) years; and b) an absolute date by which the fees will be expended.
- D. Refunds: The town shall refund any impact fees paid by a developer, plus interest actually earned, when: 1) the developer does not proceed with the development activity and files a written request for a refund; 2) the fees have not been spent or encumbered; and 3) no impact has resulted. An impact that would preclude a developer from a refund from the

town may include any impact reasonably identified by the town, including, but not limited to, the town having sized facilities and/or paid for, installed and/or caused the installation of facilities based in whole or in part upon the developer's planned development activity even though that capacity may, at some future time, be utilized by another development.

- E. Other Impact Fees: To the extent allowed by law, the town council may negotiate or otherwise impose impact fees and other fees different from those currently charged. Those charges may, at the discretion of the town council, include, but not be limited to, reductions or increases in impact fees, all or part of which may be reimbursed to the developer who installed improvements that service the land to be connected with the town system.
- F. Additional Fees And Costs: The impact fees authorized hereby are separate from and in addition to user fees and other charges lawfully imposed by the town and other fees and costs that may not be included as itemized component parts of the impact fee schedule. In charging any such fees as a condition of development approval, the town recognizes that the fees must be a reasonable charge for the service provided.
- G. Fees Effective At Time Of Payment: Unless the town is otherwise bound by a contractual requirement, the impact fee shall be determined from the fee schedule in effect at the time of payment in accordance with the provisions of section [2-10D-6](#) of this article.
- H. Imposition Of Additional Fee Or Refund After Development Activity: Should any developer undertake development activities such that the ultimate density or other impact of the development activity is not revealed to the town, either through inadvertence, neglect, a change in plans, or any other cause whatsoever, and/or the impact fee is not initially charged against all units or the total density within the development, the town shall be entitled to charge an additional impact fee to the developer or other appropriate person covering the density for which an impact fee was not previously paid. (Ord. 09-002, 2-24-2009, eff. 5-25-2009)

2-10D-5: CAPITAL FACILITIES PLAN:

The town has developed a culinary water capital facilities plan for the town culinary water system. The culinary water capital facilities plan has been prepared based on reasonable growth assumptions for the town wide service area, and analyzes the general demand characteristics of current and future users of each system. Furthermore, the capital facilities plan identifies the impact on system improvements created by development activity and estimates the proportionate share of the costs of impacts on system improvements that are reasonably related to new development activity. (Ord. 09-002, 2-24-2009, eff. 5-25-2009)

2-10D-6: IMPACT FEE SCHEDULE AND FORMULA¹:

A. Maximum Supportable Impact Fees:

1. The fee schedule included herein represents the maximum impact fees which the town may impose on development within the defined townwide service area and are based upon general demand characteristics and potential demand that can be created by

each class of user. The town reserves the right under the impact fees act, Utah Code Annotated section [11-36-202](#)(2)(c),(d), to assess an adjusted fee to respond to unusual circumstances to ensure that fees are equitably assessed.

2. This adjustment may result in a higher impact fee if the town determines that a user would create a greater than normal impact on any of the systems. The town may also decrease the impact fee if the developer can provide documentation that the proposed impact will be less than what could be expected, given the type of user (Utah Code Annotated section [11-36-202](#)(3)(a)).

- B. Actual Impact Fee Determination: The town is seeking funding from various sources which may or may not include grant monies. The town is not able to recoup costs of capital facilities paid through federal grants, but can do so for the loan portion only. The actual impact fee will be set at or below the following recommended maximum impact fee prior to the effective date hereof and will be listed on the town consolidated fee schedule before May 25, 2009, which is the effective date of this article.

2-10D-7: FEE EXCEPTIONS AND ADJUSTMENTS:

- A. The Town Council may, on a project by project basis, authorize exceptions or adjustments to the impact fees due from development for those projects the Town Council determines to be of such benefit to the community as a whole to justify the exception or adjustment. Such projects may include facilities being funded by tax supported agencies, affordable

housing projects, or facilities of a temporary nature. The Town Council may elect to waive or adjust impact fees in consideration of economic benefits to be received from the developer's activity.

- B. Applications for exceptions are to be filed with the town at the time the applicant first requests the extension of service to the applicant's development or property. (Ord. 09-002, 2-24-2009, eff. 5-25-2009)

The Licensing Officer, or his or her designee, shall then conduct an investigation, comparing the subject business with other businesses of like nature and shall make findings of fact from which he shall determine whether the license fee is discriminatory, unreasonable or unfair as to the licensee or applicant from the standpoint of its impact on interstate commerce, and shall recommend to the Town Manager an appropriate license fee under the circumstances, and the Town Manager shall fix the license fee in such amount. If the regular license fee has already been paid, the town manager shall order a refund of any amount over and above the amount of the license fee fixed, if any. 3-5-1: PURPOSE AND FINDINGS:

- A. It is the objective of this chapter the town establish reasonable and uniform regulations governing the operation of sexually oriented businesses and their employees in the town. This chapter shall be construed by the town to protect the governmental interests recognized by this chapter in a manner consistent with constitutional protection provided by the United States and Utah constitutions. The purpose of these regulations is to provide for the regulation of and licensing of sexually oriented businesses within the town in a manner which will protect the property values of surrounding businesses and neighborhoods, and residents from the potential adverse secondary effects of sexually oriented businesses, while providing to those who desire to patronize sexually oriented

businesses the opportunity to do so. Sexually oriented businesses are frequently used for unlawful sexual activities, including prostitution. Licensing of sexually oriented businesses is a legitimate and reasonable means of ensuring that operators of sexually oriented businesses comply with reasonable regulations and operators do not knowingly allow their businesses to be used for illegal sexual activity or solicitation. There is convincing documented evidence that sexually oriented businesses, because of their nature, have a deleterious effect on both the existing neighboring businesses and surrounding residential areas, causing increased crime and downgrading of property values. The purpose of this chapter is to control the adverse effects of sexually oriented businesses and thereby to protect the health, safety and welfare of the citizens and guests of the town, protect the citizens from increased crime, preserve the quality of life, preserve the property values and character of the surrounding neighborhoods, and deter the spread of urban blight.

B. 1. Sexually oriented businesses lend themselves to ancillary unlawful and unhealthy activities that are presently uncontrolled by the unlicensed operators of the establishments. Further, there is presently no mechanism in this town to make the owners and operators of these establishments responsible for the activities that occur on their premises.

2. Sexual acts, including masturbation, and oral and anal sex, occur at unregulated sexually oriented businesses, especially those which provide private or semiprivate booths or cubicles for viewing films, videos or live sex shows.
3. Offering and providing such unregulated space encourages such activities, which creates unhealthy conditions.
4. Numerous communicable diseases may be spread by activities occurring in sexually oriented businesses, including, but not limited to, syphilis, gonorrhea, human immunodeficiency virus infection (HIV-AIDS), genital herpes, hepatitis, salmonella, campylobacter and shigella infections, chlamydia, mycoplasmal and ureoplasmal infections, trichomoniasis and chancroid.
5. Sanitary conditions in some sexually oriented businesses are unhealthy, in part, because the activities conducted there are unhealthy, and, in part, because of the unregulated nature of the activities, and the failure of the owners and the operators of the facilities to self-regulate those activities and maintain those facilities.
6. The findings noted in subsections B1 through B5 of this section raise substantial governmental concerns.
7. A reasonable licensing procedure is an appropriate mechanism to place the burden of that reasonable regulation on the owners and the operators of the sexually oriented businesses. Further, such a licensing procedure will place a heretofore nonexistent incentive on the operators to see that the sexually oriented business is run in a manner consistent with the health, safety and welfare of its patrons and employees, as well as the citizens of the town. It is appropriate to require reasonable assurances that the licensee is the actual operator of the sexually oriented business, fully in possession and control of the premises and activities occurring therein.
8. The disclosure of certain information by those persons ultimately responsible for the day to day operation and maintenance of the sexually oriented business, where such information is substantially related to the significant governmental interest in the operation of such uses, will aid in preventing the spread of sexually transmitted diseases and will prevent the further secondary effects of dissemination of illegal obscenity, child pornography, and to minors and materials harmful to them.
9. The general welfare, health, morals and safety of the citizens of the town will be promoted by the enactment of this chapter. (Ord. 09-011, 7-28-2009)

- A. Residents of the town have an inalienable interest in their personal safety, well being, and privacy in their residences, as well as their ability to provide or receive information regarding matters of personal belief, political or charitable activities, and goods and services lawfully in commerce. The town has a substantial interest in protecting the well being, tranquility, personal safety, and privacy of its citizens, which includes the ability to protect citizens from unwanted intrusions upon residential property. The town also has a substantial interest in protecting citizens from fraud or otherwise unfair consumer sales practices, as well as criminal activity.

7-1-1: ADMINISTRATION:

- A. Water Department Established: There is hereby established a town water department, which shall operate and maintain the town water system. The water system constructed or otherwise acquired by the town to supply town residents with culinary water shall be the property of the town and shall be under the sole and exclusive control and jurisdiction of the town. The Town Council may, from time to time, make such rules and regulations as are necessary for the water system's proper operation, which are not in conflict with other rules and/or ordinances.
- B. Management Of System: The town water system shall be managed by the town Public Works Director pursuant to the provisions of this title and pursuant to consolidated fee schedules, rules and regulations adopted by the Town Council from time to time prescribing his powers and duties.

- C. Authority Of Public Works Director: The Public Works Director, or his/her designee, shall have charge of the town reservoirs, water tanks, water mains, fire hydrants and all equipment and appurtenances of the water system. He shall have direction of the laying of water mains, the putting in of all service lines, and the regulation of the supply of water. He shall be responsible for the proper care and efficient operation of the water system.
- D. Sole Authority To Operate Culinary Water System: There shall be only one operating water system within the town corporate limits. That system shall be solely owned, operated and maintained by the town. It shall be illegal for any person or entity to develop, form, own, maintain or operate any type of water system within the town limits separate and apart from the town water system.
- E. Financially Independent Department: The water department shall operate as a financially independent department of the town. Its budgeted revenues shall come from gross income and revenues of any kind, from any source whatsoever, derived from the operation of the water system, including, without limitation, all fees, rates, impact fees, connection fees, service fees, assessments, and other charges established by the consolidated fee schedule of the Town Council; the gross revenues of all improvements, additions and extensions of the system hereafter constructed or acquired; and all interest earned by and profits derived from the sale of investments made with the income and revenues. Should other departments of the town provide services to the water department, the water department shall transfer reasonable amounts to reimburse such other departments for the actual cost of such services. Unexpended funds from any budget year shall remain in the water department. (Ord. 09-012, 7-28-2009)

7-1-2: DEFINITIONS:

When used in this chapter, the following words and phrases shall have the meanings given in this section:

ANIMAL FEEDING OPERATION: A lot or facility where the following conditions are met: a) animals have been or will be stabled or confined and fed or maintained for a total of forty five (45) days or more in any twelve (12) month period; b) and crops, vegetation forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility. Two (2) or more animal feeding operations under common ownership are considered to be a single feeding operation if they adjoin each other, if they use a common area, or if they use a common system for the disposal of wastes.

ANIMAL UNIT: A unit of measurement for any animal feeding operation calculated by adding the following numbers: The number of slaughter and feeder cattle multiplied by 1.0, plus the number of mature dairy cattle multiplied by 1.4, plus the number of swine weighing over fifty five (55) pounds multiplied by 0.04, plus the number of sheep multiplied by 0.1, plus the number of horses multiplied by 2.0.

APPROVED BACKFLOW ASSEMBLY: A backflow assembly accepted by the Utah State Department of Environmental Quality, Division of Drinking Water and the Public Works Director, or his/her designee, as meeting the standards of the currently adopted plumbing code for a specific application.

AUXILIARY WATER SUPPLY: Any water supply on or available to the premises other than the purveyor's public water supply will be considered as an "auxiliary water supply". These auxiliary waters may include water from another purveyor's public potable water supply or any natural source, such as well, spring, river, stream, etc., or used waters. These waters may be contaminated or polluted or they may be objectionable and constitute an unacceptable water source over which the Public Works Director, or his/her designee, does not have authority for sanitary control.

BACK PRESSURE: Pressure causing the flow of water or other liquids, mixtures or substances from a region of high pressure to a region of low pressure into the water distribution pipes of a potable water supply system from any source, other than the intended source.

BACK SIPHONAGE: The flow of water or other liquids, mixtures or substances under vacuum conditions into the distribution pipes of a potable water supply system from any source, other than the intended source, caused by the reduction of pressure into the potable water system.

BACKFLOW: The reversal of the normal flow of water caused by either back pressure or back siphonage.

BACKFLOW PREVENTION ASSEMBLY: An assembly or means designated to prevent backflow. Specifications for backflow assemblies are contained within the currently adopted plumbing code and in the cross connection control program for Utah maintained by the Division of Drinking Water.

CONTAMINATION: A degradation of the quality of the potable water supply by sewage, industrial fluids or waste liquids, compounds or other materials that may create a health hazard.

CROSS CONNECTION: Any actual or potential connection between the potable water system and any other source or system through which it is possible to introduce into the public drinking water system any used water, industrial fluid, gas or substance other than the intended potable water. This includes any temporary conditions such as swing connections, removable sections, or other similar plumbing arrangements.

CROSS CONNECTION, CONTAINMENT: The installation of an approved backflow assembly at the water service connection to any customer's premises where it is physically and economically infeasible to find, permanently eliminate or control all actual or potential cross connections within the customer's water distribution system; or, it shall mean the installation of an approved backflow prevention assembly on the service line leading to and supplying a portion of a customer's water system where there are actual or potential cross connections which cannot be effectively eliminated or controlled at the point of the cross connection (isolation).

CROSS CONNECTION, CONTROLLED: A connection between a potable water system and a non-potable water system with an approved backflow prevention assembly properly installed and maintained so that it will continuously afford the protection commensurate with the degree of hazard.

DESIGN STANDARD: A control that is implemented at or by a potential contamination source to prevent discharges to the groundwater. Spill protection is an example of a design standard.

ERC OR EQUIVALENT RESIDENTIAL CONNECTION: A term used to evaluate service

connections to consumers other than the typical residential domicile. Public water system management is expected to review annual metered drinking water volumes delivered to nonresidential connections and estimate the equivalent number of residential connections that these represent based upon the average of annual metered drinking water volumes delivered to true single-family residential connections.

EXCESS WATERING: Watering to the extent that water is allowed to accumulate on the surface of the ground and leave the property entering gutters, storm drains, ditches and other conveyances.

EXTREMELY HAZARDOUS SUBSTANCES: Those substances which are identified in the section 302(EHS) column of the "Title III List Of Lists - Consolidated List Of Chemicals Subject To Reporting Under SARA Title III" (EPA 560/4-91-011).

LAND MANAGEMENT STRATEGIES: Zoning and non-zoning controls which include, but are not limited to, the following: zoning and subdivision ordinance, site plan reviews, design and operating standards, source prohibitions, purchase of property and development rights, public education programs, groundwater monitoring, household hazardous waste collection programs, water conservation programs, memoranda of understanding, written contracts and agreements, and so forth.

PERSON: Any individual, partnership, firm, corporation, limited liability company, or other legal entity.

POLLUTION SOURCE: Point source discharges of contaminants to groundwater or potential discharges of the liquid forms of "extremely hazardous substances" which are stored in containers in excess of "applicable threshold planning quantities" as specified in SARA title III. Examples of possible pollution sources include, but are not limited to, the following: storage facilities that store the liquid forms of extremely hazardous substances, septic tanks, drain fields, class V underground injection wells, landfills, open dumps, landfilling of sludge and seepage, manure piles, salt piles, pit privies, and animal feeding operations with more than ten (10) animal units.

POTENTIAL CONTAMINATION SOURCE: Any facility or site which employs an activity or procedure which may potentially contaminate groundwater. A pollution source is also a "potential contamination source".

PUBLIC WORKS DIRECTOR, OR HIS/HER DESIGNEE: The Public Works Director of Brian Head Town, or his/her designee, is vested with the authority and responsibility for the implementation of an effective cross connection control program and for the enforcement of the provisions of this chapter.

REGULATORY AGENCY: Any governmental agency with jurisdiction over "hazardous waste", as defined.

REPEATED OR FLAGRANT WASTING OF WATER: Those situations where persons who have received informal notice that they are wasting water continue to use water in the same manner. It does not mean those persons who waste water on solitary or isolated occasions.

SANITARY LANDFILL: A disposal site where solid wastes, including putrescible wastes or hazardous wastes, are disposed of on land by placing earth cover thereon.

TOWN WATER: All water that passes through the town water distribution system, excluding snow making water.

WATERING OR "TO WATER": The act of applying water to the outdoor landscape through means such as moveable sprinklers, installed watering systems, hoses and similar devices.

