

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 20-F

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended March 31, 2007

Commission file number 1-6439

Sony Kabushiki Kaisha

(Exact name of Registrant as specified in its charter)

SONY CORPORATION

(Translation of Registrant's name into English)

JAPAN

(Jurisdiction of incorporation or organization)

**7-1, KONAN 1-CHOME, MINATO-KU,
TOKYO 108-0075, JAPAN**

(Address of principal executive offices)

Securities registered pursuant to Section 12(b) of the Act.

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
American Depositary Shares*	New York Stock Exchange
Common Stock**	New York Stock Exchange

* American Depositary Shares evidenced by American Depositary Receipts.
Each American Depositary Share represents one share of Common Stock.

** No par value per share.

Not for trading, but only in connection with the listing of American Depositary Shares pursuant to the requirements of the New York Stock Exchange.

Securities registered pursuant to Section 12(g) of the Act.

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

<u>Title of Class</u>	<u>Outstanding as of</u>	
	<u>March 30, 2007 (Tokyo Time)</u>	<u>March 29, 2007 (New York Time)</u>
Common Stock	1,002,062,405	
American Depositary Shares		176,704,973

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. Refer to definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer

Indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

In this document, Sony Corporation and its consolidated subsidiaries are together referred to as "Sony." In addition, sales and operating revenue is referred to as "sales" in the narrative description except in the Consolidated Financial Statements.

The noon buying rate for yen in New York City as certified for customs purposes by the Federal Reserve Bank of New York on June 20, 2007 was 123.60 yen = 1 U.S. dollar.

As of March 31, 2007, Sony Corporation had 960 consolidated subsidiaries (including variable interest entities). It has applied the equity accounting method with respect to its 62 affiliated companies.

Cautionary Statement

Statements made in this annual report with respect to Sony's current plans, estimates, strategies and beliefs and other statements that are not historical facts are forward-looking statements about the future performance of Sony. Forward-looking statements include, but are not limited to, those statements using words such as "believe," "expect," "plans," "strategy," "prospects," "forecast," "estimate," "project," "anticipate," "aim," "may" or "might" and words of similar meaning in connection with a discussion of future operations, financial performance, events or conditions. From time to time, oral or written forward-looking statements may also be included in other materials released to the public. These statements are based on management's assumptions and beliefs in light of the information currently available to it. Sony cautions you that a number of important risks and uncertainties could cause actual results to differ materially from those discussed in the forward-looking statements, and therefore you should not place undue reliance on them. You also should not rely on any obligation of Sony to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Sony disclaims any such obligation. Risks and uncertainties that might affect Sony include, but are not limited to (i) the global economic environment in which Sony operates, as well as the economic conditions in Sony's markets, particularly levels of consumer spending; (ii) exchange rates, particularly between the yen and the U.S. dollar, the Euro and other currencies in which Sony makes significant sales or in which Sony's assets and liabilities are denominated; (iii) Sony's ability to continue to design and develop and win acceptance of, as well as achieve sufficient cost reductions for, its products and services, including newly introduced platforms within the Game segment, which are offered in highly competitive markets characterized by continual new product introductions, rapid development in technology and subjective and changing consumer preferences (particularly in the Electronics, Game and Pictures segments, and the music business); (iv) Sony's ability and timing to recoup large-scale investments required for technology development and increasing production capacity; (v) Sony's ability to implement successfully personnel reduction and other business reorganization activities in its Electronics segment; (vi) Sony's ability to implement successfully its network strategy for its Electronics, Game and Pictures segments, and All Other, including the music business, and to develop and implement successful sales and distribution strategies in its Pictures segment and the music business in light of the Internet and other technological developments; (vii) Sony's continued ability to devote sufficient resources to research and development and, with respect to capital expenditures, to correctly prioritize investments (particularly in the Electronics segment); (viii) Sony's ability to maintain product quality (particularly in the Electronics and Game segments); (ix) the success of Sony's joint ventures and alliances; (x) the outcome of pending legal and/or regulatory proceedings; and (xi) shifts in customer demand for financial services such as life insurance and Sony's ability to conduct successful Asset Liability Management in the Financial Services segment. Risks and uncertainties also include the impact of any future events with material adverse impacts.

Important information regarding risks and uncertainties is also set forth elsewhere in this annual report, including in "Risk Factors" included in "Item 3. *Key Information*," "Item 4. *Information on the Company*," "Item 5. *Operating and Financial Review and Prospects*," "Legal Proceedings" included in "Item 8. *Financial Information*," Sony's Consolidated Financial Statements referenced in "Item 8. *Financial Information*," and "Item 11. *Quantitative and Qualitative Disclosures about Market Risk*."

June (through June 20)	—	123.67	121.08	123.60

The noon buying rate for yen in New York City as certified for customs purposes by the Federal Reserve Bank of New York on June 20, 2007 was 123.60 yen = 1 U.S.dollar.

* The average yen exchange rates represent average noon buying rates of all the business days during the respective year.

Notes to Selected Financial Data:

- In January 2003, the Financial Accounting Standards Board (“FASB”) issued FASB Interpretation (“FIN”) No. 46, “Consolidation of Variable Interest Entities — an Interpretation of Accounting Research Bulletin (“ARB”) No. 51.” FIN No. 46 addresses the consolidation by a primary beneficiary of a variable interest entity (“VIE”). Sony early adopted the provisions of FIN No. 46 on July 1, 2003. As a result of adopting the original FIN No. 46, Sony recognized a one-time charge with no tax effect of 2,117 million yen as a cumulative effect of accounting change in the consolidated statement of income, and Sony’s assets and liabilities increased by 95,255 million yen and 97,950 million yen, respectively. These increases were treated as non-cash transactions in the consolidated statement of cash flows. In addition, cash and cash equivalents increased by 1,521 million yen. Sony subsequently early adopted the provisions of FIN No. 46R, which replaced FIN No. 46, upon issuance

in December 2003. The adoption of FIN No. 46R did not have an impact on Sony's results of operations and financial position or impact the way Sony had previously accounted for VIEs.

2. In July 2003, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants issued Statement of Position ("SOP") 03-1, "Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts." SOP 03-1 requires insurance enterprises to record additional reserves for long-duration life insurance contracts with minimum guarantee or annuity receivable options. Additionally, SOP 03-1 provides guidance for the presentation of separate accounts. Sony adopted SOP 03-1 on April 1, 2004. As a result of the adoption of SOP 03-1, Sony's operating income decreased by 5,156 million yen for the fiscal year ended March 31, 2005. Additionally, on April 1, 2004, Sony recognized a charge of 4,713 million yen (net of income taxes of 2,675 million yen) as a cumulative effect of an accounting change.
3. In July 2004, the Emerging Issues Task Force ("EITF") issued EITF Issue No. 04-8, "The Effect of Contingently Convertible Instruments on Diluted Earnings per Share." In accordance with Statement of Financial Accounting Standards ("FAS") No. 128, "Earnings per Share", Sony had not previously included in the computation of diluted earnings per share ("EPS") the number of potential common stock issuable upon the conversion of contingently convertible debt instruments ("Co-Cos") that had not met the conditions to exercise the stock acquisition rights. EITF Issue No. 04-8 requires that the maximum number of common stock that could be issued upon the conversion of Co-Cos be included in diluted EPS computations from the date of issuance regardless of whether the conditions to exercise the stock acquisition rights have been met. Sony adopted EITF Issue No. 04-8 during the quarter ended December 31, 2004. As a result of the adoption of EITF Issue No. 04-8, Sony's diluted EPS of income before cumulative effect of an accounting change and net income for the fiscal year ended March 31, 2004 were restated. Sony's diluted EPS of income before cumulative effect of an accounting change and net income for the fiscal year ended March 31, 2005 decreased by 7.26 yen and 7.06 yen, respectively, as a result of adopting EITF Issue No. 04-8.
4. Effective April 1, 2006, Sony adopted FAS No. 123 (revised 2004), "Share-Based Payment" ("FAS No. 123(R)"). This statement requires the use of the fair value based method of accounting for employee stock-based compensation and eliminates the alternative to use the intrinsic value method prescribed by Accounting Principle Board Opinion ("APB") No. 25. With limited exceptions, FAS No. 123(R) requires that the grant-date fair value of share-based payments to employees be expensed over the period the service is received. Sony had accounted for its employee stock-based compensation in accordance with the provisions prescribed by APB No. 25 and its related interpretations and had disclosed the net effect on net income and net income per share ("EPS") allocated to the common stock as if Sony had applied the fair value recognition provisions of FAS No. 123 to stock-based compensation as described in Note 2 to the Consolidated Financial Statements, "Significant accounting policies — Stock-based compensation." Sony has elected the modified prospective method of transition prescribed in FAS No. 123(R), which requires that compensation expense be recorded for all unvested stock acquisition rights as the requisite service is rendered beginning with the first period of adoption. As a result of the adoption of FAS No. 123(R), Sony's operating income decreased by 3,670 million yen for the fiscal year ended March 31, 2007.
5. In February 2006, the FASB issued FAS No. 155, "Accounting for Certain Hybrid Financial Instruments," an amendment of FAS No. 133 and FAS No. 140. This statement permits an entity to elect fair value remeasurement for any hybrid financial instrument if the hybrid instrument contains an embedded derivative that would otherwise be required to be bifurcated and accounted for separately under FAS No. 133. The election to measure the hybrid instrument at fair value is made on an instrument-by-instrument basis and is irreversible. The statement is effective for all financial instruments acquired, issued, or subject to a remeasurement event occurring after the beginning of an entity's fiscal year beginning after September 15, 2006, with earlier adoption permitted as of the beginning of the fiscal year, provided that financial statements for any interim period of that fiscal year have not been issued. Sony early adopted FAS No. 155 on April 1, 2006. As a result of the adoption of FAS No. 155, Sony's operating income increased by 3,828 million yen for the fiscal year ended March 31, 2007. Additionally, on April 1, 2006, Sony recognized a net charge of 3,785 million yen (net of income taxes of 2,148 million yen) as a cumulative-effect adjustment to beginning retained earnings, which consisted of 1,754 million yen (net of income taxes of 996 million yen) of gross gains and 5,539 million yen (net of income taxes of 3,144 million yen) of gross losses.

6. In September 2006, the FASB issued FAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans," an amendment to FASB Statements No. 87, 88, 106 and 132(R). FAS No. 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit pension and other postretirement benefit plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income. FAS No. 158 was adopted by Sony in the financial statements for the year ended March 31, 2007. FAS No. 158 also requires companies to measure the funded status of the plan as of the date of its fiscal year-end, effective for years ending after December 15, 2008. Sony expects to adopt the measurement provisions of FAS No. 158 effective March 31, 2009. The impact of adopting FAS 158 was a 9,508 million yen reduction in accumulated other comprehensive income. Refer to Note 14 to the Consolidated Financial Statements, "Pension and severance plans," for further details.
7. Effective April 1, 2006, Sony reclassified royalty income as a component of sales and operating revenue, rather than as a component of other income as previously recorded. In connection with this reclassification, sales and operating revenue, operating income and other income for the fiscal years ended March 31, 2003, 2004, 2005 and 2006 have been reclassified to conform with the presentation of these items for the fiscal year ended March 31, 2007. The amounts of royalty income reclassified from other income to sales and operating revenue for the fiscal years ended March 31, 2003, 2004, 2005 and 2006 were 32,375, 34,244, 31,709, and 35,161 million yen, respectively. In addition to the above, certain reclassifications of the financial statements for the fiscal years ended March 31, 2003, 2004, 2005 and 2006 have been made to conform to the presentation for the fiscal year ended March 31, 2007.

Risk Factors

This section contains forward-looking statements that are subject to the Cautionary Statement appearing on page 2 of this annual report. Risks to Sony are also discussed elsewhere in this annual report, including without limitation in the other sections of this annual report referred to in the Cautionary Statement.

Sony must overcome increasingly intense pricing competition, especially in the Electronics and Game segments.

Sony's Electronics segment produces consumer products that compete against products sold by an increasing number of competitors on the basis of several factors including price. In order to produce products that appeal to changing and increasingly diverse consumer preferences, and to overcome the fact that a relatively high percentage of consumers already possess products similar to those that Sony offers, Sony's Electronics and Game segments must develop superior technology, anticipate consumer tastes and rapidly develop attractive products. In the Electronics segment, Sony faces increasingly intense pricing pressure in a variety of consumer product areas. Sony's sales and operating income depend on Sony's ability to continue to develop and offer Electronics and Game products at competitive prices that meet changing and increasingly diverse consumer preferences.

Sony is subject to competition from firms that may be more specialized or have greater resources.

Sony's businesses, primarily within the Electronics segment, face a broad range of competitors, from large international companies to an increasing number of relatively small, rapidly growing, and highly specialized organizations. Sony has a portfolio of businesses in different industries while many of its competitors specialize in one or more of these business areas. As a result, Sony may not fund or invest in certain of its businesses to the same degree that its competitors do, and these competitors may have greater financial, technical, and marketing resources available to them than the businesses of Sony against which they compete. The Financial Services segment faces

increasing competition in Japan due to ongoing deregulation that is eliminating barriers among the insurance, banking and securities industries. In addition, Sony's financial services businesses may not be able to compete effectively, especially against established competitors with greater financial, marketing and other resources.

Sony may not be able to recover its increasingly diverse and increasingly expensive investments in technology development and production capacity.

Sony's businesses, particularly the Electronics and Game segments, compete in intensely competitive markets characterized by changing consumer preferences and rapid technological innovation. In order to be profitable in such markets, Sony is continuing to invest heavily in research and development and semiconductor fabrication equipment. Recent examples of such expenditures include research and development investment in 65 nanometer semiconductor process technology and related capital expenditures with IBM Corporation and Toshiba Corporation for production of the Cell Broadband Engine™ ("Cell/B.E.") within the Electronics segment for sale primarily to the Game segment, and an investment in a joint venture, S-LCD Corporation ("S-LCD"), with Samsung Electronics Co., Ltd. ("Samsung") to produce 7th generation amorphous thin film transistor ("TFT") liquid crystal display ("LCD") panels. In addition, by the end of the fiscal year ending March 31, 2008, Sony and Samsung are scheduled to complete the investment in S-LCD regarding the manufacture of 8th generation TFT LCD panels at S-LCD. The total amount of the investment for the 8th generation panels is expected to be approximately 200 billion yen (approximately 50 percent of which will be contributed by Sony). Sony may not be able to recover these investments, in part or in full, or the recovery of these investments may take longer than expected. As a result, the carrying value of the related assets may be subject to an impairment charge, which could adversely affect Sony's mid-term profitability. (Refer to "Trend Information" in "Item 5. Operating and Financial Review and Prospects.")

Sony's business reorganization efforts are costly and may not attain their objectives.

Sony has engaged in significant reorganization initiatives in an effort to allocate managerial resources into core areas and improve operating efficiency and profitability. These efforts have included the concentration of resources into profitable, growth businesses by withdrawing from or downsizing selected businesses. Other efforts include the execution of a plan to reduce costs including a reduction in the number of Sony's employees around the world.

On September 22, 2005, Sony announced its mid-term corporate strategy for the three fiscal years ending March 31, 2006 through March 31, 2008. This mid-term corporate strategy includes restructuring initiatives focused on the reduction in the number of business categories and the number of product models, the rationalization of manufacturing sites, the streamlining of administrative and headquarter functions, as well as the sale of non-core assets.

In association with these restructuring initiatives, 138.7 billion yen and 38.8 billion yen of restructuring charges were recorded for the fiscal years ended March 31, 2006 and 2007, respectively. Sony anticipates the recording of approximately 35 billion yen in restructuring charges for the fiscal year ending March 31, 2008.

Restructuring charges are recorded in cost of sales, selling, general and administrative expenses and loss on sale, disposal or impairment of assets, net and thus decrease Sony's consolidated operating and net income. Moreover, due to internal or external factors, the improved efficiencies and cost savings projected may not be realized as scheduled and, even if those benefits are realized, Sony may not be able to achieve the level of profitability expected due to a worsening of market conditions beyond expectations. Such possible internal factors could include, for example, a decision to implement new restructuring initiatives not already planned or a decision to increase research and development outlays or other expenditures beyond currently projected levels, either of which might increase total costs. Possible external factors could include, for example, increased burdens from regional labor regulations and labor union agreements that could prevent Sony from executing its restructuring initiatives as planned. Therefore, such reorganizations may not result in improved efficiency, increased ability to respond to market changes or reallocation of resources to more profitable activities. The inability to fully and successfully implement restructuring programs may cause Sony to have insufficient financial resources to carry out its research and development plans and to invest in targeted growth business areas.

Foreign exchange rate fluctuations can affect financial results because a large portion of Sony's sales and assets are denominated in currencies other than the yen.

Sony's consolidated statements of income are prepared from the local currency-denominated financial results of each of Sony Corporation's subsidiaries around the world which are translated into yen at the monthly average currency exchange rate. Sony's consolidated balance sheets are prepared using local currency-denominated assets and liabilities of each of Sony Corporation's subsidiaries around the world, which are translated into yen at the market exchange rate at the end of each financial period. A large proportion of Sony's consolidated financial results, assets and liabilities is accounted for in currencies other than the Japanese yen. For example, only 25.6 percent of Sony's sales and operating revenue in the fiscal year ended March 31, 2007 were originally recorded in Japan. Accordingly, Sony's consolidated financial results, assets and liabilities in Sony's businesses that operate internationally, principally in its Electronics, Game and Pictures segments, may be materially affected by changes in the exchange rates of foreign currencies when translating into Japanese yen. In the fiscal year ended March 31, 2007, for example, Sony's operating income prepared on the basis of generally accepted accounting principles in the U.S. ("U.S. GAAP") in yen decreased from the preceding fiscal year by 68.3 percent to 71.8 billion yen. However, if Sony's operating income had been prepared on a local currency basis, it would have been an operating loss of 20.3 billion yen. Operating results on a local currency basis described herein reflect sales and operating revenue and operating income obtained by applying the yen's monthly average exchange rate in the previous fiscal year to local currency-denominated monthly sales, cost of sales, and selling, general and administrative expenses in the current fiscal year. Foreign exchange rate fluctuations may have a negative impact on Sony's results in the future, especially if the yen strengthens significantly against the U.S. dollar or the Euro.

Foreign exchange fluctuations can affect Sony's results of operations due to sales and expenses in different currencies.

Exchange rate fluctuations affect Sony's operating profitability because many of Sony's products are sold in countries other than the ones in which they were manufactured. The concentration of research and development, administrative functions and manufacturing activities within the Electronics segment largely in Japan, makes this segment particularly sensitive to the yen's appreciation as the ratio of yen-denominated costs to total costs is higher than the ratio of yen-denominated revenue to total revenue. Volatile mid- to long-term changes in exchange rate levels may interfere with Sony's global allocation of resources and hinder Sony's ability to execute procurement, production, logistics, and sales activities in a manner that is profitable after the effect of such exchange rate changes.

Although Sony hedges the net foreign currency exposure resulting from import and export transactions shortly before they are projected to occur, such hedging activity cannot entirely eliminate the risk of adverse exchange rate fluctuations.

Sony must efficiently manage its procurement of parts, the market conditions for which are volatile, and control its inventory of products and parts, the demand for which is volatile.

In the Electronics and Game segments, Sony places orders for components, determines production and plans inventory in advance based on its forecast of consumer demand, which is highly volatile and difficult to predict. In the past Sony has experienced both a shortage of semiconductors, which resulted in Sony's inability to meet demand for its personal computers ("PCs") and audio visual products, and a surplus in certain semiconductors that resulted in the recognition of losses when semiconductor prices fell. Sony consumes a tremendous volume of parts and components for its products such as semiconductors and LCD panels. Consequently, market fluctuations may cause a shortage of parts and components, and may affect Sony's production or the cost of goods sold, as could price fluctuations of the underlying raw or basic materials. Sony's profitability may also be adversely affected by supply or inventory shortages or inventory adjustments that, as a result of efforts to reduce inventory by temporarily halting production or by reducing the price of goods, will lead to an increase in the ratio of cost of sales to sales. Sony writes down the value of its inventory when components or products have become obsolete, when inventory exceeds the amount expected to be used, or when the value of the inventory is otherwise recorded at a higher value than net realizable value. Such inventory adjustments have had and, if Sony is not successful in managing its inventory in the future, will have a material adverse effect on Sony's operating income and profitability. (For more information on sources of supply refer to "Sources of Supply" in "Item 4. Information on the Company.")

Sony's sales and profitability are sensitive to economic and other trends in Sony's major markets.

A consumer's decision to purchase products such as those offered by Sony in its Electronics, Game and Pictures segments, as well as by companies within All Other, is to a very significant extent discretionary. Accordingly, weakening economic conditions or outlook can reduce consumption in any of Sony's major markets, causing material declines in Sony's sales and operating income. In the fiscal year ended March 31, 2007, 25.6 percent, 26.9 percent and 24.6 percent of Sony's sales and operating revenue were attributable to Japan, the U.S. and Europe, respectively. If economic conditions in Japan, the U.S. or Europe deteriorate, or if the effects of international political and military instability depress consumer confidence, Sony's short- to mid-term sales and profitability may be significantly adversely affected. In addition, since Sony's sales in Other Areas are growing, its sales and profitability may also be affected by future political, economic and military uncertainties surrounding those areas.

Large-scale investment is required within the Game and Electronics segments, particularly during the development and introductory period of a new gaming platform.

Within the Game segment, providing and developing products that maintain competitiveness over an extended life-cycle requires large-scale investment relating to research and development, particularly during the development and introductory period of a new platform. In addition, large-scale investment relating to capital expenditures and research and development is also required within the Electronics segment for the fabrication and manufacture of key components, including semiconductors supplied to the Game segment, which are used in products within the Game segment. Moreover, it is particularly important in the Game segment that these products are provided to consumers at competitive prices to ensure the favorable market penetration of the platform. Should the platform fail to achieve such favorable market penetration, there is a risk that this investment, or a part thereof, will not be recouped and the carrying value of the related assets will be subject to an impairment charge, resulting in a significant negative impact on Sony's mid-term profitability. In addition, even if Sony is able to sufficiently recoup its investment, it is probable that a significant negative impact on Sony's operating results could occur during the introductory period of the platform. Further, if the platform is ultimately successful, it may take longer than expected to recoup the investment, resulting in a negative impact on Sony's profitability.

An example of such a significant negative impact during the introductory period of the platform is the PLAYSTATION®3 ("PS3")-related charges which resulted in a loss of 232.3 billion yen within the Game segment for the fiscal year ended March 31, 2007. This loss reflected a negative margin arising from the sale of the PS3 at strategic price points lower than its production cost during the introductory period. (Refer to "Game" section of "Operating Performance by Business Segment" at "Operating Results" in "Item 5. Operating and Financial Review and Prospects.")

Sony's Game and Electronics segments are particularly sensitive to year-end holiday season demand.

Since the Game segment offers a relatively small range of hardware products (including PlayStation®2, PSP™ (PlayStation®Portable), and the PS3) and a significant portion of overall demand is weighted towards the year-end holiday season, factors such as changes in the competitive environment, changes in market conditions, delays in the release of highly anticipated software titles and insufficient supply of hardware during the year-end holiday season can negatively impact the financial performance of both the Game and the Electronics segments. For example, in the fiscal year ended March 31, 2007, the introduction of the PS3 in Europe was delayed from the scheduled date of November 2006 to March 2007 because of a delay in improvements in the mass production yield of the blue-violet laser diode, a key device for the Blu-ray disc drive equipped in the PS3, which was designed, developed and manufactured internally at Sony. Also, a supply shortage of the PS3 arose during the 2006 year-end holiday season in Japan and North America.

The Electronics segment is also dependent upon year-end holiday season demand and, to a lesser extent than the Game segment, is susceptible to weak sales and supply shortages that may prevent it from meeting demand for its products during this season.

The sales and profitability of Sony's Game segment depends on the penetration of its gaming platforms, which is sensitive to software line-ups, including software published by third parties.

In the Game segment, the penetration of gaming platforms is a significant factor for sales and profitability, which may be affected by the ability to provide customers with sufficient software line-ups, including software published by third parties. Software line-ups affect not only software sales and profitability, as in many other content businesses, but also affect the penetration of gaming platforms, which can affect hardware sales and profitability.

Operating results for Sony's Pictures segment vary according to the cost of productions, customer acceptance, and competing products.

Operating results for the Pictures segment's motion picture and television productions can materially fluctuate depending primarily upon the cost of such productions and acceptance of such productions by the public, which are difficult to predict. In addition, the commercial success of the Pictures segment's motion picture and television productions depend upon the acceptance of other competing productions by the public, and the availability of alternative forms of entertainment and leisure activities.

Sony's Pictures segment is subject to labor interruption.

The Pictures segment is dependent upon highly specialized union members who are essential to the production of motion pictures and television programs. A strike by one or more of these unions could delay or halt production activities. Such a delay or halt, depending on the length of time involved, could cause delay or interruption in the release of new motion pictures and television programs and thereby could adversely affect revenues and cash flows in the Pictures segment.

Sony's Financial Services segment operates in a highly regulated environment and new regulations and regulatory initiatives could adversely affect the flexibility of its business operation.

Sony's Financial Services segment operates in industries subject to comprehensive regulation and supervision, including the Japanese insurance and banking industries. Future developments or changes in laws, regulations or policies and their effects are unpredictable and could lead to increased compliance expenses or limitations on operations. For example, Japan's Financial Services Agency recently required all life and non-life insurance companies to perform and report on systematic reviews of non-payment of insurance claims, the results of which could lead to additional rulemaking.

In conducting prudent asset liability management, Sony's Financial Services segment is subject to risks from market fluctuations in the value of investments, changes in customer demand and potential variability in insurance claims.

