

MA Series

Operating Instructions for MA-14 & MA-34 Safety Switches

KEEP THIS GUIDE FOR FUTURE REFERENCE

This information is designed to help suitably qualified personnel install and operate Omron Scientific Technologies, Inc. safety switch equipment.

Before using this product, read this guide thoroughly along with any relevant European and/or National Standards e.g. Machinery Directive 89/392/EEC and it's Amendments, Provision and Use of Work Equipment Regulations.

Further information can be obtained from
Omron Scientific Technologies, Inc.

Description

The MA-14 & MA-34 safety switches are magnetically operated non-contact safety switch for use in machine guarding applications.

The non-contact operation makes theses switches easy to install and tolerant to misalignment, providing a simple and reliable solution to machine guard interlocking.

The MA-14 is manufactured in a robust ABS housing and the MA-34 is manufactured in a 316 Grade Stainless Steel housing. Both switch and actuator are fully sealed to IP67 and suitable for use in wet or dusty environments

With correct installation, these safety switches comply with the guidelines given in EN1088.

Operation

When the safety switch and actuator are within the specified operating range, (See table on page 3 for switching distances) the **Safety Contact** will be closed and the **Auxiliary Contact** will be open.

When the actuator moves out of the operating range, the **Safety Contact** will open. The Auxiliary **Contact** will close for indication.

The MA-14 & MA-34 safety switch and actuator are designed to approach each other from most angles. When the switch is closed the targets on the printed face of the switch must be aligned.

Applications

Interlocked guards where door locking is not required.
Food and Beverage packing/filling systems
Dairy
Pharmaceutical
Paper Industry
Can Forming and Filling, (Aluminum, Steel, Plastic)
Semiconductor Manufacture/Assembly.

MA-14

MA-34

Approvals

CE	Complies with the relevant sections of the CE marking directive.
UL	UL 508, Industrial Control Equipment

EUROPEAN DIRECTIVES

Machinery Directive 98/37/EC
Low Voltage Directive 73/23/EC
Electromagnetic Compatibility Directive 89/336/EC

EUROPEAN STANDARDS

EN292	Safety of Machinery Basic concepts, general principles for design.
EN 60204	Safety of Machinery Electrical equipment of machines.
EN 954-1	Safety of Machinery Safety related parts of controls systems
EN 1088	Interlocking devices associated with guards.
EN 60947-5-3	Safety of Machinery Specification for low voltage switchgear and control gear.

Declaration of Conformity

A Declaration of Conformity can be obtained from the Omron Scientific Technologies, Inc. web Site: www.sti.com

Mounting

The MA-14 & MA-34 safety switches can approach each other from most angles. When the guard is closed the targets on the printed face of the switch and actuator must be aligned.

Mount the switch on to the machine frame and the actuator on to the opening edge of the door. Always try to mount the switch on non-ferrous material. (*Ferrous materials may reduce the switching distance.*)

Use the tamper proof screws provided to make more secure.

Do not use the safety switch as a door stop.

Leave a minimum of 50 mm between any adjacent switches.

EN 1088
Provides some mounting suggestions, see example opposite.

When fixing the safety switch to a sliding door (A), ensure that when the door is opened (B) it is not easily accessible, helping prevent the system being overridden.

Contacts & Connections

MA-14DP11
MA-34DS11

MA-14DP10
MA-34DS10

All Safety contacts should be fused externally		
		Safety Contacts External Fuse DC

Specification Changes

In the interest of product development, specifications are subject to change without notice.

Note

The safety contacts of the Omron Scientific Technologies, Inc. switches are described as normally closed (N/C)
i.e. With the guard closed, actuator in place, and the machine able to be started.