WELLHEAD: The upper terminal of a well, including adapters, ports, seals, valves and other attachments. (Ord. 09-012, 7-28-2009)

7-1-3: MANDATORY CONNECTION REQUIREMENTS:

It shall be mandatory for any property owner constructing, owning or maintaining a building used for human occupancy and/or constructing or installing any water fixture utilizing culinary water as provided under the provisions of this chapter, and other appropriate regulations adopted by consolidated fee schedule by the Town Council, to apply and pay for the appropriate water connection, and connect to the town water system, whenever that system is within three hundred feet (300') of any property line on which the building or water fixture is installed or erected. All connections shall be through an approved water meter. (Ord. 09-12, 7-28-2009)

7-1-4: CONNECTION TO SYSTEM:

- A. Required: Prior to connection, the owner must sign a service agreement, as set forth in section [7-1-7](#) of this chapter. Applicants for water service shall include in their system a suitable meter box or vault, and all appurtenances to specifications required by the Public Works Department and approved at the time the building permit is issued. It shall be unlawful for unauthorized individuals to tap or connect to the town municipal water distribution system without authorization. The owner of the property with an unauthorized connection shall be liable to the town for all water use resulting from such connection and may be subject to criminal fines and penalties. All connections shall be approved and inspected by the Public Works Director or designee. Upon connection, regular water service fees must be paid.
- B. Master Meters; Additional Meters: All buildings with more than one ERC will be serviced by a master meter capable of registering both high and low flows. Commercial buildings with any residential units will be serviced by two (2) separate master meters capable of registering both high and low flows. The residential portion of the building will be serviced with one meter and the remaining uses will be serviced with one meter. The owner of a building may install at his/her expense separate meters to any portion of his/her building. The owner will be responsible for proper installation, maintenance and reading of such meters. Information gathered from additional meters will be for owner use only. (Ord. 09-012, 7-28-2009)

7-1-5: METERS:

A. Metered Service:

1. A base rate will be charged to all water connections according to the size of the meter in use. The base rate for all meter sizes shall be established by the consolidated fee schedule. All water used from the town water system for household, domestic, irrigation, commercial, industrial, or any other use shall be metered and water paid for according to the quantity used. (Ord. 09-12, 7-28-2009)
2. All water delivered through each meter shall be used on the premises where the meter is located and charged at the rate established by the consolidated fee schedule. Unoccupied structures will be billed the minimum charge set by the consolidated fee schedule for the meter used in the structure unless a service disconnect request has been received by the water department. A service disconnect request will be charged a reconnect fee established by the consolidated fee schedule to reestablish water service.
3. Except for individual personal use, no water shall be removed from the premises. (Ord. 11-002, 4-26-2011)

B. Meter Reading: Meters may be read monthly, but shall be read a minimum of five (5) times per year. In the event that one reading covers consumption for more than one month, consumption shall be prorated equally to each month included in the meter reading. By connecting to the water system, property owners and occupants of the property are deemed to have consented to permit meter readers onto their property to read the meters. In the event that meters were installed within any building on the premises, and there is no remote readout device, the property owner or occupant must permit access for the reading of the meter during normal business hours as a condition of continued water service.

C. Meter Error: In the event that a meter malfunctions so that a reliable reading is not possible, charges shall be estimated based on the average usage of the previous six (6) months.

D. Meter Test: If a water user contests the accuracy of a meter, which when removed and checked, proves to be accurate or under reading, the actual costs of removing, replacing and testing the meter shall be charged to the water user on the next water bill. If the meter is over reading, no charge will be made for the repair, and an adjustment for the error will be estimated, for not more than three (3) months. Meter errors of three percent (3%) or less shall be deemed accurate readings. If upon the second rereading requested by the customer within six (6) months the meter is found to be accurate, a reread charge as established by the consolidated fee schedule will be included in the next billing. The Public Works Director may waive the reread fee if needed. (Ord. 09-012, 7-28-2009)

E. Meter Tampering: It shall be a violation of this chapter to tamper with or bypass any water meter, causing it to produce inaccurate meter readings, or for any other purpose, or to willfully cause damage to any water meter. Willful consumption of water through a meter known to be damaged, bypassed or tampered with, constitutes theft of services and may be punishable as a class B misdemeanor, subject to penalty as provided in section [1-4-1](#) of this code. All meters installed throughout the system shall become the property of the town upon installation. Only meters meeting the town specifications may be used. (Ord. 09-012, 7-28-2009; amd. 2010 Code)

7-1-6: ACCESSIBILITY OF METERS:

All water meters shall be located in town rights of way or utility easements with direct and reasonable access for town water crews on accessible property lines, unless otherwise authorized by the Public Works Director. The areas surrounding the meter box must be kept clear of obstructions and must be accessible at all times. The meter lid must be kept free of weeds, plants, trees, rocks, planters, grass and anything that would impede access to the meter box. (Ord. 09-012, 7-28-2009)

7-1-7: SERVICE AGREEMENT:

The town shall require all persons desiring water service and the owner of real property to be serviced to sign a service agreement. Said agreement shall be binding upon both the town and the individual in setting forth terms and conditions of water service and methods of collection of past due amounts owed for water service. When more than one dwelling or unit is served by a single water meter or when there are multiple owners or timeshare interval owners of the property, the service agreement will designate a single responsible party to whom all notices and billings shall be sent. Notice to the responsible party shall have the same force and effect as notice to all owners. (Ord. 09-012, 7-28-2009)

7-1-8: FEES, RATES, CHARGES, BILLINGS:

A. Meter Deposit: All customers requesting new services will be required to pay a deposit as set forth by the consolidated fee schedule. If no outstanding, unpaid balance occurs for twelve (12) consecutive months, the deposit will be applied to the thirteenth month bill. However, if the occupant paying the deposit is a renter, the town shall retain the deposit until the renter vacates the unit, at which time the deposit shall be returned to the renter within thirty (30) days. No interest will be paid on the deposit.

B. Billing:

1. The town shall send a monthly or bimonthly billing for water used in the previous month as shown by the meter readings or as estimated. Payment is due upon issuance of the bill.
2. Late fees shall be assessed against all accounts which are more than thirty (30) days past due as set forth by the consolidated fee schedule. Interest will be charged only against the unpaid balance, and not against any partial payment, or against the current billing cycle charges. All payments on past due accounts shall first be applied to fees accrued, then to the oldest unpaid balance.

3. Unless separate meters are established for every unit, billing for multiple users at a single address or multiple users organized as a homeowners' association shall be to a single responsible party who shall be responsible for payment of the entire billing. For such users with more than one meter, the usage from all meters shall be accumulated to determine the total amount of water used. In such cases, the allowances for each residential unit shall be combined and any water used in excess of the total allowance shall be billed at the excess water rate established by the consolidated fee schedule.
 4. In the case of mixed use, the residential allowance shall be subtracted from the total water used and any excess shall then be billed at the commercial usage rates established by the consolidated fee schedule. When a residential project includes an office located in the common area of the project, and if a business license is required for the activity of such office, then the project shall be billed for one commercial user in addition to the number of residential users and be treated as a mixed use user.
- C. Water Meter Fees: All water meters shall be supplied and installed by the town or by its authorized representative. For all water lines serving residential and commercial uses, an installation fee shall be paid to the building department at the time the building permit is issued. The meter installation fee shall be established by the consolidated fee schedule.
- D. Returned Checks: Any user paying by check will pay an additional fee established by the consolidated fee schedule if the check is returned by the bank for any reason. (Ord. 09-12, 7-28-2009; amd. Ord. 13-001, 4-9-2013)
- E. Fee/Rate Relief: Public Works Director shall be authorized to adjust and/or waive excessive use fees if the Public Works Director determines that the excessive use is not due to the actions of the water user (property owner or tenant) but rather due to causes beyond the control of the user and if the water user informs the Town within thirty (30) days of the date of the bill showing the excessive use. (Ord. 15-002, 01-27-2015)

Administrative decisions regarding water fee/rate relief may be appealed by the water user upon written request within thirty (30) days of the administrative decision. The appeal will be heard by a board consisting of the Town Manager and two members of the Town Council. The appeal board will review whether the administrative decision was made consistent with the provisions of this Title. (Ord. 15-002, 01-27-2015)

7-1-9: NONPAYMENT:

- A. Notice Of Termination: In the event of nonpayment of any billing for town service and a sixty (60) day balance exceeding fifty dollars (\$50.00), the town may maintain an action to recover the amount owed, and after giving written notice to the owner of the property and the occupant thereof, may terminate service. Notice of termination of service shall be served upon the occupant of the property in person, or shall be posted on the property, and notice shall be given to the owner of the property by mail to the last known address of the owner. When more than one dwelling or unit is served through a single water meter, or when there are multiple or timeshare owners, notice may be given to the owners' association, management company or representative owner as shown on the town billing records. The multi-unit, single metered structures shall be posted with notice of

termination, but it shall not be necessary to post each unit served. Service shall not be terminated for nonpayment without at least ten (10) days' notice.

- B. Reinstatement Of Water Service: Any water customer who has had water shut off for nonpayment of a bill, a request for disconnect from water service, failure to repair leaks, or failure to comply with a requested curtailment during a water emergency, in addition to any other fees, monies owed, deposits or fines, shall pay a reconnection fee as established by the consolidated fee schedule before service is reinstated. (Ord. 09-012, 7-28-2009)

ARTICLE C. WATER FACILITIES CONSTRUCTION COSTS REIMBURSEMENT GUIDELINES AND PROVISIONS

7-1C-1: PURPOSE AND FINDINGS:

7-1C-2: DEFINITION:

7-1C-3: REIMBURSEMENT GUIDELINES AND PROVISIONS:

7-1C-4: CALCULATION OF REIMBURSEMENT COSTS:

7-1C-1: PURPOSE AND FINDINGS:

- A. Purpose: It is the purpose of this article to establish guidelines and provisions for the reimbursement of costs to developers for the construction of culinary water system improvements within the town annexation boundaries.
- B. Findings: Based on preliminary information, the town finds:
1. It is necessary in the interest of the public health, public safety and general welfare that the town and the county promote the construction of water system infrastructure within the annexation boundary of the town;
 2. By allowing for the reimbursement of the costs of the construction of water systems, the likelihood of developers constructing new water facilities is increased;
 3. It is fair and equitable for other lot owners or developers to reimburse a previous developer for the costs incurred by the previous developer for the construction of the water facility. (Ord. 07-003, 3-13-2007)

7-1C-2: DEFINITION:

For the purposes of this article, "water main line" means that portion of a central water distribution system (public system) that is usual water laterals, and is owned and maintained by a municipality or service district. For the purposes of this article, an eight inch (8") diameter pipe

is the minimum size to be considered a water main line and eligible for reimbursement. (Ord. 07-003, 3-13-2007)

7-1C-3: REIMBURSEMENT GUIDELINES AND PROVISIONS:

- A. Agreement: In the event that a developer desires to install new water infrastructure, with an eight inch (8") minimum diameter, and connect to the town water distribution system, they shall be entitled to enter into an agreement with the town to provide for the reimbursement of a proportional share of the actual costs of constructing or extending the water infrastructure.
- B. Costs Paid: The reimbursement of the costs would be paid by lot owners or developers who thereafter connect to the new water infrastructure. The reimbursement agreement would be binding on all current or future lot owners connecting to the new water system, unless a written agreement is executed between the initial developer and the lot owner, waiving the reimbursement requirement.
- C. Submittal, Approval: In order for a reimbursement agreement to be effective, the reimbursement agreement must be executed and construction drawings of the new facilities must have been submitted and approved by the public works department prior to the installation of the new water infrastructure.
- D. Collection: Thereafter, the installation reimbursement costs shall be collected for the provision of new water facilities until the initial developer has been reimbursed, without interest, according to the terms of a reimbursement agreement, or for a ten (10) year period following the execution of the reimbursement agreement.
- E. Payment Not Guaranteed: The town in no way guarantees payment to the initial developer, except to the extent that funds are actually collected from lot owners or developers in accordance with the terms of this article.
- F. Additional Costs: In addition to the cost of the extension, the lot owner or developer shall pay the physical connection costs and or any other impact fees as required by ordinance. (Ord. 07-003, 3-13-2007)

7-1C-4: CALCULATION OF REIMBURSEMENT COSTS:

- A. Methods Of Calculation: With respect to any reimbursement agreement entered into by the town, the town may consider methods of calculating reimbursement costs, such as: 1) by number of connections; 2) by length of infrastructure fronting a lot; or 3) by volume or capacity demand.
- B. Determination Of Method: Each reimbursement agreement shall specify which method or combination of methods shall be used to calculate reimbursement costs. Which methods of calculation are used in each development agreement shall be determined by the town, in its sole discretion.

- C. Responsibility For Billing And Collection Of Reimbursement Amounts: It is the responsibility of the developer to notify the town if any third party connects or intends to connect onto said water main as installed by the developer at any time within ten (10) years from the date of signing a reimbursement agreement. The town shall, upon receipt of written notification from the developer, inform the third party of the reimbursement agreement and collect said fee as part of the approval for water connection, in addition to charging the usual connection and impact fee. The town shall then pay the amount over to the developer until such time as they have been reimbursed for the amount agreed upon in the reimbursement agreement, or up and until the expiration of ten (10) years, whichever shall occur first. The town in no way guarantees payment to the developer, except to the extent that the developer timely notifies the town of the need to collect funds from a third party and funds are collected from such third party and in accordance with the terms set forth in this article. SUSPENDED SOLIDS: Total suspended matter that either floats on the surface of, or is in suspension in, water, wastewater or other liquids, and that is removable by laboratory filtering as prescribed in "Standard Methods For The Examination Of Water And Wastewater", and referred to as nonfilterable residue.

SYSTEM: The sanitary sewer, storm sewer, combined sewer, wastewater facilities and wastewater treatment works of the town.

TOWN: Brian Head Town, Iron County, Utah.

UNPOLLUTED WATER: Water of quality equal to or better than the effluent criteria in effect, or water that would not cause violation of receiving water quality standards and would not be benefited by discharge to the sanitary sewers and wastewater treatment facilities provided.

WASTEWATER: The spent water of a community. From the standpoint of source, it may be a combination of the liquid and water carried wastes from residences, commercial buildings, industrial plants and institutions, together with any groundwater, surface water and storm water that may be present.

WASTEWATER FACILITIES: The structures, equipment, sewers and processes required to collect, carry away and treat wastewater and dispose of the effluent.

7-2-3: USE OF PUBLIC SEWER REQUIRED:

A. Prohibited Deposits, Discharges:

1. It shall be unlawful for any person to place, deposit or permit to be deposited on public or private property within the town, or in any area under the jurisdiction of said town, any human excrement, garbage or other objectionable waste.
2. It shall be unlawful to discharge to any natural outlet within the town, or in any area under the jurisdiction of said town, any sewage or other polluted waters except where suitable treatment has been provided in accordance with subsequent provisions of this chapter.
3. Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic system, cesspool or other facility intended or used for the disposal of wastewater.

B. Connection Required: Any owner of property located within the town shall connect (hook up) to the town system when a sewer main line is within three hundred feet (300') of any portion of the property boundary as follows:

1. **New Construction:** Connection to a public sewer is required where a new dwelling unit or facility used for human occupancy is being proposed, built, reconstructed or altered, and where a building permit is required.
2. **Existing Dwelling Or Facility:**
 - a. **Failed System:** Connection to a public sewer is required when the existing septic system has failed and needs repairs to the leach field or septic tank (treatment outside the building in the septic tank or absorption system).

- b. Unpermitted System: Connection to a public sewer is required within one year of a notice to comply issued by Southwest Utah public health department, when the owner of property is unable to provide information and materials that a septic system permit has been issued by Southwest Utah public health department.
 - c. Change Of Ownership: Connection to a public sewer is required when the ownership of property changes to another owner.
 - d. New Sewer Service Availability: Connection to a public sewer is required within three (3) years of a new public sewer main line becoming available to an existing dwelling or facility.
- C. Special Funding: The town acknowledges the possibility of utilizing special funding tools (i.e., special improvement districts, special service districts, etc., or other legally recognized methods) when collective connections to the public sewer may be required by this chapter.
- D. Evaluation, Approval Authority: The Southwest Utah Public Health Department and the State Department of Environmental Quality shall be considered the town experts in evaluating and approving and permitting sewage treatment systems.
- E. Waiver Of Sewer Connection Requirement: In the event that a sewer connection is required by this chapter, but is not practically feasible due to unusual circumstances, a letter of waiver may be provided by the Public Works Director stating the nature of the unusual circumstances. Unusual circumstances shall be determined by the Public Works Director, and may include such things as grade, physical barriers, insufficient capacity of system, distance of home from property line, topography, etc. Additionally, the town shall explain its intent to provide, or not to provide, for a future sewer connection, as well as a statement of acknowledgment for the use of an appropriate on site wastewater system.
- F. Connections Outside Distance Requirement: Nothing in this chapter shall prohibit the connection to a public sewer as described in this chapter when a property is beyond the three hundred foot (300') connection requirement, if desired by the property owner and for which provisions are made in an appropriate agreement. The town encourages connection to a public sewer whenever and wherever possible in order to preserve and protect groundwater quality in the county.
- G. Penalty: To evidence compliance with the requirements of this section, the town adopts the penalty and compensatory sanctions, the violation of which shall constitute a class B misdemeanor: The town hereby exercises jurisdiction to protect its culinary water system and sources from exposure to underground percolation from any ecological injury, pollution or contamination of the watershed or exposure to the system and water polluting underground percolation influencing the culinary waterworks sources. The failure of a person to comply with this section shall constitute a public offense and is punishable by law as a class B misdemeanor. Such person shall pay a fine of not less than fifty dollars (\$50.00) for each day of violation and each day of failure to connect shall be deemed a separate offense. (Ord. 09-013, 7-28-2009)

7-2-4: SANITARY SEWERS, BUILDING SEWERS AND CONNECTIONS:

- A. Permit Required: No unauthorized person shall uncover, make any connections into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the town.
- B. Classification; Application: There shall be one class of sewer connection, to be known as "residential" or "residential equivalent". In every case, the owner or agent shall make application on a form obtained from the town. The permit application shall be supplemented by any plans, specifications or other information considered pertinent in the judgment of the Public Works Director. A fee for sewer connection permits and inspections shall be assessed and collected at the time of application to the town.
- C. Separate Sewer Required; Exception: A separate and independent building sewer shall be provided for every building; except, where one building stands at the rear of another on an interior lot having no street frontage and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard or driveway, the building sewer from the front building may be extended to the rear building and the whole system will be considered as one building sewer. The town does not and will not assume any obligation or responsibility for damage caused by or resulting from any such single connection aforementioned.
- D. Use Of Old Building Sewers: Old building sewers may be used in connection with new buildings only when they are examined and tested by the department, at the owner's sole cost, and found to meet all requirements of this chapter.
- E. Construction Methods: The size, slope, alignment, materials or construction of all sanitary sewers, including building sewers, and the methods to be used in excavating, placing of the pipe, jointing, testing and backfilling the trench, shall all conform to the requirements of the building and plumbing codes, or other applicable rules and regulations of the code provisions, or in amplification thereof. The materials and procedures set forth in appropriate specifications of the ASTM and WPCF manual of practice no. 9 shall apply.
- F. Elevation: Whenever possible, the building sewer shall be brought from the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer. Where such means are necessary, the owner shall be responsible for all installations, maintenance and operating costs of their operation.
- G. Polluted Surface Drainage: No person shall make connection of roof downspouts, foundation drains, areaway drains or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer, unless such connection is approved by the Public Works Director and the state department of environmental quality for purposes of disposal of polluted surface drainage.
- H. Grease Interceptors: All new and existing buildings and facilities are required to have in place and operational grease interceptors and/or separators as set forth by the international plumbing code section 1003.
- I. Code Compliance; Standards: The connection of the building sewer into the public sewer shall conform to the requirements of the building and plumbing codes or other applicable rules and regulations of the town and the state, or the procedures set forth in appropriate

specifications of nationally recognized publications of what are known as the ASTM and the WPCF manual of practice no. 9, and/or the town public works standards. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Public Works Director before installation.

