Pos-E-Kon[®] power, connection & control

Wire pin & sleeve connectors

**Thomas & Betts is now ABB
Installation Products, but our long
legacy of quality products and
innovation remains the same. From
connectors that help wire buildings
on Earth to cable ties that help put
machines in space, we continue to
work every day to make, market,
design and sell products that
provide a smarter, safer and more
reliable flow of electricity, from
source to socket.**

Overview

The FAQs about Pos-E-Kon® interconnects

ABB interconnects adhere to international standards and are used worldwide to provide a high degree of reliability in electrical wiring.

Why?

Rectangular circuit interconnections

- Best use of space for multiple contacts in heavy-duty housings
- Easy to assemble with many different insert options
- Best fit for easy access in panels, machinery and enclosures
- Sealed connector with quick disconnect handles
- Wide variety of circuit possibilities from standard items
- Solid or stranded wire in fixed or portable use

Who?

- Machine tool OEMs
- Material handling equipment OEMs
- Robotics systems OEMs and installations
- Packaging machinery OEMs and facilities
- Control panels and PLC systems
- Molding, assembly or line machinery OEMs and facilities
- Construction, mining and welding apparatus
- Carnival applications

What?

- Servo controls
- Sensing and feedback loops
- Conveyor and process controls
- Low power, DC or logic systems
- Combination power, system and other circuits
- Modular controls including fiber-optic connections

Where?

Worldwide agency approvals and applications

- DIN VDE 0627/86, 0110/02.79, and 0110-1/04.97
- IEC 60.664-1, DIN/IEC 512
- UL® recognized (E215386) and CSA certified
- Protection classes IP44 through IP65 per IEC 529
- Component use in CE marked equipment OK per IEC
- Council Directive July 1999, 73/23/EEC
- Available from ABB – Pos-E-Kon authorized distributors
- ABB sales representatives and agents worldwide

DIN standard configurations

- Most inserts and housings are interface compatible with other DIN standard lines. Verify physical application before selecting cross reference.
- Pos-E-Kon construction includes standard NPT conduit adapters for hoods and bases, with many options available. DIN standard Hoods and Bases may have “Euro Style” PG fittings (or none) included unless specially ordered.

The basic system: build an application

- Step 1** – Maximum voltage and amperage requirements (300 V or 600 V classes, 10–80 A).
- Step 2** – Number of contacts or circuits needed.
- Step 3** – Choose wire terminations style; screw terminal or crimp contacts. Select series from charts.
- Step 4** – Base (or coupler) and hood construction/ mating selection per series (single or double levers).

—
01

- 01 Hood
- 02 Base housing (or coupler hood)

Step 1

Hood:

- Separable housing for inserts
- Top or side conduit/wire entry
- Standard locking posts, dual or single
- Locks to panel base, box base or inline coupler hood

—
02

Step 2

Base housing (or coupler hood):

- Surface wall-mount box base (shown)
- Panel base for through-panel access
- Coupler hood mating for portable use
- Single or dual “lever” locking

—
03

- 03 Male insert
- 04 Female insert

Step 3

Male insert:

- Male contact carrier body
- Screw terminal contacts (pins with wire protection saddles) or crimp terminated pins

—
04

Step 4

Female insert:

- Female contact carrier
- Screw terminal contacts (sleeves with wire protection saddles) or crimp terminated sleeves

Overview

Pos-E-Kon® insert selector chart

S – Screw terminals C – Crimp contacts
 F – Fiber optic (POF) A – Terminal block wiring adapter

Select the number of contacts – All inserts have separate ground contacts

10-16 A A, B, V, T	35 A C	10-80 A K
		

Screw terminal/Insert types (Integral contacts)

Screw termination is used for ease of assembly plus ease of maintenance. No tooling beyond a screwdriver and wire strippers is required.

10 A D & DD	16 A A & B
	

Crimp terminal/insert types (Crimp contacts)

Crimp terminals offer solid, thermally cool vibration-resistant terminations for OEM equipment and critical applications. Better for smaller AWG sizes also. Crimp tools are noted in each section.

