Safety Instructions

1. Before you use the product please read the manual carefully and keep it properly.
2. Do not disassemble or refit the product by yourself.

Welcome to our store next time!
We are always there for you!

3. Keep the product away from heat source.
4. Do not place the product in humid condition.
5. Keep water or other liquid away from the interior of this product, or the product will break up.
6. Please do not plug in the car charger before car started, or the voltage at startup may hurt the car charger.
7. You'd better pull out the car charger after car flameout, for some cars will still supply power.
8. Avoiding extreme high temperature. Please pull out the car charger when the temperature is over 45°C inside the car.
9. Avoiding dropping, throwing and shaking the car charger.
10. Please do not use any corrosive cleaner/ oil to clean.

Note: Please kindly know it is not QC car charger, so it won't indicate fast charging in Android phone. With each USB port is 2.4A, it could charge faster than conventional one.