- J. Excavations: All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. A person must first obtain a permit from the Public Works Director prior to doing any excavation in a public right of way. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the town. (Ord. 09-013, 7-28-2009)

7-2-5: RATES FOR USE:

- A. Established: The rates for connecting to and use on monthly or any other basis may be fixed and amended by resolution or amending ordinance. The governing body will, to promote equity in distribution of operation and maintenance costs, and for no other purpose, establish rates based entirely upon metered water usage, effluent strength by or solely upon the basis as defined hereinabove, or upon an equitable combination of any of those so that the costs of operation and maintenance reflected in rates will be equitably distributed among those based upon their usage of and benefit received from the system.
- B. Costs And Expenses Borne By Owner: All costs and expenses incidental to the installation, connection and maintenance of each building sewer to the public sewer shall be borne by the owner. The owner shall indemnify the town from any loss or damage that may directly or indirectly be occasioned by the installation, connection or maintenance activities of the building sewer.
- C. Liability For Charges: Irrespective of the occupant, user, tenant, cotenant, permissive user, or any other person, firm, partnership, corporation or entity being in possession of the premises to which a connection is supplied or service made available, the owner of the premises according to the records of the county recorder shall be legally responsible for the payment of all charges, fees, assessments and any other obligation or liability of user.
- D. Delinquency: If any delinquent sewer connection, sewer user charge, repairs, maintenance or any other obligation is imposed against any premises, property, buildings or structures, the obligation shall be deemed by the town as an obligation of the owner of the real property on which any use is made from a sewer connection. Water service to delinquent property shall be turned off by the town for failure to pay any and all sewage and wastewater fees, assessments, charges or liability, and will not be turned on again to those premises where a delinquency occurs unless and until all liabilities to the town for sewer service are paid in full. All payments for utilities, whether "water" or "sewer", shall be credited first to sewer assessments, fees or charges.
- E. Interest Charge On Delinquent Or Past Due Connection Fees: The town council may, at their discretion and in circumstances that are equitable, impose interest at the highest legal rate on all past due accounts, either for connection fees, user charges, assessments, maintenance, repair or any other charge which is provided for, imposed or authorized by this chapter.

- F. Notification: Each user will be notified, at least annually, in conjunction with a regular bill, of the rate and that portion of the user charges, which are attributable to wastewater treatment services (O&M) vs. debt service. (Ord. 09-013, 7-28-2009)
- G. Fee/Rate Relief: Public Works Director shall be authorized to adjust and/or waive sewer fees resulting from excessive use of water if the Public Works Director determines that the excessive use is not due to the actions of the utility user (property owner or tenant) but rather due to causes beyond the control of the user and if the utility user informs the Town within thirty (30) days of the date of the bill showing the excessive use. (Ord. 15-002, 01-27-2015)

Administrative decisions regarding water fee/rate relief may be appealed by the water user upon written request within thirty (30) days of the administrative decision. The appeal will be heard by a board consisting of the Town Manager and two members of the Town Council. The appeal board will review whether the administrative decision was made consistent with the provisions of this Title. (Ord. 15-002, 01-27-2015)

7-2-6: ANNUAL REVIEW OF OPERATIONAL COSTS; REVISION WHERE REQUIRED; DEBT SERVICE:

- A. The town shall review the total annual cost of operation and maintenance, long term debt service relating to the wastewater treatment works, as well as each user's wastewater contribution percentage not less often than every year, and will revise the user charge system as necessary to assure equity of the system established herein, and to assure that sufficient funds are obtained from the town user charge system to:
 - 1. Consistently operate and maintain the wastewater treatment works; and
 - 2. Cover said debt service.
- B. The town will apply excess revenues collected from users to the costs of operation and maintenance for the next year, and adjust this rate accordingly. The addendum attached to ordinance 09-013, entitled "Brian Head Town Consolidated Fee Schedule" shall be used for calculating rates. The addendum shall be used as a formula for calculating rates, fees and charges for connection, use and access to the system. The addendum is adopted and made a part of this chapter. (Ord. 09-013, 7-28-2009)

7-2-7: USE REGULATIONS:

- A. Unpolluted Waters: No person shall discharge or cause to be discharged any unpolluted waters, such as storm water, surface water, groundwater, roof runoff, subsurface drainage or cooling water to any sanitary sewer.
- B. Storm water: Storm water shall be discharged to such sewers as are specifically designated as storm sewers, or to a natural outlet approved by the state department of environmental quality and other regulatory agencies.

C. Prohibited Discharges: No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

1. Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive liquid, solid or gas.
2. Any waters containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to contaminate the sludge of the town system, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the wastewater treatment plant.
3. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment and personnel of the wastewater treatment works.
4. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or the interference with the proper operation of the wastewater facilities, such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups and milk containers, etc., either whole or ground by garbage grinders. Each user which discharges any toxic pollutants which cause damage to the town wastewater facilities shall be liable to the town for such damage and for all expenses incurred by the town in repairing or replacing those wastewater facilities.

D. Limited Discharges: The following described substances, materials, waters or waste shall be limited in discharges to the town system to concentrations or quantities which will not harm either the sewers, wastewater treatment process or equipment, will not have an adverse effect on the receiving stream, or will not otherwise endanger lives, limb, public property, or constitute a nuisance. The Public Works Director may set limitations lower than the limitations established in the regulations below if, in his opinion, such more severe limitations are necessary to meet the above objectives. In forming his opinion as to the acceptability, the Public Works Director shall consider such factors as the quantity of subject waste in relation to flows and velocities in the sewers, materials of construction of the sewers, the wastewater treatment process employed, capacity of the wastewater treatment plant, degree of treatability of the waste in the wastewater treatment plant, and other pertinent factors. The limitations or restrictions on materials or characteristics of waste or wastewaters discharged to the sanitary sewer which shall not be violated without approval of the Public Works Director are as follows:

1. Wastewater having a temperature higher than one hundred fifty degrees Fahrenheit (150°F) (65 degrees centigrade).
2. Wastewater containing more than twenty five (25) milligrams per liter of petroleum oil, non-biodegradable cutting oils or product of mineral oil origin.
3. Wastewater from industrial plants containing floatable oils, fat or grease.

4. Any garbage that has not been properly shredded (see definition of "properly shredded garbage", as defined in section [7-2-2](#) of this chapter). Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurants, hospitals, catering establishments or similar places where garbage originates from the preparation of food in kitchens for the purpose of consumption on the premises or when served by caterers. Grinders for commercial establishments may be inspected by town personnel at any reasonable time.
 5. Any waters or wastes containing iron, chromium, copper, zinc and similar objectionable or toxic substances to such degree that any such material received in the wastewater treatment works exceeds the limits established by DEQ for such materials.
 6. Any waters or wastes containing odor producing substances in an amount exceeding limits established by DEQ for such substances.
 7. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Public Works Director in compliance with the applicable state or federal regulations.
 8. Quantities of flow, concentrations, or both, which constitute a "slug", as defined in section [7-2-2](#) of this chapter.
 9. Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.
 10. Any waters or wastes which, by interaction with other waters or wastes in the public sewer system, release obnoxious gases, form suspended solids which interfere with the collection system, or create a condition deleterious to structures and treatment processes.
- E. Authority Regarding Prohibited Discharges: If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which water contains the substances or possesses the characteristics enumerated in subsection D of this section, and which, in the judgment of the Public Works Director, may have a deleterious effect upon the wastewater facilities, wastewater treatment processing equipment or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Public Works Director may:
1. Reject the wastes;
 2. Require pretreatment to an acceptable condition before discharge to the public sewers;
 3. Require control over the quantities and rates of discharge; and/or
 4. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of section [7-2-5](#) of

this chapter. When considering the above alternatives, the Public Works Director shall give consideration to the economic impact of each alternative on the discharger. If the Public Works Director permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Public Works Director.

- F. Interceptors: Grease, oil and sand interceptors shall be provided when required by the international plumbing code section 1003. Interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Public Works Director, and shall be located as to be readily and easily accessible for cleaning and inspection. In the maintaining of these interceptors, the owner shall be responsible for the proper removal and disposal by appropriate means of the captivated material and shall maintain records of the dates and means of disposal, which shall be subject to review by the Public Works Director. Any removal and hauling of the collected materials not performed by owner's personnel must be performed by currently licensed waste disposal firms.
- G. Maintenance Of Facilities: Where pretreatment or flow equalizing facilities are provided or required for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.
- H. Observation Structure: When required by the Public Works Director, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable structure, together with such necessary meters and other appurtenances in the building sewer, to facilitate observation, sampling and measurement of the wastes. Such structures, when required, shall be accessible and safely located, and shall be constructed in accordance with plans approved by the Public Works Director. The structure shall be installed by the owner at his expense, and shall be maintained by him so as to be safe and accessible at all times.
- I. Information Determining Compliance Required: The Public Works Director may require a user of sewer services to provide information needed to determine compliance with these rules. Such information may include:
 - 1. Wastewaters discharge peak rate and volume over a specified time period.
 - 2. Chemical analysis of wastewaters.
 - 3. Information on raw materials, processes and products affecting wastewater volume and quality.
 - 4. Quantity and disposition of specific liquid, sludge, oil, solvent or other materials important to sewer use control.
 - 5. A map or plat of the user's property showing any pretreatment facility location.
 - 6. Details of wastewater pretreatment facilities.
 - 7. Details of systems to prevent and control the losses of materials through spills to the public sewer.

- J. Measurements, Tests And Analyses: All measurements, tests and analyses of the characteristics of water and wastes to which reference is made in these rules shall be determined in accordance with the latest edition of "Standard Methods For The Examination Of Water And Wastewater", published by the American Public Health Association. Sampling methods, location, times, durations and frequencies are to be determined on an individual basis subject to approval by the Public Works Director.
- K. Special Agreements: No statement contained in this section shall be construed as preventing any special agreement or arrangement between the town and any industrial concern whereby an industrial waste or unusual strength or character may be accepted by the town for treatment. (Ord. 09-013, 7-28-2009)

7-2-8: INDUSTRIAL WASTE PROVISIONS:

The developers of all commercial/industrial projects shall provide the town with detailed information concerning the projects' expected wastewater quality and quantity. The town will review this information and determine which of the following facilities are required:

- A. Building sewer sampler.
- B. Wastewater flow monitoring station.
- C. Gravity separator.
- D. Industrial waste clarifier.
- E. Pretreatment facilities.
- F. Under certain circumstances, the town may require special pipe installation procedures or types of pipe, including special protective coating for pipe and fittings.
- G. All industrial truck/car washes will be a recirculating non-discharge type. (Ord. 09-013, 07-28-2009)

7-2-9: VANDALISM:

No persons shall maliciously, willfully or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenances or equipment that is a part of the wastewater facilities. Any persons violating this provision may be subject to immediate arrest. (Ord. 09-013, 7-28-2009)

7-2-10: EXTENSION OF SEWER LINES:

Any and all line extensions from any town sewer main line, not otherwise a part of a town public

works project, shall be at the owner's expense, subject to the terms of a sewer line extension agreement provided by the town, and required as a condition precedent to any sewer line extension. The property owner shall extend such sewer line to the furthest point on the owner's lot property line which is fronting a town street. The expenses of installing sewer lines shall be at the sole expense of the owner, and in accordance with town specifications and state DEQ; and, under this section, shall be deemed the property of the town upon inspection and acceptance of the sewer line by the town. (Ord. 09-013, 7-28-2009)

Title 7 – Utilities

Chapter 2 Sewer Use & Service

ARTICLE A. SEWER FACILITIES CONSTRUCTION COSTS REIMBURSEMENT GUIDELINES AND PROVISIONS

7-2A-1: PURPOSE AND FINDINGS:

7-2A-2: DEFINITION:

7-2A-3: REIMBURSEMENT GUIDELINES AND PROVISIONS:

7-2A-4: CALCULATION OF REIMBURSEMENT COSTS:

7-2A-1: PURPOSE AND FINDINGS:

- A. Purpose: It is the purpose of this article to establish guidelines and provisions for the reimbursement of costs to developers for the construction of sewer system improvements within the town annexation boundaries.
- B. Findings: Based on preliminary information, the town finds:
 - 1. It is necessary in the interest of the public health, public safety and general welfare that the town and the county promote the construction of sewer system infrastructure within the annexation boundary of the town; and
 - 2. By allowing for the reimbursement of the costs of the construction of sewer systems, the likelihood of developers constructing new sewer facilities is increased;
 - 3. It is fair and equitable for other lot owners or developers to reimburse a previous developer for the costs incurred by the previous developer for the construction of the sewer facility. (Ord. 07-003, 3-13-2007)

7-2A-2: DEFINITION:

For the purposes of this article, "sewer main line" means that portion of a central wastewater collection system (public system) that is used or designed to gather or collect sewage for delivery to an approved wastewater treatment facility, and is owned and maintained by a municipality or service district. For the purposes of this article, an eight inch (8") diameter pipe is

the minimum size to be considered a sewer main line and eligible for reimbursement. (Ord. 07-003, 3-13-2007)

7-2A-3: REIMBURSEMENT GUIDELINES AND PROVISIONS:

- A. Agreement: In the event that a developer desires to install new sewer infrastructure, with an eight inch (8") minimum diameter, and connect to the town sewer collection system, they shall be entitled to enter into an agreement with the town to provide for the reimbursement of a proportional share of the actual costs of constructing or extending the sewer infrastructure.
- B. Costs Paid: The reimbursement of the costs would be paid by lot owners or developers who thereafter connect to the new sewer infrastructure. The reimbursement agreement would be binding on all current or future lot owners connecting to the new sewer system, unless a written agreement is executed between the initial developer and the lot owner, waiving the reimbursement requirement.
- C. Submittal, Approval: In order for a reimbursement agreement to be effective, the reimbursement agreement must be executed and construction drawings of the new facilities must have been submitted and approved by the public works department prior to the installation of the new sewer infrastructure.
- D. Collection: Thereafter, the installation reimbursement costs shall be collected for the provision of new sewer facilities until the initial developer has been reimbursed, without interest, according to the terms of a reimbursement agreement, or for a ten (10) year period following the execution of the reimbursement agreement.
- E. Payment Not Guaranteed: The town in no way guarantees payment to the initial developer, except to the extent that funds are actually collected from lot owners or developers in accordance with the terms of this article.
- F. Additional Costs: In addition to the cost of the extension, the lot owner or developer shall pay the physical connection costs and or any other impact fees as required by ordinance. (Ord. 07-003, 3-13-2007)

7-2A-4: CALCULATION OF REIMBURSEMENT COSTS:

- A. Methods Of Calculation: With respect to any reimbursement agreement entered into by the town, the town may consider methods of calculating reimbursement costs, such as: 1) by number of connections; 2) by length of infrastructure fronting a lot; or 3) by volume or capacity demand.
- B. Determination Of Method: Each reimbursement agreement shall specify which method or combination of methods shall be used to calculate reimbursement costs. Which methods of calculation are used in each development agreement shall be determined by the town, in its sole discretion.