If Sony's Financial Services segment fails to conduct effective asset liability management ("ALM") to balance possible risks and expected returns on investment assets with its financing liabilities and underwriting risks on insurance policy benefits, its ability to provide competitive products and services to customers may deteriorate and its profitability may decline. Sony Life Insurance Co., Ltd. ("Sony Life"), which constitutes the largest portion of this segment, has liabilities to policyholders with a long average duration, making ALM more challenging. This segment also may incur losses from decreases in the value of securities and other financial instruments purchased for investment purposes resulting from fluctuations in interest rates or in equity markets. In addition, Sony's Financial Services segment faces a risk of changes in customer demand including a change from more profitable protection-orientated products, such as term insurance, to less profitable savings-oriented products, such as individual annuities, as well as a risk of unpredictable increases in insurance claims.

Differences between actual and assumed policy benefits and claims may require Sony's Financial Services segment to increase policy reserves in the future.

Sony's life insurance and non-life insurance businesses establish policy reserves for future benefits and claims based on regulatory guidelines and estimates of future payment obligations made by qualified actuaries. The

insurance businesses calculate these reserves based on many assumptions and estimates, including the frequency and timing of the event covered by the policy, the amount of benefits or claims to be paid and the investment returns on the assets they purchase with the premiums received. These assumptions and estimates are inherently uncertain, and the insurance businesses cannot determine with precision the ultimate amounts that they will be required to pay for, or the timing of payment of, actual benefits and claims or whether the assets supporting the policy liabilities will grow at the level they assume prior to the payment of benefits or claims. The frequency and timing of the event covered by the policy and the amount of benefits or claims to be paid are subject to a number of risks and uncertainties, many of which are outside of the insurance businesses' control, including:

- changes in trends underlying the insurance businesses' assumptions and estimates, such as mortality and morbidity rates and automobile accident rates;
- the availability of sufficient reliable data and the insurance businesses' ability to correctly analyze the data;
- the insurance businesses' selection and application of appropriate rating and pricing techniques; and
- changes in legal standards, claim settlement practices, medical care expenses and automobile repair costs.

If the actual experience of the insurance businesses is less favorable than their assumptions or estimates, reserves may be inadequate. In addition, any changes in regulatory guidelines or standards with respect to the required level of policy reserves may require that the insurance businesses establish policy reserves based on more stringent assumptions, estimates or actuarial calculations. Such events could result in a need to increase provisions for policy reserves, which may have a significant adverse effect on the financial condition and results of operations of the Financial Services segment.

Sony's Music business, Sony's investment in SONY BMG MUSIC ENTERTAINMENT, and the Pictures segment are subject to digital piracy, which may become increasingly prevalent with the development of new technologies.

In Sony's Music business, including its investment in SONY BMG MUSIC ENTERTAINMENT ("SONY BMG"), as well as in the Pictures segment, the development of digital technology has created new risks with respect to Sony's ability to protect its copyrights. Advances in technology that enable the transfer and downloading of digital audio and visual files from the Internet without authorization from the owners of rights to such content threaten the conventional copyright-based business model by making it easier to create and redistribute unauthorized audio and visual files. Such unauthorized distribution has adversely affected sales and operating results within the Music business, as well as in Sony's investment in SONY BMG, and threatens to adversely affect sales and operating income in the Pictures segment. These technological advances include new digital devices such as hard disk drive video and audio recorders, CD, DVD, and Blu-ray Disc recorders and peer-to-peer digital distribution services. As a result, Sony has incurred and will continue to incur expenses to develop new services for the authorized digital distribution of music, movies and television programs and to combat unauthorized digital distribution of its copyrighted content. These initiatives will increase Sony's near-term expenses and may not achieve their intended result.

Sony's Music business and Sony's investment in SONY BMG are dependent on establishing new artists, and together with Sony's Pictures segment are subject to increases in talent-related costs.

The success of Sony's Music business and Sony's investment in SONY BMG is highly dependent on establishing artists that appeal to customers, and the competition with other entertainment companies for such talent is intense. If the Music business and SONY BMG are unable to find and establish new talented artists, sales, operating income and equity in net income (loss) of affiliated companies may be adversely affected. In addition, with respect to the Music business and the Pictures segment, as well as SONY BMG, Sony has experienced and may continue to experience significant increases in talent-related spending.

SONY BMG is subject to renewed regulatory approval from the European Commission competition authorities.

In August 2004, Sony combined its recorded music business outside of Japan with the recorded music business of Bertelsmann AG, forming SONY BMG, after approval from, among others, the European Commission competition authorities. On December 3, 2004, Impala, an international association consisting of 2,500 independent recorded music companies, applied for annulment of the decision to clear the merger. On July 13, 2006, the European Court of First Instance overruled the Commission's decision to allow the merger to go forward, requiring the Commission to re-examine the merger. The transaction was renotified on January 31, 2007, in accordance with applicable EU merger control rules, and an in-depth investigation was opened on March 1, 2007. While the Commission completes its reexamination, Sony continues to account for the results of Sony BMG under the equity method. If the Commission does not approve the merger and the previously combined company is forced to unwind the merger, Sony may incur significant costs and may not be able to achieve its objectives with respect to its recorded music business.

Sony may not be successful in implementing its hardware, software and content integration strategy.

Sony believes that utilizing broadband networks to facilitate the integration of hardware, software and content is essential for differentiating itself in the marketplace. Sony also believes that this strategy will eventually lead to consistent revenue streams. However, this strategy depends on the development (both inside and outside of Sony) of certain network technologies, coordination among Sony's various business units, and the standardization of technological and interface specifications across business units and within industries. If Sony is not successful in implementing this strategy, it could adversely affect Sony's mid- to long-term competitiveness.

Sony's utilization of joint ventures and alliances within strategic business areas may not be successful.

The composition of Sony during the last several years has reflected a shift towards the establishment of joint ventures and strategic alliances in order to supplement or replace functions that were previously performed by divisions of Sony Corporation or wholly-owned subsidiaries, to mitigate the burden of substantial investments and to achieve operating efficiencies through cooperation with other companies.

Sony currently has investments in several joint ventures, including Sony Ericsson Mobile Communications, AB ("Sony Ericsson"). In April 2004, Sony established S-LCD, a joint venture with Samsung for the production of 7th generation amorphous TFT LCD panels. In August 2004, Sony combined its recorded music business outside of Japan with the recorded music business of Bertelsmann AG, forming the jointly-owned company, SONY BMG. If Sony and its partners are not able to reach their common financial objectives successfully, Sony's financial performance as a whole may be adversely affected. Sony's financial performance may also be adversely affected temporarily or in the medium-term during the investment period of those alliances, joint ventures and strategic investments even if Sony and its partners remain on course to achieve those common objectives. A recent example of how Sony's financial performance has been adversely affected in the course of these types of relationships is the equity in net losses recorded for S-LCD during the fiscal year ended March 31, 2006 of 7.2 billion yen. Managing the growing number of joint ventures and strategic alliances, and, in particular, dealing with the legal and cultural differences that can arise in such relationships, represents a risk. In addition, by participating in joint ventures or strategic alliances, Sony may encounter conflicts of interest, may not maintain sufficient control over the joint venture or strategic alliance, including over cash flow, and may be faced with an increased risk of the loss of proprietary technology or know-how.

Sony's physical facilities and information systems are subject to damage as a result of disasters, outages, malfeasance or similar events.

Sony's headquarters, some of Sony's major data centers and many of Sony's most advanced device manufacturing facilities, including those for semiconductors, are located in Japan, where the possibility of disaster or damage from earthquakes is generally higher than in other parts of the world. In addition, Sony's offices and facilities, including those used for research and development, material procurement, manufacturing, motion picture and television production, logistics, sales and services are located throughout the world and are subject to possible

destruction, temporary stoppage or disruption as a result of any number of unexpected events. If any of these facilities or offices were to experience a significant loss as a result of any of the above events, it could disrupt Sony's operations, delay production, shipments and revenue, and result in large expenses to repair or replace these facilities or offices.

In addition, as network and information systems have become increasingly important to Sony's operating activities, network and information system shutdowns caused by unforeseen events such as power outages, disasters, terrorist attacks, hardware or software defects, computer viruses and computer hacking pose increasing risks. Such an event could also result in the disruption of Sony's operations, delay production, shipments and recognition of revenue, and result in large expenditures necessary to repair or replace such network information systems. Furthermore, Sony's operating activities could be subject to risks caused by misappropriation, misuse, leakage, falsification, and disappearance of internal information, including that of customers and vendors. Judging from the experience of other similarly situated companies, it is possible that Sony could be exposed to significant monetary liability if such risks were to materialize, and it is also possible that such events could harm Sony's reputation and credibility. Considering the increasing social awareness concerning the importance of personal information and relevant legislation (Refer to "*Government Regulations*" in "Item 4. *Information on the Company*"), such risks are increasing particularly for businesses that handle a large amount of customer and consumer data. Although Sony continues to take precautions against such unforeseen risks, such as by undertaking efforts to educate operators and administrators who have access to databases about appropriate ways to protect such information, these measures may be insufficient, and Sony may be unable to avoid or prevent such situations.

Sony is subject to financial and reputational risks due to product quality and liability issues.

Sony products, such as software (including software for mobile phone handsets) and electronic devices including semiconductors are becoming increasingly sophisticated and complicated as rapid advancements in technologies occur, and as demand increases for digital equipment. At the same time, product quality and liability issues present greater risks. Sony's efforts to manage the rapid advancements in technologies and increased demand, as well as to control product quality, may not be successful, and if they are not, Sony may incur expenses in connection with, for example, product recalls, service and lawsuits, and Sony's brand image and reputation as a producer of high-quality products may suffer. These issues are not only relevant to the final Sony products that are sold directly to customers but also to the final products of other companies that are equipped with Sony's components, such as the semiconductors mentioned above. An example of these issues is the recording of a 51.2 billion yen provision during the fiscal year ended March 31, 2007 that related to the recalls by Dell Inc., Apple Inc. and Lenovo, Inc. of notebook computer battery packs that use lithium-ion battery cells manufactured by Sony as well as the subsequent global replacement program initiated by Sony for certain notebook computer battery packs used by Sony and several other notebook computer manufacturers that use lithium-ion battery cells manufactured by Sony (refer to "Performance by Product Category" for "Electronics" within "*Operating Results for the Fiscal Year Ended March 31, 2007*" in "Item 5. *Operating and Financial Review and Prospects*").

Sony may be adversely affected by its employee benefit obligations.

Sony recognizes the unfunded pension obligation as consisting of the (i) Projected Benefit Obligation ("PBO") less (ii) the fair value of pension plan assets. Actuarial gains and losses are included in pension expenses in a systematic manner over employees' average remaining service periods in a manner consistent with FAS No. 87, "Employers' Accounting for Pensions," FAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans" and the related amendments to those standards. Any decrease of the pension asset value due to low returns from investments or increases in the PBO due to a lower discount rate, increases in rates of compensation and certain other actuarial assumptions would increase the unfunded pension obligations, and could, subject to the provisions of FAS No. 87, result in an increase in pension expenses recorded as cost of sales or as a selling, general and administrative expense. Refer to Note 14 of Notes to Consolidated Financial Statements for more information regarding Sony's pension and severance plans. Also refer to "Critical Accounting Policies" in "Item 5. *Operating and Financial Review and Prospects*."

Most pension assets and liabilities recognized on Sony's consolidated balance sheets relate to Japanese plans, which are subject to the Japanese Defined Benefit Corporate Pension Plan Act pursuant to which Sony is required to

meet certain financial criteria including periodic actuarial revaluation and annual settlement of gain or loss of the plan. In the eventuality that the actuarial reserve required by law exceeds the fair value of pension assets, Sony may be required to make an additional contribution to the plan, which would reduce consolidated cash flow.

Changes in Sony's tax rates or exposure to additional tax liabilities could adversely affect its earnings and financial condition.

Sony is subject to income taxes in Japan and numerous other jurisdictions. Significant judgment is required in determining its worldwide provision for income taxes. In the ordinary course of our business, there are many transactions, including intercompany charges, and calculations where the ultimate tax determination is uncertain. Also, Sony's future effective tax rates could be unfavorably affected by changes in the mix of earnings in countries with differing statutory rates.

Further, Sony is subject to continuous examination of its income tax returns by tax authorities. As a result, Sony regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of its provision for income taxes. However, there can be no assurance that the outcomes of these examinations will not have an adverse effect on Sony's operating results and financial condition.

In addition, if Sony is unable to generate sufficient future taxable income in certain jurisdictions, or if there is a significant change in the actual effective tax rates or the time period within which the underlying temporary differences become taxable or deductible, Sony could be required to increase its valuation allowances against its deferred tax assets resulting in an increase in its effective tax rate and an adverse impact on future operating results.

Sony's business could suffer as a result of adverse outcomes of current or future litigation and regulatory actions.

Sony faces the risk of litigation and regulatory proceedings in connection with its operations. Lawsuits, including regulatory actions, may seek recovery of very large, indeterminate amounts or limit Sony's operations, and the possibility that they may arise and their magnitude may remain unknown for substantial periods of time. A substantial legal liability or adverse regulatory outcome could have a material adverse effect on Sony's business, results of operations, financial condition, and reputation.

Sony may be accused of infringing others' intellectual property rights and be liable for significant damages.

Sony's products incorporate a wide variety of technologies. Claims have been and could be asserted against Sony that such technology infringes the intellectual property owned by others. Such claims might require us to enter into settlement or license agreements, to pay significant damage awards, and/or to face a temporary or permanent injunction prohibiting Sony from marketing or selling certain of its products, which could have a material adverse effect on Sony's business, results of operations, financial condition, and reputation.

Sony is dependent upon certain intellectual property rights of others, and Sony may not be able to continue to obtain necessary licenses to employ technology covered by such rights.

Many of Sony's products are designed under the license of patents and other intellectual property rights from third parties who have developed technologies that are protected by such rights. Based upon past experience and industry practice, Sony believes that it will be able to obtain or renew licenses relating to various intellectual properties useful in its business that it needs in the future; however, such licenses may not be available at all or on acceptable terms, and Sony may need to redesign or discontinue marketing or selling such products as a result.

Increased reliance on external suppliers may increase financial, reputational and other risks to Sony.

With the increasing necessity of pursuing quick business development and high operating efficiency with limited managerial resources, Sony increasingly procures from third-party suppliers components (including LCD panels for televisions), and technologies (such as operating systems for PCs). In addition, it consigns to external suppliers extensive activities including procurement, manufacturing, logistics, sales and other services. Reliance on outside sources increases the chance that Sony will be unable to prevent products from incorporating defective or

inferior third-party technology or components. Products with such defects can adversely affect Sony's consolidated sales and its reputation for quality products. This reliance on external suppliers may also expose Sony to the effects of an external suppliers' insufficient compliance with applicable regulations or infringement of third-party intellectual property rights.

Sony is subject to environmental and occupational health and safety regulations that can increase the costs of operations or limit its activities.

Sony is subject to a broad range of environmental and occupational health and safety laws and regulations, including laws and regulations relating to air pollution, water pollution, the management, elimination or reduction of the use of hazardous substances, decreases in the level of standby power of certain products, waste management, recycling of products, batteries and packaging materials, site remediation and worker and consumer health and safety. These regulations could become more stringent or additional regulations could be adopted in the future, which could cause us to incur additional compliance costs or limit our activities. Further, a failure to comply with applicable environmental or health and safety laws could result in fines, penalties, legal judgments or other costs or remediation obligations. Such a finding of noncompliance could also injure our brand image. Such events could adversely affect our financial performance.

We monitor and evaluate new environmental and health and safety requirements that may affect our operations. The European Union (the "EU") has enacted two directives relevant to our business: the Restriction of Hazardous Substances Directive ("RoHS") and the Waste Electrical and Electronic Equipment Directive ("WEEE"). RoHS restricts the use of certain hazardous substances in electrical and electronic equipment marketed in the EU. WEEE makes producers of electrical and electronic equipment financially responsible for the collection of certain products from end users who wish to dispose of them and for subsequent treatment, recycling and safe disposal of those products. Similar regulations are being formulated in other parts of the world, including in China. We could incur substantial costs to comply with RoHS, WEEE and other similar programs that might be enacted in the future.

In addition, the EU's Registration, Evaluation, Authorisation and Restriction of Chemicals program ("REACH") came into effect as of June 2007. In general, REACH requires manufacturers, users and importers of a broad range of chemical substances to register for these chemicals and uses of chemicals up and down the supply chain and perform a range of tests and assessments on those substances and make the results available to the public and the EU regulators. Going forward, as registrations and test data are processed and evaluated under the REACH program, actions could be taken that could affect the cost and availability of certain chemicals, and users may have to shift to the use of more expensive and/or less effective substitutes. The various obligations under REACH are to be phased in over a period of time, and we will continue to evaluate the potential impact of these regulations, including whether REACH could directly or indirectly increase our costs or restrict our activities, which could have an adverse impact on our financial performance.

Sony is subject to the risks of operations in different countries.

Most of Sony's activities are conducted outside of Japan, including in emerging markets. International operations bring challenges. Production in China and other Asian countries of electronics products increases the time necessary to supply products to Europe and the U.S., which can make it more difficult to meet changing customer demand and preferences. Concentration of the production of PC components in China and Taiwan could lead to production interruptions if a catastrophe or widespread contagion, similar to the spread of Severe Acute Respiratory Syndrome ("SARS"), occurs in the region. Further, Sony may encounter difficulty in planning and managing operations due to unfavorable political or economic factors, such as instability in the Middle East resulting from the Iraq War, cultural and religious conflicts, foreign exchange controls, or unexpected legal or regulatory changes such as import or export controls, nationalization of assets or restrictions on the repatriation of returns from foreign investments.

American Depository Shareholders have fewer rights than shareholders and may not be able to enforce judgments based on U.S. securities laws.

The rights of shareholders under Japanese law to take actions, including voting their shares, receiving dividends and distributions, bringing derivative actions, examining Sony's accounting books and records and exercising appraisal rights are available only to shareholders of record. Because the depository, through its custodian agents, is the record holder of the shares underlying the American Depositary Shares ("ADSs"), only the depository can exercise those rights in connection with the deposited shares. The depository will make efforts to vote the shares underlying ADSs in accordance with the instructions of ADS holders and will pay the dividends and distributions collected from Sony. However, ADS holders will not be able to bring a derivative action, examine Sony's accounting books and records, or exercise appraisal rights through the depository.

Sony Corporation is incorporated in Japan with limited liability. A majority of our directors and corporate executive officers are non U.S. residents, and a substantial portion of the assets of Sony Corporation and the assets of our directors and corporate executive officers are located outside the U.S. As a result, it may be more difficult for investors to enforce against Sony Corporation or such persons the judgments obtained in U.S. courts predicated upon the civil liability provisions of the federal and state securities laws of the U.S. or judgments obtained in other courts outside Japan. There is doubt as to the enforceability in Japanese courts, in original actions or in actions for enforcement of judgments of U.S. courts, of civil liabilities predicated solely upon the federal and state securities laws of the U.S.

Item 4. Information on the Company

History and Development of the Company

Sony Corporation, the ultimate parent company of Sony, was established in Japan in May 1946 as Tokyo Tsushin Kogyo Kabushiki Kaisha, a joint stock company (*Kabushiki Kaisha*) under Japanese law. In January 1958, it changed its name to Sony Kabushiki Kaisha ("Sony Corporation" in English).

In December 1958, Sony Corporation was listed on the Tokyo Stock Exchange (the "TSE"). In June 1961, Sony Corporation issued American Depositary Receipts ("ADRs") in the U.S.

In March 1968, Sony Corporation established CBS/Sony Records Inc. in Japan, currently Sony Music Entertainment (Japan) Inc. ("SMEJ"), as a 50:50 joint venture company between Sony Corporation and CBS Inc. in the U.S. In January 1988, SMEJ became a wholly-owned subsidiary of Sony Corporation. In November 1991, SMEJ was listed on the Second Section of the TSE.

In September 1970, Sony Corporation was listed on the New York Stock Exchange (the "NYSE").

In August 1979, Sony Corporation established Sony Prudential Life Insurance Co., Ltd. in Japan, currently Sony Life Insurance Co., Ltd. ("Sony Life"), as a 50:50 joint venture company between Sony Corporation and The Prudential Insurance Company of America. In March 1996, Sony Life became a wholly-owned subsidiary of Sony Corporation, and in April 2004, with the establishment of a financial holding company Sony Financial Holdings Inc. ("SFH"), Sony Life became a wholly-owned subsidiary of SFH.

In July 1984, Sony Magnescale Inc., a subsidiary of Sony Corporation and currently Sony Precision Technology Inc., was listed on the Second Section of the TSE. In July 1987, Sony Chemicals Corporation, a subsidiary of Sony Corporation, was listed on the Second Section of the TSE.

In January 1988, Sony Corporation acquired CBS Records Inc., a music business division of CBS Inc. in the U.S. In January 1991, CBS Records Inc. changed its name to Sony Music Entertainment Inc. ("SMEI"). In November 1989, Sony Corporation acquired Columbia Pictures Entertainment, Inc. in the U.S. In August 1991, Columbia Pictures Entertainment, Inc. changed its name to Sony Pictures Entertainment Inc. ("SPE").

In November 1993, Sony established Sony Computer Entertainment Inc. ("SCEI") in Japan.

In January 2000, acquisition transactions by way of exchanges of stock were completed such that SMEJ, Sony Chemicals Corporation, and Sony Precision Technology Inc. became wholly-owned subsidiaries of Sony Corporation.

In June 2001, Sony Corporation issued shares of subsidiary tracking stock in Japan, the economic value of which was intended to be linked to the economic value of Sony Communication Network Corporation (“SCN”), which was renamed So-net Entertainment Corporation (“So-net”) in October 2006. All shares of subsidiary tracking stock were terminated and converted to shares of Sony’s common stock in December 2005. SCN was listed on the Mother’s market of the TSE in December 2005. Sony Corporation continues to hold a majority of the shares of So-net.

In October 2001, Sony Ericsson Mobile Communications, AB (“Sony Ericsson”), a 50:50 joint venture company between Sony Corporation and Telefonaktiebolaget LM Ericsson of Sweden, was established.

In October 2002, Aiwa Co., Ltd. (“Aiwa”) became a wholly-owned subsidiary of Sony Corporation. In December 2002, Aiwa was merged into Sony Corporation.

In June 2003, Sony Corporation adopted the “Company with Committees” system in line with the revised Japanese Commercial Code. (Refer to “Board Practices” in “Item 6. *Directors, Senior Management and Employees.*”)

In April 2004, Sony Corporation established SFH in Japan. Sony Life, Sony Assurance Inc., and Sony Bank Inc. became subsidiaries of SFH.

In April 2004, S-LCD Corporation (“S-LCD”), a joint venture between Sony Corporation and Samsung Electronics Co., Ltd. of Korea for the manufacture of amorphous thin film transistor (“TFT”) liquid crystal display (“LCD”) panels, was established in Korea.

In August 2004, Sony combined its worldwide recorded music business, excluding its recorded music business in Japan, with the worldwide recorded music business of Bertelsmann AG forming the 50:50 joint venture, SONY BMG MUSIC ENTERTAINMENT (“SONY BMG”).

In April 2005, a consortium led by Sony Corporation of America (“SCA”) and its equity partners, Providence Equity Partners, Texas Pacific Group, Comcast Corporation and DLJ Merchant Banking Partners, completed the acquisition of Metro-Goldwyn-Mayer Inc. (“MGM”).

Sony Corporation’s registered office is located at 7-1, Konan 1-chome, Minato-ku, Tokyo 108-0075, Japan, telephone +81-3-6748-2111.

The agent in the U.S. for purposes of this Item 4 is Sony Corporation of America, 550 Madison Avenue, New York, NY 10022 (Attn: Office of the General Counsel).

Principal Capital Investments

In the fiscal years ended March 31, 2005, 2006 and 2007, Sony’s capital expenditures (additions to fixed assets on the balance sheets) were 356.8 billion yen, 384.3 billion yen and 414.1 billion yen, respectively. Sony’s capital expenditures are expected to be 440 billion yen during the fiscal year ending March 31, 2008. For a breakdown of principal capital expenditures and divestitures (including interests in other companies), refer to “Item 5. *Operating and Financial Review and Prospects.*” Sony invested approximately 150 billion yen in the semiconductor business during the fiscal year ended March 31, 2007. Sony plans to invest approximately 130 billion yen in the semiconductor business in the fiscal year ending March 31, 2008. Sony issued an 80 billion yen syndicated loan in June 2006, and a 130 billion yen syndicated loan in December 2006 and has raised additional funds generated internally to be used for general corporate purposes, including capital expenditures related to key devices including display devices, and debt redemption. Refer to “Property, Plant and Equipment” below for a geographic distribution of these investments.

Business Overview

Important Changes during the Fiscal Year

Effective April 1, 2006, Sony reclassified royalty income as a component of sales and operating revenue, rather than as a component of other income as previously recorded. As a result, this reclassification has also been made to sales and operating revenue, operating income and other income for the fiscal years ended March 31, 2005 and 2006

to conform with the presentation of these items for the fiscal year ended March 31, 2007. Royalty income for the fiscal year ended March 31, 2007 was 35.1 billion yen. Royalty income for the fiscal years ended March 31, 2005 and 2006 was 31.7 billion yen and 35.4 billion yen, respectively. These amounts were recorded primarily within the Electronics segment.

Effective April 1, 2005, Sony no longer breaks out its music business as a reportable segment as it no longer meets the materiality threshold. Accordingly, the results for Sony’s music business are now included within All Other and the results for the fiscal year ended March 31, 2005 have been reclassified to All Other for comparative purposes. Results for the fiscal years ended March 31, 2006 and 2007 in All Other include the results of SMEI’s music publishing business and SMEJ, excluding Sony’s Japan-based disc manufacturing business which, effective April 1, 2005, has been reclassified to the Electronics segment. However, results for the fiscal year ended March 31, 2005 in All Other include the consolidated results for SMEI’s recorded music business for the period through August 1, 2004, as well as the results for SMEI’s music publishing business and SMEJ excluding Sony’s Japan-based disc manufacturing business.

