How to connect Catchmon GO with phone for first time

Insert two AAA batteries and turn on Catchmon GO. The LED will flash green several times.

Click on pokemon go plus in phone to start connecting with Catchmon GO

After successful connection, available devices on the app will light up like the graph.

If Catchmon GO has successfully connected with phone before but signal is lost, LED will be blue and flashing. To reconnect, simply click Go Plus icon at top right in phone app map. (Purple light flashing if connection successful)

To connect with new phones, first unpair previous Catchmon GO connection. Methods are indicated as follows.

Function and light description

Press Catchmon GO button to select various the different light functions. Press once and go from blue light > green light > purple light in order. Switch to the desired light option, then set up based on the instructions below.

Blue light: to unpair Catchmon GO Bluetooth

Catchmon GO with a new phone, first unpair previous connection : Pressing LED to blue light, long press again for 3 sec to unpair. When unpairing, LED will be blue and yellow flashing for 30 sec.

Unpairing successful : green light flashes
Unpairing unsuccessful : red light flashes

Green light: notification sound switch

Green light: sound on
Green breathing light: sound off
In green light display, press for 3s to switch on/off notification sound setting.

Turned on : green light flashes
Turned off : red light flashes

Purple light: vibration switch

Purple light: vibration on
Purple breathing light: vibration off
In purple light display, press for 3s again to switch on/off vibration setting.

Turned on successful : purple light flashes
Turned off successful : red light flashes

※When you turn on Catchmon GO, press the button first and turn on the power switch together, both sound and vibration functions will be turned off.

Catchmon tips

1. If bag is full and cannot collect items from Pokestop, first deactivate "Nearby Pokestop" notification in Go Plus setting menu.
2. If out of red Pokeballs and temporarily cannot capture, first deactivate "Nearby Pokemon" notification in Go Plus setting menu.

Red	Out of range of the Pokestop	beep-beep-triple	triple vibration triple

Additional Instructions

Catchmon GO consumes very little power and has power saving and sleep mode features.

Pokemon app will automatically disconnect from Catchmon every hour. If not reconnected after 10min, Catchmon GO will go into sleep mode. Player can press Go Plus connection icon in app anytime and automatically call up Catchmon GO to reconnect. When changing batteries, Catchmon GO will retain all settings in memory so reset is not necessary.

Troubleshooting (working with Pokemon GO, please refer the following)

1. Delete Pokemon GO Plus Bluetooth setting in phone.
 2. Go to game settings and disconnect Pokemon GO Plus.
 3. Unpair Bluetooth setting in Catchmon (Press blue LED 3 sec)
 4. Turn off game and restart it.
 5. Connect Catchmon GO and Pokemon GO App as per the first time.
- NOTE: Pokemon GO App, Android and iOS system upgrades may cause Catchmon GO to not connect. Multiple Catchmons in one place will also cause Bluetooth interference in phone and cause disconnection.

FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Non-modification Statement:
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement:
The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure condition without restriction.

Compatible with iPhone or higher devices with iOS Ver. 11 or higher installed.
Compatible with Android devices with 2 GB RAM or more, Bluetooth Smart (Bluetooth Ver. 4.0 or higher), compatible and Android Ver. 5.0 or higher installed.