C. Responsibility For Billing And Collection Of Reimbursement Amounts: It is the responsibility of the developer to notify the town if any third party connects or intends to connect onto said sewer main as installed by the developer at any time within ten (10) years from the date of signing a reimbursement agreement. The town shall, upon receipt of written notification from the developer, inform the third party of the reimbursement agreement and collect said fee as part of the approval for sewer connection, in addition to charging the usual connection and impact fee. The town shall then pay the amount over to the developer until such time as they have been reimbursed for the amount agreed upon in the reimbursement agreement, or up and until the expiration of ten (10) years, whichever shall occur first. The town in no way guarantees payment to the developer, except to the extent that the developer timely notifies the town of the need to collect funds from a third party and funds are collected from such third party and in accordance with the terms set forth above. (Ord. 07-003, 3-13-2007)

Chapter 8

BUILDING PERMITS

9-8-1: PURPOSE:

9-8-2: BUILDING PERMIT AND CONFORMANCE WITH TERMS REQUIRED:

9-8-3: DESIGN REVIEW:

9-8-4: FINAL REVIEW:

9-8-5: ACCEPTANCE OF IMPROVEMENTS AND OCCUPANCY:

9-8-1: PURPOSE:

The purpose and intent of the building permit review process is to secure the general purposes and objectives of this title to ensure that the general appearance and public safety of buildings, structures and development are harmonious with and complement the neighborhood. Projects are evaluated to ensure that they are consistent with this title, the town general plan, zoning map and general design standards (chapter 12 of this title); and meet applicable health, safety and public welfare standards. (Ord. 08-016, 8-12-2008)

9-8-2: BUILDING PERMIT AND CONFORMANCE WITH TERMS REQUIRED:

- A. Construction, alteration, or removal of any building or structure, or any part thereof, as provided for or restricted in this title and the uniform codes, shall not be commenced without a valid building permit and other permits as required. (2010 Code, amd. Ord. 15-004, 4-28-2015)
- B. Land, buildings or premises in any zoning district shall be used only for the purposes permitted in such district and in accordance with an occupancy permit issued by the building department. The use, building or premises must conform to the provisions of the occupancy permit and all related ordinances, regulations, resolutions and requirements of this title. A new occupancy permit must be obtained prior to a change in use or character of any building.
- C. A building permit shall only be issued after a design review process. Single family dwelling, accessory structures, and commercial remodels that does not change the footprint that are permitted uses and in compliance with the LMC may be reviewed and approved by Town

Staff. All other types of building projects shall follow a two-step process: Project Design Review by the Planning Commission and building permit final review by town staff. (2010 Code, amd. Ord. 15-004, 4-28-2015)

- D. Any construction, alteration of any building or structure, or any part thereof, requiring a building permit, shall require the submission of engineered building plans if required by applicable law. (2010 Code, amd. Ord. 15-004, 4-28-2015)

9-8-3: DESIGN REVIEW:

- A. Purpose: The purpose and intent of the design review is intended to be an abbreviated submittal, to provide an opportunity to verify the project is consistent with applicable regulations and requirements, to obtain general feedback from the public or review boards, to ascertain special requirements and make changes in design (if necessary) before incurring the time and expense of preparing a complete (final) building permit submittal.
- B. Review And Process:
 - 1. Application: An applicant shall submit a complete design review application, signed by an owner or legal representatives of the subject property, to the building department. If the subject property is a condominium project or is owned by a corporation, the signature of an officer of the entity with authority to bind the entity shall be sufficient. Town staff may waive application requirements that are not applicable to the project. (2010 Code, amd. Ord. 15-004, 4-28-2015)
 - 2. Town Staff Review:
 - a. After a complete design review application has been received by the building department, the Town Manager, or designee, will determine if the project, as submitted, is consistent with the requirements of this title. The developer will be notified, in writing, of deficiencies and inconsistencies.
 - b. The applicant will then be given the opportunity to make the necessary corrections, revisions or redesign of the project so as to conform to the requirements of this title. If, in the judgment of the Town Manager, or designee, a variance is required, the staff shall so notify the applicant. The applicant may either apply for a variance pursuant to section 9-11-1 of this title, or redesign the project to avoid the variance requirement. After a complete, conforming application has been received, the Town Manager, or designee, shall make a final review of the design review application, and shall forward a written recommendation to the planning commission.
 - c. The Town Manager, or designee, shall recommend to the planning commission, in writing, any conditions the town staff deems reasonable and necessary under the circumstances to carry out the intent of this chapter and title.
 - 3. Planning Commission Review: Within a reasonable time after a complete submittal, the Town Manager, or designee, shall present the design review application to the Planning Commission. The Planning Commission shall review the application and approve the project as presented, approve the project with modifications, or deny the application with

the specified deficiencies of this code that when corrected may be brought before the Planning Commission for review.

C. Standards For Review:

1. The proposed uses, structure and site improvements shall conform to the following:
 - a. Town general plan;
 - b. Zoning regulations and other relevant sections of this title;
 - c. Applicable building codes as adopted by the state;
 - d. General design standards of chapter 12 of this title; and
 - e. Other applicable laws.
2. The design shall be sensitive to the constraints of topography, soil types, geologic hazards, watercourses and floodplains, visual impacts and preservation of views.
3. Utilities and services shall be available and adequate to meet the needs of the proposed structure and uses. (2010 Code, amd. Ord. 15-004, 4-28-2015)

D. Modifications:

1. When a commercial project contemplates a modification to the plan and it is deemed by the staff to be minor in scope (unseen structural modifications, interior floor layout not resulting in increased density, facade repairs, landscaping, etc.), the project may be approved by the Town Manager or designee. Modifications deemed "significant" in nature by the Town Manager, or designee, shall be submitted to and reviewed by the town staff, which shall then forward its recommendation to the Planning Commission for review.
 2. If, following the town staff review, and before being presented to the Planning Commission for consideration, the project is significantly modified, the town staff must again review the modification before it is presented to the Planning Commission. Significant modifications may include, but are not limited to, a change of configuration of buildings on the lot, lot layout or configuration, a change in the number of rooms or number of units, or other change that raises significant new issues, questions or problems as to the project's conformity to the general plan or this title.
- E. Plan Modification Fee: A fee as indicated on the consolidated fee schedule for modification of plans or permits shall be paid when a design modification is requested, prior to any review of modifications, to cover the cost of processing and review.
- F. Expiration: A design review approval expires after one year from the date of the Planning Commission approval if a building permit has not been issued. (Ord. 08-016, 8-12-2008)

9-8-4: FINAL REVIEW:

A. Review Process:

1. Application: Following design review by the Planning Commission, if required, application shall be made to the building department for final review.
2. Town Staff Review: The town staff, upon receipt of a completed application and all fees, shall review the application and shall approve, approve with conditions, or deny the final building permit application.

B. Standards For Review:

1. The proposed uses, structure and site improvements shall be reviewed subject to the following:
 - a. Town general plan;
 - b. Zoning regulations, town design standards and other relevant sections of this title;
 - c. International building code (IBC) and all current applicable codes as currently adopted by the state.
2. The design shall be sensitive to the constraints of topography, soil types, geologic hazards, watercourses and floodplains, visual impacts and preservation of views.
3. Utilities and services shall be available and adequate to meet the needs of the proposed structure and uses, including, but not limited to, roads, gas, electric, storm drainage, telecommunications, public safety, schools and recreation, or bonding provided for subject to sections 9-13-5 and 9-13-7 of this title.

C. Plan Revisions: After a building permit is granted, a project may not be altered without the approval of the Town Manager, or designee. In order to ensure that the proposed modification is consistent with this title, and that the redesign is still in conformity with design and final review, the Town Manager, or designee, may then require any documents deemed reasonably necessary to evaluate the modification. For violations of this requirement, the Town Manager, or designee, may suspend the building permit and construction on the project.

D. Expiration:

1. Every permit issued shall expire if the building or work authorized by such permit is not commenced within one hundred eighty (180) calendar days from the date of issuance of such permit.
2. Once a building permit is granted and construction commenced, the approval shall continue for a period of twenty four (24) months, unless otherwise revoked or extended. The building permit shall expire upon a permanent occupancy permit being issued. (Ord. 08-016, 8-12-2008)

9-8-5: ACCEPTANCE OF IMPROVEMENTS AND OCCUPANCY:

- A. **Occupancy Permit:** An occupancy permit shall be issued only for a single building (a single permit may not be issued for multiple buildings) upon compliance with the following conditions:
 - 1. A notice of completion has been issued by the building department verifying that the building project is completed and in compliance with all applicable codes for occupancy, including all on site and off site improvement work.
 - 2. A set of "as built drawings", as defined in section 9-2-1 of this title, has been filed with the building department.
- B. **Temporary Occupancy:** The building official is authorized to issue a temporary occupancy if the space to be occupied has been noted on approved plans stating occupiable space before the completion of the entire work covered by the permit; provided, that such a portion or portions shall be occupied safely and sanitarily. The building official shall set a time period during which the temporary certificate of occupancy is valid, not to exceed one year.
- C. **Inspection:** The Town Manager, member of the building department, Public Safety Director or other designated official shall, upon presentation of evidence of authority, have the right of access to any premises at any reasonable hour for the purpose of inspecting all buildings, structures and other construction projects during the course of their construction, modification or repair, and to inspect land uses to determine compliance with the provisions of this title.
- D. **Acceptance Of Improvements:** On or off site improvements shall be deemed accepted by the town only after complete inspection by the Building Official, Public Works Director and Director of Public Safety for their area of discipline and responsibility; for buildings and structures, the issuance of an occupancy permit; and for on or off site public improvements, upon the issuance of a certificate of acceptance by the Town Manager, or designee. 9-9-2: SUBDIVISION CONTROL:

Subdivision of land must comply with the provisions of this chapter and Utah Code Annotated section 10-9a-601 et seq. Until a final plat is recorded according to these provisions, the following may not occur: land transferred, sold or offered for sale, contracted for sale, deeded or conveyed, building permit issued on said land; terrain altered; any vegetation removed from the proposed subdivision site; or engaging in any site development. The steps of the subdivision process are as follows:

- A. Pre-application Conference/Staff; Developer Meeting: Prior to submission of formal materials for a proposed subdivision and one week prior to each Planning Commission meeting, a subdivider shall participate in a pre-application conference with the town staff. This will provide the subdivider an opportunity to consult with and receive assistance from the town regarding the regulations and design requirements applicable to the subdivision of the property prior to a significant investment in technical/engineering and legal work.

- B. Plan, Plat Review: A schematic plan review, preliminary plat and a final plat of such subdivision are approved in accordance with the process set forth in this title.
- C. Plat Recorded: The approved final plat is recorded in the office of the County Recorder by the Town Clerk, with all recording costs paid by the subdivider.
- D. Improvements: The improvements required in connection with the subdivision have been constructed or guaranteed as provided herein.

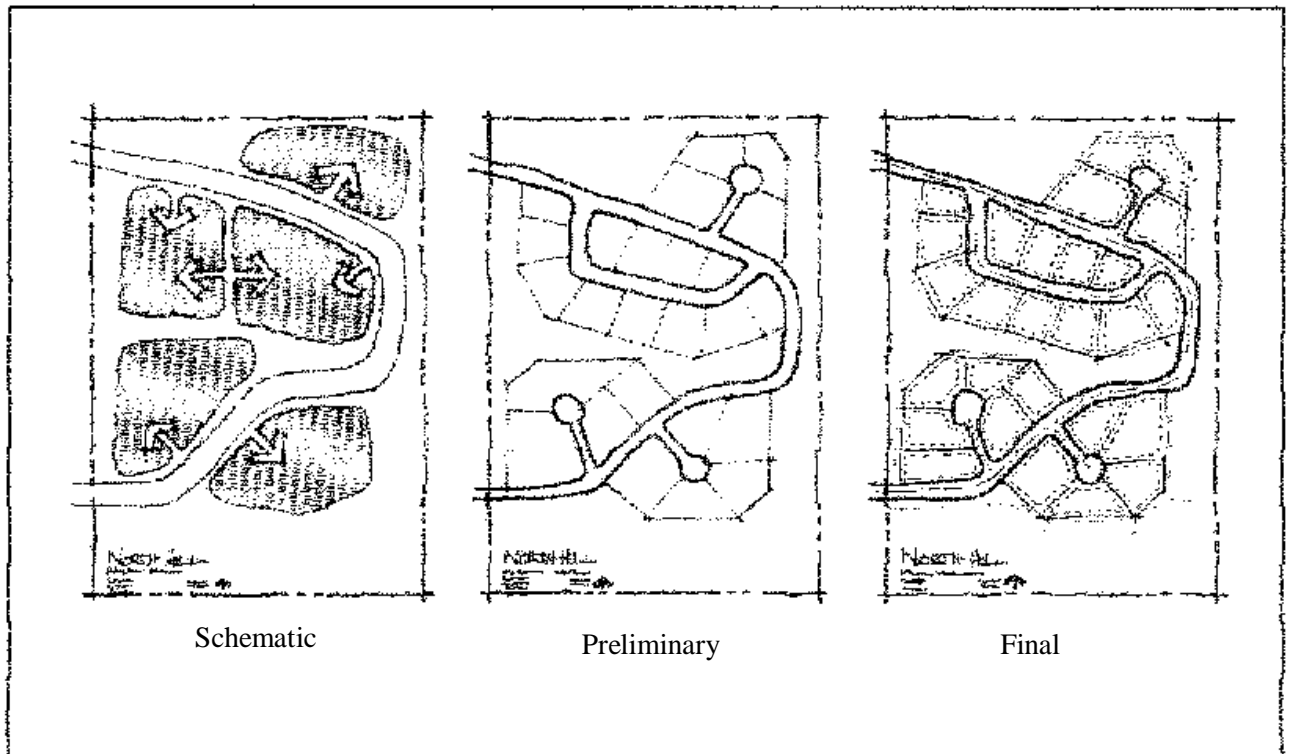

Figure 9.1: The three stages of a subdivision approval require increasing levels of detail in design.

(Ord. 08-016, 8-12-2008)

9-9-3: SCHEMATIC PLAN REVIEW:

- A. Purpose: The schematic plan is intended to be an abbreviated submittal, to allow the applicant and the review boards to determine the basic feasibility of the proposal before incurring the time and expense of the preliminary and final plats.

B. Review Process:

1. Submittal: See chapter 4 of this title, tables 2 and 3, for the information to be included on or with the schematic plan.
2. Town Review: The Town Manager and/or staff shall review the documents submitted for schematic plan review to determine if they are complete as required in chapter 4 of this title and meet the standards for review of subsection C of this section. The application and staff comments are then forwarded to the planning commission.
3. Planning Commission Review: Within a reasonable time after the town review, the Town Manager shall present the schematic plan to the Planning Commission at a regular meeting. During this review, the Planning Commission shall provide additional comments and input as they pertain to this title, to assist the applicant in preparing the preliminary plat application.

C. Standards For Review: The applicant shall demonstrate that:

1. Conformance To General Plan: The proposed subdivision conforms to the town general plan, zoning regulations, public works standards, design standards (chapter 12 of this title) and other relevant sections of this title.
2. Water: The proposed water source is connected to the town's water distribution system and has adequate capacity and an adequate method of distribution within the subdivision. If applicable and also required, the applicant shall also demonstrate the existence of an agreement to provide water from the water provider and/or evidence of availability of water. (2010 Code, amd. Ord. 15-004, 4-28-2015)

5. Appropriate Use: The proposed uses for the property are appropriate to the zone district and the layout/design is responsive to the constraints of topography, soil types, geologic hazards, watercourses and floodplains, visual impacts and preservation of views.
6. Public Services: Adequate public services are available to meet the needs of the proposed subdivision, including roads, gas, electric, telecommunications, mail, police and fire protection, schools and recreation. If adequate services do not exist at the time of application, provision must be made for expansion of services concurrent to the subdivision development.

D. Staff Cannot Bind Town: The schematic plan review is intended to help the subdivider identify important issues and concerns before he or she incurs the expense and time involved in preparing more detailed plans. Town staff and Planning Commission

recommendations, suggestions and interpretations are advisory and shall not be considered binding on the town.

- E. Vested Rights: Submission of a schematic plan does not constitute the beginning of any vested rights for the applicant. Vested rights shall accrue only upon the filing of a complete preliminary plat application with all required information and fees. However, if there is a compelling, countervailing public interest or the town has initiated proceedings to amend this title or other applicable ordinances at the time of the preliminary plat application, then there shall be no vesting as it pertains to the compelling, countervailing public interest or pending ordinance change.
- F. Expiration; Extension: Application shall expire one year from completion of review with a one year extension available from staff, upon written request by the applicant submitted prior to the one year deadline. The developer shall pay all costs incurred with the extension. (Ord. 08-016, 8-12-2008)

9-9-4: PRELIMINARY PLAT:

- A. Purpose: The purpose of the preliminary plat is to review and resolve most of the technical details of the subdivision design in order to minimize changes and revisions which might otherwise be necessary on the final plat. The preliminary plat, and all information and procedures relating thereto, shall in all respects be in compliance with the provisions of this title and any other applicable ordinances.
- B. Standards For Review: The applicant shall demonstrate that:
 - 1. Compliance With Schematic Plan: The proposal complies with schematic plan review comments by both staff and planning commission.
 - 2. Water: The proposed water distribution system is connected to the town's water system and meets the requirements of the town; the proposal includes a schematic design of the water distribution system. (2010 Code, amd. Ord. 15-004, 4-28-2015)
 - 3. Sewer: Provision has been made for a public sewer collection system is connected to the town's sewer system and meets town requirements. (2010 Code, amd. Ord. 15-004, 4-28-2015)
 - 4. Public Services: Preliminary engineering plans provide evidence that public services (roads, trails, fire, police, gas, electricity, telecommunications, schools and recreation) meet the requirements of this title and applicable codes.
- C. Review Process:
 - 1. Application: After completing the schematic plan review required in this title, the subdivider shall file an application for preliminary plat approval. See Chapter 4 of this

title, tables 2 and 3, for the information required to be included on or with the preliminary plat. The applicant shall provide the town with sufficient information so that it can provide notice by transmittal letter to such public agencies and utilities as deemed appropriate by the town manager, or designee, and in accordance with Utah Code Annotated section 10-9a-207, as amended. In the transmittal letter, the town shall request that each of the affected entities, as set forth in Utah Code Annotated section 10-9a-103(1), as amended, forward a report of its findings and recommendations to the town staff and Planning Commission by the date of the public hearing set for the preliminary plat approval. The developer shall pay for all costs incurred.

2. Town Staff Review:
 - a. Within a reasonable amount of time, the Town Manager and/or staff shall review the preliminary plat application for general compliance with these regulations, public works standards, design standards and other applicable ordinances. If the preliminary plat is not complete or not in general compliance, the Town Manager and/or staff shall notify the subdivider in writing and specify the respects in which it is deficient. When the submission is complete and in general compliance, the Town Manager, or designee, shall forward the preliminary plat to the Planning Commission.
 - b. The Public Works Department and Town Engineer shall review submittals, plans and plats as to engineering requirements for street widths, grades, alignments, snow removal and storage, surface water flow and flood control, and for consistency of the proposed public improvements with this title and other applicable ordinances. (2010 Code, amd. Ord. 15-004, 4-28-2015)
 3. Planning Commission Review: When the filing of a preliminary plat of a subdivision and any other information required is deemed complete and accurate by the staff, the Planning Commission shall hold a public hearing (commission with documentation as prescribed in chapter 4 of this title) to review and recommend thereon. If the Planning Commission finds that the proposed plat complies with the requirements of this chapter and it is satisfied with the plat of the subdivision, it shall forward to the Town Council a recommendation to approve, or approve with conditions, the plat. If the Planning Commission finds that the proposed plat does not meet the requirements of this title or other applicable ordinances, it shall deny such plat.
 4. Town Council Review: Upon receipt of a recommendation from the Planning Commission, the Town Council shall meet to approve as recommended, approve as modified by the Town Council, or deny the proposed preliminary plat.
- D. Effect Of Approval Of Preliminary Plat: Approval of the preliminary plat shall in no way relieve the applicant of his responsibility to comply with all ordinances, all issues identified during the schematic plan review (unless formally waived by the Town Council), and to provide all improvements and easements necessary to meet town standards and specifications.