On April 8, 2005, a consortium led by SCA and its equity partners, Providence Equity Partners, Texas Pacific Group, Comcast Corporation and DLJ Merchant Banking Partners, completed the acquisition of MGM for a total purchase price of approximately 5.0 billion U.S. dollars. In conjunction with the acquisition, SPE entered into agreements to co-finance and produce new motion pictures with MGM, and to distribute MGM’s existing film and television content through SPE’s global distribution channels. In June 2006, MGM and SPE modified this arrangement with respect to the co-financing of motion pictures and further to allow MGM to bring its worldwide television distribution business in-house and to consolidate substantially all of its worldwide home entertainment distribution activities with another major studio. MGM continues to operate under the Metro-Goldwyn-Mayer name as a private company headquartered in Los Angeles. As part of the acquisition, SCA invested 257 million U.S. dollars in exchange for 20 percent of the total equity capital. However, based on the percentage of common stock owned, Sony records 45 percent of MGM’s net income (loss) as equity in net income of affiliated companies. With respect to equity in net income of affiliated companies, MGM is expected to have no effect on equity in net income during the fiscal year ending March 31, 2008, due to the fact that Sony no longer has any book basis in MGM as of March 31, 2007.

In August 2004, Sony combined its recorded music business outside of Japan with the recorded music business of Bertelsmann AG forming SONY BMG, after approval from, among others, the European Commission competition authorities. On December 3, 2004, Impala, an international association consisting of 2,500 independent recorded music companies, applied for annulment of the decision to clear the merger. On July 13, 2006, the European Court of First Instance overruled the Commission’s decision to allow the merger to go forward, requiring the Commission to re-examine the merger. The transaction was renotified, in accordance with applicable EU merger control rules, on January 31, 2007, and an in-depth investigation was opened on March 1, 2007. While the Commission completes its reexamination, Sony continues to account for the results of Sony BMG under the equity method.

Commencing April 1, 2006, Sony has partly realigned its product category configuration in the Electronics segment. Accordingly, results for the previous fiscal year have been reclassified. The primary changes are as shown below:

<u>Main Product</u>	<u>Previous Product Category</u>	<u>New Product Category</u>
Low-temperature polysilicon thin film transistor LCD	“Semiconductors”	“Components”
Chemical component	“Other”	“Components”

Products and Services

The following table sets forth Sony's sales and operating revenue by operating segments. Figures in parentheses indicate percentage of sales and operating revenue.

	Fiscal Year Ended March 31					
	2005		2006		2007	
	(Yen in millions)					
Electronics	4,827,663	(67.1)	4,782,173	(63.7)	5,421,384	(65.4)
Game	702,524	(9.8)	918,252	(12.2)	974,218	(11.7)
Pictures	733,677	(10.2)	745,859	(9.9)	966,260	(11.7)
Financial Services	537,715	(7.5)	720,566	(9.6)	624,282	(7.5)
All Other	389,746	(5.4)	343,747	(4.6)	309,551	(3.7)
Sales and operating revenue	<u>7,191,325</u>	<u>(100.0)</u>	<u>7,510,597</u>	<u>(100.0)</u>	<u>8,295,695</u>	<u>(100.0)</u>

Electronics

The following table sets forth Sony's Electronics segment sales and operating revenue by product categories. Figures in parentheses indicate percentage of sales and operating revenue.

	Fiscal Year Ended March 31					
	2005		2006		2007	
	(Yen in millions)					
Audio	571,864	(11.8)	536,187	(11.2)	522,879	(9.7)
Video	1,036,328	(21.5)	1,021,325	(21.4)	1,143,120	(21.1)
Televisions	921,195	(19.1)	927,769	(19.4)	1,226,971	(22.6)
Information and Communications	816,150	(16.9)	842,537	(17.6)	950,461	(17.5)
Semiconductors	184,235	(3.8)	172,249	(3.6)	205,757	(3.8)
Components	751,097	(15.6)	800,716	(16.7)	852,981	(15.7)
Other	546,794	(11.3)	481,390	(10.1)	519,215	(9.6)
Electronics Total	<u>4,827,663</u>	<u>(100.0)</u>	<u>4,782,173</u>	<u>(100.0)</u>	<u>5,421,384</u>	<u>(100.0)</u>

Note:

Sony manages the Electronics segment as a single operating segment. However, Sony believes that the product category information in the Electronics segment is useful to investors in understanding the sales contributions of the products in this business segment.

In the Electronics segment, Sony is engaged in the development, design, manufacture, and sale of various kinds of electronic equipment, instruments and devices for consumer and professional markets. Sony's principal manufacturing facilities are located in Japan, Malaysia, China, the U.S., Singapore, Spain and Mexico, and its products are marketed by sales subsidiaries and unaffiliated local distributors and sold through direct sales via the Internet throughout the world. In addition to internationalizing its production operations, Sony has been promoting the transfer of research and development activities and management functions overseas to bring its overseas operations into closer proximity to local communities and markets.

Audio:

"Audio" includes home audio, portable audio, car audio, and car navigation systems.

Video:

"Video" includes video cameras, digital cameras, DVD-Video players/recorders, Blu-ray disc players/recorders, and video decks.

Televisions:

“Televisions” includes LCD televisions, televisions incorporating cathode ray tubes (“CRTs”), rear-projection televisions, and computer displays.

Information and Communications:

“Information and Communications” includes PCs, printer systems, broadcast- and professional-use audio, video, and monitors and other professional-use equipment.

Semiconductors:

“Semiconductors” includes LCDs, charge coupled devices (“CCDs”), CMOS image sensors, and other semiconductors.

Components:

“Components” includes optical pickups, batteries, audio/video/data recording media, and data recording systems.

Other:

“Other” includes sales to outside customers, such as sales of mobile phone handsets to Sony Ericsson by Sony EMCS Corporation (“Sony EMCS”), CD, DVD, Blu-ray disc manufacturing and physical distribution businesses, and products and services that are not included in the above categories.

Game

Sony Computer Entertainment Inc. (“SCEI”) develops, produces, markets and distributes PlayStation®, PS one™, PlayStation®2 (“PS2”), PSP® (PlayStation®Portable) (“PSP”) and PLAYSTATION®3 (“PS3™”) hardware and related software. Sony Computer Entertainment America Inc. (“SCEA”) and Sony Computer Entertainment Europe Ltd. (“SCEE”) market and distribute PlayStation, PS one, PS2, PSP and PS3 hardware, and develop, produce, market and distribute related software in the U.S. and Europe. SCEI, SCEA and SCEE enter into licenses with third-party software developers.

Pictures

Global operations in the Pictures segment encompass motion picture production, acquisition and distribution; television production, acquisition and distribution; home entertainment production, acquisition and distribution; television broadcasting; digital content creation and distribution; development of new entertainment products and services, and operation of a studio facility.

SPE’s motion picture arm, the Columbia TriStar Motion Picture Group, includes SPE’s principal motion picture production organizations, Columbia Pictures, TriStar Pictures, Screen Gems and Sony Pictures Classics, as well as Sony Pictures Home Entertainment, Sony Pictures Releasing and Sony Pictures Releasing International. SPE also holds a 7.5 percent equity interest in Revolution Studios and has the rights to market and distribute its motion picture product throughout most of the world. Upon delivery of Revolution Studios’ films, SPE advances a portion of the production cost and then incurs distribution and marketing costs in those markets where SPE distributes. SPE retains a fee for its distribution services in addition to its participation in Revolution Studios’ profits and losses as a result of its equity ownership stake. SPE currently expects the initial theatrical release of the final Revolution Studios’ film under this arrangement to be prior to March 31, 2008.

In conjunction with the acquisition of MGM in April 2005 by SCA and its equity partners, SPE entered into agreements to co-finance and produce new motion pictures with MGM and to distribute MGM’s existing film and television content through SPE’s global distribution channels. In June 2006, MGM and SPE modified this arrangement with respect to the co-financing of motion pictures and further to allow MGM to bring its worldwide

television distribution business in-house and to consolidate substantially all of its worldwide home entertainment distribution activities with another major studio.

SPE's Television Group is primarily comprised of Sony Pictures Television and Sony Pictures Television International with various broadcast channel investments. SPE develops and produces network television series, first-run syndication programming, made-for-cable programming, daytime serials, syndicated games shows, animated series, made for television movies, miniseries and other television programming and distributes such programs to the networks, syndication market and cable market.

Sony Pictures Digital operates SPE's digital content creation and distribution businesses including Sony Online Entertainment, as well as operating Sony Pictures Imageworks and Sony Pictures Animation.

SPE manages a studio facility, Sony Pictures Studios, which includes post production facilities, at SPE's world headquarters in Culver City, California. A second studio facility, The Culver Studios, which was owned and operated by SPE, was sold by SPE in April 2004. SPE is leasing back a portion of this facility with the lease term expiring on April 30, 2008.

Financial Services

In the Financial Services segment, on April 1, 2004 Sony established a wholly-owned subsidiary, SFH, a holding company for Sony Life, Sony Assurance Inc. ("Sony Assurance") and Sony Bank Inc. ("Sony Bank"), with the aim of integrating various financial services including insurance, savings and loans, and offering individual customers high value-added products and high-quality services.

Sony conducts insurance operations primarily through Sony Life, a Japanese life insurance company, and Sony Assurance, a Japanese non-life insurance company, both wholly-owned by SFH. Sony also operates an Internet-based banking business in Japan through Sony Bank, which is an 88 percent owned subsidiary of SFH. Aside from SFH, Sony is also engaged in a leasing and credit financing business in Japan through Sony Finance International Inc. ("Sony Finance"), a wholly-owned subsidiary of Sony Corporation.

All Other

All Other is mainly comprised of SMEJ, a Japanese domestic recorded music business that produces recorded music and music videos through contracts with many artists in all musical genres; SMEI's music publishing business, which owns and acquires rights to musical compositions, exploits and markets these compositions and receives royalties or fees for their use; So-net, an Internet-related service business subsidiary operating mainly in Japan; an in-house facilities management business in Japan; a contactless IC card business; and an advertising agency business in Japan.

Sales and Distribution

The following table shows Sony's sales in each of its major markets for the periods indicated. Figures in parentheses indicate the percentage of worldwide sales and operating revenue for which the particular market accounts.

	Fiscal Year Ended March 31					
	2005		2006		2007	
	(Yen in millions)					
Japan	2,132,462	(29.7)	2,203,812	(29.3)	2,127,841	(25.6)
United States	1,977,310	(27.5)	1,957,644	(26.1)	2,232,453	(26.9)
Europe	1,612,576	(22.4)	1,715,775	(22.8)	2,037,658	(24.6)
Other Areas	1,468,977	(20.4)	1,633,366	(21.8)	1,897,743	(22.9)
Sales and operating revenue	7,191,325	(100.0)	7,510,597	(100.0)	8,295,695	(100.0)

Electronics

Sony's electronics products and services are marketed throughout the world under the trademark "Sony," which has been registered in 204 countries and territories.

In most cases, sales of Sony's electronics products are made to sales subsidiaries of Sony Corporation located in or responsible for sales in the countries and territories where Sony's products and services are marketed. These subsidiaries then sell those products to local distributors and dealers. In some regions, sales of certain products and services are made directly to local distributors by Sony Corporation.

Sales in the Electronics segment are particularly seasonal and also vary significantly with the timing of new product introductions and economic conditions of each country. Sales for the third quarter ending December 31 of each fiscal year are generally higher than other quarters of the same fiscal year due to demand in the year-end holiday season.

Japan:

Sony Marketing (Japan) Inc. markets consumer electronics products through retailers and also markets professional electronics products and services. For electronic components, Sony sells products directly to wholesalers and manufacturers.

United States:

Sony markets its electronics products and services through Sony Electronics Inc. and other wholly owned subsidiaries in the U.S.

Europe:

In Europe, Sony's consumer electronics products and services are marketed through several sales subsidiaries including Sony United Kingdom Limited, Sony Deutschland G.m.b.H., and Sony France S.A. Sales of electronics products for professional use, electronic components, and services are made through several divisions, differentiated by product, covering all of Europe.

Other Areas:

In overseas areas other than the U.S. and Europe, Sony's electronics products and services are marketed through sales subsidiaries including Sony Corporation of Hong Kong Limited, Sony Gulf FZE in the United Arab Emirates, Sony Electrónicos de México, S.A. de C.V., Sony of Canada Ltd., and Sony Australia Limited.

Game

SCEI, SCEA, SCEE and subsidiaries in Asia market and distribute PlayStation, PS one, PS2, PSP and PS3 entertainment hardware and related software.

Sales in the Game segment are dependent on the timing of the introduction of attractive software and a significant portion of overall demand is weighted towards the year-end holiday season.

Pictures

SPE, with global operations in 67 countries, generally retains all rights relating to the worldwide distribution of its internally produced motion pictures, including rights for theatrical exhibition, DVD and Blu-ray distribution, pay and free television exhibition and other markets. SPE also acquires distribution rights to motion pictures produced by other companies and jointly produces films with other studios or production companies. These rights may be limited to particular geographic regions, specific forms of media or periods of time. SPE uses its own distribution service business, Sony Pictures Releasing, for the U.S. theatrical release of its films and for the theatrical release of films acquired from and produced by others.

Outside the U.S., SPE generally distributes and markets its films through one of its Sony Pictures Releasing International subsidiaries. In certain countries, however, SPE has joint distribution arrangements with other studios or arrangements with independent local distributors.

SPE's theatrical release strategy focuses on offering a diverse slate of films with a mix of genres, talent and budgets. For the fiscal year ending March 31, 2008, 41 films are currently slated for release by SPE, including nine films under the Columbia banner, five films under the Screen Gems or TriStar banner, 20 Sony Pictures Classics releases, six Revolution Studios releases, and one film from Sony Pictures Animation. SPE has a motion picture library of more than 3,500 feature films, including 12 that have won the Best Picture Academy Award®. Currently, SPE is converting its library (including acquired product) to a digital format and approximately 2,200 titles have been converted. In addition, SPE and four other motion picture studios are equal investors in Movielink LLC, an online download service offering feature films on an on-demand basis.

The worldwide home entertainment distribution of SPE's motion pictures and television programming (and programming acquired or licensed from others) is handled through Sony Pictures Home Entertainment, except in certain countries where SPE has joint distribution arrangements with other studios or arrangements with independent local distributors. Product is distributed on DVD and Blu-ray formats.

SPE produces local language programming in key markets around the world, some of which are co-produced with local partners and sells SPE-owned formats in over 30 countries. This programming, along with SPE's library of television programming and motion pictures, is licensed to affiliated and independent stations and broadcasters in the U.S., and to affiliated and independent international television stations and other broadcasters throughout the world. In the U.S., SPE owns and operates the cable channel GSN (formerly Game Show Network) jointly with Liberty Media Corporation. SPE also has investments in more than 40 international networks, which are available in more than 130 countries worldwide.

Financial Services

Sony Life conducts its life insurance business primarily in Japan. Sony Life's core business is providing death protection and other insurance products to individuals, primarily through a consulting-based sales approach utilizing Lifeplanner®, its highly trained life insurance professionals, and through independent agencies. Sony Life provides tailor-made life insurance products that are optimized for each customer. As of March 31, 2007, Sony Life employed 3,776 Lifeplanner® life insurance professionals. Sony Life maintains an extensive service network including 84 Lifeplanner branch offices, 25 regional sales offices, and 2,186 independent agencies in Japan. In addition, Sony Life has aimed to apply its insurance expertise in countries other than Japan, operating Sony Life Insurance (Philippines) Corporation in the Philippines since November 1999. As part of its plan to expand its sales of individual annuity products, in January 2007 Sony Life announced its intention to establish a new Japanese joint venture with AEGON N.V. The new joint venture is expected to commence operations in 2008, subject to regulatory approval.

Sony Assurance has conducted a non-life insurance business in Japan since October 1999. Sony Assurance's core business is providing automobile insurance and medical and cancer insurance to individual customers, primarily through direct marketing via the telephone and the Internet. The one-to-one relationships Sony Assurance forms with its customers help to provide Sony Assurance with a clear understanding of its customers' opinions and needs, which it can reflect in its product and service offerings.

Sony Bank has conducted banking operations in Japan since June 2001. As an Internet bank focusing on the asset management needs of individual customers, Sony Bank offers an array of products and services including yen and foreign currency deposits, investment trusts, mortgage and other individual loans, and others. By using Sony Bank's transaction channel, the "MONEYKit" service website, account holders can invest and manage assets according to their life plans over the Internet.

Sony Finance conducts a leasing business for corporations, and a consumer financing business including "Sony Card," a credit card for individual customers, through Sony's electronic retailers and other affiliated partners.

All Other

SMEJ produces, markets, and distributes CDs, DVDs, and pre-recorded audio and video software. SMEJ conducts business in Japan under “Sony Records,” “Epic Records,” “Ki/oon Records,” “SMEJ Associated Records,” “Defstar Records,” and other labels.

SMEI owns and acquires rights to musical compositions, exploits and markets these compositions, receives royalties or fees for their use and conducts its music publishing business through a joint venture with a third party investor in countries other than Japan primarily under the Sony/ATV Music Publishing name.

So-net provides Internet broadband network services to subscribers as well as creating and distributing content through its portal service to various platforms including PCs, mobile phones and other home electronics devices including TVs and game consoles.

Sources of Supply

Sony pursues procurement of raw materials, parts and components to be used in the production of its products on a global basis on the most favorable terms that it can achieve. These items are purchased from various suppliers around the world. Generally, Sony maintains multiple suppliers for most significant categories of parts and components.

However, when raw materials, parts and components become scarce, the cost of production rises. For example, the market price of copper has the potential to proportionately affect the cost of parts that utilize copper, such as printed circuit boards and power cables. The price of cobalt, which is used in applications involving lithium-ion batteries as well as a range of recording media, has also been rising and has some impact on the cost of those items. In addition, there is growing concern that the price of resin may rise, which would result in an increase in the cost of plastic parts. With respect to parts and components, LCD panels and memory devices, which are used in multiple applications, can influence Sony’s business performance when the cost of such parts and components fluctuates substantially.

After-Sales Service

In the Electronics and Game segments, Sony provides repair and servicing functions in the areas where its products are sold. Sony provides these services through its own service centers, factories, authorized independent service centers, authorized servicing dealers and subsidiaries.

In line with the industry practices of the electronics and game businesses, almost all of Sony’s products sold in Japan carry a warranty, generally for a period of one year from the date of purchase, covering repairs, free of charge, in the case of a malfunction in the course of ordinary use of the product. In the case of broadcast- and professional-use products, Sony maintains support contracts with customers in addition to warranties. Overseas warranties are generally provided for various periods of time depending on the product and the area in which it is marketed.

To further ensure customer satisfaction, Sony maintains customer information centers in its principal markets.

Patents and Licenses

Sony has a number of Japanese and foreign patents relating to its products. Sony is licensed to use a number of patents owned by others, covering a wide range of products. Certain licenses are important to Sony’s business, such as that for optical disc related and Digital TV products. With respect to optical disc related products, Sony products that employ DVD-Video player functions, including PS2 and PS3 hardware, are substantially dependent upon certain patents licensed by MPEG LA LLC, Dolby Laboratories Licensing Corporation and Nissim Corp. These patents relate to technologies essential to DVD specification. Sony’s Digital TV products are substantially dependent upon certain patents licensed by Thomson Licensing Inc. Sony considers its overall license position beneficial to its operations. While Sony believes that its various proprietary intellectual property rights are important to its success, it believes that neither its business as a whole nor any business segment is materially dependent on any particular patent or license, or any particular group of patents or licenses, except as set forth above.

Competition

In each of its principal product lines, Sony encounters intense competition throughout the world. Sony believes, however, that in the aggregate it competes successfully and has a major position in all of the principal product lines in which it is engaged, although the strength of its position varies with products and markets. Refer to “Risk Factors” in “Item 3. *Key Information.*”

In the Electronics segment, Sony believes that its product planning and product design expertise, the high quality of its products, its record of innovative product introductions and product improvements, its price competitiveness derived from reductions in manufacturing and indirect costs, and its extensive marketing and servicing efforts are important factors in maintaining its competitive position.

The Game segment is in a historically volatile and highly dynamic industry, and SCEI’s competitive position is affected by changing technology and product introductions, limited platform life cycles, popularity of software titles, seasonality, consumer spending and other economic trends. To be successful in the game industry, it is important to win customer acceptance of SCEI’s platforms.

In the Pictures segment, SPE faces intense competition from other major motion picture studios and, to a lesser extent, from independent production companies. SPE must compete to obtain story rights and talent, including writers, actors, directors and producers, which are essential to the success of SPE’s products. SPE also competes with alternative forms of entertainment to attract the attention of audiences worldwide and to obtain exhibition and distribution outlets and optimal release dates for its products. Competition in television production, distribution, and syndication is also intense because available broadcast time is limited and the audience is increasingly fragmented among broadcast networks, cable, and other independent television stations both in the U.S. and internationally. Furthermore, broadcast networks are increasingly producing their own shows internally. This competitive environment has resulted in fewer opportunities to produce shows for networks and a shorter lifespan for ordered shows that do not immediately achieve favorable ratings.

In the Financial Services segment, Sony Life, Sony Assurance and Sony Bank have each established highly effective marketing channels. Sony Life differentiates itself through its Lifeplanner® consulting-based sales approach and the training and expertise of this sales force contributes not only to growth in new insurance policies but also to creating long-term customer relationships. Sony Assurance’s direct marketing approach makes efficient use of technology to communicate directly with customers resulting in customer-friendly and cost-effective service offerings and Sony Assurance has maintained a leading position in the direct-marketing segment of Japan’s automobile insurance market. Sony Bank has made use of the Internet to offer a steadily expanding menu of investment products and loans to individuals. Each of Sony Life, Sony Assurance, and Sony Bank proactively solicits feedback from its customers and continually strives to improve its level of service. This customer-centric service culture is reflected in high customer satisfaction rankings.

In the Financial Services segment, it is important to maintain a strong and healthy financial foundation for the business as well as to meet diversifying customer needs. Sony Life has maintained a high solvency margin ratio, relative to Japanese domestic criteria that require the maintenance of a minimum solvency margin ratio. Sony Assurance also has maintained a high solvency margin ratio relative to the aforementioned Japanese domestic criteria. Sony Bank has strengthened its financial base and has maintained an adequate capital adequacy ratio relative to the Japanese domestic criteria concerning this ratio.

In addition, Sony Finance faces competitive pressure to achieve a leading position in the new arena of secure payment systems on the Internet by utilizing new technology.

Within All Other, success at SMEJ is dependent to a large extent upon the artistic and creative abilities of employees and outside talent and is subject to the vagaries of public taste. SMEJ’s future competitive position depends on its continuing ability to attract and develop artists who can achieve a high degree of public acceptance. So-net faces competition in Japan from many existing large companies, as well as from new entrants to the market. Telecommunications companies that possess a large Internet-ready infrastructure and other entrants that compete solely on the basis of price have created a market in which competitive price reductions are the norm. Rapid technological advancement has created many new opportunities but it has also increased the rate at which new and more efficient services must be brought to market to earn customer approval. Customer price elasticity is high, and

users are able to change Internet service providers with increasing ease. The penetration of mobile Internet services provided by telecommunications companies may also provide a substitute to the home-centric Internet service provided by So-net.

Government Regulations

Sony's business activities are subject to various governmental regulations in the different countries in which it operates, including regulations relating to business/investment approvals, trade affairs including customs and export control, competition and antitrust, intellectual property, consumer and business taxation, foreign exchange controls, personal information protection, product safety, occupational health, and environmental and recycling requirements.

In Japan, the insurance and banking businesses are subject to approvals and oversight from the Financial Services Agency under the Insurance Business Law and the Banking Law, respectively. In addition, the telecommunication businesses are subject to approvals from the Ministry of Internal Affairs and Communications.

Also refer to "Risk Factors" in "Item 3. *Key Information.*"

Organizational Structure

The following table sets forth the significant subsidiaries owned, directly or indirectly, by Sony Corporation.

<u>Name of company</u>	<u>Country of incorporation</u>	<u>(As of March 31, 2007) Percentage owned</u>
Sony EMCS Corporation	Japan	100.0
Sony Semiconductor Kyushu Corporation	Japan	100.0
Sony Marketing (Japan) Inc.	Japan	100.0
Sony Computer Entertainment Inc.	Japan	100.0
Sony Financial Holdings Inc.	Japan	100.0
Sony Life Insurance Co., Ltd.	Japan	100.0
Sony Music Entertainment (Japan) Inc.	Japan	100.0
Sony Americas Holding Inc.	U.S.A.	100.0
Sony Corporation of America	U.S.A.	100.0
Sony Electronics Inc.	U.S.A.	100.0
Sony DADC US Inc.	U.S.A.	100.0
Sony Computer Entertainment America Inc.	U.S.A.	100.0
Sony Pictures Entertainment Inc.	U.S.A.	100.0
Sony Europe Holding B.V.	Netherlands	100.0
Sony Europe G.m.b.H.	Germany	100.0
Sony United Kingdom Ltd.	U.K.	100.0
Sony Computer Entertainment Europe Ltd.	U.K.	100.0
Sony Global Treasury Services Plc	U.K.	100.0
Sony Holding (Asia) B.V.	Netherlands	100.0
Sony Overseas S.A.	Switzerland	100.0
Sony Electronics Asia Pacific Pte. Ltd.	Singapore	100.0

Property, Plant and Equipment

Sony has a number of offices, plants and warehouses throughout the world. Most of the buildings in, and land on, which they are located are owned by Sony, free from significant encumbrances.