10-16 A A, B, V, T	10 A D & DD	POF D
		
		

All crimp types represented require contacts ordered separately. Each section contains hand crimp tool selection notes

01

- 01 Screw terminal inserts
- 02 Crimp terminal inserts
- 03 Terminal block wiring adapters

Screw terminal inserts*

- Integral screw terminal contacts provide for easy terminal wiring and fast assembly
- Standard wire protection saddles prevent cutting of strands during assembly

02

Crimp terminal inserts*

- Provides reliable connections for long-term configurations
- Contact sizes accommodate wiring from 12-20 AWG

* Note:

- Made of durable glass fiber-filled thermoplastic
- Contact numbers clearly marked for easy identification
- Easily installed (male or female) in either hoods or bases using captive mounting screws

03

WAM1 marker tab clips
Snap-in formed label holder tabs allow terminal identification for B Series.

DIN Mounting Foot FE807TB

—
WAR, right ground strap
WAL, left ground strap

Terminal block wiring adapters

- Allows for measuring of circuit while in operation
- Provide easy connections in panel mounting configurations
- Labels available for easy identification of circuits
- Can be mounted on DIN rails by using snap-on mounting feet
- Used in switch cabinets, panel enclosures or mounted in panel base housings – see B and D series

Insert strip blank – WAM1B

Insert strip numbers 1–64 – WAM1N64

Insert strip letters A–Z – WAM1AZ

* Made of durable glass fiber-filled thermoplastic
Contact numbers clearly marked for easy identification
Easily installed (male or female) in either hoods or bases using captive mounting screws

Overview

Hood and base housings

—
01 Box base
—
02 Top cable entry
—
03 Panel base
—
04 Side cable entry
—
05 Box base housing with single lever and spring cover. Metal spring covers available for b series, where noted.

- Rugged cast aluminum hoods and bases: Maximum performance in many operating conditions
- Various hood heights available: Easier assembly and wiring with low, high and standard profiles
- Corrosion-resistant finishes: Optional special materials extend life in corrosive conditions
- Locking possibilities include single locking system and double locking system
- Complete selection: Flexible product designs (see Hood/Base cross reference below)
- Dust covers and more: See adapters (page 10) and covers (page 10) or bases with covers available in most series (accessories, pages 58–62)
- Custom configurations: Multiple conduit entry/ sizes and other configurations available to spec

* Special high-temperature series in copper-free aluminum with special green epoxy powder coat, Viton® seals.†

** Special isolation design allows additional control circuit capability.

† Viton is a trademark of DuPont Performance Elastomers.

Overview

- 1) Select size (number of contacts) from each series' section left-hand page chart (selected inserts), then look at corresponding right-hand page columns.
- 2) Vertical columns note single or double locking systems available (double locking usually preferable).
- 3) Select base housings for mounting and/or function: conduit/cable entry, thru-panel access, inline coupler or reversed locking as shown. (Note profile height options.)
- 4) Select side or top entry hoods as shown. (Note profile height options.)
- 5) Review conduit and cable entry options (standard NPT adapter sizes for each series).

Note: M Series (layout) groups interior options, followed by base selection options.

Each right-hand page shows:		
	Standard bases	BASE TO HOOD
	Standard hoods	
	Portable service Coupler hoods	HOOD TO COUPLER
	Reverse locking Lever hoods	HOOD TO BASE
	Post bases	

Overview

— 01 Sub-miniature (DB) adapter plates

— 02 B24 insert mounting adapter plates

— 03 Dust covers (thermoplastic) & hinged covers (thermoplastic or metal)

— 01

Sub-miniature (DB) adapter plates

- Connect test and diagnostic equipment to control circuits
- Panel base, box housing base or any hood installation (ribbon cable – entry hoods available)
- Industry standard sizes
- Dust covers for protection recommended
- 9, 15, 25, 37 and 50 series

— 02

B24 insert mounting adapter plates

- Allows housing standardization for multiple applications
- B24 footprint fit to single B6, B10, B16 inserts
- Rugged thermoplastic
- Fits standard B24 hoods and bases
- B24 insert mounting adapter plates
- Allows custom connections for drill-and-install work
- Blank plate for expansion
- All standard hood/base sizes supported

— 03

Dust covers (thermoplastic) and hinged covers (thermoplastic or metal)

- Separate covers or fixed-mount hinged types
- Metal fixed-mount hinged covers for B series bases available in select sizes
- Separate or fixed covers protect contacts when not in use or while unmated