- E. Expiration Of Preliminary Plat Approval: Application for final plat approval shall be made within twelve (12) months after approval or conditional approval of the preliminary plat by the Town Council. This time period may be extended for no more than an additional twelve (12) months if the subdivider petitions for and the Planning Commission grants an extension prior to the expiration date. Only one extension may be granted. Failure to submit the application for final plat within the allotted time period shall cause the previous approvals to be null and void. Fees previously paid by the applicant shall not be refunded. (Ord. 08-016, 8-12-2008)

9-9-5: FINAL PLAT:

- A. Purpose: The purpose of the final plat is to require formal approval of detailed engineering and legal requirements by the Planning Commission before a subdivision plat is recorded. The final plat and all information and procedures relating thereto shall in all respects be in compliance with the provisions of this title. The final plat and improvement plans submitted shall conform in all respects to those regulations and requirements specified during the schematic plan and preliminary plat procedures. Pursuant to Utah Code Annotated sections 10-9a-603 and 10-9a-604, as amended, the town manager shall sign the final plat following planning commission approval.
- B. Standards For Review: The applicant shall:
 - 1. Comply with all conditions of schematic and preliminary plat approval.
 - 2. Include acceptable final engineering plans for the water distribution system, final agreements from the water provider, and provisions for perpetual maintenance for the water system.
 - 3. Meet all planning, engineering and surveying requirements of the town for maps, data, surveys, analyses, studies, reports, plans, designs, documents, wetlands designations, and other supporting materials.
 - 4. Provide evidence to show that there is no encumbrance, lien or conveyance restricting the intended use of the lot.
 - 5. Provide evidence from the County Treasurer that all ad valorem taxes applicable to the property have been paid.
 - 6. Include all dedications for streets, roadways, easements, trails and/or rights of way, as necessary.
 - 7. Meet the requirements of chapter 4 of this title, table 3.
 - 8. Provide signature blocks on the plat signed by a representative of public utilities which identify their approval as required by Utah Code Annotated.
- C. Review Process:

1. Application: The subdivider shall file an application for final plat approval with the Town Manager or staff in such form and quantities as prescribed by the town, including one reproducible Mylar copy for recording. See chapter 4 of this title, table 3, for the information required on or with the final plat.
 2. Town Staff Review: The Town Manager shall ensure that the final plat and associated documents have been checked by the applicable town departments (Public Works, Public Safety), Town Engineer and Town Attorney for completeness and general compliance with this title and for incorporation of any changes required during the preliminary plat procedure, and that other applicable approval agencies have granted approval. If the submission is not complete, not in general compliance with or does not incorporate conditions of previous approvals, the town shall notify the applicant in writing and specify the respects in which it is deficient. When the submission is complete, in general compliance with applicable ordinances, and incorporates all prior conditions of approval, the town manager, or designee, shall forward the final plat to the planning commission for review.
 3. Planning Commission Review: Upon receipt of the final plat, the Planning Commission shall examine the plat to determine whether the plat conforms to the preliminary plat, all applicable town ordinances and codes, the standards of the town, and with all requirements imposed as conditions of previous acceptances. If the Planning Commission shall thereupon determine that the plat is in conformity therewith, it shall forward its recommendation onto the Town Council for final approval. (2010 Code, amd. Ord. 15-004, 4-28-2015)
 4. Town Council Review: Upon receipt of the final plat and the Planning Commission's recommendation, the Town Council shall examine the plat to determine whether the plat conforms to the preliminary plat, all applicable town ordinances and codes and the standards of the town, and with all requirements imposed as conditions of previous acceptances. If the Town Council determines that the final plat does not fully conform to the preliminary plat, standards and prior conditions of approval, it shall: a) disapprove the final plat and advise the subdivider in writing of the changes or additions that must be made for approval; or b) table or continue the application to allow the subdivider to make revisions. The subdivider shall be responsible for notifying the town that he or she is ready to go to the Town Council for final plat approval. (2010 Code, amd. Ord. 15-004, 4-28-2015)
- D. Security Agreement: Prior to recording a final plat, the subdivider shall obtain sufficient financial guarantee consistent with chapter 13 of this title. The accompanying agreement may contain such provisions as approved by the Town Attorney and Town Engineer.
- E. Recording Final Plat: After final approval, filing of the bond agreements described in chapter 13 of this title, and signing of the plat by the Town Manager, Mayor, Town Engineer, Town Attorney, utility companies and other required entities, the plat and covenants, conditions and restrictions (CC&Rs) for the subdivision shall be presented by the town to the County Recorder for recording. The subdivider shall pay all recording costs. (2010 Code, amd. Ord. 15-004, 4-28-2015)
- F. Expiration Of Final Plat Approval: If the requirements set forth above are not met by the subdivider within six (6) months from the date of final plat approval, such approval shall

be null and void. This time period may be extended for good cause shown, for additional six (6) month periods by the Town Manager. The subdivider must petition for an extension prior to the expiration of the original six (6) months, or an extension previously granted. Up to two (2) extensions may be granted, if the Town Manager finds that each extension will not be detrimental to the town. If any of the fees charged as a condition of subdivision approval, including, but not limited to, inspection fees, park fees, flood control fees, as well as the amounts the town uses to estimate bonds to ensure completion of improvements, have increased, the Town Manager may require the subdivider pay such increases as a condition of granting the extension. If the final plat is not recorded within the required time frame, the applicant will be required to work within the time constraints of the approved preliminary plat phase.

G. Amending Or Vacating Recorded Plat:

1. Any landowner whose land has been platted as provided in this title may, upon application to the town, have such plat, or portion thereof, or any street or alley therein contained, altered, amended or vacated.

9-10-5: HOME OCCUPATIONS:

A. Purpose: It is the purpose and intent of this section to allow persons residing in dwellings to use their mental or physical expertise and talent in providing a service, developing a product for sale to the public, operating certain kinds of small businesses or maintaining a professional or business office work space in the dwelling, or in an attached or detached garage or accessory building, or yard space, while at the same time maintaining the peace, quiet and domestic tranquility within all residential areas of the town. It is further the purpose and intent of this chapter that home occupations shall be clearly accessory and subordinate to the principal use of the property for dwelling purposes.

B. Permitted Standards For Home Occupations When Conducted Entirely Within Residence: The following standards shall be observed in the operation of all home occupations to be approved by town staff:

1. The home occupation shall be conducted primarily by residents of the premises. A home occupation may have employees; however, only one employee who does not live in the home may come to the home at any one time for purposes of employment. One additional off street parking stall shall be provided for any employee coming to the home who is not a resident of the premises.
2. The home occupation shall not physically change the dwelling or yard space to the extent that it would alter the residential or aesthetic character of the dwelling, yard or neighborhood.
3. The home occupation shall be allowed one nameplate sign, which shall be consistent with chapter 14 of this title. Temporary signs shall not be permitted for home occupations.
4. The home occupation shall not generate pedestrian or vehicular traffic in excess of that customarily associated with the zone in which the use is located, as determined by the zoning administrator and appropriate regulatory authorities. "Occupancy load", as defined by the currently adopted building code, shall not be exceeded.
5. The home occupation shall not cause a demand for municipal or utility services or community facilities in excess of those usually and customarily provided for residential use, as determined by the Zoning Administrator and appropriate regulatory authorities.
6. Sale of commodities produced on the premises shall be permitted. The sale of all commodities shall be by prior individual invitation only.
7. Home occupations shall conform to business license requirements of title 3 of this code.
8. There shall be complete conformity with all applicable Town, County, State and Federal laws and ordinances.

C. Conditional Use Standards For Home Occupations Using Attached Or Detached Garages, Accessory Structures Or Yard Space: The following standards shall be observed in the operation of all home occupations using garages, other accessory structures or yard space, which shall be approved by conditional use, in addition to the standards specified in subsection B of this section:

1. An occupation may be considered as a conditional use only under the following conditions:

- a. The Planning Commission finds that the proposed home occupation will be clearly accessory and subordinate to the principal use of the property for dwelling purposes; and
 - b. The Planning Commission finds that the proposed home occupation will not adversely affect the residential nature and aesthetic quality of the neighborhood; and
 - c. Any off street parking displaced by the home occupation is relocated elsewhere on the lot or parcel; and
 - d. The Planning Commission may impose any conditions it deems necessary to mitigate impacts of the home occupation on the neighborhood.
2. In determining whether to grant a conditional use approval for the use of an attached or detached garage, accessory structure or yard space for a home occupation, the Planning Commission shall consider the effect of such use on the residential character of the property upon which the home occupation is proposed to be located. In making a determination, the Planning Commission may consider factors including, but not limited to:
- a. Displacement of normally residential functions of yard space and building or structure usage;
 - b. The potential for generation of noise, dust, vapors, fumes, odors and light;
 - c. The potential for generation of excess traffic;
 - d. The potential impact of the proposed home occupation on the aesthetic quality of the neighborhood and the property upon which the home occupation is proposed to be located.
3. Due to the special nature of home occupations, their potential to create adverse impacts to the neighborhood, and the potential for significant unforeseen impacts to occur, the Planning Commission reserves the right to review any home occupation granted conditional use approval pursuant to this subsection. The conditional use permit for the home occupation may be reviewed and modified or revoked by the Planning Commission due to failure of the owner or operator of the home occupation to observe all conditions specified in issuing the permit; failure to observe the purpose and intent of this section or other requirements of this title in regard to the maintenance of improvements and conduct of the home occupation as approved; or significant unforeseen impacts resulting from the operation of the home occupation in conflict with the purpose and intent of this section and as explained in the application.

Chapter 11

FLEXIBLE APPROACHES

9-11-1: VARIANCES:

9-11-2: CONDITIONAL USE PERMIT:

9-11-3: PLANNED UNIT DEVELOPMENT (PUD):

9-11-1: VARIANCES:

A. Purpose: A variance is intended to grant a property owner relief from the terms of this title where conditions are such (particular physical surroundings, shape or topographical conditions) that literal enforcement of this title would cause an unreasonable hardship upon the owner, as distinguished from a mere inconvenience or increased costs. A variance is not intended to disregard the spirit of the town general plan, this title, or design standards ([chapter 12](#) of this title). A variance may be requested for physical constraints to the lot that deprive the applicant of the reasonable use of his property when others similarly situated are entitled to make such use of their property.

B. Review Procedures:

1. Application: An application for variance review must be filed with the town, and the required fee paid in advance. If, in the course of subdivision or building permit review, it is determined that a variance is required or desired, all further action shall be stayed until the applicant shall have obtained the variance.
2. Appeal Authority Review: The appeal authority shall review the application in a hearing to be held within a reasonable time after the application is submitted. Notice to adjoining property owners is required pursuant to section [9-1-8](#) of this title. The appeal authority shall grant or deny the variance pursuant to the standards and conditions set forth by state law, Utah Code Annotated section 10-9a-702, as amended, and those set forth below.

C. Standards For Review:

1. The appeal authority may grant a variance only if:
 - a. Literal enforcement of this title would cause an unreasonable hardship for the applicant that is not necessary to carry out the general purpose of this title;
 - b. There are special circumstances attached to the property that do not generally apply to other properties in the same zone;
 - c. Granting the variance is essential to the enjoyment of a substantial property right possessed by other property in the same zone;
 - d. The variance will not substantially affect the general plan and will not be contrary to the public interest; and
 - e. The spirit of this title is observed and substantial justice is done.
2. In determining whether or not enforcement of this title would cause unreasonable hardship under subsection C1 of this section, the appeal authority may not find an unreasonable hardship unless the alleged hardship:
 - a. Is located on or associated with the property for which the variance is sought; and
 - b. Comes from circumstances peculiar to the property, not from conditions that are general to the neighborhood.

3. In determining whether or not enforcement of this title would cause unreasonable hardship under subsection C1 of this section, the appeal authority may not find an unreasonable hardship if the hardship is self-imposed or economic.
4. In determining whether or not there are special circumstances attached to the property under subsection C1 of this section, the appeal authority may find that special circumstances exist only if the special circumstances:
 - a. Relate to the hardship complained of; and
 - b. Deprive the property of privileges granted to other properties in the same zone.
5. The applicant shall bear the burden of proving that all of the conditions justifying a variance have been met.

D. Appeal: The town or any person aggrieved by a final decision of the appeal authority may appeal to a court of competent jurisdiction, provided the appeal is filed with the court within thirty (30) days after the decision of the appeal authority. (Ord. 08-016, 8-12-2008)

9-11-2: CONDITIONAL USE PERMIT:

- A. Purpose: Although each zoning district is primarily intended for a predominant type of use (i.e., dwelling units in residential districts), there are a number of uses which the Town Council has identified that may be appropriate in a particular district if conditions are met that mitigate potential adverse impacts of the proposed use. For example, as a condition of approval, a bed and breakfast may be required to furnish adequate parking to accommodate all potential occupants of the home. The conditional use review is intended to provide additional information necessary to assure compatibility and harmonious relationships between proposed uses, surrounding properties and the town in general.
- B. Approval Required: Conditional use approval is required for the conditional uses in each zoning district. Conditional use approval may be revoked upon failure to comply with all conditions attached to the original approval of the conditional use as set forth in a conditional use permit.
- C. Review Process:
1. Application:
 - a. An application for approval of a conditional use shall be filed with the building department on a form provided by the town and must include written consent by the owners of all property on which the conditional use activity shall be conducted.
 - b. The appropriate fee from the consolidated fee schedule shall be submitted with the application.
 - c. Other information required to be submitted on or with the conditional use application can be found in [chapter 4](#) of this title, table 2.
 2. Staff Review: Upon receipt of a completed conditional use application, the town staff shall conduct a review of the application. The Town Manager, or designee, shall prepare and deliver to the planning commission a written advisory report with a recommendation, including recommended conditions on the application.
 3. Planning Commission Review And Action:
 - a. Within a reasonable time of receipt of a complete application, the planning commission shall give public notice consistent with section [9-1-8](#) of this title and hold a public hearing on the proposed conditional use. Members of the public may submit written comments to be part of the public hearing record or may present oral comments at the hearing.

- b. Upon receipt of the town staff and other applicable agency recommendations, and input from the public hearing, the planning commission shall review the project and may impose reasonable conditions of approval which are designed to mitigate the reasonably anticipated detrimental effects of the proposed use. If the applicant accepts the conditions imposed, the planning commission may grant the conditional use permit. If the reasonably anticipated detrimental effects of the proposed conditional use cannot be substantially mitigated by the proposal or the imposition of reasonable conditions to achieve compliance with applicable standards, the planning commission may deny the conditional use.

D. Standards For Review:

1. No conditional use permit may be issued unless the planning commission finds that the application meets the following standards and conditions:
 - a. Protects the safety of persons and property:
 - (1) Will not result in unreasonable traffic congestion or traffic hazards;
 - (2) Has adequate and necessary access for municipal services.
 - b. Will not exceed the obligations and/or financial capability of the town and will not require a level of community facilities and services greater than that which is available or which may be provided.
 - c. Will protect environmental values:
 - (1) Will not cause unreasonable air, water, groundwater, light or noise pollution;
 - (2) Does not have critically expansive soils, high water table, slope instability, or other soil problems which cannot be mitigated.
 - d. Consistent with the town general plan:
 - (1) Will comply with the requirements of the zoning district in which the use is to be established and with all other requirements of this title;
 - (2) Will be compatible with the character of the neighborhood and surrounding structures in scale, mass and traffic circulation.
 - e. The applicant has assured performance of obligations by posting bond or other adequate security as determined necessary by the planning commission per [chapter 13](#) of this title.
2. With its approval, the planning commission may impose such conditions and safeguards to ensure compliance with the requirements, standards or conditions of this section. The violation of any condition, safeguard or commitment of record by the applicant shall be sufficient grounds for revocation of conditional use approval.

E. Transferability: A conditional use permit is transferable with the title to the underlying property so that an approved project may be conveyed or assigned by the applicant to others without losing the approval. The permit cannot be transferred off the site on which approval was granted.

F. Time Limit: The approval for the use shall expire unless a building permit is issued, or the conditional use begins within a period of twelve (12) months from the date of conditional use approval.

G. Modification: No approved conditional use may be modified, structurally enlarged or expanded unless the site plan is amended and reviewed and approved in accordance with the procedures and standards of this section.

H. Related Permits And Requirements: A conditional use shall also be subject to all other procedures, permits and requirements of other applicable ordinances and regulations of the

town. In the event of any conflict between the provisions of a conditional use permit and any other permit or requirement, the more restrictive provisions shall prevail. (Ord. 08-016, 8-12-2008)

9-11-3: PLANNED UNIT DEVELOPMENT (PUD):

A. Purpose:

1. The purpose of the planned unit development (PUD) is to provide for fractional ownership of property on a single parcel of land, to encourage flexibility in the design of the site, to preserve open space through clustering concepts, and to ensure compliance with the uses and densities of the underlying zone district regulations.
2. A planned unit development may also mean an integrated design for development of residential, commercial or light industrial uses in which one or more of the regulations, other than use and density regulations of the zoning district in which the development is to be situated, is waived or varied to allow flexibility and initiative in site and building design and location in accordance with an approved plan and imposed general requirements as specified in this section.
3. In the case of fractional ownership PUD, it is the intent of this section to create a functioning association of common owners with sufficient financial and leadership strength to maintain a sustainable project.