The following table sets forth information as of March 31, 2007 with respect to plants used for the manufacturing of products for the Electronics segment and for the Game segment with floor space of more than 500,000 square feet:

<u>Location</u>	<u>Approximate floor space (square feet)</u>	<u>Principal products manufactured</u>
In Japan:		
Nagasaki (Sony Semiconductor Kyushu Corporation — Nagasaki TEC)	2,232,000	CMOS image sensors and other semiconductors
Kumamoto (Sony Semiconductor Kyushu Corporation — Kumamoto TEC)	2,104,000	LCDs, CCDs, CMOS image sensors and other semiconductors
Kagoshima (Sony Semiconductor Kyushu Corporation — Kagoshima TEC)	1,783,000	LCDs, CCDs, CMOS image sensors and other semiconductors
Kohda, Aichi (Sony EMCS Corporation — Kohda TEC)	963,000	Video cameras, digital cameras, and Memory Sticks
Inazawa, Aichi (Sony EMCS Corporation — Inazawa TEC)	864,000	LCD televisions
Kanuma, Tochigi (Sony Chemicals & Information Device Corporation)	791,000	Magnetic tapes, adhesives, and electronic components
Tochigi, Tochigi (Sony Energy Devices Corporation)	609,000	Magnetic and optical storage media and batteries
Koriyama, Fukushima (Sony Energy Devices Corporation)	581,000	Batteries
Kosai, Shizuoka (Sony EMCS Corporation — Kosai TEC)	566,000	Broadcast- and professional-use video equipment
Minokamo, Gifu (Sony EMCS Corporation — Minokamo TEC)	543,000	Video cameras, digital cameras, mobile phone handsets, and modules
Kisarazu, Chiba (Sony EMCS Corporation — Kisarazu TEC)	502,000	DVD-Video Recorders
Overseas:		
Pittsburgh, Pennsylvania, U.S.A. (Sony Electronics Inc.)	2,820,000	Rear-projection televisions
Huizhou, China (Sony Precision Devices (Huizhou) Co., Ltd.)	1,329,000	Optical pickups

<u>Location</u>	<u>Approximate floor space (square feet)</u>	<u>Principal products manufactured</u>
Terre Haute, Indiana, U.S.A. (Sony DADC US Inc.)	1,255,000	CDs, CD-ROMs, DVDs, DVD-ROMs, and Blu-ray Discs
Wuxi, China (Sony Electronics (Wuxi) Co., Ltd., Sony Digital Products (Wuxi) Co., Ltd. and Sony (China) Ltd.)	1,202,000	Batteries, LCD televisions, PCs, and digital cameras
Penang, Malaysia (Sony EMCS (Malaysia) Sdn. Bhd. — PG TEC)	988,000	Audio equipment and data recording systems
Tijuana, Mexico (Sony de Tijuana Este, S.A. de C.V.)	935,000	LCD televisions, rear projection televisions, TV tuners, and audio equipment
Dothan, Alabama, U.S.A. (Sony Electronics Inc.)	809,000	Magnetic tape products
Bangi, Malaysia (Sony EMCS (Malaysia) Sdn. Bhd. — KL TEC)	797,000	CRT televisions, rear projection televisions, TV tuners, and DVD-Video players
Jurong, Singapore (Sony Display Device (Singapore))	786,000	CRTs
San Diego, California, U.S.A. (Sony Electronics Inc.)	658,000	PCs
Nuevo Laredo, Mexico (Sony Electronics Inc.)	587,000	Magnetic storage media and batteries
Pitman, New Jersey, U.S.A. (Sony Music Entertainment Inc.)	568,000	CDs, CD-ROMs, DVDs, and DVD-ROMs
Viladecavallas, Spain (Sony Espana, S.A.)	566,000	LCD televisions, TV components, and projectors

Sony plans to invest 130 billion yen during the fiscal year ending March 31, 2008, compared to 150 billion yen in the previous fiscal year in semiconductor fabrication facilities and equipment. This investment includes investment in production capacity for CMOS image sensors.

In addition to the facilities above, Sony has a number of other plants for electronic products throughout the world. Sony owns research and development facilities, and employee housing and recreation facilities, as well as Sony Corporation's headquarters buildings in Tokyo, Japan, where administrative functions and product development activities are carried out. SCEI leases its corporate headquarters buildings located in Tokyo, where administrative functions, product development, and software development are carried out. SCEA and SCEE lease their offices in the U.S. and Europe, respectively.

SPE's corporate offices and motion picture and television production facilities are headquartered in Culver City, California, where it owns and operates a studio facility, Sony Pictures Studios. A second studio facility, The Culver Studios, which was owned and operated by SPE was sold by SPE in April 2004. SPE is leasing back a portion

of this facility with the lease term expiring on April 30, 2008. SPE also leases office space and motion picture and television support facilities from affiliates of Sony Corporation and other third parties in various worldwide locations. SPE's film and videotape storage operations are located in various leased locations in the U.S. and Europe.

Most of SMEJ's offices, including leased premises, are located in Tokyo, Japan.

In December 2001, SCA entered into a lease with a Variable Interest Entity, which is consolidated by Sony, for its corporate headquarters. Sony has the option to purchase the building at any time during the lease term which expires in December 2008. The aggregate floor space of this building is approximately 723,000 square feet.

Item 5. *Operating and Financial Review and Prospects*

OPERATING RESULTS

Operating Results for the Fiscal Year Ended March 31, 2007 compared with the Fiscal Year Ended March 31, 2006

Overview

Sony's sales and operating revenue ("sales") for the fiscal year ended March 31, 2007 increased 10.5 percent compared with the previous fiscal year. Sales within the Electronics segment, the Game segment and the Pictures segment increased while Financial Services revenue decreased. In the Electronics segment, although there was a decline in sales of such products as cathode ray tube ("CRT") televisions, sales to outside customers increased 13.4 percent compared with the previous fiscal year mainly due to an increase in sales of liquid crystal display ("LCD") televisions. Sales within the Game segment increased 6.1 percent compared to the previous fiscal year as a result of the launch of the PLAYSTATION®3 ("PS3") in Japan, North America and Europe. In the Pictures segment, sales increased 29.5 percent compared to the previous fiscal year due to higher worldwide theatrical and home entertainment revenue from films released in the fiscal year ended March 31, 2007 as compared to those released in the previous fiscal year. Revenues decreased 12.6 percent within the Financial Services segment primarily due to lower valuation gains in the general account and the separate account at Sony Life, compared to the previous fiscal year, when there was a significant increase in the Japanese stock market.

Operating income decreased 68.3 percent compared with the previous fiscal year. The operating income for the previous fiscal year included a one time net gain of 73.5 billion yen resulting from the transfer to the Japanese government of the substitutional portion of Sony's Employee Pension Fund, of which 64.5 billion yen was recorded within the Electronics segment. During the fiscal year ended March 31, 2007, Sony recorded a 51.2 billion yen provision that relates to the recalls by Dell Inc., Apple Inc. and Lenovo, Inc. of notebook computer battery packs that use lithium-ion battery cells manufactured by Sony and the subsequent global replacement program initiated by Sony for certain notebook computer battery packs used by Sony and several other notebook computer manufacturers that use lithium-ion battery cells manufactured by Sony. Despite the recording of this provision, operating income within the Electronics segment increased 2,167.4 percent mainly as a result of an increase in sales to outside customers and a positive impact from the depreciation of the yen versus the U.S. dollar and the Euro. In the Game segment, an operating loss was recorded in the fiscal year ended March 31, 2007 as a result of the sale of the PS3 at strategic price points lower than its production cost during the introductory period. In the Pictures segment, operating income increased 55.7 percent compared with the previous fiscal year due to strong worldwide theatrical and home entertainment revenue on feature films released in the current fiscal year. In the Financial Services segment, operating income decreased 55.3 percent compared with the previous fiscal year as a result of decreased valuation gains from investments in the general account, including valuation gains from convertible bonds at Sony Life Insurance Co., Ltd. ("Sony Life").

Operating income in the fiscal year ended March 31, 2007 included a gain on the sale of a portion of the site of Sony's former headquarters in the amount of 21.7 billion yen, of which 2.6 billion yen was recorded within All

Other and the remaining amount was recorded in "Corporate." Operating income related to an additional gain on sale for the remaining portion of the site under contract, which is expected to be recognized in the fiscal year ending March 31, 2008 is estimated to be approximately 59.0 billion yen, and this entire amount will be recorded in "Corporate."

Operating income for the fiscal year ended March 31, 2007 was negatively affected by the recording of certain provisions for outstanding legal proceedings including the European Commission's investigation in connection with professional videotape claims, partially offset by the reversal of a portion of provisions related to the resolution of certain patent claims recorded in prior periods.

Restructuring

In the fiscal year ended March 31, 2007, Sony recorded restructuring charges of 38.8 billion yen, a decrease from the 138.7 billion yen recorded in the previous fiscal year. The primary restructuring activities were in the Electronics segment.

Of the total 38.8 billion yen, Sony recorded 10.8 billion yen in personnel-related costs including early retirement programs.

Electronics

Restructuring charges in the Electronics segment for the fiscal year ended March 31, 2007 were 37.4 billion yen, compared to 125.8 billion yen in the previous fiscal year.

Due to the worldwide market shrinkage as a result of demand shift from CRT televisions to LCD and plasma televisions, Sony has been implementing a worldwide plan to rationalize CRT and CRT television production facilities and has been downsizing its business over several years. As a part of this restructuring program, in the fiscal year ended March 31, 2007 Sony recorded a non-cash impairment charge of 1.7 billion yen for CRT television manufacturing facilities located in the U.S. The impairment charge was calculated as the difference between the carrying value of the asset and the present value of estimated future cash flows. The charge was recorded in loss on sale, disposal or impairment of assets, net in the consolidated statements of income. While continuing to manufacture and sell CRT televisions in countries and territories where demand remains, Sony is actively shifting its focus in those areas to LCD televisions. As a result, Sony plans to cease manufacturing CRTs by March 2008, after it has stockpiled a sufficient quantity for future use.

As a result of the contraction of the European rear projection television market, Sony has decided to discontinue the production of LCD rear projection televisions in Europe. In association with this action, Sony has recorded inventory writedowns and charges for supplier claims of 3.8 billion yen for the fiscal year ended March 31, 2007, with most of these expenses being recorded as cost of sales in the consolidated statements of income.

In addition to the above restructuring efforts, Sony undertook headcount reduction programs to further reduce operating costs in the Electronics segment. As a result of these programs, Sony recorded restructuring charges of 9.7 billion yen for the fiscal year ended March 31, 2007, and these charges were included in selling, general and administrative expenses in the consolidated statements of income. The remaining liability balance as of March 31, 2007 was 7.2 billion yen and will be paid through the fiscal year ending March 31, 2008.

For more detailed information about restructuring, please refer to Note 17 of Notes to the Consolidated Financial Statements.

Operating Performance

	Fiscal Year Ended March 31		Percent change
	2006	2007	
	(Yen in billions)		
Sales and operating revenue	7,510.6	8,295.7	+10.5%
Operating income	226.4	71.8	-68.3
Income before income taxes	286.3	102.0	-64.4
Equity in net income of affiliated companies	13.2	78.7	+496.9
Net income	123.6	126.3	+2.2

Sales

Sales for the fiscal year ended March 31, 2007 increased by 785.1 billion yen, or 10.5 percent, to 8,295.7 billion yen compared with the previous fiscal year. A further breakdown of sales figures is presented under “*Operating Performance by Business Segment*” below.

“Sales” in this analysis of the ratio of cost of sales, including research and development costs, and selling, general and administrative expenses to sales refers only to the “net sales” and “other operating revenue” portions of consolidated sales and operating revenue, and excludes financial service revenue. This is because financial service expenses are recorded separately from cost of sales and selling, general and administrative expenses. The calculations of all ratios below that pertain to business segments include intersegment transactions.

Cost of Sales and Selling, General and Administrative Expenses

Cost of sales for the fiscal year ended March 31, 2007 increased by 738.2 billion yen, or 14.3 percent, to 5,889.6 billion yen compared with the previous fiscal year, and increased from 75.9 percent to 76.8 percent as a percentage of sales. Year on year, the cost of sales ratio decreased from 80.6 percent to 78.8 percent in the Electronics segment, increased from 80.4 percent to 102.8 percent in the Game segment, and increased from 60.2 percent to 60.3 percent in the Pictures segment.

In the Electronics segment, there was an improvement in the cost of sales ratio for several products, in particular digital cameras, LCD televisions and video cameras. In the Game segment, there was a deterioration in the cost of sales ratio. This deterioration was primarily the result of the loss arising from the sale of the PS3 at strategic price points lower than its production cost during the introductory period, as well as the recording of other charges in association with preparation for the launch of the PS3 platform. In the Pictures segment, operating income increased due to substantially higher revenue. However, the cost of sales ratio was flat compared to the previous fiscal year due to the recording of production expenses associated with several new network television shows in the television business in the current fiscal year and the absence of a licensing agreement extension for *Wheel of Fortune*, which was recognized in the previous fiscal year.

The personnel-related costs included in cost of sales were 457.3 billion yen, an increase of 1.0 billion yen, primarily recorded within the Electronics segment.

Research and development costs (all research and development costs are included within cost of sales) for the fiscal year ended March 31, 2007 increased by 12.1 billion yen to 543.9 billion yen compared with the previous fiscal year. The ratio of research and development costs to sales was 7.1 percent compared to 7.8 percent in the previous fiscal year.

Selling, general and administrative expenses for the fiscal year ended March 31, 2007 increased by 261.4 billion yen, or 17.1 percent, to 1,788.4 billion yen compared with the previous fiscal year. The ratio of selling, general and administrative expenses to sales increased from 22.5 percent in the previous fiscal year to 23.3 percent. Year on year, the ratio of selling, general and administrative expenses to sales increased from 18.0 percent to 18.2 percent in the Electronics segment and from 18.7 percent to 20.0 percent in the Game segment. On the other hand, the ratio of selling, general and administrative expenses to sales decreased from 36.0 percent to 35.2 percent in the Pictures segment.

Personnel-related costs in selling, general and administrative expenses increased by 54.4 billion yen compared with the previous fiscal year mainly due to the recording of a gain resulting from the transfer to the Japanese government of the substitutional portion of Sony's employee pension fund in the previous fiscal year. In addition, advertising and publicity expenses for the fiscal year increased by 86.0 billion yen compared with the previous fiscal year primarily due to increased advertising and publicity expenses within the Pictures segment.

Loss on sale, disposal or impairment of assets, net was 5.8 billion yen, compared with 73.9 billion yen in the previous fiscal year. This decrease was mainly due to losses on the sale, disposal and impairment of CRT and CRT television production equipment in the Electronics segment, as well as an asset impairment write-down associated with the sale of the Metreon, a U.S. entertainment complex, in the previous fiscal year.

Operating Income

Operating income for the fiscal year ended March 31, 2007 decreased by 154.7 billion yen, or 68.3 percent, to 71.8 billion yen compared with the previous fiscal year. The operating income margin decreased from 3.0 percent to 0.9 percent. In descending order by amount of financial impact, the Electronics segment, Financial Services segment, the Pictures segment and All Other contributed to operating income. On the other hand, an operating loss was recorded within the Game segment primarily due to a loss arising from the sale of the PS3 at strategic price points lower than its production cost during the introductory period, as well as the recording of other charges in association with preparation for the launch of the PS3 platform. For a further breakdown of operating income (loss) for each segment, please refer to "Operating Performance by Business Segment" below.

Other Income and Expenses

For the fiscal year ended March 31, 2007, other income decreased by 23.3 billion yen, or 19.6 percent, to 95.2 billion yen, while other expenses increased by 6.4 billion yen, or 10.9 percent, to 64.9 billion yen, compared with the previous fiscal year. The net amount of other income and other expenses was net other income of 30.3 billion yen, a decrease of 29.6 billion yen, compared with the previous fiscal year.

The gain on change in interest in subsidiaries and equity investees decreased by 29.3 billion yen, or 48.2 percent compared to the previous fiscal year, to 31.5 billion yen. During the fiscal year ended March 31, 2007, there was a gain recorded on the sale of a portion of the stock held in StylingLife Holdings Inc. ("StylingLife"). However, the total gain on change in ownership interests declined as Sony recorded a gain on change in interest of 60.8 billion yen in the previous fiscal year resulting from the initial public offering of So-net Entertainment Corporation ("So-net"), and the sale of a portion of the stock held in both Monex Beans Holdings, Inc., and So-net M3 Inc., a consolidated subsidiary of So-net.

Interest and dividends in other income of 28.2 billion yen was recorded in the fiscal year ended March 31, 2007, an increase of 3.3 billion yen, or 13.2 percent, compared with the previous year. For the fiscal year ended March 31, 2007, interest expense totaling 27.3 billion yen was recorded, a decrease of 1.7 billion yen, or 5.9 percent, compared with the previous year.

In addition, a net foreign exchange loss of 18.8 billion yen was recorded in the fiscal year ended March 31, 2007, an increase of 15.8 billion yen from the previous fiscal year. The net foreign exchange loss was recorded because the value of the yen, especially during the second through fourth quarters of the fiscal year ended March 31, 2007, was lower than the value of the yen at the time that Sony entered into foreign exchange forward contracts and foreign currency option contracts. These contracts are entered into by Sony to mitigate the foreign exchange rate risk to cash flows that arises from settlements of foreign currency denominated accounts receivable and accounts payable, as well as foreign currency denominated transactions between consolidated subsidiaries.

Income before Income Taxes

Income before income taxes for the fiscal year ended March 31, 2007 decreased 184.3 billion yen, or 64.4 percent, to 102.0 billion yen compared with the previous fiscal year, as a result of the decrease in operating income and the decrease in the net amount of other income and other expenses mentioned above.

Income Taxes

During the fiscal year ended March 31, 2007, Sony recorded 53.9 billion yen of income taxes at an effective tax rate of 52.8 percent. This effective tax rate exceeded the Japanese statutory tax rate as a result of the recording of losses by certain overseas subsidiaries with tax rates that are lower than the rate in Japan. The effective tax rate was 61.6 percent in the previous fiscal year and exceeded the Japanese statutory tax rate due to the recording of additional valuation allowances against deferred tax assets by Sony Corporation and several of Sony's Japanese and overseas consolidated subsidiaries due to continued losses recorded by these entities and the recording of an additional tax provision for the undistributed earnings of overseas subsidiaries.

Results of Affiliated Companies Accounted for under the Equity Method

Equity in net income of affiliated companies during the fiscal year ended March 31, 2007 was 78.7 billion yen, an increase of 65.5 billion yen, or 496.9 percent compared to the previous fiscal year. Equity in net income of affiliated companies reported for Sony Ericsson Mobile Communications AB ("Sony Ericsson") was 85.3 billion yen, an increase of 56.3 billion yen compared to the previous fiscal year, due to the increase in sales of hit models such as "Walkman®" and "Cyber-shot" phones. Sony recorded equity in net income of 5.0 billion yen for SONY BMG MUSIC ENTERTAINMENT ("SONY BMG"), a decrease of 0.8 billion yen compared to the previous fiscal year. Although there was a favorable impact due to an industry-related legal settlement, a year-on-year reduction in restructuring charges, and reductions in overhead costs from continued restructuring, sales declined due to the accelerated decline in the worldwide physical music market. Sony recorded equity in net income of 6.4 billion yen (before the elimination of unrealized intercompany profits of 1.4 billion yen), a 13.6 billion yen improvement compared to the prior fiscal year, for S-LCD Corporation ("S-LCD"), a joint-venture with Samsung Electronics Co., Ltd. ("Samsung") for the manufacture of amorphous thin film transistor ("TFT") LCD panels. Sony recorded equity in net loss of 18.9 billion yen for Metro-Goldwyn-Mayer Inc. ("MGM"), an increase in the amount of equity in net loss of 2.0 billion yen compared to the previous fiscal year. The equity in net loss for MGM includes non-cash interest expense of 9.6 billion yen on cumulative preferred stock compared to the 6.0 billion yen of non-cash interest expense on cumulative preferred stock recorded in the previous fiscal year. With respect to equity in net income of affiliated companies, MGM is expected to have no effect on equity in net income or loss during the fiscal year ending March 31, 2008, due to the fact that Sony no longer has any book basis in MGM as of March 31, 2007.

Minority Interest in Income (Loss) of Consolidated Subsidiaries

In the fiscal year ended March 31, 2007, minority interest in income of consolidated subsidiaries of 0.5 billion yen was recorded compared to minority interest in loss of 0.6 billion yen in the previous year.

Net Income

Net income for the fiscal year ended March 31, 2007 increased by 2.7 billion yen, or 2.2 percent, to 126.3 billion yen compared with the previous fiscal year. Despite the decrease in income before income taxes, net income increased mainly due to the decrease of income taxes and increase in equity in net income of affiliated companies. As a percentage of sales, net income decreased from 1.6 percent to 1.5 percent. Return on stockholders' equity decreased from 4.1 percent to 3.8 percent. (This ratio is calculated by dividing net income by the simple average of stockholders' equity at the end of the previous fiscal year and at the end of the fiscal year ended March 31, 2007.)

Basic net income per share was 126.15 yen compared with 122.58 yen in the previous fiscal year, and diluted net income per share was 120.29 yen compared with 116.88 yen in the previous fiscal year. Refer to Notes 2 and 21 of Notes to Consolidated Financial Statements.

Operating Performance by Business Segment

The following discussion is based on segment information. Sales and operating revenue in each business segment include intersegment transactions. Refer to Note 24 of Notes to Consolidated Financial Statements.

Business Segment Information

	Fiscal Year Ended March 31		Percent change
	2006	2007	
	(Yen in billions)		
Sales and operating revenue			
Electronics	5,176.4	6,050.5	+16.9%

Electronics

Sales and operating revenue for the fiscal year ended March 31, 2007 increased 874.1 billion yen, or 16.9 percent, to 6,050.5 billion yen compared with the previous fiscal year. Operating income increased by 149.8 billion yen, or 2,167.4 percent, to 156.7 billion yen compared with the previous fiscal year and the operating income to sales ratio increased from 0.1 percent to 2.6 percent. Sales to outside customers on a yen basis increased 13.5 percent compared to the previous fiscal year. Regarding sales to outside customers by geographical area, sales increased by 7 percent in Japan, by 9 percent in the U.S., by 24 percent in Europe, and by 14 percent in non-Japan Asia and other geographic areas (“Other Areas”).

In Japan, there was a significant increase in the sales of mobile phones, principally to Sony Ericsson, and LCD televisions, while sales decreased for DVD-Video recorders, personal computers (“PCs”) and CRT televisions. In the U.S., sales of LCD televisions significantly increased, while sales decreased for rear projection and CRT televisions. In Europe, sales increased for LCD televisions and PCs, while sales declined for CRT televisions and home-use video cameras. In Other Areas, sales of LCD televisions and digital cameras increased, while sales of mobile phones, primarily to Sony Ericsson, and CRT televisions decreased. The decrease in sales of mobile phones

was due to the impact of the deconsolidation resulting from the transfer to Sony Ericsson in the previous fiscal year of the stock of a Chinese subsidiary that mainly assembled mobile phones.

Performance by Product Category

Sales and operating revenue by product category discussed below represent sales to outside customers, which do not include intersegment transactions. Refer to Note 24 of Notes to Consolidated Financial Statements.

“Audio” sales decreased by 13.3 billion yen, or 2.5 percent, to 522.9 billion yen. Sales of flash memory and hard drive digital audio players decreased due to a change in model mix, as unit shipments of approximately 4.5 million units were flat compared to the previous fiscal year. On the other hand, there was a significant decrease in sales of both CD and MiniDisc (“MD”) format headphone stereos due to a shift in market demand. However, car audio and home audio sales increased.

“Video” sales increased by 121.8 billion yen, or 11.9 percent, to 1,143.1 billion yen. Sales of digital cameras increased in Japan, the U.S. and Europe. Worldwide shipments of digital cameras increased by approximately 3.5 million units to approximately 17.0 million units. Sales of DVD recorders decreased as worldwide shipments decreased by approximately 150,000 units to approximately 1.85 million units. Worldwide shipments of home-use video cameras decreased by approximately 150,000 units to approximately 7.45 million units. DVD-Video player unit shipments decreased by approximately 100,000 units to approximately 7.9 million units.

“Televisions” sales increased by 299.2 billion yen, or 32.2 percent, to 1,227.0 billion yen. There was a significant increase in worldwide sales of LCD televisions, as worldwide shipments of LCD televisions increased by approximately 3.5 million units, to approximately 6.3 million units. Sales of LCD rear projection televisions decreased significantly as a result of declining sales prices, despite an increase in worldwide shipments of approximately 50,000 units, as compared to the previous fiscal year, to approximately 1.10 million units. There was also a significant decrease in worldwide sales of CRT televisions, primarily as a result of a decrease in worldwide shipments of CRT televisions by approximately 2.1 million units to approximately 4.7 million units.

“Information and Communications” sales increased by 107.9 billion yen, or 12.8 percent, to 950.5 billion yen. Sales of PCs increased due to strong sales in Europe and Other Areas, and overall sales of PCs increased. Worldwide unit shipments of PCs increased approximately 300,000 units to approximately 4.0 million units. Sales of broadcast- and professional-use products increased as a result of favorable sales of high-definition related products.

“Semiconductors” sales increased by 33.5 billion yen, or 19.5 percent, to 205.8 billion yen. The increase was due to an increase in sales of charged coupled devices (“CCDs”) and CMOS image sensors.

“Components” sales increased by 52.3 billion yen, or 6.5 percent, to 853.0 billion yen. This increase was primarily due to an increase in sales of lithium-ion batteries, primarily for use in PCs and power tools, and Memory Sticks. On the other hand, sales of CD-R/RW drives and optical pickups declined, primarily as a result of significant unit price declines. Sales of DVD+/-R/RW drives increased, despite a deterioration in unit selling prices, as a result of a significant growth in units sold in association with the expansion of the market.

“Other” sales increased by 37.8 billion yen, or 7.9 percent, to 519.2 billion yen. This increase was the result of an increase in sales of mobile phones, primarily to Sony Ericsson.

In the Electronics segment, cost of sales for the fiscal year ended March 31, 2007 increased by 594.4 billion yen, or 14.2 percent to 4,769.0 billion yen compared with the previous fiscal year. The cost of sales ratio improved by 1.8 percentage points to 78.8 percent compared to 80.6 percent in the previous fiscal year. There was also an improvement in the cost of sales ratio for such products as digital cameras, LCD televisions and home-use video cameras, although the cost of sales ratio deteriorated for products such as LCD rear projection televisions due to sales price reductions associated with severe sales competition in North America. Restructuring charges recorded in cost of sales amounted to 12.6 billion yen, a decrease of 11.2 billion yen compared with the 23.8 billion yen recorded in the previous fiscal year. Research and development costs increased 22.2 billion yen, or 5.3 percent, from 418.1 billion yen in the previous fiscal year to 440.4 billion yen.