Overview

Wire and cable entry options

01

01 Cable compression seal fitting

02 Euro gland seal

03 Standard NPT conduit adapters

04 Cord grip fittings

05 Pos-E-Kon® advantages

02

Portable service cord

- Sheathed industrial multi-conductor cables usage
- Options cover many installation needs
- Special constructions available for retrofit or original specification
- Hoods and bases may be specified (in bulk volumes)
- Euro standard gland seal also available

Cord grip fittings

- Both NPT and PG thread styles
- Thermoplastic sealing glands in NPT, PG and ISO threads – for retrofit or original specification
- More options than shown are available (shown in gray; black also available)

03

Standard NPT conduit adapters

- Euro PG to NPT thread adapters (PG male to NPT female)
- Standard on all Pos-E-Kon hoods and bases
- Available separately for MRO
- Sizes from (PG11 to ½") through (PG48 to 1½") NPT

Pos-E-Kon advantages

- Feature: Ergonomic thermoplastic levers for "B" series double-lever housings B10–B24
- Benefits: Non-slip comfortable grip for easier locking and unlocking
- Feature: Laser-etched labeling for all metal housings and hot-stamped labeling on contact carrier inserts
- Benefits: Permanent marking with all data combined in external marking vs. internal label

04

05

Overview

Easy-to-use catalog number selection

Hoods

- TH – Top entry hood with NPT fitting
- SH – Side entry hood with NPT fitting

Wiring entry options

- Cord or conduit adapter fittings
- Ribbon cable and Euro cable entry
- Housings without fittings
- Custom assemblies

Male and female terminal block wiring adapters

- MS or FSxxxWAR/WAL
(right/left ground) options for panel base installations

PB – Panel base housing
Panel face or bulkhead mounting with rear wiring access

BB – Box base housing surface
Mount with NPT conduit entry (1 or 2) fittings (standard)

Double posts (front/back) for double-level locking (single-side posts/lever also).

Male and female inserts

- Same installation to any hood or base orientation
- MS – Male screw terminal insert (shown)
- FS – Female screw terminal insert (shown)

OR

- MC – Male crimp Insert
- FC – Female crimp insert
 - >use MP – Male and FP – Female pins

CH – Coupler hood
Inline portable connection

* Install with silicone sealant/adhesive for industrial use.

** For T Series 200 °C applications, specify catalog number except use "T" prefix instead of "B" for gaskets. EX: use "T16XFGP" for panel base gaskets.

Technical information

Coding pins, guide pins and sleeves can be used in all series housings, with all inserts

- 01 Coding pin – PC600
- 02 Guide pin – MG601
- 03 Guide sleeve – FG602

01

Coding pins:

Used for rejection in multiple “same size or series” insert/hood installations. Patterns show examples of rejection coding pins installed.

Coding possibilities for single insert series

Coding possibilities for double insert series

02

03

Guide pins and sleeves:

Perform same function as coding pins and/or aid high-density insert mating as well.

Coding possibilities for single insert series

Coding possibilities for double insert series

● Male guide pins or coding pins

○ Female guide sleeves

⊕ Mounting screw

Technical information

Instructions for connection with fiber optic (POF Cable)

1) Before crimping the POF* cable, 1.0 mm to the glass fiber cable contact, the end of the fiber has to be polished. Stick end of POF cable into polishing tool and grind on a plane surface (e.g. glass plate). Wipe off any residues after polishing. The best optical damping values are achieved with wet-polishing-procedure.

2) Strip 1.0 mm POF cable on min. 14 mm for D sleeve contacts and min. 19 mm for D pin contacts.

3) Insert stripped POF cable in sleeve or pin contact until stop. The optical fiber should then stick about 1 mm out of the contact.

4) Optical fiber crimping:

Adjust the positioning sleeve into the corresponding inlet of the crimping tool with the stop screw at 1.45 mm (if necessary check with gauge pin, diameter 1.45 mm, with closed crimping tool).

Insert the glass fiber cable contact together with the POF cable through the crimp opening of the crimping tool into the positioning sleeve.

By pressure on the contact, the fiber inside the contact will be locked into the right position for the fiber crimping. Continue pressure until the release mechanism is heard.

* POF = Polymer optical fiber