B. Review Process: Planned unit developments (PUD) shall be reviewed and approved under the same land use authority provisions as the subdivision process.

C. Standards For Review:

1. The applicant shall demonstrate the following:
 - a. The development shall be in a single ownership at the time of application or filed jointly by all owners of the property.
 - b. The proposed uses of the property are consistent with the underlying zoning.
 - c. The arrangements of structures and open spaces will not adversely affect adjacent properties. For example, where deemed necessary by the planning commission, the lowest height and least intensity of buildings and uses shall be arranged around the boundaries of the development.
 - d. The proposed use and location shall provide a service or facility that will contribute to the general well being of the neighborhood and the community.
 - e. The proponents of the planned unit development have demonstrated to the satisfaction of the planning commission and Town Council that an organizational structure and financial plan is established for construction, phasing and maintenance (including HOA responsibilities and budget projection for 10 years) to ensure sustainability of the project.
 - f. The planned development is consistent with the town general plan.
 - g. The development is planned as a single project (with possible phasing) with continuity of building design, theme and uses.
 - h. Easements are created to establish and maintain the continuity of existing and planned trails and ski ways with ownership and maintenance being the responsibility of the approved organizational structure, unless specifically accepted by the town.
2. In cases where the applicant requests a waiver or flexibility from the zoning standards (excluding use and density, which may not be waived) they shall demonstrate the following:
 - a. Any request to modify physical restrictions identified in [chapter 7](#) of this title shall be submitted for approval by the planning commission.

- b. Minimum landscape requirements identified in [chapter 7](#) of this title shall be increased by ten percent (10%), and application shall include a detailed landscape plan.
- c. Special consideration has been given to preserving natural vegetation, land formations and topography.

D. Appeals: A final decision of the land use authority may be appealed to the appeal authority following the procedures of subsection [9-3-2H](#) of this title, but must be filed within ten (10) regular business days of the decision. (Ord. 08-016, 8-12-2008)

Land designated as public right of way shall be separate and distinct from lots adjoining such right of way and shall not be included in the area of such lots.
- C. Developable Lots: All subdivisions shall result in the creation of lots which are developable and capable of being built upon. A subdivision shall not create lots and no building permit shall be issued for any lots that would make building or access impractical due to size, shape, steepness of terrain, location of watercourses, problems of sewerage or driveway grades, or other physical conditions, except where such lots are suitable and dedicated for a common open space, private utility or public purpose.

- D. Side Lines: The side lines of all lots, so far as possible, shall be at right angles to each street on which the lot faces, or approximately radial to the center of curvatures. Exceptions may be made to this requirement for considerations such as solar orientation, grades, line of site or other traffic safety issues.
- E. Corner Lots: Corner lots for residential use shall be platted wider than interior lots in order to permit conformance with the required front setback requirements along all streets bordering such lots.

(Ord. 08-016, 8-12-2008)

9-12-3: DEVELOPMENT DESIGN AND LAYOUT:

- A. Hazardous Site Conditions Avoided: The design of the development shall avoid or fully mitigate hazardous site conditions (unstable slopes, geologic faults, seismic zones, wildland fire, avalanche or flood potential, etc.).
- B. Drainage: Drainage from individual lots shall be coordinated with the general storm drainage pattern for the area and shall avoid conveying to adjacent lots runoff flows higher than historic patterns.
- C. Centrally Located Recreation Facilities: Recreation facilities should be located central to all residents of the development whenever possible.
- D. Access: All lots should have reasonable access to open space, trails, park land or recreation facilities that are set aside for either development use or use by the general public.

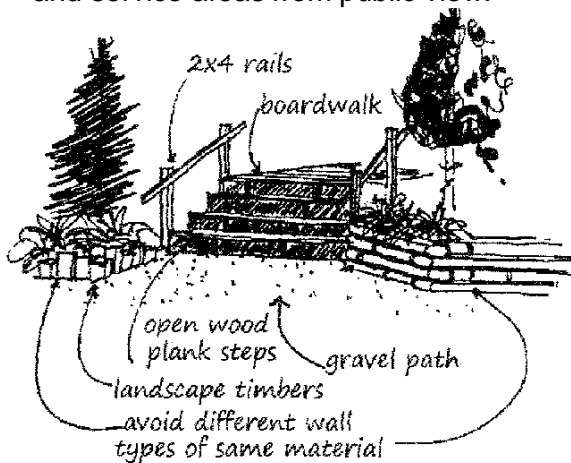

- E. Trails And Open Space Access: Access to public trails and open space abutting the property shall be provided.
- F. Extension Of Infrastructure: Public utilities, streets and other public infrastructure shall extend to the farthest border of the development to allow for future development to continue.
- G. Maintenance Of Common Facilities: Maintenance of common facilities must be accomplished through CC&Rs, a homeowners' association, a separate maintenance agreement, or some other perpetual agreement to ensure that sufficient funds are collected for this purpose.
- H. Layout: The layout of lots should provide desirable settings for structures by making use of natural contours, maintaining views, affording privacy, and providing protection from wind, noise and vehicular traffic.
- I. Development Design: Development design should provide for efficiency in the installation and provision of all public and private utilities and services.
- J. Preservation Of Features: Where trees, groves, waterways, scenic points, historic spots or other town assets and landmarks exist, as determined by the town, every possible means shall be provided to preserve these features. The development is encouraged to maintain a minimum of twenty percent (20%) of the lot area in natural vegetation in order to preserve the natural environment and topography or demonstrate to the planning commission satisfaction that an alternate plan will satisfy this intent. Undisturbed natural vegetation areas that are shown on the approved plan shall be properly marked and protected against damage.
- K. Placement Of Buildings: The placement of buildings shall be designed to preserve the natural terrain, drainage, existing topsoil, tree groupings, large trees and large rocks as much as possible so as to screen the building and parking areas from public view.
- L. Removal Of Hazardous Materials: Trees, brush, deadfall, natural vegetation or combustible materials shall be removed and maintained at least fifteen feet (15') from structures as a defensible space for firefighting purposes. Additional area may be required by the public safety department. Fire resistant plant materials may be planted in the defensible space as approved by the public safety department.
- M. Building Placement: Building placement should be considerate of the following:
 1. Preserving views of nature, creating a comfortable pedestrian environment with outdoor spaces that do not feel "boxed in" from tall buildings surrounding the space that create a "canyon effect";
 2. Sun and shade areas to enhance the seasonal experience, and make best use of environmental conditions for snow melting, outdoor seating areas and building efficiency;
 3. Service and delivery areas should be screened from public areas and provide sufficient room for vehicular movement;
 4. Pockets and enclosures are encouraged to create "outdoor rooms" adjacent to buildings, pedestrian traffic and recreation areas. These spaces should blend with the topography, have varied floor heights to add interest, incorporate vegetation and plantings, and incorporate both open and covered space for multiseason use. (Ord. 08-016, 8-12-2008)

9-12-4: CONSTRUCTION ON SLOPES EXCEEDING TWENTY FIVE PERCENT:

Lots with the building or disturbance area identified on slopes of twenty five percent (25%) (14 degrees) to forty percent (40%) (21.8 degrees) warrant especially close review to assure that all grading, retaining wall, cut/fill and road/driveway grade standards will meet the requirements of this title and currently adopted building codes. Construction or lot disturbance shall not take place on slopes exceeding forty percent (40%) (21.8 degrees), except for lots legally subdivided prior to the adoption date hereof. The design shall minimize lot disturbance and removal of existing vegetation, and provide erosion protection. (Ord. 08-016, 8-12-2008)

9-12-5: LANDSCAPING AND FENCES:

A. Purpose: Development shall attempt to blend with the natural terrain and to preserve drainage/waterways, existing topsoil, tree groupings, large trees and rocks. Landscaping design shall provide for new trees, shrubs and vegetation to screen buildings, parking lots and service areas from public view.

UNDESIRABLE LANDSCAPE MATERIALS

DESIRABLE LANDSCAPE MATERIALS

B. Landscaped Areas Of Development:

1. Shall incorporate natural, informal landscape design, rather than formal, geometric patterns.
2. Create buffer zones between adjacent uses and screen parking, service and equipment areas from view within and between developments through the use of extensive tree, shrub and natural grass planting.
3. Preserve natural vegetation, rock outcroppings and other natural features to blend the new development to the natural environment.
4. Incorporate paths, trails and gathering areas into the natural environment and use materials that blend with the area, such as timbers, pavers, colored concrete, boulders, etc.

Figure 11.1: Informal planting (left) is preferred. Formal planting (right) is discouraged in Brian Head.

- C. Fences: Fences and gates should be avoided to preserve a sense of openness and continuity. When fences are implemented for landscaping, safety, animal containment, or privacy they shall comply with the following:
1. Fences and gates shall be set back at least ten feet (10') behind the building front facade.
 2. Perimeter fencing of a property is prohibited without specific planning commission approval.
 3. Fences shall not exceed four feet (4') in height, except where required for safety reasons (swimming pool and attractive nuisances) and not visible from off site.
 4. Fence materials shall be wood, timbers, rock or materials indigenous to the area. Wrought iron fencing should be used primarily at swimming pools and painted or treated to blend in with the surrounding environment or building facade.
 5. Vegetation should be planted in and around fencing to soften the appearance.
 6. Inappropriate wall and fence materials are railroad ties, stucco, chainlink, concrete blocks and vinyl. (Ord. 08-016, 8-12-2008)

9-12-6: LIGHTING:

It is the intent of this section to encourage lighting practices and systems which will minimize light pollution, glare and light trespass, and will conserve energy while maintaining nighttime

safety, utility, security and productivity. All light fixtures, including security lighting, except streetlamps, shall be aimed or shielded so that the direct illumination shall be confined to the property boundaries of the source.

A. Building And Yard Lighting: Outdoor lights shall be designed and installed to reduce and eliminate light pollution, shall be conducive to preserving night sky quality, and to the following standards:

1. Yard lighting fixtures and lamps may be selected by the property owner. To reduce light pollution, the fixtures shall be mounted to the building or of a pole type that directs light towards the ground and focuses on the object to be lit. The fixture shield shall provide a sharp cutoff to prevent spillover lighting of the surrounding area and/or the sky.
2. Such fixtures shall be located to prevent or avoid damage from roof snowshed or snow removal equipment. The lighting fixture shall be located between twelve feet (12') and six feet (6') in height above finished grade of the public sidewalk, walking surface or driveway.
3. Each fixture shall be not more than two hundred fifty (250) watts per fixture (standard incandescent bulb, or equivalent luminance florescent bulb), and fixtures shall be spaced sufficiently to provide adequate light as required by the building code.
4. Parking lot lights, yard lights, or both, may be required for multi-family, commercial and industrial projects. The planning commission shall review the proposed lighting plan of a project to determine that it meets the minimum lighting requirement for safety while maintaining sensitivity to night sky preservation.

B. Subdivision Lighting:

1. Subdivision plans shall provide for the minimum lighting of all street intersections and cul-de-sacs over three hundred feet (300') in length.
2. At the option of the town, additional streetlights along the public right of way may be required. Said streetlights, when required, shall conform to the streetlight requirements of this chapter and the town public works standards.
3. In commercial, industrial and all other nonresidential subdivisions, streetlights, yard lights, or both, shall be required. The town shall have the discretion to determine the appropriate lighting for each subdivision. Said streetlights and yard lights shall conform to the requirements of this section.
4. Subdivision plans shall include the location, height and overhang of each light.
5. Subdivision plans shall include the size of lights in watts and type of luminator, and where practicable, the most energy efficient luminators shall be used.
6. Subdivision plans shall include a drawing or photograph of the typical streetlight and standard proposed and the location of energy meter, switches, cutoffs, etc., if any.

Exception: The subdivision lighting requirements noted in this subsection shall not apply where it has been determined by the town that such lighting would adversely affect the Cedar Breaks Monument, and where a written agreement to that effect has been reached between the Town Council, planning commission, and the Cedar Breaks Monument staff.

EXAMPLES OF SOME COMMON LIGHTING FIXTURES

(Ord. 08-016, 8-12-2008)

9-12-7: BUILDINGS:

- A. Purpose: All buildings and structures are to blend into and be in harmony with surrounding natural vegetation patterns and landforms of the mountain setting. Buildings are to be located to minimize tree removal and site disturbance, while being oriented to the outdoor lifestyle and weather and climate conditions. Buildings are to be constructed primarily of natural and indigenous building materials while minimizing the use of manmade materials such as stucco, plastic and metal to locations such as windows, trim, roofing and areas subject to weather damage. Existing structures are encouraged to remodel or modify their appearance to comply with the following requirements.
- B. Architectural Design And Style: Buildings should implement a rustic composition such as the craftsman, historic mountain lodge, log cabin or national park style architecture that will blend with the mountain setting, as well as topography, landscape and natural environment found in and around that site. These styles include gabled roofs, exposed rafters and beams, and multipaned windows reflective of a sturdy structure. Building materials shall include large wooden beams and timbers, stone covered columns, chimneys, and foundation and exterior wall materials reflecting simple, rustic design.

C. Height:

1. Building heights are specified in each zone district.
2. Public and quasi-public utility buildings, when authorized in a district, may be erected to a height greater than the zone district height limit by obtaining a conditional use permit.
3. No dwellings shall be erected to a height less than one story above grade, unless specifically designed and approved as an earth sheltered structure.

D. Mass, Scale And Composition:

1. Building mass and scale should be sensitive to the site and surrounding structures in the neighborhood so as not to stand out or draw attention away from the natural environment.
2. Rooflines, foundations and walls shall have steps, offsets and architectural features to follow existing slopes and reduce mass. Multi-unit structures should appear to be a cluster or collection of individual masses so as not to create the appearance of stacks or rows of identical "products".

E. Roofs:

1. Single and double gabled roofs are permitted with hips and sheds used on smaller sections, secondary roofs or dormers. Flat roofs are discouraged.
2. Wood shake shingles are prohibited.
3. Roof pitches should range between four to twelve (4:12) and twelve to twelve (12:12).
4. Valleys, dormers, rain gutter and associated roof features should be designed with consideration to retention of snow on the roof. Care should be taken to avoid ice dams and snow sliding that may damage roofing materials or landscaping and building elements below. Special consideration should be given to protecting public entries, patios and balconies, where the weight of falling snow may damage such structures and endanger human life.

F. Exterior Walls:

1. Exposed foundations under four feet (4') in height may be rubbed or finished in natural grey color. Walls over four feet (4') must be covered in stone, wood or similar materials to blend with the rest of the structure, and must be resistant to snow piling and water damage.
2. Building wall finish shall include full log or log faced siding, stone (cultured or natural), wood shingles, horizontal wood or cement board siding (textured to simulate wood grain), board and batten siding. Stucco, milled wallboard, brick, nonreflective metal, vinyl siding or similar material should be used in limited quantities and not as a predominant exterior wall covering. Reflective metal is not permitted.

G. Colors:

1. Exterior building colors should be subdued, complementary colors found in the natural landscaping. Browns, greys and greens are encouraged for large mass areas. Trim colors of golds, reds, blues and greens in darker shades found in or around the site are permissible as long as they blend with the overall building design and do not create a strong contrast. Buildings or building materials that stand out against the landscape because of color or light reflection are prohibited.
2. Roof colors should resemble natural earthtone hues that blend with the surrounding landscape. Reflective materials shall not be used. Bright red, bright blue, bright green, bright white, bright cream or similar colors that stand out from the surrounding landscape, or draw attention to the structure, shall not be used.

H. Windows And Doors:

1. Large glass surfaces should have features (structural or grid) that break the window up into multipane units.
2. Large windows and doors should be recessed and/or shaded by eaves, overhangs, decks or similar architectural features that reduce glare and reflection.
3. Window and door frame colors shall comply with subsection G of this section.
4. Glass shall not create a mirrored finish, but may be treated or coated to control solar heat gain.
5. Windows and doors should be trimmed or framed by wood, timber, wood shutters, stone or wood lintels and sills that are of a scale, color and mass that reflect styles such as the craftsman, historic mountain lodge, log cabin or national park style architecture.

I. Design Factors: Snow loads, fire standpipes, provisions for handicapped, elevator emergency requirements, footing specifications and house address: Requirements for these design factors are defined in the building codes currently adopted by the state, with specific design criteria available from the town building department. Building addresses shall be assigned by the town. (Ord. 08-016, 8-12-2008)

9-12-8: CONSTRUCTION DEBRIS REMOVAL:

All building/construction sites shall provide debris removal sufficient to facilitate the regular cleanup and removal of construction debris from the site. The debris container or containment area must prevent debris from being blown off the property and screen the debris/garbage from public view or maintain the material in a neat orderly manner. It may not become a fire hazard or nuisance to the public or attract vermin. Failure to comply with this section may result in the suspension of building permits, fines or other such appropriate penalties. (Ord. 08-016, 8-12-2008)

9-12-9: ROADS:

A. Road Layout And Geometry:

1. The design and arrangement and construction of all roads, public and private (unless otherwise provided), shall be in conformance with the town public works standards, the provisions of this title, and the town design standards.
2. Road systems shall provide efficient internal circulation and reasonable access to public highways, minimize congestion and unsafe conditions, and be in conformance with the town general plan.
3. The arrangement of roads shall provide for the continuation of roads between adjacent properties when the continuation is necessary for the convenient movement of traffic, pedestrians, emergency or maintenance vehicles, or the efficient provision of utilities. Proposed streets shall be continuous and in alignment with existing planned or platted streets with which they are to connect.
4. Roads shall be designed in compliance with applicable codes to provide emergency access and egress for residents and occupants; which should encourage two (2) or more points of access to a development or neighborhood wherever possible.
5. Where the potential traffic impacts on the existing street systems are considered to be great, or in the case of unique circumstances concerning topography or street layout, the subdivider may be required to prepare a detailed engineering study of the road system.
6. Proposed streets shall intersect one another as nearly at right angles as topography and other limiting factors of good design permit. No intersection may be closer than one

hundred fifty feet (150') to any other intersection as measured from the centerlines of the intersections.