Selling, general and administrative expenses increased by 170.6 billion yen, or 18.3 percent to 1,101.7 billion yen compared with the previous fiscal year. A provision of 51.2 billion yen was recorded for the fiscal year ended

March 31, 2007 for recalls by Dell Inc., Apple Inc. and Lenovo, Inc. of notebook computer battery packs that use lithium-ion batteries manufactured by Sony as well as the subsequent global replacement program initiated by Sony for certain notebook computer battery packs used by Sony and several other notebook computer manufacturers that use lithium-ion battery cells manufactured by Sony. Also, an additional provision was recorded due to the expansion of models subject to free repairs and an extension of the repair period for Sony products and the products of other companies that are equipped with Sony CCDs. Results for the Electronics segment were also negatively impacted by an adjustment to reflect a more accurate method of calculating the provision for free repairs of Sony CCDs, which had the effect of further increasing the provision. Although there was a reversal of a portion of provisions related to the resolution of certain patent claims recorded in prior periods, this reversal was more than offset by the negative impact of the recording of certain provisions for outstanding legal proceedings including the European Commission's investigation in connection with professional videotape claims. Finally, a 64.5 billion yen gain recorded as a result of the transfer to the Japanese government of the substitutional portion of Sony's Employee Pension Fund was included in the previous fiscal year. Total selling, general and administrative expenses increased because the cumulative impact of the above-mentioned items exceeded the decrease in restructuring charges that were recorded in selling, general and administrative expenses for the fiscal year ended March 31, 2007. Of the restructuring charges recorded in the Electronics segment, the amount recorded in selling, general and administrative expenses decreased by 35.5 billion yen from 49.5 billion yen in the previous fiscal year to 14.0 billion yen. Of the restructuring charges recorded in selling, general and administrative expenses, the amount recorded for headcount reductions, including reductions through the early retirement program, was 9.7 billion yen, a decrease of 35.4 billion yen compared with the previous fiscal year. The ratio of selling, general and administrative expenses to sales increased 0.2 percentage points from the 18.0 percent recorded in the previous fiscal year to 18.2 percent.

Loss on sale, disposal or impairment of assets, net decreased 12.3 billion yen to 10.8 billion yen compared with the previous fiscal year. This amount includes 10.8 billion yen of restructuring charges, including 5.2 billion yen of restructuring charges related to the recording of an impairment loss for goodwill for a CRT television glass manufacturing subsidiary in the U.S. The amount of restructuring charges included in loss on sale, disposal or impairment, net in the previous fiscal year was 52.5 billion yen.

The amount of operating income recorded in the Electronics segment for the fiscal year ended March 31, 2007, increased significantly due to an increase in sales to outside customers and the positive impact of the depreciation of the yen. This result is in spite of the above-mentioned recording by Sony of a 51.2 billion yen provision that relates to recalls of notebook computer battery packs and the subsequent global replacement program and the recording of an additional provision related to free repairs of Sony CCDs. The operating income from the previous year included a 64.5 billion yen gain that was recorded as a result of the transfer to the Japanese government of the substitutional portion of Sony's Employee Pension Fund. Regarding profit performance by product, excluding restructuring charges and the impact of the net gain resulting from the transfer to the Japanese government of the substitutional portion of Sony's Employee Pension Fund, digital cameras and LCD televisions, which experienced favorable sales, and video cameras, which experienced an increase in sales of high value-added models, contributed to the increase in the operating income of the segment.

Manufacturing by Geographic Area

Slightly more than 50 percent of the Electronics segment's total annual production during the fiscal year ended March 31, 2007 took place in Japan, including the production of digital cameras, video cameras, flat panel televisions, PCs, semiconductors and components such as batteries and Memory Sticks. Approximately 60 percent of the annual production in Japan was destined for other regions. China accounted for slightly more than 10 percent of total annual production, approximately 80 percent of which was destined for other regions. Asia, excluding Japan and China, accounted for approximately 10 percent of total annual production, with approximately 60 percent destined for Japan, the U.S. and Europe. The Americas and Europe together accounted for the remaining balance of approximately 25 percent of total annual production, most of which was destined for local distribution and sale.

Game

Sales for the fiscal year ended March 31, 2007 increased by 58.2 billion yen, or 6.1 percent, to 1,016.8 billion yen compared with the previous fiscal year. An operating loss of 232.3 billion yen was recorded for the fiscal year ended March 31, 2007, which was a deterioration of 241.1 billion yen from the fiscal year ended March 31, 2006.

By region, although sales decreased slightly in Japan, there was a significant increase in sales in North America and Europe.

Overall hardware sales increased as a result of the launch of the PS3 in Japan, North America and Europe. However, the sales of the PlayStation®2 (“PS2”) and PSP®(PlayStation®Portable) (“PSP”) declined due to lower unit sales compared with the previous fiscal year, and also because of a price reduction of the PS2. On the other hand, overall software sales decreased as a result of lower PS2 software sales, despite an increase in PSP software sales, as well as the contribution from PS3 software sales, compared to the previous fiscal year.

Total worldwide production shipments of hardware and software were as follows:

Worldwide hardware production shipments (decrease compared to the previous fiscal year):*

- PS2: 14.20 million units (a decrease of 2.02 million units)
- PSP: 8.36 million units (a decrease of 5.70 million units)
- PS3: 5.50 million units

Worldwide software production shipments (increase/decrease compared to the previous fiscal year):**

- PS2: 193 million units (a decrease of 30 million units)
- PSP: 54.1 million units (an increase of 12.5 million units)
- PS3: 13.2 million units

* Production shipments of hardware and software are counted upon shipment of the products from manufacturing bases. Sales of such products are recognized when the products are delivered to customers.

** Including those both from Sony and third parties under Sony licenses.

Operating performance deteriorated significantly compared with the previous fiscal year. This deterioration was primarily the result of the loss arising from the sale of the PS3 at strategic price points lower than its production cost during the introductory period, as well as the recording of other charges in association with the preparation for the launch of the PS3 platform. Operating income for the PS2 business decreased due to a decrease in software sales while operating income in the PSP business increased primarily due to continued cost reductions in hardware production. A write-down of PS3-related inventory of 81.4 billion yen was recorded in the fiscal year ended March 31, 2007 compared with a write-down of 25.0 billion yen recorded in the previous fiscal year.

The cost of sales to sales ratio deteriorated 22.4 percentage points, from 80.4 percent in the previous fiscal year, to 102.8 percent and the ratio of selling, general and administrative expenses to sales increased 1.3 percentage points from 18.7 percent in the previous fiscal year, to 20.0 percent for the reasons mentioned for the decrease in operating income above.

A significant reduction in the operating loss is expected in the fiscal year ending March 31, 2008 due to rapid reductions in hardware production costs and an enhanced line-up of software titles in the PS3 business.

Pictures

Sales for the fiscal year ended March 31, 2007 increased by 220.4 billion yen, or 29.5 percent, to 966.3 billion yen compared to the previous fiscal year. Operating income increased by 15.3 billion yen, or 55.7 percent, to 42.7 billion yen and the operating margin increased from 3.7 percent to 4.4 percent. The results in the Pictures segment consist of the results of Sony Pictures Entertainment Inc. (“SPE”), a U.S. based subsidiary.

On a U.S. dollar basis, sales for the fiscal year in the Pictures segment increased approximately 26 percent and operating income increased by approximately 53 percent. Sales increased significantly due to higher worldwide theatrical and home entertainment revenue from films released in the current fiscal year, as compared to those

released in the previous fiscal year. Major films released in the fiscal year that contributed to both theatrical and home entertainment revenue included *The Da Vinci Code*, *Casino Royale*, *Click*, *Talladega Nights: The Ballad of Ricky Bobby* and *The Pursuit of Happyness*. Sales for the fiscal year release slate increased approximately 1.8 billion U.S. dollars as compared to the previous fiscal year. Television product revenues increased by approximately 160 million U.S. dollars primarily as a result of higher advertising and subscription sales from several international channels.

Operating income for the segment increased significantly, primarily due to the performance of films released in the current fiscal year. Operating loss from the current fiscal year release slate decreased approximately 530 million U.S. dollars as compared to the previous year's release slate due to the same factors contributing to the increase in film revenue noted above. Partially offsetting this was a decrease in operating income of 98 million U.S. dollars for television product primarily due to the recording of production and marketing expenses in the current fiscal year associated with several new network and made-for-syndication television shows, combined with the absence of a licensing agreement extension for *Wheel of Fortune*, which was recognized in the previous fiscal year. Results for the Pictures segment were also negatively impacted by an adjustment to increase its reserve for returns of home entertainment catalog product.

As of March 31, 2007, unrecognized license fee revenue at SPE was approximately 1.1 billion U.S. dollars. SPE expects to record this amount in the future having entered into contracts with television broadcasters to provide those broadcasters with completed motion picture and television products. The license fee revenue will be recognized in the fiscal year in which the product is made available for broadcast.

Financial Services

Note that the revenue and operating income at Sony Life, Sony Assurance Inc. ("Sony Assurance") and Sony Bank Inc. ("Sony Bank") discussed below on a U.S. GAAP basis differ from the results that Sony Life, Sony Assurance and Sony Bank disclose on a Japanese statutory basis.

Financial Services segment revenue for the fiscal year ended March 31, 2007 decreased by 93.9 billion yen, or 12.6 percent, to 649.3 billion yen compared with the previous fiscal year. Operating income decreased by 104.2 billion yen, or 55.3 percent, to 84.1 billion yen and the operating income margin decreased to 13.0 percent compared with the 25.3 percent of the previous fiscal year.

At Sony Life, revenue decreased by 100.0 billion yen, or 15.5 percent, to 545.1 billion yen compared with the previous fiscal year. Although revenue from insurance premiums increased at Sony Life reflecting an increase in insurance-in-force, the main reason for this decrease was lower valuation gains in the general and separate accounts as compared to the previous fiscal year, when there was a significant increase in the Japanese stock market. Operating income at Sony Life decreased by 106.8 billion yen or 56.7 percent to 81.7 billion yen, primarily due to a decrease in valuation gains from investments in the general account, including valuation gains from convertible bonds.

At Sony Assurance, revenue increased due to higher insurance revenue brought about by an expansion in automobile insurance-in-force. Operating income increased due to an increase in insurance revenue and an improvement in the expense ratio (the ratio of sales, general and administrative expenses and commissions to net premiums written).

At Sony Bank, revenue rose mainly due to a significant decrease of foreign exchange losses from part of Sony Bank's foreign currency deposits, as compared with the previous fiscal year, and an increase in interest revenue associated with an increase in the balance of assets from investing activities. As a result, Sony Bank recorded operating income in the fiscal year ended March 31, 2007, as compared to an operating loss in the previous fiscal year.

At Sony Finance International, Inc. ("Sony Finance"), a leasing and credit financing business subsidiary in Japan, overall revenue decreased and the operating loss increased primarily due to decreases in revenue and profit at leasing and installment businesses. However, revenue increased at the credit card business which resulted in a decrease in the operating loss recorded for that business.

Condensed Statements of Income Separating Out the Financial Services Segment (Unaudited)

The following schedule shows unaudited condensed statements of income for the Financial Services segment and all other segments excluding Financial Services as well as condensed consolidated statements of income. This presentation is not required under generally accepted accounting principles in the U.S. ("U.S. GAAP"), which is used in Sony's consolidated financial statements. However, because the Financial Services segment is different in nature from Sony's other segments, Sony believes that a comparative presentation may be useful in understanding and analyzing Sony's consolidated financial statements.

Transactions between the Financial Services segment and all other segments excluding Financial Services are eliminated in the consolidated figures shown below.

Condensed Statements of Income

Financial Services	Fiscal Year ended March 31	
	2006	2007

All Other

During the fiscal year ended March 31, 2007, sales within All Other were comprised mainly of sales from Sony Music Entertainment (Japan) Inc. (“SMEJ”), a Japanese domestic recorded music business; Sony Music Entertainment Inc.’s (“SMEI”) music publishing business; So-net, an Internet-related service business subsidiary operating mainly in Japan; a contactless IC card business; and an advertising agency business in Japan. In June 2006, Sony Corporation sold 51 percent of the stock of StylingLife Holdings Inc. (“StylingLife”), a holding company comprised of six retail businesses within Sony previously included within All Other, to a wholly-owned subsidiary of Nikko Principal Investments Japan Ltd. Sony Corporation sold additional shares of StylingLife in December 2006, and currently holds approximately 23 percent of the total outstanding stock in StylingLife.

Sales for the fiscal year ended March 31, 2007 decreased by 48.4 billion yen, or 11.4 percent, to 377.6 billion yen, compared with the previous fiscal year. During the fiscal year, the sales decrease within All Other reflects the deconsolidation of the six retail businesses noted above after the sale of a majority of the stock of StylingLife. Of total segment sales, 82 percent were sales to outside customers. In terms of profit performance, operating income for All Other increased from 20.5 billion yen in the previous fiscal year to 32.4 billion yen.

Sales at SMEJ declined mainly due to lower intersegment sales in association with the transfer of business activity relating to Sony’s disc custom press business, which was carried out at SMEJ during the previous fiscal year, to other segments within Sony Group. Best selling albums during the fiscal year included CHEMISTRY’s *ALL THE BEST*, Yuna Ito’s *HEART* and Angela Aki’s *HOME*.

Excluding sales recorded within Sony’s music business, there was a decrease in sales within All Other. This decrease was mainly due to the above-mentioned deconsolidation of Sony’s retail businesses, partially offset by an increase in sales at the contactless IC card business and So-net, where there was a favorable increase in fiber optic connection service subscribers.

Regarding profit performance within All Other, operating income of 32.4 billion yen was recorded, an 11.9 billion yen increase compared to the 20.5 billion yen of operating income recorded in the previous fiscal year. Operating income at SMEJ declined approximately 37 percent compared to the previous fiscal year, mainly due to a decrease in album and single sales and the recognition of a gain in the previous fiscal year resulting from the transfer to the Japanese government of the substitutional portion of Sony’s Employee Pension Fund.

Excluding the decrease in operating income in the music business, there was an increase in operating income within All Other, mainly due to an asset impairment write-down associated with the sale of the Metreon, a U.S. entertainment complex, recorded in the previous fiscal year. Operating income at So-net increased mainly due to an increase in profit resulting from greater fee revenue from new subscribers.

During the fiscal year ended March 31, 2007, a gain on the sale of a portion of Sony’s former headquarters site in the amount of 2.6 billion yen is included in operating income within All Other.

Foreign Exchange Fluctuations and Risk Hedging

During the fiscal year ended March 31, 2007, the average value of the yen was 116.0 yen against the U.S. dollar, and 148.6 yen against the Euro, which was 3.2 percent lower against the U.S. dollar and 8.2 percent lower against the Euro, respectively, compared with the average of the previous fiscal year.

In the Pictures segment, Sony translates into yen the U.S. dollar consolidated results of SPE (a U.S.-based operation that has worldwide subsidiaries).

Therefore, analysis and discussion of certain portions of the operating results of SPE are specified as being on “a U.S. dollar basis.” Results on a U.S. dollar basis are not on the same basis as Sony’s consolidated financial statements and do not conform with U.S. GAAP. In addition, Sony does not believe that these measures are a substitute for U.S. GAAP measures. However, Sony believes that results presented on a local currency basis provide additional useful information to investors regarding operating performance.

Sony’s consolidated results are subject to foreign currency rate fluctuations mainly derived from the fact that the countries where manufacturing takes place may be different from those where such products are sold. In order to

reduce the risk caused by such fluctuations, Sony employs derivatives, including foreign exchange forward contracts and foreign currency option contracts, in accordance with a consistent risk management strategy. Such derivatives are used primarily to mitigate the effect of foreign currency exchange rate fluctuations on cash flows generated by anticipated intercompany transactions and intercompany accounts receivable and payable denominated in foreign currencies.

Sony Global Treasury Services Plc (“SGTS”) in London provides integrated treasury services for Sony Corporation and its subsidiaries. Sony’s policy is that Sony Corporation and all subsidiaries with foreign exchange exposures should enter into commitments with SGTS for hedging their exposures. Sony Corporation and most of its subsidiaries utilize SGTS for this purpose. The concentration of foreign exchange exposures at SGTS means that, in effect, SGTS hedges the net foreign exchange exposure of Sony Corporation and its subsidiaries. SGTS in turn enters into foreign exchange transactions with creditworthy third-party financial institutions. Most of the transactions are entered into against projected exposures before the actual export and import transactions take place. In general, SGTS hedges the projected exposures on average three months before the actual transactions take place. However, in certain cases SGTS partially hedges the projected exposures one month before the actual transactions take place when business requirements such as shorter production-sales cycles for certain products arise. Sony enters into foreign exchange transactions with financial institutions primarily for hedging purposes. Sony does not use these derivative financial instruments for trading or speculative purposes except for certain derivatives in the Financial Services segment utilized for portfolio investments and Asset Liability Management (“ALM”).

To minimize the adverse effects of foreign exchange fluctuations on its financial results, particularly in the Electronics segment, Sony seeks, when appropriate, to localize material and parts procurement, design, and manufacturing operations in areas outside of Japan.

Changes in the fair value of derivatives designated as cash flow hedges, including foreign exchange forward contracts and foreign currency option contracts, are initially recorded in accumulated other comprehensive income and reclassified into earnings when the hedged transaction affects earnings. Foreign exchange forward contracts, foreign currency option contracts and other derivatives that do not qualify as hedges are marked-to-market with changes in value recognized in Other Income and Expenses. The notional amounts of foreign exchange forward contracts, currency option contracts purchased and currency option contracts written as of March 31, 2007 were 1,768.6 billion yen, 287.8 billion yen and 67.2 billion yen, respectively.

Operating Results for the Fiscal Year Ended March 31, 2006 compared with the Fiscal Year Ended March 31, 2005

Overview

Sony’s sales and operating revenue for the fiscal year ended March 31, 2006 increased 4.4 percent compared with the previous fiscal year. This increase is mainly due to an increase in revenues within the Financial Services segment, as a result of an improvement in gains and losses on investments at Sony Life due to favorable Japanese domestic equity market conditions, and increased sales within the Game segment, due to the contribution from the PSP. In the Electronics segment, although sales benefited from the depreciation of the yen as well as an increase in sales of LCD televisions, sales to outside customers decreased 0.9 percent compared with the previous fiscal year. There was a decline in sales of CRT televisions, due to a continued shift in demand towards flat panel televisions, and in plasma televisions, where new product development has been terminated.

Operating income increased 55.5 percent compared with the previous fiscal year. Operating income includes a one-time net gain of 73.5 billion yen, which resulted from the transfer to the Japanese government of the substitutional portion of Sony’s Employee Pension Fund. Of this amount, a gain of 64.5 billion yen was recorded within the Electronics segment. In the Financial Services segment, operating income increased due to an improvement in gains and losses on investments at Sony Life resulting from the above-mentioned favorable Japanese domestic equity market conditions. In the Electronics segment, although restructuring charges increased compared with the previous fiscal year, the amount of operating loss decreased as a result of a net gain resulting from the transfer to the Japanese government of the substitutional portion of Sony’s Employee Pension Fund mentioned above and favorable exchange rates. Operating income within the Game segment declined primarily as a result of an increase in research and development costs associated mainly with the PS3. In the Pictures segment,

operating income also declined due to lower worldwide theatrical and home entertainment revenues on feature films.

Restructuring

In the fiscal year ended March 31, 2006, Sony recorded restructuring charges of 138.7 billion yen, an increase from the 90.0 billion yen recorded in the previous fiscal year. The primary restructuring activities were in the Electronics segment and All Other.

Of the total 138.7 billion yen, Sony recorded 48.3 billion yen in personnel-related costs. This expense was incurred because 5,700 people, mainly in Japan, the U.S. and Western Europe, left Sony primarily through early retirement programs.

For more detailed information about restructuring, please refer to Note 17 of Notes to the Consolidated Financial Statements.

Electronics

Restructuring charges in the Electronics segment for the fiscal year ended March 31, 2006 were 125.8 billion yen, compared to 83.2 billion yen in the previous fiscal year.

Due to the worldwide market shrinkage and demand shift from CRT televisions to plasma and LCD panel televisions, Sony has been implementing a worldwide plan to rationalize CRT and CRT television production facilities and has been downsizing its business over several years. In the fiscal year ended March 31, 2006, as part of this restructuring program, Sony recorded a non-cash impairment charge of 25.5 billion yen for CRT TV display manufacturing facilities located in the U.S. The impairment charge was calculated as the difference between the carrying value of the asset group and the present value of estimated future cash flows. The charge was recorded in loss on sale, disposal or impairment of assets, net in the consolidated statements of income.

In addition to the above restructuring efforts, Sony undertook several headcount reduction programs to further reduce operating costs in the Electronics segment. As a result of these programs, Sony recorded restructuring charges of 45.1 billion yen for the fiscal year ended March 31, 2006, and these charges were included in selling, general and administrative expenses in the consolidated statements of income. These staff reductions were achieved worldwide mostly through the implementation of early retirement programs. The remaining liability balance as of March 31, 2006 was 19.4 billion yen and will be paid through the fiscal year ending March 31, 2007. Sony will continue to seek the appropriate headcount level to optimize the workforce in the Electronics segment.

All Other

Restructuring charges within All Other for the fiscal year ended March 31, 2006 were 10.4 billion yen, compared to 5.3 billion yen recorded in the previous fiscal year. The main component of the restructuring charges recorded during the fiscal year ended March 31, 2006 was an 8.5 billion yen asset impairment write-down associated with the sale of the Metreon, a U.S. entertainment complex.

Operating Performance

	Fiscal Year Ended March 31		Percent change
	2005	2006	
	(Yen in billions)		
Sales and operating revenue	7,191.3	7,510.6	+4.4%
Operating income	145.6	226.4	+55.5
Income before income taxes	157.2	286.3	+82.1
Equity in net income of affiliated companies	29.0	13.2	-54.6
Net income	163.8	123.6	-24.5

Sales

Sales for the fiscal year ended March 31, 2006 increased by 319.3 billion yen, or 4.4 percent, to 7,510.6 billion yen compared with the previous fiscal year. A further breakdown of sales figures is presented under “*Operating Performance by Business Segment*” below.

“Sales” in this analysis of the ratio of cost of sales, including research and development costs, and selling, general and administrative expenses to sales refers only to the “net sales” and “other operating revenue” portions of consolidated sales and operating revenue, and excludes financial service revenue. This is because financial service expenses are recorded separately from cost of sales and selling, general and administrative expenses. The calculations of all ratios below that pertain to business segments include intersegment transactions.

Cost of Sales and Selling, General and Administrative Expenses

Cost of sales for the fiscal year ended March 31, 2006 increased by 151.3 billion yen, or 3.0 percent, to 5,151.4 billion yen compared with the previous fiscal year, and increased from 75.1 percent to 75.9 percent as a percentage of sales. Year on year, the cost of sales ratio decreased from 80.7 percent to 80.6 percent in the Electronics segment, increased from 73.0 percent to 80.4 percent in the Game segment, and increased from 58.7 percent to 60.2 percent in the Pictures segment.

In the Electronics segment, there was a deterioration in the cost of sales ratio for several products, in particular image sensors and CRT televisions. In the Game segment, there was an increase in the cost of sales ratio as a result of research and development costs associated with the PS3. In the Pictures segment, the cost of sales ratio also increased primarily due to lower worldwide theatrical and home entertainment revenues from feature films.

There was a decrease in personnel-related costs included in cost of sales of 9.8 billion yen, primarily within the Electronics segment, compared with the previous fiscal year.

Research and development costs (all research and development costs are included within cost of sales) for the fiscal year ended March 31, 2006 increased by 29.8 billion yen to 531.8 billion yen compared with the previous fiscal year. The ratio of research and development costs to sales was 7.8 percent compared to 7.5 percent in the previous fiscal year.

Selling, general and administrative expenses for the fiscal year ended March 31, 2006 decreased by 8.0 billion yen, or 0.5 percent, to 1,527.0 billion yen compared with the previous fiscal year. The ratio of selling, general and administrative expenses to sales improved from 23.1 percent in the previous fiscal year to 22.5 percent. Year on year, the ratio of selling, general and administrative expenses to sales improved from 18.8 percent to 18.0 percent in the Electronics segment and from 21.0 percent to 18.7 percent in the Game segment. On the other hand, the ratio of selling, general and administrative expenses to sales increased from 32.5 percent to 36.0 percent in the Pictures segment.

Personnel-related costs in selling, general and administrative expenses decreased by 60.4 billion yen compared with the previous fiscal year mainly due to a decrease in severance-related expenses in the Electronics segment resulting from the implementation of restructuring initiatives. In addition, advertising and publicity expenses for the fiscal year increased by 59.8 billion yen compared with the previous fiscal year. This was primarily due to the fact that advertising and publicity expenses increased within the Pictures and Game segments.

Loss on sale, disposal or impairment of assets, net was 73.9 billion yen, compared with 28.0 billion in the previous fiscal year. This increase was due to losses recorded on the sale, disposal and impairment of CRT and CRT television production equipment in the Electronics segment, as well as an asset impairment write-down associated with the sale of the Metreon, a U.S. entertainment complex.

Operating Income

Operating income for the fiscal year ended March 31, 2006 increased by 80.8 billion yen, or 55.5 percent, to 226.4 billion yen compared with the previous fiscal year. The operating income margin increased from 2.0 percent to 3.0 percent. In descending order by the amount of financial impact, the Financial Services segment, the Pictures segment, All Other and the Game segment contributed to operating income. On the other hand, although there was a

net gain from the transfer to the Japanese government of the substitutional portion of Sony's Employee Pension Fund and the depreciation of the yen, the Electronics segment recorded an operating loss mainly due to a decrease in sales to outside customers, an increase in loss on sale, disposal or impairment of assets and a deterioration in the cost of sales ratio associated with a decline in unit selling prices. For a further breakdown of operating income for each segment, please refer to "*Operating Performance by Business Segment*" below.