7. Where a road does not extend to the boundary of the development and its continuation is not required, its terminus shall provide for a cul-de-sac or turnaround as required by the town public works standards or applicable building codes.
8. Protection strips reserved to control or restrict access to a property shall be utilized only where the reserve strip is deeded to and accepted by the town.
9. Public or private roads must provide legal access to each building lot within the subdivision.
10. Curbs, gutters and sidewalks shall be of a type approved by the town public works standards on any existing or proposed street adjoining a lot on which a building is to be constructed or remodeled, or on which a new use is to be established. All materials and workmanship shall be sensitive to appearance and durability, due to a harsh weather climate. Such curbs, gutters and sidewalks may be required as a condition of building or use permit approval.
11. Excessively long and straight streets which are conducive to high speed traffic shall be prohibited.
12. Every cul-de-sac and permanent dead end street shall comply with the following requirements:
 - a. End at a turnaround area having a radius no less than fifty feet (50') and be of hard surface material;
 - b. Not exceed eight hundred feet (800') in total length, unless additional turnaround areas (each having at least a 50 foot radius) are also provided at intervals of no less than eight hundred feet (800') throughout the length of such cul-de-sac or permanent dead end street.
 - c. Hammerhead turnaround areas may be allowed in special circumstances when recommended by the public safety department and approved by the land use authority.
13. Temporary dead end streets, intended as access to future development parcels, shall be a minimum of one lot depth in length and shall meet all of the other requirements for permanent dead end streets set forth in subsection A12 of this section
14. Driveways, mailboxes, fire hydrants and all other obstructions at such turnaround areas shall be designed in such a way as to provide an area for snow storage.
15. Road edges shall be:
 - a. Finished and landscaped to eliminate raw cuts in the land;
 - b. Cuts shall be graded to provide for vegetation, without damaging existing vegetation and trees;
 - c. Revegetated on road edges and cuts;
 - d. Constructed to support a vehicle;
 - e. Riprapped and graded to reduce erosion in drainageways;
 - f. Constructed to provide driveway and road swales or culverts to protect intersections.
16. Retaining soils on roadways shall comply with section [9-12-11](#) of this chapter.

B. Road Grades:

1. Road grades shall be in compliance with the town public works standards, the building codes currently adopted by the state and this code.
2. All road grades greater than twelve percent (12%) (6.8 degrees) shall be submitted for approval to the land use authority with the recommendation of the town staff.
3. Intersections, switchbacks, hammerheads and cul-de-sacs shall not exceed a four percent (4%) grade. Roadway sections extending from these areas shall not exceed ten percent (10%) for a distance of at least two hundred feet (200').

4. Roadway sections exceeding ten percent (10%) (5.7 degrees) shall be no longer than four hundred feet (400') in length and at the bottom of such section shall be provided a straight "braking section" less than ten percent (10%). The length of the braking section must be at least one-half ($\frac{1}{2}$) of the length of the roadway that exceeds the ten percent (10%) (5.7 degrees) grade.

C. Private Road Maintenance: A maintenance plan must be established to the satisfaction of the Town Manager, or designee, before a private road may be approved. The plan shall define private road construction, surface material and schedule of maintenance, and ensure that sufficient funds will be available to maintain the road.

D. Street Names:

1. Street names shall be proposed by the developer and/or citizen and approved by the land use authority, with the recommendation of town and county staff.
2. Developers or citizens are encouraged to do an investigation of local history regarding the names and references to geological and historical features located in the subdivision and, wherever possible, to incorporate the historical names and references into the names and designations of streets. (Ord. 08-016, 8-12-2008)

9-12-10: DRIVEWAYS:

The following shall apply to all driveways connecting the public right of way to a private or public parking lot or structure:

A. When Approval Required: Driveways exceeding one hundred fifty feet (150') in length and/or twelve percent (12%) (6.8 degrees) grade must be approved by the director of public safety and/or designee.

(Ord. 08-016, 8-12-2008)

9-12-11: CUTS, FILLS AND RETAINING WALLS:

- A. Purpose: Because of the dramatic visual impact of cuts, fills and retaining walls in the town, and the public safety factors that may arise with significant cuts and fills in unsuitable soils, cuts, fills and retaining walls shall be designed to mitigate visual impact and ensure safe soil retention.
- B. Cuts And Retaining Walls: Cuts, fills and retaining walls shall conform to the following criteria:
 1. Unretained cuts shall not exceed one slope unit vertical for each two (2) units horizontal (50 percent slope) (unless a steeper slope is designed by a state licensed engineer) and must be revegetated to prevent erosion.
 2. Any single retaining wall or retaining mechanism, within the same plane, exceeding twelve feet (12') in height or one hundred feet (100') in length of exposed wall shall be reviewed by the planning commission.
 3. Up to three (3) terraced cuts may be created under a terraced cuts retaining system, so long as each wall is separated by a minimum four foot (4') setback (measured from face to face) for visual relief and revegetation. Total maximum height of a terraced retaining system exceeding eighteen feet (18') in height shall be reviewed by the planning commission as part of the approval process.
 4. Retaining wall height shall be measured as the exposed face of a single wall or combined faces of a terraced retaining system.
- C. Measuring Cut/Fill Heights: Cuts and/or fills shall be measured vertically at natural grade from the lowest to the highest point of disturbance.
- D. Retaining Wall Appearance: Retaining walls and/or retaining systems shall be constructed of decorative, natural or rustic materials, such as stone or heavy timbers. Concrete or masonry materials (including split face block) may be used when structural design requirements exceed natural material capabilities. Walls shall be colored or tinted and have a surface texture to blend with the surrounding soil or rock colors, and must be approved by the Town Manager, or designee, before excavation permits shall be granted.
- E. Retaining Wall Design: All retaining walls greater than four feet (4') in height shall be designed by a professional engineer or architect licensed in the state for the loads imposed on it. Plans shall be submitted at the preliminary plan stage to demonstrate that the hillside above any proposed cut will remain stable after the proposed cut/fill and retaining system, if any, has been completed.
- F. Revegetation/Erosion Control:

1. All cut and fill slopes must be naturalized and revegetated within one growing season after the cut or fill is made.
2. Cuts and fills should be naturalized by rounding edges, placing boulders in natural fashion and planting native plants, including trees, brush and ground cover, to match surrounding areas. A landscape/revegetation plan in compliance with the town design standards shall be submitted to the town staff for review with the cut/fill design plans.
3. All revegetated areas must be maintained and replanted as necessary to control erosion and maintain the aesthetic value of the site.
4. Foot bridges and private vehicle bridges shall be reviewed and approved by the building department in conjunction with the single-family dwelling approval per [chapter 8](#) of this title. (Ord. 08-016, 8-12-2008)

9-12-12: BRIDGE AND TUNNEL REGULATIONS:

The design of bridges and/or tunnels shall conform to the following regulations:

- A. Design Plans: All bridges and tunnels must be detailed in design plans submitted to the planning commission for its review and comply with [chapter 8](#) of this title, as applicable.
- B. State Code Compliance: Highway bridge abutments shall comply with state code.
- C. Retaining Wall Applicability: All wing walls and bridge abutments shall be constructed in conformity with the retaining wall section of this code (section [9-12-11](#) of this chapter). (Ord. 08-016, 8-12-2008)

9-12-13: WATERWAYS, DRAINAGES AND FLOOD HAZARD AREAS:

Special attention shall be given to ensure that development is setback sufficiently from waterways, drainages and flood hazard areas to prevent erosion, flooding and damage to development and the waterways per state and federal standards. Such features should be constructed to give a natural "streambed" appearance to the waterway or drainage area by making small meanders, placing rocks of various sizes (pebbles, cobble, rocks and boulders) in the streambed and banks, and planting clumps of trees and shrubs along the outside edge.

A. Design Storm:

1. As each site is unique for elevation and time of concentration, the following website can be used for determining the precipitation intensity, currently found at:

http://hdsc.nws.noaa.gov/hdsc/pfds/sa/ut_pfds.html

2. The user will input the latitude and longitude for the particular site and choose "precipitation intensity" from the drop down menu on screen (the user will verify the elevation is within acceptable limits for the project area).
3. If a storm distribution is being utilized for the stormwater design, a standard SCS type II distribution should be used. This distribution shows approximately fifty (50) to seventy five percent (75%) of total rainfall to occur in a brief period (approximately 2 hours), which is typical of the intense short duration storms experienced in the town area.

B. Detention Ponds: On site detention ponds are to be sized for the 100-year 24-hour storm.

C. Stormwater Conveyance: Stormwater conveyance pipes are to be sized based on a 10-year 24-hour storm.

1. Pipes will be sized using a rainfall intensity determined by the time of concentration for the applicable drainage basin with a minimum pipe size of fifteen inches (15").
2. The time of concentration will be estimated using the soil conservation service technical release 55 (SCS TR-55) method. SCS TR-55 method uses three (3) distinct runoff patterns in a watershed: a) sheet flow; b) shallow concentrated flow; and c) channel flow. Sheet flow occurs in the upper reaches of a watershed and persists for a maximum of three hundred feet (300'). Minimum time of concentration to be used for design shall be five (5) minutes.

After flowing in sheets, water then typically becomes less sheet like and more concentrated. Following shallow concentrated flow, water typically collects in natural or manmade channels (U.S. soil conservation service, 1986).

D. Other Permits: Below is a list of other permits that may be required for construction projects in the town. This list is for informational purposes only and may not include all necessary permits, depending on the project location:

1. Utah pollutant discharge elimination system (UPDES) general permit for stormwater discharges associated with construction activities. This permit is required for any land disturbance of one acre or greater. The permit requires submittal of a notice of intent (NOI) to the Utah division of water quality (DWQ) with appropriate fee, preparation of a stormwater pollution prevention plan (SWPPP) and erosion control plan. Additional information regarding this permit can be found at:

[http://www.waterquality.utah.gov/UPDES/stormwatercon .htm](http://www.waterquality.utah.gov/UPDES/stormwatercon.htm)

2. Utah stream alteration permit: This permit is required for any construction activity occurring along a creek or stream. The permit requires submittal of a stream alteration permit to the division of water rights with applicable design drawings and calculations. Additional information regarding this permit can be found at:

<http://nrwrt1.nr.state.ut.us/strmalt/default.asp>

3. U.S. army corps of engineers (USACE) wetland permits. Potential wetlands need to be assessed and jurisdiction needs to be determined and approved by the USACE. Possible requirements are a wetland boundary delineation, drawings, meetings with the USACE and permits. (Ord. 08-016, 8-12-2008)

9-12-14: UTILITIES:

A. Purpose: The provisions of this section are intended to regulate utility installations within subdivisions and private improvements and not major utility installations relating to distribution lines, etc.

B. Construction: All utility connections and lines shall be installed underground. Before any installations are covered, material and service must be inspected and approved by the town or applicable utility. During the construction period, temporary power poles and lines shall be allowed within the boundaries of the construction project; however, such poles and lines must be removed before final certificate of occupancy for the project is granted.

C. Easements:

1. All utilities shall be placed within public road rights of way or specific rights of way or easements. Multiple use of a given easement is encouraged. The final plat shall note all easements, and associated construction drawings define the location of each utility.
2. Easements shall be provided at the rear and at least one side of each lot (so that they adjoin each other on common lot lines) or be provided in such a way as to demonstrate that utilities can be provided to each lot.
3. Recreational easements are required for all proposed motorized and nonmotorized trails, ski runs or open space to promote recreational opportunities in the community, unless otherwise approved by the planning commission. Easements shall be required during land use approval (i.e., zone change, subdivision, building permit) for existing trails, ski runs and open space established by historic use (see subsection [9-12-16B1](#) of this chapter).
4. Easement locations should be established to ensure the best use of the land and to provide corridors for utility services through raw land for the future development or subdividing of land according to the town general plan. (Ord. 08-016, 8-12-2008)

9-12-15: PARKING:

- A. Purpose: There shall be provided at the time of erection of any main building, or creation of a land use, or at the time such buildings or uses are altered, enlarged, converted or increased in capacity, minimum off street parking space with adequate provision for ingress and egress by standard sized vehicles in accordance with the requirements of this section. Whenever feasible, parking shall be placed underground.
- B. Parking Space Requirements: Parking spaces shall be determined in accordance with this section. Variations may be made to these provisions when justified by a parking study prepared by a licensed engineer and approval of the land use authority.
- C. Required Number; Table: The off street parking spaces required for each use permitted by this code shall not be less than that found in table 1 of this subsection. When a computation of spaces results in a fractional number, the fractional part shall be computed as a whole space.

E. Location Of Lot: The parking spaces required by this section shall be provided on the same lot or parcel as the use, or where the exclusive use of such is provided on another lot or

9-13-1: PURPOSE:

The purpose of this chapter is to provide enforcement provisions and to ensure compliance with this title. (Ord. 08-016, 8-12-2008)

9-13-2: ENFORCEMENT:

The Town Manager shall be designated as the person to administer and enforce the provisions of this title and all other land use regulations adopted by the town. The Town Manager shall take legal action when deemed necessary to enforce the provisions of this title or other land use regulations. 9-13-5: ISSUANCE OF BUILDING PERMIT AND CERTIFICATES OF OCCUPANCY:

A. Policy: In order to protect buyers of condominiums, planned unit development projects and other property in the town against purchasing property on which the on and off site improvement work is incomplete and may not be completed, and to protect the public at large from dangerous and undesirable conditions that result from unfinished on and off site

improvements, such as, but not limited to, erosion, flooding and blowing dust, it is the policy of the town that no building permit may be issued on any building project within the town limits unless and until the final plat has been recorded. Construction may not begin until the development has provided necessary access to the building lot for delivery of goods and access for laborers. No wood framing shall proceed without an all-weather surface road or driveway, and working water system to serve fire hydrants and firefighting apparatus. In no event shall a certificate of occupancy be issued on any building until all required on and off site improvements are completed sufficient for safe, orderly occupancy of the building as determined by the Town Manager, or designee.

- B. Site Plan Conformance: The building department, prior to issuance of a permanent occupancy permit, shall review the completed improvements to ensure compliance with the approved site plan, showing the location and nature of drainage work, grade changes, retaining walls and landscaping, together with any trails, paths or walkways. A temporary occupancy certificate may be issued with adequate bonding for incomplete work when determined by the Town Manager, or designee.
- C. Construction According To Approved Plans: No site plan will be altered or modified without prior approval of the appropriate land use authority.
- D. Completion And Cleanup Deposit: Upon issuance of a permit, the building inspection department shall charge a completion and cleanup deposit as established in the town consolidated fee schedule. Upon satisfactory completion of the building and site clean up, the deposit will be refunded to the contractor of record. In such cases where the site clean up (including fire risk mitigation) is not corrected in a timely manner, the town may use the deposit and hire the work to be done. (Ord. 08-016, 8-12-2008)

9-13-6: COMPLIANCE WITH SUBDIVISION AND OTHER PERMIT APPROVAL:

- A. Policy: In order to ensure compliance with certain provisions of this title for subdivisions, the Town Manager, or designee, is authorized to ensure compliance with the provisions and requirements of previously authorized permits or subdivision approval.
- B. As Built Drawings For Subdivisions: A detailed as built site plan showing the location of public utilities, nature of drainage work, grade changes, retaining walls and landscaping, together with any trails, paths or walkways, shall be submitted to the town prior to acceptance of improvements and releasing of financial security. Site improvements shall be completed pursuant to this title and as shown in the detailed site plans in both a paper and approved electronic format.
- C. Construction According To Approved Plans: No subdivision improvements may be modified from the approved plat and construction drawings without prior approval of the appropriate land use authority. (Ord. 08-016, 8-12-2008)

9-13-7: SECURITY FOR COMPLETION:

- A. Policy: In order to ensure compliance with certain provisions of this title for subdivisions, building projects and other permits, the Town Manager, or designee, shall be hereby authorized to ensure completion of the approved design through a form of security as

deemed necessary by this section, or as determined by the provisions of the required permit.

- B. Subdivisions: In the event that approval is sought for the completion of a subdivision, the town shall ensure that all of the following conditions are met:
1. The subdivider shall submit to and obtain approval from the appropriate town official for all final construction plans, improvements and development agreements. The subdivider shall guarantee the installation and construction of the required improvements free from defects in material or workmanship and in compliance with town standards.
 2. The guarantee shall be in the form of a corporate surety bond, escrow agreement, cashier's check or money market certificate made payable only to the town, or irrevocable letter of credit in forms acceptable to the town and for an amount equal to one hundred twenty five percent (125%) of the estimated cost of the improvements. The form of any guarantee of improvements shall be reviewed and approved by the town attorney before acceptance of the guarantee or security by the town. The cost estimates shall be reviewed by the town engineer to ensure completion of all public improvements as shown on the approved plans. In the event that the town engineer disputes the amounts stated in the bid bond, the subdivider shall provide contracts supported by a full performance and payment bond by the contractor, or the town engineer's price shall be used. All improvements must be completed within one year of posting of the required security. Such one year period may be extended once in the discretion of the Town Manager, or designee, where weather or other circumstances justify the extension. In the event of any extension, the bond amounts shall be reviewed and adjusted as necessary.
- C. Other Permits: In order to ensure compliance with certain provisions of this title for projects requiring other permits, the Town Manager, or designee, is authorized to ensure completion of the approved design through a form of security as deemed necessary by this section or as determined by the provisions of the required permit.
- D. Logging And Tree Removal, Grading, Trenching And Horse Boarding Permits: In the event that approval is sought for the completion of project requiring logging and tree removal, grading, trenching or horse boarding, the applicant may be required to submit a guarantee similar to that required for subdivisions (see subsection B of this section).
- E. Term Of Security: The terms of any security arrangement offered to the town shall include, but not be limited to:
1. An approved final plat, permit application and all associated data required for the completion of the subdivision or permitted project, including approved construction plans which are used to compute the cost of the improvements by the town engineer or Town Manager.
 2. The improvements shall be completed to the satisfaction of the Town Manager, or designee, and according to town specifications as established in this title.
 3. The town shall have exclusive control over the security proceeds, and they may be released only upon written approval of the Town Manager, or designee.
 4. The security proceeds may be reduced upon request of the subdivider or permittee, with approval of the town, as the improvements are installed. The amount of the reduction shall be determined by the Town Manager, on advice from the public works department or town engineer. Such requests may be made only once every thirty (30) days, and no reductions may be authorized until such time as the public works department or town engineer has inspected the improvements and found them to be in compliance with town

specifications. Any reductions may only be granted by written authorization of the Town Manager.