Other Income and Expenses

In the consolidated results for the fiscal year ended March 31, 2006, other income increased by 52.5 billion yen, or 79.7 percent, to 118.4 billion yen, while other expenses increased by 4.2 billion yen, or 7.7 percent, to 58.5 billion yen, compared with the previous fiscal year. The net amount of other income and other expenses was net other income of 59.9 billion yen, an increase of 48.3 billion yen, compared with the previous fiscal year.

The gain on change in interest in subsidiaries and equity investees increased by 44.5 billion yen, or 272.7 percent compared to the previous fiscal year to 60.8 billion yen. This was mainly the result of a gain of 21.5 billion yen on the change in interest in subsidiaries and equity investees resulting from the initial public offering of So-net, a gain of 20.6 billion yen on the change in interest resulting from the partial sale of Sony's investment in Monex Beans Holdings, Inc., and gains of 12.0 billion yen and 6.6 billion yen, respectively, on the change of interest at So-net M3 Inc., a consolidated subsidiary of So-net and at DeNA Co., Ltd., an equity affiliate of So-net accounted for by the equity method.

Interest and dividends of 24.9 billion yen were recorded in the fiscal year ended March 31, 2006, an increase of 10.2 billion yen, or 69.5 percent, compared with the previous year. This increase was mainly the result of an increase in interest received resulting from an improvement in the rate of return on overseas investments.

For the fiscal year ended March 31, 2006, interest payments totaling 29.0 billion yen were recorded, an increase of 4.4 billion yen, or 18.0 percent, compared with the previous fiscal year.

In addition, a net foreign exchange loss of 3.1 billion yen was recorded in the fiscal year ended March 31, 2006, compared to a net foreign exchange loss of 0.5 billion yen recorded in the previous fiscal year. The net foreign exchange loss was recorded because the value of the yen, especially during the first and third quarters of the fiscal year ended March 31, 2006, was lower than the value of the yen at the time that Sony entered into foreign exchange forward contracts and foreign currency option contracts. These contracts were entered into by Sony to mitigate the foreign exchange rate risk to cash flows that arises from settlements of foreign currency denominated accounts receivable and accounts payable, as well as foreign currency denominated transactions between consolidated subsidiaries.

Income before Income Taxes

Income before income taxes for the fiscal year ended March 31, 2006 increased 129.1 billion yen, or 82.1 percent compared with the previous fiscal year, to 286.3 billion yen as a result of the increase in operating income and the increase in the net amount of other income and other expenses mentioned above.

Income Taxes

Income taxes for the fiscal year ended March 31, 2006 increased by 160.5 billion yen to 176.5 billion yen. Compared to an effective tax rate of 10.2 percent in the previous fiscal year, the effective tax rate was 61.6 percent in the current fiscal year. This effective tax rate exceeded the Japanese statutory tax rate primarily due to the recording of additional valuation allowances against deferred tax assets by Sony Corporation and several of Sony's Japanese domestic and overseas consolidated subsidiaries, mainly within the Electronics segment, due to continued losses recorded at these businesses and the recording of an additional tax provision for the undistributed earnings of certain foreign subsidiaries. The effective tax rate was significantly lower than the Japanese statutory rate in the previous fiscal year as a result of the reversal of valuation allowances at Sony's U.S. subsidiaries associated with an improvement in operating performance.

On June 30, 2006, Sony Corporation and Sony Computer Entertainment Inc. ("SCEI") each received notification from the Tokyo Regional Taxation Bureau ("TRTB") of a reassessment of the profits they reported

from transactions between SCEI and its subsidiary Sony Computer Entertainment America Inc. (“SCEA”), for the fiscal years ended March 31, 2000 through 2005. On the same date, Sony Corporation also received notification of a reassessment of the profits reported from transactions related to CD and DVD disc manufacturing operations with a number of its overseas subsidiaries for the fiscal years ended March 31, 2004 and 2005.

Sony Corporation and SCEI believe that their allocation of income for the periods in question was appropriate and that they have paid the proper amount of taxes in each of the jurisdictions. Therefore Sony Corporation and SCEI disagree with the position of the TRTB and have lodged an objection. In addition, Sony Corporation and SCEI plan to formally request bilateral consultations (where available) to obtain relief from double taxation under the applicable tax treaties of various countries and is currently in the process of obtaining an Advanced Price Agreement.

Transfer pricing was reassessed in accordance with the notification from the TRTB, resulting in additional Japanese income of 74.4 billion yen, which led to Sony Corporation and SCEI incurring an estimated additional cash tax (including corporate tax and others) of approximately 27.9 billion yen. Sony Corporation and SCEI believe that double taxation will be avoided through the procedure described above, and therefore Sony does not expect any material impact on its consolidated profit and loss as a result of this reassessment.

Results of Affiliated Companies Accounted for under the Equity Method

Equity in net income of affiliated companies during the fiscal year ended March 31, 2006 was 13.2 billion yen, a decrease of 15.9 billion yen, or 54.6 percent compared to the previous fiscal year. Equity in net income of affiliated companies for the previous fiscal year included the recording of 12.6 billion yen as equity in net income for InterTrust Technologies Corporation (“InterTrust”), which reflected InterTrust’s proceeds from a license agreement arising from the settlement of a patent-related suit. In the current fiscal year, Sony Ericsson, as a result of increased sales of products including camera phone and “Walkman®” phone models, contributed 29.0 billion yen to equity in net income, an increase of 11.6 billion yen compared to the previous fiscal year. Sony recorded equity income of 5.8 billion yen for SONY BMG during the current fiscal year, compared to an equity loss of 3.4 billion yen in the previous fiscal year as a result of a reduction in restructuring charges and the realization of incremental cost savings. However, Sony recorded an equity in net loss of 7.2 billion yen for S-LCD, a joint-venture with Samsung for the manufacture of amorphous TFT LCD panels and equity in net loss of 16.9 billion yen for MGM. The equity in net loss for MGM includes non-cash interest of 6.0 billion yen on cumulative preferred stock.

Minority Interest in Income (Loss) of Consolidated Subsidiaries

In the fiscal year ended March 31, 2006, minority interest in loss of consolidated subsidiaries of 0.6 billion yen was recorded compared to minority interest in income of 1.7 billion yen for the previous fiscal year. This loss was primarily due to the recording of loss at ST Mobile Display Corporation, a joint venture with Toyota Industries Corporation for the manufacture of low-temperature polysilicon thin film transistor liquid crystal display panels for mobile products.

Net Income

Net income for the fiscal year ended March 31, 2006 decreased by 40.2 billion yen, or 24.5 percent, to 123.6 billion yen compared with the previous fiscal year. This decrease was primarily the result of the above-mentioned increase in income taxes and decrease in equity in net income of affiliated companies. As a percentage of sales, net income decreased from 2.3 percent to 1.6 percent. Return on stockholders’ equity decreased from 6.2 percent to 4.1 percent. (This ratio is calculated by dividing net income by the simple average of stockholders’ equity at the end of the previous fiscal year and at the end of the fiscal year ended March 31, 2006.)

Basic net income per share was 122.58 yen compared with 175.90 yen in the previous fiscal year, and diluted net income per share was 116.88 yen compared with 158.07 yen in the previous fiscal year. Refer to Notes 2 and 21 of Notes to Consolidated Financial Statements.

Operating Performance by Business Segment

The following discussion is based on segment information. Sales and operating revenue in each business segment include intersegment transactions. Refer to Note 24 of Notes to Consolidated Financial Statements.

Business Segment Information

	Fiscal Year Ended March 31		Percent change
	2005	2006	
	(Yen in billions)		
Sales and operating revenue			
Electronics	5,094.5	5,176.4	+1.6%

Consolidated	<u>145.6</u>	<u>226.4</u>	<u>+55.5</u>

As of August 1, 2004, Sony and Bertelsmann AG combined their recorded music businesses in a joint venture. The newly formed company, SONY BMG, is 50 percent owned by each parent company. Under U.S. GAAP, SONY BMG is accounted for by Sony using the equity method and, since August 1, 2004, 50 percent of net profits or losses of this business have been included under "Equity in net income (loss) of affiliated companies."

In connection with the establishment of this joint venture, Sony's non-Japan-based disc manufacturing and physical distribution businesses, formerly included within the Music segment, a separate reporting segment until the end of the previous fiscal year, have been reclassified to the Electronics segment to recognize the new management reporting structure whereby Sony's Electronics segment has now assumed responsibility for these businesses. Effective April 1, 2005, a similar change was made with respect to Sony's Japan-based disc manufacturing business. Results for the fiscal year ended March 31, 2005 in the Electronics segment have been restated to account for these reclassifications.

Effective April 1, 2005, Sony no longer breaks out its music business as a reportable segment as it no longer meets the materiality threshold. Accordingly, the results for Sony's music business are now included within All Other, and the results for the fiscal year ended March 31, 2005 have been reclassified to All Other for comparative purposes. Results for the fiscal year ended March 31, 2006 in All Other include the results of SMEI music publishing business and SMEJ, excluding Sony's Japan-based disc manufacturing business which, as noted above,

has been reclassified to the Electronics segment. However, results for the previous fiscal year in All Other include the consolidated results for SMEI's recorded music business for the period through August 1, 2004, as well as the results for SMEI's music publishing business and SMEJ excluding Sony's Japan-based disc manufacturing business.

Electronics

Sales and operating revenue for the fiscal year ended March 31, 2006 increased 81.8 billion yen, or 1.6 percent, to 5,176.4 billion yen compared with the previous fiscal year. Operating profit of 6.9 billion in the Electronics segment was recorded compared to operating profit of 2.9 billion yen in the previous fiscal year. Despite the increase in sales, sales to outside customers, on a yen basis, decreased 1.0 percent compared to the previous fiscal year. With respect to sales to outside customers by geographical area, sales decreased by 12 percent in Japan, by 3 percent in the U.S., by 4 percent in Europe and increased by 12 percent in Other Areas.

In Japan, although there was a significant increase in the sales of LCD televisions, as well as increased sales for flash memory and hard drive digital audio players, sales decreased for such products as mobile phones, principally to Sony Ericsson, CRT televisions and plasma televisions. In the U.S., although there was an increase in sales of LCD and rear projection televisions, sales decreased for such products as CRT and plasma televisions. In Europe, although sales increased for such products as LCD televisions, there was a decline in sales of such products as CRT and plasma televisions, and mobile phones, primarily to Sony Ericsson. In Other Areas, sales of such products as LCD televisions and PCs increased, while sales of such products as CD-R/RW drives and CRT televisions decreased.

Performance by Product Category

Sales and operating revenue by product category discussed below represent sales to outside customers, which do not include intersegment transactions. Refer to Note 24 of Notes to Consolidated Financial Statements.

"Audio" sales decreased by 35.7 billion yen, or 6.2 percent, to 536.2 billion yen. Sales of flash memory and hard drive digital audio players increased significantly, in conjunction with an increase in shipments to approximately 4.5 million units, compared to approximately 850,000 unit shipments recorded in the previous fiscal year. On the other hand, there was a significant decrease in the unit shipments of both CD and MD format headphone stereos due to a shift in market demand. In addition, car audio experienced a decrease in sales, and there was a slight decrease in home audio sales.

"Video" sales decreased by 15.0 billion yen, or 1.4 percent, to 1,021.3 billion yen. In addition to a decrease in sales of digital cameras in Japan, the U.S. and Europe, there was a decrease in sales of VHS video recorders. Sales of digital cameras decreased, coupled with a decrease in worldwide shipments by approximately 0.5 million units to approximately 13.5 million units. Worldwide shipments of DVD recorders increased by approximately 300,000 units to approximately 2.0 million units, while sales increased slightly. Worldwide shipments of home-use video cameras increased by approximately 250,000 units to approximately 7.6 million units. DVD-Video player unit shipments decreased by approximately 1.5 million units to approximately 8.0 million units.

"Televisions" sales increased by 6.6 billion yen, or 0.7 percent, to 927.8 billion yen. There was a significant increase in worldwide sales of LCD televisions, as worldwide shipments of LCD televisions increased by approximately 1.8 million units, to approximately 2.8 million units. Sales of rear projection televisions increased as the sales percentage of higher priced units increased, although worldwide shipments remained largely unchanged at approximately 1.2 million units. On the other hand, there was a significant decrease in worldwide sales of CRT televisions, primarily as a result of both a decrease in worldwide shipments of CRT televisions, by approximately 2.7 million units to approximately 6.8 million units and a fall in unit prices due to the continued shift in demand towards flat panel televisions. In addition, sales of plasma televisions, where new product development has been terminated, also decreased worldwide.

"Information and Communications" sales increased by 26.4 billion yen, or 3.2 percent, to 842.5 billion yen. Although sales of desktop PCs decreased, overall sales increased as a result of favorable worldwide sales of notebook PCs. Worldwide unit shipments of PCs increased approximately 400,000 units to approximately

3.7 million units. Sales of broadcast- and professional-use products increased as a result of favorable sales of high-definition related products.

“Semiconductors” sales decreased by 12.0 billion yen, or 6.5 percent, to 172.2 billion yen. The decrease was due to a decrease in sales of CCDs as the result of pricing pressures.

“Components” sales increased by 49.6 billion yen, or 6.6 percent, to 800.7 billion yen. This increase was primarily due to an increase in sales of lithium-ion batteries, primarily for use in PCs and power tools, and Memory Sticks. On the other hand, sales of CD-R/RW drives and optical pickups declined, primarily as a result of significant unit price declines. Sales of DVD+/-R/RW drives increased, despite a deterioration in unit selling prices, as a result of a significant growth in units sold in association with the expansion of the market.

“Other” sales decreased by 65.4 billion yen, or 12.0 percent, to 481.4 billion yen. This decrease was the result of a decrease in sales of mobile phones, primarily to Sony Ericsson.

In the Electronics segment, cost of sales for the fiscal year ended March 31, 2006 increased by 63.3 billion yen, or 1.5 percent to 4,174.6 billion yen compared with the previous fiscal year. The cost of sales ratio decreased by 0.1 percent to 80.6 percent compared to 80.7 percent in the previous fiscal year. Although there was an improvement in the cost of sales ratio for such products as video cameras and PCs, products that contributed to the deterioration in the cost of sales ratio included image sensors and CRT televisions, which experienced decreased sales. Restructuring charges recorded in cost of sales amounted to 23.8 billion yen, an increase of 14.2 billion yen compared with the 9.6 billion yen recorded in the previous fiscal year. Research and development costs decreased 15.2 billion yen, or 3.5 percent, from 433.3 billion yen in the previous fiscal year to 418.1 billion yen.

Selling, general and administrative expenses decreased by 25.4 billion yen, or 2.7 percent to 931.1 billion yen compared with the previous fiscal year. The primary reason for this decrease was the recording of a 64.5 billion yen net gain resulting from the transfer to the Japanese government of the substitutional portion of Sony’s Employee Pension Fund. Of the restructuring charges recorded in the Electronics segment, the amount recorded in selling, general and administrative expenses decreased by 4.1 billion yen from 53.6 billion yen in the previous fiscal year to 49.5 billion yen. Of the restructuring charges recorded in selling, general and administrative expenses, the amount recorded for headcount reductions, including reductions through the early retirement program, was 45.1 billion yen, a decrease of 5.8 billion yen compared with the previous fiscal year. On the other hand, royalty expenses decreased 17.2 billion yen. The ratio of selling, general and administrative expenses to sales decreased 0.8 percentage points from the 18.8 percent recorded in the previous fiscal year to 18.0 percent.

Loss on sale, disposal or impairment of assets, net increased 40.0 billion yen to 63.9 billion yen compared with the previous fiscal year. This amount includes 52.5 billion yen in restructuring charges, which includes 25.5 billion yen of restructuring charges related to CRT and CRT television manufacturing facilities in the U.S. The amount of restructuring charges included in loss on sale, disposal or impairment, net in the previous fiscal year was 19.2 billion yen.

The amount of operating profit recorded in the Electronics segment for the fiscal year ended March 31, 2006 increased as a result of the net gain resulting from the transfer to the Japanese government of the substitutional portion of Sony’s Employee Pension Fund, despite the recording of increased restructuring charges. Excluding the impact of restructuring charges and the net gain resulting from the transfer to the Japanese government of the substitutional portion of Sony’s Employee Pension Fund, profit performance by product reflected an increase in operating losses recorded by CRT televisions and LCD televisions and a decrease in operating income recorded by image sensors. On the other hand, there was a decrease in the operating loss recorded by DVD recorders (including PSXTM) as well as an increase in operating income for video cameras and PCs.

Manufacturing by Geographic Area

Slightly more than 50 percent of the Electronics segment’s total annual production during the fiscal year ended March 31, 2006 took place in Japan, including the production of digital cameras, video cameras, flat panel televisions, PCs, semiconductors and components such as batteries and Memory Sticks. Approximately 65 percent of the annual production in Japan was destined for other regions. China accounted for slightly more than 10 percent of total annual production, approximately 70 percent of which was destined for other regions. Asia, excluding Japan

and China, accounted for slightly more than 10 percent of total annual production, with approximately 60 percent destined for Japan, the U.S. and Europe. The Americas and Europe together accounted for the remaining balance of slightly less than 25 percent of total annual production, most of which was destined for local distribution and sale.

Game

Sales for the fiscal year ended March 31, 2006 increased by 228.9 billion yen, or 31.4 percent compared with the previous fiscal year, to 958.6 billion yen. Operating income decreased by 34.4 billion yen, or 79.7 percent, to 8.7 billion yen compared with the previous fiscal year, and the operating income margin decreased from 5.9 percent to 0.9 percent.

By region, although sales decreased slightly in Japan, there was an increase in sales in the U.S. and Europe.

There was a significant increase in hardware sales compared to the previous fiscal year. Sales increased significantly, mainly in the U.S and Europe, and sales in Japan remained relatively unchanged compared to the previous fiscal year, primarily due to a significant contribution to sales from the PSP, which experienced favorable growth in all geographic areas and the fact that PlayStation®2 (“PS2”) sales were on a par with those in the previous fiscal year. In addition, although PS2 software sales decreased, as a result of the contribution to sales from PSP software, software sales in Japan, the U.S. and Europe were relatively unchanged compared to the previous fiscal year.

Total worldwide production shipments of hardware and software were as follows:

Worldwide hardware production shipments (increase compared to the previous fiscal year):*

- PS2: 16.22 million units (an increase of 0.05 million units)
- PSP: 14.06 million units (an increase of 11.09 million units)

Worldwide software production shipments (increase/decrease compared to the previous fiscal year):**

- PS2: 223 million units (a decrease of 29 million units)
- PSP: 41.6 million units (an increase of 35.9 million units)

* Production shipments of hardware and software are counted upon shipment of the products from manufacturing bases. Sales of such products are recognized when the products are delivered to customers.

** Including those both from Sony and third parties under Sony licenses.

Operating income decreased significantly compared with the previous fiscal year. Although profits from the PS2 and PSP businesses exceeded those in the previous fiscal year, the decrease in operating income was mainly the result of continued high research and development costs associated with the PS3, as well as the recording of charges associated with preparation for the launch of the PS3 platform including a write-down of approximately 25.0 billion yen for semiconductor components used in the PS3.

The cost of sales to sales ratio deteriorated by 7.4 percent, from 73.0 percent in the previous fiscal year, to 80.4 percent for the reasons mentioned above for operating income. The ratio of selling, general and administrative expenses to sales decreased by 2.3 percent, compared to 21.0 percent in the previous fiscal year, to 18.7 percent as a result of the sales increase.

Pictures

Sales for the fiscal year ended March 31, 2006 increased by 12.2 billion yen, or 1.7 percent, to 745.9 billion yen compared with the previous fiscal year. Operating income decreased by 36.5 billion yen, or 57.1 percent, to 27.4 billion yen and the operating income margin decreased from 8.7 percent to 3.7 percent. The results in the Pictures segment consist of the results of SPE, a U.S.-based subsidiary.

On a U.S. dollar basis, sales for the fiscal year in the Pictures segment decreased approximately 4 percent and operating income decreased by approximately 61 percent. Sales decreased primarily due to lower worldwide theatrical and home entertainment revenues on feature films, partially offset by an increase in television product revenues. The lower theatrical and home entertainment revenues primarily resulted from the strong performance of

Spider-Man 2 in the prior fiscal year coupled with the disappointing performance of certain films in the current fiscal year film slate, particularly *Stealth*, *Zathura* and the *Legend of Zorro*. Sales for the fiscal year release slate decreased 967 million U.S. dollars as compared to the previous fiscal year. Television product revenues increased by approximately 220 million U.S. dollars primarily due to higher advertising and subscription sales from several of SPE's international channels, higher sales of television library product and the extension of a licensing agreement for *Wheel of Fortune*.

Operating income for the segment decreased significantly, primarily due to the disappointing overall performance of the current fiscal year's film slate in both the theatrical and home entertainment markets. Operating loss from the current fiscal year release slate increased 623 million U.S. dollars as compared to the prior fiscal year's release slate due to the same factors contributing to the decrease in film revenue noted above. Partially offsetting this was an increase in operating income of 83 million U.S. dollars for television product due to the same factors noted above for revenue.

As of March 31, 2006, unrecognized license fee revenue at SPE was approximately 1.2 billion U.S. dollars. SPE expects to record this amount in the future having entered into contracts with television broadcasters to provide those broadcasters with completed motion picture and television products. The license fee revenue will be recognized in the fiscal year that the product is available for broadcast.

Financial Services

Please note that the revenue and operating income at Sony Life, Sony Assurance and Sony Bank discussed below on a U.S. GAAP basis differ from the results that Sony Life, Sony Assurance and Sony Bank disclose on a Japanese statutory basis.

Financial Services revenue for the fiscal year ended March 31, 2006 increased by 182.7 billion yen, or 32.6 percent, to 743.2 billion yen compared with the previous fiscal year. Operating income increased by 132.8 billion yen, or 239.4 percent, to 188.3 billion yen and the operating income margin increased to 25.3 percent compared with the 9.9 percent of the previous fiscal year.

At Sony Life, revenue increased by 170.8 billion yen, or 36.0 percent, to 645.0 billion yen compared with the previous fiscal year. The main reasons for this increase were an improvement in gains and losses from investments at Sony Life, primarily within the general account, as well as an increase in revenue from insurance premiums reflecting an increase of insurance-in-force. The improvement in gains and losses from investments in the general account was principally a result of an improvement in valuation gains from stock conversion rights in convertible bonds resulting from the aforementioned favorable Japanese domestic stock market conditions. Operating income at Sony Life increased by 127.4 billion yen or 208.8 percent to 188.4 billion yen, mainly as a result of a significant improvement in gains and losses on investments in the general account mentioned above.

At Sony Assurance, revenue increased due to higher insurance revenue brought about by an expansion in automobile insurance-in-force. Operating income increased due to an increase in insurance revenue and an improvement in the expense ratio (the ratio of sales, general and administrative expenses to premiums).

At Sony Bank, which started operations in June 2001, although foreign exchange losses were recorded as a result of the depreciation of the yen on part of Sony Bank's foreign currency deposits, revenue rose as there was an increase in interest revenue associated with an increase in the balance of assets from investing activities, in addition to revenues from other investing activities. The amount of the operating loss decreased compared with the previous fiscal year, as a result of the increase in revenue.

At Sony Finance, a leasing and credit financing business subsidiary in Japan, revenue increased due to an increase in leasing and credit card revenue. In terms of profitability, a reduced operating loss was recorded compared to the previous fiscal year, as a result of improved profitability at a credit card business at Sony Finance.

Condensed Statements of Income Separating Out the Financial Services Segment (Unaudited)

The following schedule shows unaudited condensed statements of income for the Financial Services segment and all other segments excluding Financial Services as well as condensed consolidated statements of income. This presentation is not required under U.S. GAAP, which is used in Sony's consolidated financial statements. However, because the Financial Services segment is different in nature from Sony's other segments, Sony believes that a comparative presentation may be useful for understanding and analyzing Sony's consolidated financial statements.

Transactions between the Financial Services segment and all other segments excluding Financial Services are eliminated in the consolidated figures shown below.

Condensed Statements of Income

All Other

During the fiscal year ended March 31, 2006, sales within All Other were comprised mainly of sales from SMEJ, a Japanese domestic recorded music business; SMEI's music publishing business; So-net, an Internet-related service business subsidiary operating mainly in Japan; a retailer of imported general merchandise in Japan; an in-house facilities management business in Japan; and an advertising agency business in Japan. Results for the first four months of the previous fiscal year in All Other incorporated the results for SMEI's recorded music business, which, as noted above, was combined with Bertelsmann AG's recorded music business to form the SONY BMG joint venture which is accounted for by the equity method.

Sales for the fiscal year ended March 31, 2006 decreased by 44.9 billion yen, or 9.5 percent, to 426.0 billion yen, compared with the previous fiscal year. Of total segment sales, 81 percent were sales to outside customers. In terms of profit performance, operating income for All Other increased for the fiscal year from 5.1 billion yen to 20.5 billion yen.

During the fiscal year, the sales decrease within All Other reflects the fact that, as noted above, the results for the first four months of the previous fiscal year in All Other incorporated the results for SMEI's recorded music business.

Sales at SMEJ were relatively unchanged compared with the previous fiscal year. Best selling albums during the fiscal year included *Ken Hirai 10th Anniversary Complete Single Collection '95-'05 "Uta Baka"* by Ken Hirai, *NATURAL* by ORANGE RANGE and *BEST* by Mika Nakashima.

Excluding sales recorded within Sony's music business, there was an increase in sales within All Other. This increase was mainly due to strong sales at a business engaged in the production and marketing of animation products, favorable sales both at So-net and its subsidiaries, as well as an increase in sales recorded at an imported general merchandise retail business.

Regarding profit performance within All Other, operating income of 20.5 billion yen was recorded, a 15.5 billion yen increase compared to the 5.1 billion yen of operating income recorded in the previous fiscal year. This increase was mainly the result of the fact that the results for SMEI's recorded music business, which recorded an operating loss in the previous fiscal year, are now recorded as part of the results of the SONY BMG joint venture, and the continued strong performance at SMEJ, where operating income increased approximately 40 percent compared to the previous fiscal year mainly due to an improvement in the cost of sales ratio and the recording of a net gain resulting from the transfer to the Japanese government of the substitutional portion of Sony's Employee Pension Fund.