5. If the security proceeds are inadequate to pay the cost of the completion of the public improvements according to town specifications for whatever reason, including previous reductions, then the owner, subdivider or permittee shall be responsible for the deficiency; in the context of subdivision improvements, no further building permits shall be issued in the subdivision until the improvements are completed or a new security agreement has been approved and executed to ensure completion of the remaining improvements.
6. If, upon written demand of the town after expiration of the security time period, the security proceeds are not transferred to the town within thirty (30) days of the demand, then the town costs of obtaining the proceeds, including the town attorney's office fees and costs of outside attorney fees and court costs, shall be deducted from the security proceeds.
7. Upon receipt of the security proceeds after the expiration of the time period, the costs of completion shall include reimbursement to the public works department or town engineer and all other town departments for the costs of administration of the completion of the improvements, including inspection costs.
8. The owner, subdivider or permittee agrees to hold the town harmless from any and all liability that may arise as a result of the improvements which are installed until such time as the town accepts the improvements.
9. All improvements required under this title shall be installed by a contractor or subcontractor licensed by the state, as required by law.

F. Payment Of Interest: The town shall not be required to deposit any funds provided as security in an interest bearing account. However, any interest accruing on deposited funds shall accrue to the benefit of the owner, subdivider or permittee and not to the town, unless expended for completion of required improvements.

G. Release Of Funds: The town shall relinquish funds held or security posted for the purpose of paying for required improvement work performed according to the plans as that work is completed. In such event, the town shall release funds equal to the actual cost of performing the work as the work progresses, minus five percent (5%). Upon satisfactory completion of all required improvement work, all funds, up to the final five percent (5%), shall be immediately released to the owner, subdivider or permittee. The final five percent (5%) shall be reserved by the town for a one year warranty period. (See subsection K of this section.)

H. Modification Of Plans: An owner, subdivider or permittee may request modifications to plans covering required improvements by submitting revised plans to the Town Manager, or designee, for review and approval by the appropriate land use authority. If the modification of the plans increases the cost of required improvements, additional security must be provided by the owner, subdivider or permittee to cover the increased costs.

I. Phased Projects: Security for improvements applicable to each phase of a phased project or development shall be provided as each phase is planned or permitted.

J. Final Inspection: After completion of all required improvements, the owner, subdivider or permittee shall make a written request to the Town Manager, or designee, for a final inspection to be made by all affected town departments as required by this title. Upon receipt of inspection reports from all affected departments, a summary of the final

inspections shall be provided by the Town Manager, or designee, specifying the acceptability and/or completion of all required improvements.

- K. Warranty Period: Once all required subdivision improvements are inspected and approved by the town, a one year warranty period shall begin and any guarantee or security filed with the town with regard to such improvements shall be released, provided at least five percent (5%) of the guarantee or security amount is held to guarantee the quality of workmanship and materials during the one year warranty period. At the end of the one year guarantee period, any remaining guarantee or security shall be released only in accordance with subsection G of this section. (Ord. 08-016, 8-12-2008)

9-15-1: PURPOSE:

The purpose of this chapter is to establish general requirements for the siting of wireless telecommunication facilities which deal with issues of visual mitigation, noise, residential impacts, health, safety and facility siting. The provisions of this chapter apply to both commercial and private wireless telecommunication facilities, except for residential communication equipment for single-family units that are not used for commercial profit. The intent of this chapter is to:

- A. Encourage the location of wireless telecommunication facilities in nonresidential areas;
- B. Minimize the total number of monopole wireless telecommunication facilities throughout the community;
- C. Encourage the collocation use of new and existing wireless telecommunication facility sites;
- D. Encourage providers and users of wireless telecommunication facilities to locate such facilities where the adverse impact on the community is minimal;
- E. Encourage providers and users of wireless telecommunication facilities to use innovative designs to minimize adverse visual impact; and
- F. Enhance the ability of the providers of telecommunication services to provide such services to the community quickly, effectively and efficiently. (Ord. 08-016, 8-12-2008)

9-15-2: DEFINITIONS:

As used in this chapter:

ANTENNA: A transmitting or receiving device used in telecommunications that radiates or

captures radio signals.

COLLOCATION: The siting of two (2) or more communication antennas on a single communication tower, or siting of one or more antennas on an existing building or structure.

LATTICE TOWER: A self-supporting multiple sided, open steel frame structure used to support telecommunications equipment.

MONOPOLE FACILITY: An antenna or series of individual antennas mounted on a single cylindrical pole, together with its associated equipment. For the purposes of this chapter, if a facility does not fit the definition of a roof or wall mounted facility, it shall be considered a "monopole facility".

STEALTH FACILITY: A wall, roof or monopole facility which is disguised as another object or otherwise concealed from view. Examples of stealth facilities include, but are not limited to, trees, synthetic rocks or architectural elements, such as dormers, steeples and chimneys.

WALL MOUNTED FACILITY: An antenna or series of individual antennas mounted against the vertical wall of a building or structure, together with its associated equipment.

WIRELESS TELECOMMUNICATION FACILITY OR FACILITIES: An unmanned structure or structures which consist of equipment used primarily for the transmission, reception or transfer of voice or data through radio wave or wireless transmissions. Such sites typically require the construction of transmission support structures to which antenna equipment is attached. (Ord. 08-016, 8-12-2008)

9-15-3: APPLICABILITY:

The requirements of this chapter apply to both commercial and private wireless telecommunication services, such as "cellular" or "PCS" (personal communications services) communications, wireless internet and paging systems. All wireless telecommunication facilities shall comply with the following regulations and all other ordinances of the town, as well as with any pertinent regulations of the federal communications commission and the federal aviation administration. (Ord. 08-016, 8-12-2008)

9-15-4: MASTER PLAN REQUIRED:

A site location master plan shall be submitted by each company desiring placement of wireless telecommunication facilities. The master plan shall be submitted to the planning commission and town staff prior to processing any permits for permitted or conditional use locations. The master plan shall include an inventory of existing and anticipated sites for the location of wireless telecommunication facilities within the town, within the town annexation boundary, and within one-half ($\frac{1}{2}$) mile outside of the town annexation boundary. The plan shall indicate area coverage, if known, location, antenna height above existing grade, ability to collocate or justification for not collocating, and antenna type for each site. The plan shall be updated by the company upon request from the planning commission. Every master plan shall be considered proprietary information and not be part of the public record. (Ord. 08-016, 8-12-2008)

9-15-5: ALLOWABLE USES:

The uses specified in table A are allowed; provided, that they comply with all requirements of this chapter:

(Ord. 08-016, 8-12-2008)

9-15-6: FACILITY TYPES AND STANDARDS:

Wireless telecommunication facilities are characterized by the type and location of the antenna structure. There are four (4) general types of antenna structures: wall mounted; roof mounted; monopoles; and lattice towers. Standards for the installation of each type of antenna are as follows:

A. Wall Mounted Antenna: The following provisions apply to wall mounted antennas (see figure 1 at section [9-15-13](#) of this chapter):

1. Wall mounted antennas shall not extend above the wall line of the building or structure, or extend more than four feet (4') horizontally from the face of the building or structure.

2. Antennas, equipment and the supporting structure shall be painted to match the color of the building or structure, or the background against which they are most commonly seen. Antennas and the supporting structures on buildings shall be architecturally compatible with the building.
3. Antennas mounted directly on existing parapet walls, penthouses or mechanical equipment rooms, with no portion of the antenna extending above the roofline of such structures, shall be considered a wall mounted antenna.
4. Stealth wall mounted antennas are encouraged and shall be allowed to vary from the provisions of this section as determined by the Town Manager, or his designee, for permitted uses, and the planning commission for conditional uses. Stealth wall mounted antennas are not required to be located with public or quasi-public uses in R-1, R-2 and R-3 zones (see table A at section [9-15-5](#) of this chapter).

B. Roof Mounted Antenna: The following provisions apply to roof mounted antennas (see figures 2 and 3 at section [9-15-13](#) of this chapter):

1. Roof mounted antennas shall be allowed on top of existing penthouses or mechanical equipment rooms, provided the antennas and antenna mounting structures shall not extend more than eight feet (8') above the existing roofline of the penthouse or mechanical equipment room.
2. For antennas not mounted on a penthouse or mechanical equipment room and on a flat roof:
 - a. The antennas shall be mounted at least five feet (5') from the exterior wall or parapet wall of a building or structure.
 - b. The height shall be measured from the top of the antenna to the roofline of the building or structure, or to the top of the parapet wall if a parapet wall exists. For antennas mounted between five feet (5') and fourteen feet (14') from the exterior wall or parapet wall, the maximum height of the antenna is equal to the distance the antenna is set back from the exterior wall or parapet wall. For antennas set back more than fourteen feet (14'), the maximum height shall be fourteen feet (14').
 - c. Roof mounted antennas on a pitched roof shall be allowed, provided the antennas and antenna support structures do not extend higher than the peak of the roof measured by a horizontal line from the peak extending over the roof (see figure 3 at section [9-15-13](#) of this chapter).
 - d. Roof mounted antennas shall be constructed and/or colored to match the surroundings in which they are located.
 - e. Stealth roof mounted antennas are encouraged and shall be allowed to vary from the provisions of this section as determined by the planning commission. Stealth roof mounted antennas are not required to be located with public or quasi-public uses in R-1, R-2 and R-3 zones (see table A at section [9-15-5](#) of this chapter).

C. Monopole: The following provisions apply to monopoles:

1. The height limit for monopoles is sixty feet (60'). The height shall be measured from the top of the structure, including antennas, to the original grade directly adjacent to the monopole. The planning commission may allow a monopole up to eighty feet (80') in the GC, VC, L, ROS, COS and CV zones, if it finds that:
 - a. The monopole will blend in with surrounding structures, poles or trees and is compatible with surrounding uses;

10-1-1: PURPOSE:

Brian Head Town prides itself on its natural landscape and recognizes the importance of trees within the community. Besides adding to the beauty of the community trees stabilize surface drainage, help with soil erosions, and mitigate siltation of streams. Trees can also reduce air and sound pollution, regulate solar radiation, and help with wind control.

10-1-2: COMMISSION ESTABLISHED:

There is hereby created a Brian Head Town Tree Commission consisting of five members. One designated Public Works employee, one Public Safety Officer, and one Town Councilman shall be members of the Brian Head Town Tree Commission. 10-1-3: TERM OF OFFICE:

The five appointed members of the Brian Head Town Tree Commission shall serve for a term of four years and until their successors are appointed; provided that the members first appointed shall be appointed for such terms that the term of one member shall expire annually thereafter. The term of office of each appointed member shall commence on the first day of January in the year in which such member is appointed. The term of office of the other members of the Brian Head Town Tree Commission shall correspond to their tenure as Public Works employee, Public Safety Officer, or Councilman respectively. The Town Manager, with the advice and consent of the Town Council, may remove any member of the Brian Head Town Tree Commission for cause and after a public hearing, if such hearing is requested. Vacancies shall be filled in the same manner as the original appointment for the unexpired term.

10-1-4: ORGANIZATION:

In January of each year, the Brian Head Town Tree Commission shall designate one member of the Brian Head Town Tree Commission as Chairman for the ensuing year. A member of the Commission may, at the pleasure of the Commission, serve as Chairman in successive years. Following the appointment of the Chairman by the Commission, the Brian Head Town Tree Commission may select from their own members such other officers and adopt such rules and regulations for their own proceedings as they may deem expedient. Meetings of the Commission shall comply with the Utah open meeting laws and shall be held at the call of the Chairman and at such other times as the Commission may determine. The Commission shall keep minutes of its proceedings and its official actions which shall be immediately filed in the office of the Town Clerk and shall be a public record.

10-1-5 GIFTS AND BEQUESTS:

The Brian Head Town Tree Commission shall, on behalf of the Town and with the consent of the Town Council, have authority to receive gifts or bequests from any person or organization for the building, improvement or maintenance of a civic arboretum, for tree planting, or tree planting maintenance on any street or public property. All such gifts shall be received by the Town Treasurer and paid over to a special fund for such purposes. Said funds shall not be used for any other purpose.

10-1-6: AUTHORITY OF COMMISSION:

The Town, through its Brian Head Tree Commission, shall exercise full control over and regulate the planting, maintenance, and care of shade or ornamental trees and shrubbery now growing or which may hereafter be planted on any street (right-of-way) or on any public property within the Town. It shall be the duty of the Brian Head Town Tree Commission to make recommendations to the Town Council relating to the planting, pruning, spraying, removing, and irrigating of trees and shrubs on public streets and places; to make recommendations to the Town Council relating to the regulation and control of the grounds surrounding trees, shrubs, and plants on public streets and places insofar as the same may be necessary for the proper growth, care, and protection of the same; to recommend to the Town Council the removal of any trees or parts thereof growing on public or private land as outlined in this Ordinance which have become a nuisance or may be dangerous to the public safety; and to recommend to the Town Council the marking, maintenance and preservation of historic or notable trees.

10-1-7: TOWN MANAGER:

The Town Manager will administer the provisions of this Tree Commission Ordinance and such policies, recommendations, rules and regulations of the Brian Head Tree Commission as approved by the Town Council.

- A. Until otherwise provided, the Town Manager shall have the following duties and authority (or may delegate said duties as deemed necessary):
 - 1. He shall have supervision of all trees and plants planted or growing in public streets or places within the Town.
 - 2. He shall supervise planting, trimming, spraying, preserving and removing trees and other plants in public streets which front on property owned by the Town and in Town parks to promote safety and preserve the beauty of such public places.
 - 3. He shall care for all trees in the Town which have been designated by the Town Council or Brian Head Town Tree Commission as historic or notable trees.
- B. All owners and occupants of each parcel of real property within the Town shall be responsible for the care of trees located in public streets which front on that parcel of real property. All pruning of such trees must be done pursuant to proper maintenance and in no event will pruning be allowed which will be detrimental to the healthy growth of said trees.

10-1-8: PLANTING REGULATIONS:

The Brian Head Town Tree Commission shall coordinate with overhead utility companies and prepare a list designating the species of trees and shrubs which may be planted under overhead Town utility lines and on public streets within the Town; and, upon approval of such list by the Town Council, no trees or shrubs, other than the kind designated, shall be planted under any overhead Town utility lines and on any public street or public place without the consent of the Brian Head Town Tree Commission. The Brian Head Town Tree Commission shall also prepare and submit to the Town Council rules and regulations establishing standards for the planting of trees and shrubs under overhead utility lines and upon the public streets and on public property, and, after approval of said rules and regulations by the Town Council, no trees or shrubs shall be planted other than in accordance with the standards so established, unless the written consent of the Brian Head Town Tree Commission is obtained. The utility companies will construct, own, operate and maintain existing overhead utility lines only along public streets, roads, and other rights-of-ways which the Town has the legal right to occupy, and cross other public and private property across which the utility company has a utility easement. In no event shall any tree be planted over the underground utility easements.

10-1-9: REMOVAL OF TREES BY COMMISSION:

The Town, through its Brian Head Town Tree Commission, shall condemn and remove, or order the removal of any tree, tree stump, shrub, or plant upon any of the public streets or on public property within this Town where the same is dead, diseased or for any reason whatsoever is deemed undesirable by the Brian Head Town Tree Commission. The Town, through its Brian Head Town Tree Commission, shall have authority to condemn and remove, or order to be removed any tree, tree limbs, tree stump, shrub, or plant upon private property which encroaches and inhibits over a public way or, when the Brian Head Town Tree Commission shall find such action necessary to the public safety or to prevent the spread of disease or insects to public trees and places. However, the affected private property owner shall have after reasonable notice and after thirty (30) days thereof an opportunity to remedy any condition deemed undesirable by the Brian Head Tree Commission. The Brian Head Town Tree Commission shall have authority, with reasonable notice to the abutting property owner, to remove or order the removal of any tree, shrub, or plant which has been planted upon any public street or on any public property in violation of this Ordinance, or any other Ordinance pertaining to the trees in Brian Head. Utility companies that have overhead utility lines within the Town's limits have the authority to maintain and trim trees located in their utility lines.

10-1-10: FIRE MITIGATION:

Since Brian Head Town is a mountain resort and most trees are naturally grown in the Town, the Town will conduct a fire mitigation process each year, as needed. Said fire mitigation duties will be conducted by the Town's volunteer fire department, under the direction of the Public Safety Director. The Public Safety Director shall work closely with all entities (i.e. Utah Department of Transportation, Bureau of Land Management, and Forest Service) involved with tree removals, etc. as it pertains to them. All funds for the fire mitigation projects will be budgeted under the General Fund – Fire Department. Grants may also be obtained to help with fire mitigation projects.

10-1-11: REVIEW BY TOWN COUNCIL:

The Town Council shall have the right to review the acts and decisions of the Brian Head Town Tree Commission and the Town Manager. Any person may appeal any ruling or order from the Brian Head Town Tree Commission or the Town Manager to the Town Council and the Town Council shall hear the matter and make a final decision.