Excluding the operating income recorded in the music business, a loss was recorded within All Other mainly as the result of an asset impairment write-down associated with the sale of the Metreon, a U.S. entertainment complex. This was offset to some extent by cost reductions at network related businesses within Sony Corporation.

Foreign Exchange Fluctuations and Risk Hedging

During the fiscal year ended March 31, 2006, the average value of the yen was 112.3 yen against the U.S. dollar, and 136.3 yen against the Euro, which was 5.1 percent lower against the U.S. dollar and 2.0 percent lower against the Euro, respectively, compared with the average of the previous fiscal year.

In the Pictures segment, Sony translates into yen the U.S. dollar consolidated results of SPE (a U.S.-based operation that has worldwide subsidiaries).

Therefore, analysis and discussion of certain portions of the operating results of SPE are specified as being on “a U.S. dollar basis.” Results on a U.S. dollar basis are not on the same basis as Sony’s consolidated financial statements and do not conform with U.S. GAAP. In addition, Sony does not believe that these measures are a substitute for U.S. GAAP measures. However, Sony believes that results presented on a local currency basis provide additional useful information to investors regarding operating performance.

Sony’s consolidated results are subject to foreign currency rate fluctuations mainly derived from the fact that the countries where manufacturing takes place may be different from those where such products are sold. In order to reduce the risk caused by such fluctuations, Sony employs derivatives, including foreign exchange forward contracts and foreign currency option contracts, in accordance with a consistent risk management strategy. Such derivatives are used primarily to mitigate the effect of foreign currency exchange rate fluctuations on cash flows generated by anticipated intercompany transactions and intercompany accounts receivable and payable denominated in foreign currencies.

SGTS in London provides integrated treasury services for Sony Corporation and its subsidiaries. Sony’s policy is that Sony Corporation and all subsidiaries with foreign exchange exposures should enter into commitments with SGTS for hedging their exposures. Sony Corporation and most of its subsidiaries utilize SGTS for this purpose. The concentration of foreign exchange exposures at SGTS means that, in effect, SGTS hedges the net foreign exchange exposure of Sony Corporation and its subsidiaries. SGTS in turn enters into foreign exchange transactions with creditworthy third-party financial institutions. Most of the transactions are entered into against projected exposures before the actual export and import transactions take place. In general, SGTS hedges the projected exposures on average three months before the actual transactions take place. However, in certain cases SGTS partially hedges the projected exposures one month before the actual transactions take place when business requirements such as shorter production-sales cycle for certain products arise. Sony enters into foreign exchange transactions with financial institutions primarily for hedging purposes. Sony does not use these derivative financial instruments for trading or speculative purposes except for certain derivatives in the Financial Services segment utilized for portfolio investments and ALM.

To minimize the adverse effects of foreign exchange fluctuations on its financial results, particularly in the Electronics segment, Sony seeks, when appropriate, to localize material and parts procurement, design, and manufacturing operations in areas outside of Japan.

Changes in the fair value of derivatives designated as cash flow hedges, including foreign exchange forward contracts and foreign currency option contracts, are initially recorded in accumulated other comprehensive income and reclassified into earnings when the hedged transaction affects earnings. Foreign exchange forward contracts, foreign currency option contracts and other derivatives that do not qualify as hedges are marked-to-market with changes in value recognized in Other Income and Expenses. The notional amounts of foreign exchange forward contracts, currency option contracts purchased and currency option contracts written as of March 31, 2006 were 1,489.2 billion yen, 457.4 billion yen and 163.7 billion yen, respectively.

Assets, Liabilities and Stockholders' Equity

Assets

Total assets on March 31, 2007 increased by 1,108.6 billion yen, or 10.5 percent, to 11,716.4 billion yen, compared with the previous fiscal year-end. Total assets on March 31, 2007 in all segments excluding the Financial Services segment increased by 711.3 billion yen, or 11.1 percent, to 7,098.1 billion yen and total assets on March 31, 2007 in the Financial Services segment increased by 409.5 billion yen, or 9.0 percent, to 4,977.6 billion yen, compared with the previous fiscal year-end.

Current Assets

Current assets on March 31, 2007 increased by 777.2 billion yen, or 20.6 percent, to 4,546.7 billion yen compared with the previous fiscal year-end. Current assets on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 538.4 billion yen, or 18.2 percent, to 3,495.0 billion yen.

Cash and cash equivalents on March 31, 2007 in all segments, excluding the Financial Services segment, decreased 62.6 billion yen, or 10.7 percent, to 522.9 billion yen compared with the previous fiscal year-end.

Notes and accounts receivable, trade (net of allowance for doubtful accounts and sales returns) on March 31, 2007, excluding the Financial Services segment, increased 369.5 billion yen, or 37.9 percent, compared with the previous fiscal year-end to 1,343.1 billion yen. This was primarily the result of an increase in sales of the PS3.

Inventories on March 31, 2007 increased by 136.2 billion yen, or 16.9 percent, to 940.9 billion yen compared with the previous fiscal year-end. This increase was primarily a result of both increased semiconductor inventory, primarily for use in the PS3, and LCD television inventory in the Electronics segment and increased inventory in the Game segment resulting from the world-wide introduction of the PS3 platform. The inventory to cost of sales turnover ratio (based on the average of inventories at the end of each fiscal year and the previous fiscal year) was 1.78 months compared to 1.67 months at the end of the previous fiscal year. Sony considers this level of inventory to be appropriate in the aggregate.

Current assets on March 31, 2007 in the Financial Services segment increased by 237.8 billion yen, or 27.9 percent, to 1,089.3 billion yen, compared with the previous fiscal year-end. This increase was primarily due to an expansion of the life insurance and banking businesses.

Investments and Advances

Investments and advances on March 31, 2007 increased by 368.8 billion yen, or 10.5 percent, to 3,888.7 billion yen, compared with the previous fiscal year-end.

Investments and advances on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 148.8 billion yen, or 31.3 percent, to 623.3 billion yen. This was primarily a result of an increase in investments and advances towards affiliated companies such as Sony Ericsson and S-LCD.

Investments and advances on March 31, 2007 in the Financial Services segment increased by 216.6 billion yen, or 6.9 percent, to 3,347.9 billion yen, compared with the previous fiscal year-end. This increase was primarily due to investments mainly in Japanese fixed income securities by Sony Life, which increased assets as a result of an expansion of business, and an increase in mortgage loans at Sony Bank.

Also refer to "Investments" below.

Property, Plant and Equipment (after deduction of accumulated depreciation)

Property, plant and equipment on March 31, 2007 increased by 33.0 billion yen, or 2.4 percent, to 1,421.5 billion yen, compared with the previous fiscal year-end.

Property, plant and equipment on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 31.7 billion yen, or 2.3 percent, to 1,382.9 billion yen, compared with the previous fiscal year-end.

Capital expenditures (part of the increase in property, plant and equipment) for the fiscal year ended March 31, 2007 increased by 29.8 billion yen, or 7.8 percent, to 414.1 billion yen compared with the previous fiscal year. Capital expenditures in the Electronics segment increased by 22.9 billion yen, or 7.0 percent, to 351.5 billion yen. Capital expenditures in the semiconductor business within the Electronics segment, including capital expenditures related to the Cell Broadband Engine™ (“Cell/B.E.”), totaled approximately 150.0 billion yen. Capital expenditures increased in the Game segment by 8.4 billion yen, or 99.5 percent, to 16.8 billion yen. In the Pictures segment, capital expenditures increased by 0.9 billion yen, or 8.6 percent to 11.0 billion yen. In All Other, which includes Sony’s consolidated music business, 5.6 billion yen of capital expenditures were recorded, compared to the 4.2 billion yen of capital expenditures recorded in the previous fiscal year.

Property, plant and equipment on March 31, 2007 in the Financial Services segment increased by 1.2 billion yen, or 3.3 percent, to 38.7 billion yen compared with the previous fiscal year-end. Capital expenditures in the Financial Services segment increased by 2.4 billion yen, or 53.4 percent, to 6.8 billion yen.

Other Assets

Other assets on March 31, 2007 decreased by 18.7 billion yen, or 1.2 percent, to 1,550.7 billion yen, compared with the previous fiscal year end.

Other assets on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 44.1 billion yen to 1,100.8 billion yen compared with the previous fiscal year-end.

Deferred tax assets on March 31, 2007 increased by 38.2 billion yen, or 21.4 percent, to 217.0 billion yen compared with the previous fiscal year end. The increase is due primarily to an increase of deferred tax assets recorded in connection with tax loss carryforwards of foreign subsidiaries in the Game segment.

Other assets in the Financial Services segment on March 31, 2007 decreased by 46.2 billion yen, or 8.4 percent, to 501.8 billion yen compared with the previous fiscal year-end.

Liabilities

Total current and long-term liabilities on March 31, 2007 increased by 939.9 billion yen, or 12.8 percent, to 8,306.7 billion yen compared with the previous fiscal year-end. Total current and long-term liabilities on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 589.0 billion yen, or 16.6 percent, to 4,140.9 billion yen. Total current and long-term liabilities in the Financial Services segment on March 31, 2007 increased by 363.2 billion yen, or 9.1 percent, to 4,337.7 billion yen, compared with the previous fiscal year-end.

Current Liabilities

Current liabilities on March 31, 2007 increased by 351.6 billion yen, or 11.0 percent, to 3,551.9 billion yen compared with the previous fiscal year-end. Current liabilities on March 31, 2007 in all segments excluding the Financial Services segment increased by 311.3 billion yen, or 13.4 percent, to 2,640.6 billion yen.

Short-term borrowings and the current portion of long-term debt on March 31, 2007 in all segments, excluding the Financial Services segment, decreased 144.1 billion yen, or 64.0 percent, to 80.9 billion yen compared with the previous fiscal year-end. This was principally as a result of a decrease in the current portion of long-term debt, due to the redemption of straight bonds and medium-term notes.

Notes and accounts payable, trade on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 362.9 billion yen, or 45.1 percent, to 1,167.3 billion yen compared with the previous fiscal year-end.

Current liabilities on March 31, 2007 in the Financial Services segment increased by 39.1 billion yen, or 4.3 percent, to 957.5 billion yen, mainly due to an increase in deposits from customers at Sony Bank.

Long-term Liabilities

Long-term liabilities on March 31, 2007 increased by 588.3 billion yen, or 14.1 percent, to 4,754.8 billion yen compared with the previous fiscal year-end.

Long-term liabilities on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 277.7 billion yen, or 22.7 percent, to 1,500.3 billion yen. In addition, long-term debt on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 223.9 billion yen, or 31.9 percent, to 925.3 billion yen.

Long-term debt increased primarily due to the execution of yen-denominated syndicated loans for the purpose of allocating funds for general corporate purposes, including capital expenditures, and for debt redemption.

Long-term liabilities on March 31, 2007 in the Financial Services segment increased by 324.0 billion yen, or 10.6 percent, to 3,380.2 billion yen. This was due to an increase in insurance-in-force in the life insurance business which resulted in an increase in future insurance policy benefits and other of 293.3 billion yen, or 10.7 percent, to 3,037.7 billion yen.

Total Interest-bearing Debt

Total interest-bearing debt on March 31, 2007 decreased by 4.8 billion yen, or 0.4 percent, to 1,096.5 billion yen, compared with the previous fiscal year-end. Total interest-bearing debt on March 31, 2007 in all segments, excluding the Financial Services segment, increased by 79.7 billion yen, or 8.6 percent, to 1,006.2 billion yen.

Stockholders' Equity

Stockholders' equity on March 31, 2007 increased by 166.9 billion yen, or 5.2 percent, to 3,370.7 billion yen compared with the previous fiscal year-end. Retained earnings increased 116.9 billion yen compared with the previous fiscal year-end, and accumulated other comprehensive income (net of tax) was 115.5 billion yen. This was primarily due to accumulated other comprehensive income of 86.3 billion yen arising from foreign currency translation adjustments in the current fiscal year due to the depreciation of the yen, partially offset by a decrease in unrealized gains on securities in accumulated other comprehensive income of 14.7 billion yen in the current fiscal year. The ratio of stockholders' equity to total assets decreased 1.4 percentage points compared to the end of the previous fiscal year, from 30.2 percent to 28.8 percent.

Condensed Balance Sheets Separating Out the Financial Services Segment (Unaudited)

The following schedule shows an unaudited condensed balance sheet for the Financial Services segment and all other segments excluding Financial Services as well as the condensed consolidated balance sheet. This presentation is not required under U.S. GAAP, which is used in Sony's consolidated financial statements. However, because the Financial Services segment is different in nature from Sony's other segments, Sony believes that a comparative presentation may be useful in understanding and analyzing Sony's consolidated financial statements. Transactions between the Financial Services segment and all other segments excluding Financial Services are eliminated in the consolidated figures shown below.

Investments

Sony regularly evaluates its investment portfolio to identify other-than-temporary impairments of individual securities. Factors that are considered by Sony in determining whether an other-than-temporary decline in value has occurred include: the length of time and extent to which the market value of the security has been less than its original cost, the financial condition, operating results, business plans and estimated future cash flows of the issuer of the security, other specific factors affecting the market value, deterioration of issuer's credit condition, sovereign risk, and whether or not Sony is able to retain the investment for a period of time sufficient to allow for the anticipated recovery in market value.

In evaluating the factors for available-for-sale securities with readily determinable fair values, management presumes a decline in value to be other-than-temporary if the fair value of the security is 20 percent or more below its original cost for an extended period of time (generally a period of up to six months). The presumption of an other-than-temporary impairment in such cases may be overcome if there is evidence to support the conclusion that the decline is temporary in nature due to the existence of other factors which overcome the duration or magnitude of the decline. On the other hand, there may be cases where impairment losses are recognized when the decline in the fair value of the security is not more than 20 percent or such decline has not existed for an extended period of time, as a result of considering specific factors which may indicate the decline in the fair value is other-than-temporary.

The assessment of whether a decline in the value of an investment is other-than-temporary is often judgmental in nature and involves certain assumptions and estimates concerning the expected operating results, business plans and future cash flows of the issuer of the security. Accordingly, it is possible that investments in Sony's portfolio that have had a decline in value that Sony currently believes to be temporary may be determined to be other-than-temporary in the future based on Sony's evaluation of additional information such as continued poor operating results, future broad declines in value of worldwide equity markets and the effect of worldwide interest rate fluctuations. As a result, unrealized losses recorded for investments may be recognized into income in future periods.

The following table contains available-for-sale and held to maturity securities, breaking out the unrealized gains and losses by investment category.

	March 31, 2007			Fair Market Value
	Cost	Unrealized Gain	Unrealized Loss	
	(Yen in millions)			
Financial Services Business:				
Available-for-sale				
Debt securities				
Sony Life	2,129,352	17,679	(3,052)	2,143,979
Other	381,663	5,983	(5,794)	381,852
Equity securities				
Sony Life	210,009	105,376	(3,579)	311,806
Other	7,341	1,657	(40)	8,958
Held to maturity				
Debt securities				
Sony Life	—	—	—	—
Other	34,931	165	(127)	34,969
Total Financial Services	2,763,296	130,860	(12,592)	2,881,564
Non-Financial Services:				
Available-for-sale securities	70,496	21,909	(3,770)	88,635
Held to maturity securities	1,104	—	—	1,104
Total Non-Financial Services	71,600	21,909	(3,770)	89,739
Consolidated	2,834,896	152,769	(16,362)	2,971,303

The most significant portion of these unrealized losses relate to investments held by Sony Life. Sony Life principally invests in debt securities in various industries. Almost all of these securities were rated "BBB" or higher by Standard & Poor's, Moody's or other rating agencies. As of March 31, 2007, Sony Life had debt and equity securities which had gross unrealized losses of 3.1 billion yen and 3.6 billion yen, respectively. Of the unrealized loss amounts recorded by Sony Life, approximately 46 percent relate to securities being in an unrealized loss position for periods greater than 12 months as of March 31, 2007. These unrealized losses related to numerous investments, with no single investment being in a material unrealized loss position for the above-mentioned periods. In addition, there was no individual security with unrealized losses that met the test discussed above for impairment

as the declines in value were observed to be small both in amounts and percentage, and therefore, the decline in value for those investments was still determined to be temporary in nature. The percentage of non-investment grade securities held by Sony Life represents approximately 0.1 percent of Sony Life's total investment portfolio, while the percentage of unrealized losses that relate to those non-investment grade securities was approximately 1 percent of Sony Life's total unrealized losses as of March 31, 2007.

For fixed maturity securities with unrecognized losses held by Sony Life as of March 31, 2007 (3.1 billion yen), maturity dates vary as follows:

• Within 1 year:	0.4 percent
• 1 to 5 years:	96.0 percent
• 5 to 10 years:	3.4 percent
• Above 10 years:	0.2 percent

Sony also maintains long-term investment securities issued by a number of non-public companies. The aggregate carrying amount of the investments in non-public companies at March 31, 2007 was 64.9 billion yen. A non-public equity investment is valued at cost as fair value is not readily determinable. If the value is estimated to have declined and such decline is judged to be other-than-temporary, the impairment of the investment is recognized and the carrying value is reduced to its fair value.

For the fiscal years ended March 31, 2005, 2006 and 2007, total impairment losses were 4.2 billion yen, 4.0 billion yen and 7.4 billion yen, of which 0.5 billion yen, 0.2 billion yen and 6.1 billion yen, respectively, were recorded by Sony Life in Financial Services revenue. Impairment losses other than at Sony Life in each of the three years were reflected in non-operating expenses and primarily relate to certain strategic investments in non-financial services businesses. These investments primarily relate to the certain strategic investments in Japan and the U.S. with which Sony has strategic relationships for the purposes of developing and marketing new technologies. The impairment losses were recorded for each of the three fiscal years as these companies failed to successfully develop and market such technology, the operating performance of the companies was more unfavorable than previously expected and the decline in fair value of these companies was judged as other-than-temporary. None of these impairment losses was individually material to Sony.

Upon determination that the value of an investment is impaired, the value of the investment is written down to its fair value. For publicly traded investments, fair value is determined by the closing stock price as of the date on which the impairment determination is made. For non-public investments, fair value is determined through the use of such methodologies as discounted cash flows, valuation of recent financings and comparable valuations of similar companies. The impairment losses that were recorded in each of the three fiscal years related to the unique facts and circumstances of each individual investment and did not significantly impact other investments.

Sony Life and Sony Bank's investments constitute the majority of the investments in the Financial Services segment. Sony Life and Sony Bank account for approximately 85 percent and 13 percent of the investments of the Financial Services segment, respectively.

Sony Life's fundamental investment policy is to build an investment portfolio capable of ensuring stable mid-to long-term returns through the efficient investment of funds, taking into account both expected returns and investment risks and responding flexibly to changes in financial conditions and the investment environment, while maintaining a sound asset base. Moreover, as its fundamental stance towards ALM, a method of managing interest rate fluctuation risk through the comprehensive identification of differences in duration and cash flows between assets and liabilities, Sony Life takes the distinct characteristics of liability into account in order to control price fluctuation risks and establish a portfolio that ensures a certain level of returns. Sony Life adjusts its investing style depending on changes in the investment environment. In the first half of the fiscal year ended March 31, 2007, when interest rates in Japan were increasing, Sony Life invested mainly in long-term Japanese government bonds. Sony Life concentrated its investments in convertible bonds whose prices had declined due to the issuer's falling stock price.

Sony Bank operates using a similar basic investment policy as Sony Life, taking expected returns and investment risks into account in order to disperse associated risks, and structuring its asset portfolio to ensure steady returns from investments. In addition, Sony Bank is careful to match the duration of its asset portfolio with the

duration of liabilities resulting from customer deposits, in order to ensure that significant discrepancies do not occur. Government bonds and corporate bonds in yen or other currencies constitute a majority of Sony Bank's current portfolio. To safeguard its assets Sony Bank does not invest in equity securities but invests in various types of government and corporate bonds in many countries, companies and industries, to diversify associated risks. With respect to loans, Sony Bank mainly offers housing loans to individuals and does not have any corporate loan exposure.

Contractual obligations, commitments, and contingent liabilities

The following table summarizes Sony's contractual obligations and major commitments as of March 31, 2007. The references to the Notes below refer to a corresponding note within the Notes to Consolidated Financial Statements.

	Total	Payments Due by Period			
		Less than 1 year	1 to 3 year	3 to 5 year	After 5 year
(Yen in millions)					
Contractual Obligations and Major Commitments:*					
Long-term debt (Note 11)					
Capital lease obligations (Notes 8 and 11)	49,403	12,559	13,674	6,052	17,118
Other long-term debt (Note 11)	994,772	30,611	448,404	272,798	242,959
Minimum rental payments required under operating leases (Note 8)	202,723	46,154	64,811	31,129	60,629
Purchase commitments for property, plant and equipment and other assets (Note 23)	43,329	43,083	213	33	—
Expected cost for the production or purchase of films and television programming or certain rights (Note 23)	67,717	54,940	12,033	585	159
Partnership program contract with Fédération Internationale de Football Association (Note 23)	30,939	3,897	7,794	9,624	9,624
8th generation amorphous TFT-LCD panel manufacturing line at joint venture, S-LCD Corporation (Note 23)	50,200	50,200	—	—	—

*The total amount of expected future pension payments is not included in either the above table or the total amount of commitments outstanding at March 31, 2007 discussed below as such amount is not currently determinable. Sony expects to contribute approximately 37.0 billion yen to the Japanese pension plans and approximately 5.0 billion yen to the foreign pension plans during the fiscal year ending March 31, 2008 (Note 14).

*The total unused portion of the line of credit extended under loan agreements in the Financial Services segment is not included in either the above table or the amount of commitments outstanding at March 31, 2007 discussed below as it is not foreseeable how many loans will be executed. The total unused portion of the line of credit extended under these contracts was 348.4 billion yen as of March 31, 2007 (Note 23).

*The 5 year Revolving Credit Agreement with Sony BMG, which matures on August 5, 2009 and provides for a base commitment of 300 million U.S. dollars and additional incremental borrowings of up to 150 million U.S. dollars, is not included in either the above table or the amount of commitments outstanding at March 31, 2007 discussed below as such amount is not currently determinable. Sony's outstanding commitment under this Credit Agreement as of March 31, 2007 was 26.6 billion yen (Note 23).

The total amount of commitments outstanding at March 31, 2007 was 296.1 billion yen (Note 23). The commitments include major purchase obligations as shown above.

In the ordinary course of business, Sony makes commitments for the purchase of property, plant and equipment. As of March 31, 2007, such commitments outstanding were 43.3 billion yen.

A subsidiary in the Pictures segment has committed to fund a portion of the production costs of completed films and is responsible for all distribution and marketing expenses relating to these films under a distribution agreement with a third party. Further, certain subsidiaries in the Pictures segment have entered into agreements with creative talent for the development and production of films and television programming as well as agreements with third parties to acquire completed films, or certain rights therein. As of March 31, 2007, the total amount of the expected cost for the production or purchase of films and television programming or certain rights under the above commitments was 67.7 billion yen.

Sony Corporation has entered into a partnership program contract with Fédération Internationale de Football Association (“FIFA”). Through this program Sony Corporation will be able to exercise various rights as an official sponsor of FIFA events from 2007 to 2014. As of March 31, 2007, Sony Corporation was committed to make payments of 30.9 billion yen under such contract.

In July 2006, Sony Corporation and Samsung signed the final contract with respect to the construction of an 8th generation amorphous TFT-LCD panel manufacturing line at their joint venture, S-LCD. As of March 31, 2007, Sony Corporation was committed to make payments of 50.2 billion yen under such contract.

In order to fulfill its commitments, Sony will use cash generated by its operating activities, intra-group loans and borrowings from subsidiaries with excess funds to subsidiaries that are short of funds through its finance subsidiaries, and, when necessary, raise funds from the global capital markets and banks.

The following table summarizes Sony’s contingent liabilities as of March 31, 2007.

	Total Amounts of Contingent Liabilities
Contingent Liabilities: (Note 23)	(Yen in millions)
Loan guarantees to related parties	11,100
Other	10,581
Total contingent liabilities	21,681

Off-Balance Sheet Arrangements

Sony has several off-balance sheet arrangements to provide liquidity, capital resources and/or credit risk support.

During the fiscal year ended March 31, 2005, Sony entered into accounts receivable sales programs that provide for the accelerated receipt of up to 47.5 billion yen of eligible trade accounts receivable of Sony Corporation. Through these programs, Sony can sell receivables to special purpose entities owned and operated by banks. These transactions are accounted for as a sale in accordance with Financial Accounting Standards (“FAS”) No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities”, because Sony has relinquished control of the receivables. Accordingly, accounts receivable sold under these transactions are excluded from receivables in the accompanying consolidated balance sheet. The initial sale of these receivables was in March 2005, and Sony sold a total of 10.0 billion yen for the fiscal year ended March 31, 2005. Total receivables sold for the fiscal years ended March 2006 and 2007 were 146.2 billion yen and 152.5 billion yen, respectively. Losses from these transactions were insignificant. Although Sony continues servicing the sold receivables, no servicing liabilities are recorded because costs regarding collection of the sold receivables are insignificant.

Refer to Note 6 of Notes to Consolidated Financial Statements for more information on the accounts receivable securitization.

Sony has, from time to time, entered into various arrangements with variable interest entities (“VIEs”). In several of the arrangements in which Sony holds a significant variable interest, Sony is the primary beneficiary and therefore consolidates these VIEs. These arrangements include facilities which provide for the leasing of certain property, the financing of film production and the U.S. based music publishing business. In addition, Sony holds a significant variable interest in VIEs in which Sony is not the primary beneficiary and therefore does not consolidate. These VIEs include the film production/co-financing arrangements noted as follows.

On December 30, 2005, a subsidiary in the Pictures segment entered into a production/co-financing agreement with a VIE to co-finance 11 films that were released over the 15 months ended March 31, 2007. The subsidiary received 373 million U.S. dollars over the term of the agreement to fund the production or acquisition cost of films (including fees and expenses). The subsidiary is responsible for the marketing and distribution of the product through its global distribution channels. The VIE shares in the net profits, as defined, of the films after the subsidiary recoups a distribution fee, its marketing and distribution expenses, and third party participation and residual costs, each as defined. The subsidiary did not make any equity investment in the VIE nor issue any guarantees with respect to the VIE. On April 28, 2006, the subsidiary entered into a second production/co-financing agreement with a VIE to co-finance additional films. Nine films are anticipated to be released under this financing arrangement. The subsidiary will receive approximately 240 million U.S. dollars over the term of the agreement to fund the production or acquisition cost of the films (including fees and expenses). Similar to the first agreement, the subsidiary is responsible for the marketing and distribution of the product through its global distribution channels. The VIE shares in the net profits, as defined, of the films after the subsidiary recoups a distribution fee, its marketing and distribution expenses, and third party participation and residual costs, each as defined. As of March 31, 2007, three co-financed films have been released by the subsidiary and 37 million U.S. dollars has been received from the VIE under this agreement. The subsidiary did not make any equity investment in the VIE nor issue any guarantees with respect to the VIE. On January 19, 2007, the subsidiary entered into a third production/co-financing agreement with a VIE to co-finance a majority of the films to be submitted through March 2012. The subsidiary has received a commitment from the VIE that the VIE will fund up to 525 million U.S. dollars on a revolving basis to fund the production or acquisition cost of films (including fees and expenses). As of March 31, 2007, no films of the subsidiary have been funded by this VIE. Similar to the first two agreements, the subsidiary is responsible for marketing and distribution of the product through its global distribution channels. The VIE shares in the net profits, as defined, of the films after the subsidiary recoups a distribution fee, its marketing and distribution expenses, and third party participation and residual costs, each as defined. The subsidiary did not make any equity investment in the VIE nor issue any guarantees with respect to the VIE.

Refer to Note 22 of Notes to Consolidated Financial Statements for more information on variable interest entities.

Cash Flows

(The fiscal year ended March 31, 2007 compared with the fiscal year ended March 31, 2006)

Operating Activities: During the fiscal year ended March 31, 2007, Sony generated 561.0 billion yen of net cash from operating activities, an increase of 161.2 billion yen, or 40.3 percent compared with the previous fiscal year. Of this total, all segments excluding the Financial Services segment generated 305.6 billion yen of net cash from operating activities, an increase of 53.6 billion yen, or 21.3 percent, compared with the previous fiscal year, and the Financial Services segment generated 256.5 billion yen of net cash from operating activities, an increase of 109.4 billion yen, or 74.3 percent, compared with the previous fiscal year.

During the fiscal year, there was a positive impact on operating cash flow from an increase in notes and accounts payable, trade, and an increase in future insurance policy benefits and other as well as the contribution of net income after taking into account depreciation and amortization. However, primarily offsetting these contributions was an increase in notes and accounts receivable, trade, and inventory, particularly within the Electronics and Game segments.

Compared with the previous fiscal year, net cash provided by operating activities increased mainly as a result of an increase in net income after taking into account depreciation and amortization recorded during the fiscal year as compared to the previous fiscal year, as well as the effect of the gain on the transfer to the Japanese government of

the substitutional portion of the employee pension fund in the previous fiscal year, and the effect of an increase in revenue from insurance premiums, primarily reflecting an increase in insurance-in-force at Sony Life.

Investing Activities: During the fiscal year, Sony used 715.4 billion yen of net cash in investing activities, a decrease of 155.8 billion yen, or 17.9 percent, compared with the previous fiscal year. Of this total, all segments, excluding the Financial Services segment, used 431.1 billion yen of net cash in investing activities, an increase of 134.7 billion yen, or 45.5 percent, compared with the previous fiscal year, and the Financial Services segment used 276.7 billion yen in net cash, a decrease of 287.0 billion yen, or 50.9 percent compared with the previous fiscal year.

During the fiscal year, purchases of fixed assets (capital expenditures) in the Electronics segment were made primarily for semiconductor manufacturing facilities. Part of an investment in S-LCD was also made for manufacturing facilities for 8th generation TFT LCD panels.

Within the Financial Services segment, payments for investments and advances, such as investments mainly in Japanese fixed income securities at Sony Life and an increase in the outstanding balance of mortgage loans at Sony Bank, exceeded proceeds from the maturities of marketable securities, sales of securities investments and collections of advances.

Compared with the previous fiscal year, net cash used in investing activities increased within all segments excluding the Financial Services segment, reflecting the additional investment in S-LCD and the purchases of fixed assets noted above. On the other hand, net cash used in the Financial Services segment for investing activities decreased compared to the previous fiscal year due to the fact that there was an increase in the collections of investments and advances as compared to the previous fiscal year.

In all segments excluding the Financial Services segment, the difference between cash generated from operating activities and cash used in investing activities was a net use of cash of 125.5 billion yen, an increase of 81.1 billion yen, or 182.7 percent, as compared to a net use of cash of 44.4 billion yen in the previous fiscal year.

Financing Activities: During the fiscal year ended March 31, 2007, 247.9 billion yen of net cash was provided by financing activities. Of the total, 59.6 billion yen of net cash was generated from financing activities in all segments excluding the Financial Services segment, a decrease of 15.0 billion yen or 20.1 percent, compared to net cash generated in the previous fiscal year of 74.6 billion yen. This was a result, as noted above, of financing carried out through yen-denominated syndicated loans during the current fiscal year.

In the Financial Services segment, as a result of an increase in policyholder accounts at Sony Life and an increase in deposits from customers at the banking business, financing activities generated 179.6 billion yen of net cash.

Accounting for all these factors and the effect of exchange rate changes, the total outstanding balance of cash and cash equivalents at the end of the fiscal year increased by 96.8 billion yen, or 13.8 percent, to 799.9 billion yen, compared with the end of the previous fiscal year. The total outstanding balance of cash and cash equivalents of all segments, excluding the Financial Services segment, decreased by 62.6 billion yen, or 10.7 percent, to 522.9 billion yen, and for the Financial Services segment, increased by 159.4 billion, or 135.5 percent, to 277.0 billion yen, compared with the end of the previous fiscal year.

Condensed Statements of Cash Flows Separating Out the Financial Services Segment (Unaudited)

The following schedule shows unaudited condensed statements of cash flow for the Financial Services segment and all other segments excluding the Financial Services segment as well as condensed consolidated statements of cash flow. These presentations are not required under U.S. GAAP, which is used in Sony's consolidated financial statements. However, because the Financial Services segment is different in nature from Sony's other segments, Sony believes that a comparative presentation may be useful in understanding and analyzing Sony's consolidated financial statements. Transactions between the Financial Services segment and all other segments excluding the Financial Services segment are eliminated in the consolidated figures shown below.

Condensed Statements of Cash Flows

Financial Services	Fiscal Year ended March 31	
	2006	2007
	(Yen in millions)

Cash Flows

(The fiscal year ended March 31, 2006 compared with the fiscal year ended March 31, 2005)

Operating Activities: During the fiscal year ended March 31, 2006, Sony generated 399.9 billion yen of net cash from operating activities, a decrease of 247.1 billion yen, or 38.2 percent compared with the previous fiscal year. Of this total, all segments, excluding the Financial Services segment, generated 252.0 billion yen of net cash from

operating activities, a decrease of 233.5 billion yen, or 48.1 percent, compared with the previous fiscal year, and the Financial Services segment generated 147.1 billion yen of net cash from operating activities, a decrease of 20.9 billion yen, or 12.5 percent, compared with the previous fiscal year.

During the fiscal year, there was a positive impact on operating cash flow mainly from the effect of the profit contribution from the Financial Services segment, and after taking into account depreciation and amortization, as well as the effect of the loss on sale, disposal or impairment of assets, net. However, primarily offsetting these contributions was an increase in inventory, particularly within the Electronics and Game segments, the effect of the non-cash net gain on the transfer to the Japanese Government of the substitutional portion of the employee pension fund, an increase in deferred acquisition costs within the Financial Services segment and effect of the gain on change in interest in subsidiaries and equity investees.

Compared with the previous fiscal year, net cash provided by operating activities decreased mainly as a result of lower net income recorded during the fiscal year as compared to the previous fiscal year, and, as noted above, the increase in inventory during the fiscal year compared with the previous fiscal year, the effect of the gain on the transfer to the Japanese Government of the substitutional portion of the employee pension fund, and of the gain on change in interest in subsidiaries and equity investees.

Investing Activities: During the fiscal year, Sony used 871.3 billion yen of net cash in investing activities, a decrease of 59.9 billion yen, or 6.4 percent, compared with the previous fiscal year. Of this total, all segments, excluding the Financial Services segment, used 296.4 billion yen of net cash in investing activities, a decrease of 175.7 billion yen, or 37.2 percent, compared with the previous fiscal year, and the Financial Services segment used 563.8 billion yen in net cash, an increase of 142.4 billion yen, or 33.8 percent. During the fiscal year, purchases of fixed assets (capital expenditures) were made, primarily due to proactive capital expenditures in semiconductors mainly within the Electronics segment, mostly associated with image sensors.

Within the Financial Services segment, payments for investments and advances exceeded proceeds from maturities of marketable securities, sales of securities investments and collections of advances, primarily as a result of investments, mainly in Japanese fixed income securities, resulting from an increase in insurance premiums at Sony Life, and an increase in the outstanding balance of mortgage loans at Sony Bank.

Compared with the previous fiscal year, net cash used in investing activities decreased, primarily due to the fact that in the previous fiscal year, investments were carried out principally in relation to S-LCD and in semiconductor fabrication equipment, particularly investments associated with the Cell/B.E. On the other hand, within the Financial Services segment, net cash used in investing activities increased due to an increase in investments and advances compared to the previous fiscal year.

In all segments excluding the Financial Services segment, the difference between cash generated from operating activities and cash used in investing activities was a use of cash of 44.4 billion yen, as compared to the 13.3 billion yen of cash generated in the previous fiscal year.

Financing Activities: During the fiscal year ended March 31, 2006, 359.9 billion yen of net cash was provided by financing activities. Of the total, 74.6 billion yen of net cash was generated from financing activities in all segments, excluding the Financial Services segment, compared to a use of net cash in the previous fiscal year of 95.4 billion yen. This was a result of straight bonds issued in order to redeem bonds maturing during the fiscal years ended March 31, 2006 and March 31, 2007.

In the Financial Services segment, as a result of an increase in policyholder accounts at Sony Life, and an increase in deposits from customers, as well as call loan borrowings carried out at Sony Bank, financing activities generated 274.9 billion yen of net cash.

Accounting for all these factors and the effect of exchange rate changes, the total outstanding balance of cash and cash equivalents at the end of the fiscal year decreased by 76.0 billion yen, or 9.8 percent, to 703.1 billion yen, compared with the end of the previous fiscal year. The total outstanding balance of cash and cash equivalents of all segments excluding the Financial Services segment, increased by 65.7 billion yen, or 12.6 percent, to 585.5 billion yen, and for the Financial Services segment, decreased by 141.7 billion, or 54.6 percent, to 117.6 billion yen, compared with the end of the previous fiscal year.

Condensed Statements of Cash Flows Separating Out the Financial Services Segment (Unaudited)

The following schedule shows unaudited condensed statements of cash flow for the Financial Services segment and all other segments excluding the Financial Services segment as well as condensed consolidated statements of cash flow. These presentations are not required under U.S. GAAP, which is used in Sony's consolidated financial statements. However, because the Financial Services segment is different in nature from Sony's other segments, Sony believes that a comparative presentation may be useful in understanding and analyzing Sony's consolidated financial statements. LIQUIDITY AND CAPITAL RESOURCES

Sony's financial policy is to maintain the strength of its balance sheet, while securing adequate liquidity for business expenses.

Sony intends to continue various investments for future growth. Funding requirements that arise from its business strategy are principally covered by free cash flow generated from business operations and by cash and cash equivalents ("cash balance") however as needed, Sony will procure funds from the financial and capital markets.

For these financing activities, Sony has sufficient access to financial and capital markets as described below. In addition, to sustain sufficient liquidity, Sony has committed lines of credit with financial institutions, together with cash balances.

The description below covers liquidity and capital resources for consolidated Sony and excludes the Financial Services segment, which secures liquidity on its own.

Market Access

Sony Corporation and SGTS, a finance subsidiary in the U.K., procure funds from the financial and capital markets.

In order to meet long-term funding requirements, Sony Corporation utilizes its access to global equity and bond markets and borrowings from financial institutions. During the fiscal year ended March 31, 2007, Sony issued an 80 billion yen syndicated loan in June 2006 (3 years maturity), and a 130 billion yen syndicated loan in December 2006 (4 years and 7 years maturity), for general corporate purposes including capital expenditures, and debt redemption. Sony maintains a bond shelf registration of 300 billion yen filed in Japan, effective until April 2008; however Sony has not issued a bond using this shelf registration during the fiscal year ended March 31, 2007.

In order to meet the working capital requirements of Sony, SGTS maintains commercial paper (“CP”) programs and a medium-term note (“MTN”) program. SGTS maintains CP programs for the U.S., Euro and Japanese CP markets. As of March 31, 2007, the total maximum amount to be issued under these CP programs, translated into yen, was 1,326.6 billion yen. During the fiscal year ended March 31, 2007, the largest month-end outstanding balance of CP was 348.2 billion yen in November 2006. There was no outstanding balance of CP as of March 31, 2007.

SGTS maintains a Euro MTN program with a program limit amount, translated into yen as of March 31, 2007, of 590.5 billion yen. There was no outstanding balance as of that date.

Liquidity Management

Sony’s working capital needs grow significantly in the third quarter (from October to December) as a result of the general seasonality of Sony’s business. Sony’s basic liquidity management policy is to secure sufficient liquidity throughout the relevant fiscal year, covering such factors as short-term cash flow volatility mentioned above, repayments for debts whose due date fall within a year, and possible downward earnings risk due to changes in the business environment.

Sony defines its liquidity sources as the amount of cash balance, and committed lines of credit contracted with financial institutions. Regarding its cash balance, Sony’s policy is to maintain more than a certain level of cash balance to absorb any daily and monthly working capital needs. The balance of cash and marketable securities on March 31, 2007 was 525.9 billion yen. A short-term shortage in the cash balance is financed by the issuance of CP. However, Sony controls the outstanding CP amount through internal limits as part of its short-term debt risk management strategy.

For general corporate purposes, including the support of CP programs and for emergency purposes, Sony has a total, translated into yen, of 689.3 billion yen in committed lines of credit with various financial institutions, of which the unused amount was 684.9 billion yen as of March 31, 2007. Major committed lines of credit include a total, translated into yen, of 505.4 billion yen of Global Commitment Facilities contracted with a syndicate of global banks effective until March 2009, and a 150 billion yen committed line of credit contracted with Japanese financial institutions, effective until July 2009. During the fiscal year ended March 31, 2007, the contract period of the committed line of credit with Japanese financial institutions was extended for one year, from the previous contract which was effective until July 2008. In the event of a downgrade in Sony’s credit ratings, even though the cost of borrowing could increase, there are no financial covenants in any of Sony’s material financial agreements that would cause an acceleration of the obligation. In general, there are no restrictions on the uses of proceeds except that some borrowings may not be used to acquire securities listed on a U.S. exchange or traded over-the-counter in the U.S., and the use of such borrowings must comply with the rules and regulations issued by authorities such as the Board of Governors of the Federal Reserve Board.

Ratings

Sony considers one of management's top priorities to be the maintenance of a stable and appropriate credit ratings in order to ensure financial flexibility for liquidity and capital management and continued adequate access to sufficient funding resources in the financial and capital markets.

In order to facilitate access to global capital markets, Sony obtains credit ratings from two rating agencies, Moody's Investors Service ("Moody's") and Standard and Poor's Rating Services ("S&P"). In addition, Sony maintains a rating from Rating and Investment Information, Inc. ("R&I"), a rating agency in Japan, for access to the Japanese capital market.

Sony's current debt ratings from each agency are noted below:

	Moody's	S&P	R&I
Long-term debt	A2 (Outlook: Stable)	A- (Outlook: Negative)	AA- (Outlook: Stable)
Short-term debt	P-1	A-2	a-1+

In October 2006, S&P changed its outlook of Sony's long-term debt rating from stable to negative. This change was made based upon their view of increased uncertainty for Sony's business recovery in fiscal year 2007 onwards. Despite this change in outlook, Sony believes its access to the global capital markets and its ability to issue CP for its working capital needs have not been restricted.

Cash Management

Sony is centralizing and working to make more efficient its global cash management activities through SGTS. The excess or shortage of cash at most of Sony's subsidiaries is invested or funded by SGTS after having been netted out, although Sony recognizes that fund transfers are limited in certain countries and geographical areas due to restrictions on capital transactions. In order to pursue more efficient cash management, Sony manages uneven cash distribution among its subsidiaries directly or indirectly through SGTS so that Sony can reduce unnecessary cash and cash equivalents as well as borrowings as much as possible.

Financial Services segment

In the Financial Services segment, the management of Sony Financial Holdings Inc. ("SFH"), Sony Life, Sony Assurance and Sony Bank recognize the importance of securing sufficient liquidity to cover the payment of obligations that they incur in the ordinary course of business, and these companies abide by the regulations imposed by regulatory authorities and establish and operate under company guidelines that comply with these regulations. Their purpose in doing so is to maintain sufficient cash and cash equivalents and secure sufficient means to pay their obligations. For instance, cash inflows for Sony Life and Sony Assurance come mainly from policyholders' insurance premiums and Sony Life and Sony Assurance keep sufficient liquidity in the form of investments primarily in various securities. Sony Bank, on the other hand, uses its cash inflows, which come mainly from customers' deposits in local or foreign currencies, in order to offer mortgage loans to individuals or to make bond investments, and establish a necessary level of liquidity for the smooth settlement of transactions.

Sony Life currently obtains ratings from five rating agencies: A+ by S&P for insurer financial strength rating, Aa3 by Moody's for insurance financial strength rating, A+ by AM Best Company Inc. for financial strength rating, AA by R&I for insurance claims paying ability and AA by the Japan Credit Rating Agency Ltd. for ability to pay insurance claims. Sony Bank obtained an A- rating from S&P for its long-term local/foreign currency issuer ratings and an A-2 rating from S&P for its short-term local/foreign currency issuer rating.

RESEARCH AND DEVELOPMENT

In its mid-term corporate strategy announced on September 22, 2005, Sony stressed that the most pressing issue confronting Sony today is the revitalization of its electronics business. The strengthening of the competitiveness of Sony's technologies and its products is an important element of both the revitalization of the Electronics business and Sony's growth strategy, and Sony expects that research and development activities that support this competitiveness will remain pivotal to its mid- to long term strategy.

Research and development is focused in four key domains: a common development platform technology for home and mobile electronics and the technologies essential for product differentiation and for creating value-added products, semiconductor, device, and software technologies.

Reflecting Sony's mid-term corporate strategy, in October 2005, Sony established the Display Device Development Group, to accelerate the development of organic light-emitting diode ("OLED") displays, and the Technology Development Group, to strengthen software development. In April 2007, Sony expressed its intention to begin selling 11- inch OLED flat panel televisions during 2007.

Research and development costs for the fiscal year ended March 31, 2007 increased 12.1 billion yen, or 2.3 percent, to 543.9 billion yen, compared with the previous fiscal year. The ratio of research and development costs to net sales (which excludes financial service revenue) decreased from 7.8 percent to 7.1 percent. The bulk of research and development costs were incurred in the Electronics and Game segments. Expenses in the Electronics segment increased 22.3 billion yen, or 5.3 percent, to 440.4 billion yen, whereas expenses in the Game segment decreased 10.8 billion yen, or 9.9 percent, to 97.9 billion yen. In the Electronics segment, approximately 62 percent of expenses were for the development of new product prototypes while the remaining approximately 38 percent were for the development of mid- to long-term new technologies in such areas as semiconductors, communications and displays. In the Game segment, research and development costs decreased mainly due to the completion of most of the PS3's research and development phase.

Research and development costs for the fiscal year ended March 31, 2006 increased 29.8 billion yen, or 5.9 percent, to 531.8 billion yen, compared with the previous fiscal year. The ratio of research and development costs to net sales (which excludes financial service revenue) increased from 7.5 percent to 7.8 percent. The bulk of research and development costs were incurred in the Electronics and Game segments. Expenses in the Electronics segment decreased 15.2 billion yen, or 3.5 percent, to 418.1 billion yen, whereas expenses in the Game segment increased 40.2 billion yen, or 58.7 percent, to 108.7 billion yen. In the Electronics segment, approximately 64 percent of expenses were for the development of new product prototypes while the remaining 36 percent were for the development of mid- to long-term new technologies in such areas as semiconductors, communications, displays and next generation optical discs. In addition, within the Game segment, there was an increase primarily of hardware-related research and development costs associated with the PS3.

Research and development costs for the fiscal year ended March 31, 2005 decreased 12.5 billion yen, or 2.4 percent, to 502.0 billion yen, compared with the previous fiscal year. The ratio of research and development costs to net sales (which excludes financial service revenue) increased from 7.4 percent to 7.5 percent. The bulk of research and development costs were incurred in the Electronics and Game segments. Expenses in the Electronics segment increased 2.4 billion yen, or 0.6 percent, to 433.3 billion yen, and expenses in the Game segment decreased 14.9 billion yen, or 17.9 percent, to 68.5 billion yen. In the Electronics segment, approximately 62 percent of expenses were for the development of new product prototypes while the remaining 38 percent were for the development of mid- to long-term new technologies in such areas as semiconductors, communications, displays and next generation optical discs. There was an increase in research and development costs related to semiconductor process technology associated with the transfer of Sony Computer Entertainment's semiconductor manufacturing operations from the Game segment to the Electronics segment. However, the stringent selection of research and development activities resulted in a small increase in research and development expenses within the Electronics segment. Research and development expenses in the Game segment remained high due to the research and development associated with the PSP and the PS3.

TREND INFORMATION

This section contains forward-looking statements about the possible future performance of Sony and should be read in light of the cautionary statement on that subject, which appears on the inside front cover page and applies to this entire document.

Issues Facing Sony and Management's Response to those Issues

Competition in many of Sony's business segments continues to intensify and price erosion, especially in the Electronics segment, remains persistent. Competition has intensified due to the penetration of broadband, which has

led to an augmentation of network infrastructure, making it easier for companies in other sectors to enter the markets in which Sony competes.

In response to these challenges, Sony has been undertaking initiatives to improve its competitiveness and strengthen the quality of its management, such as a reduction in the number of business categories and the number of models, a rationalization of manufacturing sites and the creation of a more efficient administrative structure, as well as the sale of non-core assets (refer to “Restructuring” in “Item 5. *Operating and Financial Review and Prospects*” for more detailed information about restructuring). This plan, developed in consultation with Sony’s stakeholders both inside and outside the company, moved to strengthen Sony’s competitiveness in three core sectors — Electronics, Game and Entertainment — through a balanced mix of restructuring and growth initiatives combined with a new organizational structure. In particular, it is the revitalization of Electronics that management regards as the most pressing issue confronting Sony today. As well as reorganizing its Electronics business to place centralized decision-making authority over key areas under the Electronics CEO, Sony is implementing reorganization initiatives to strengthen horizontal coordination in the key areas of product planning, technology, procurement, manufacturing, and sales and marketing. For Sony’s growth strategy in Electronics, resources will be focused on the development and commercialization of high-definition products, mobile products and advanced semiconductors and other key devices that can further differentiate these products, targeting enhanced competitiveness and improved profitability. In the Game segment, Sony intends to expand the PS3 platform while developing its PS2 and PSP businesses.

In addition to this cost-cutting and investment for growth, each of Sony’s business segments grappled with issues specific to that segment. Below is a description of the issues management believes each segment continues to face and an explanation as to how each segment is approaching those issues.

Electronics

Although the Electronics segment continues to hold a very strong position in the worldwide consumer audio visual products market, that position has become increasingly threatened as a result of the entrance of new manufacturers and distributors. These new entrants are threatening Sony’s position due to the industry shift from analog to digital technology. In the analog era, complicated functionality of electronics products was made possible through the combination of several complex parts, and Sony held a competitive advantage in the design and manufacture of those parts as a result of its accumulated expertise. In the digital era, however, complicated functionality has become concentrated on semiconductors and other key digital devices. Since these semiconductors and key devices are able to be mass produced, they have become readily available to new market entrants, and the functionality that once commanded a high premium has become more affordable. This has led to intense price erosion in the consumer audio visual products market. To respond to these challenges, Sony is striving to keep pace with price erosion by reducing its manufacturing and other costs. It is seeking to maintain the premium pricing it enjoys on many of its end-user products by adding functionality to those products and developing new applications and ways of use that appeal to the consumer. In addition, it is taking steps to increase its competitive edge by developing high value-added semiconductors and other digital key devices in-house. By enhancing the in-house production of key devices, Sony aims to incorporate added-value into these key devices.

In the area of semiconductors, in the fiscal years ended March 31, 2006 and 2007, Sony carried out 140 billion yen and 150 billion yen, respectively, of capital expenditures mainly on system large scale integrations (“LSI”) and CCDs. These totals also include Sony’s investment in semiconductor fabrication equipment built at the 65 nanometer process technology level. Chips that will be manufactured using this equipment will be some of the most highly advanced on the market, and will include system LSI, in particular the Cell/B.E. microprocessor for the broadband era, which is already used in the computer entertainment system, PS3, and is anticipated for use in digital consumer electronics products. Over the last five years, Sony Corporation, Sony Computer Entertainment, IBM Corporation (“IBM”) and Toshiba Corporation (“Toshiba”) have carried out joint development focused on 90 and 65 nanometer process technology for utilization in the design and manufacturing of the Cell/B.E. Moreover, in 2006 Sony Corporation, IBM, and Toshiba concluded a new joint development agreement and an alliance for the research and development of advanced semiconductor technology has begun.

Sony has reconsidered its investment policy in the semiconductor business. In the future, Sony will carefully select investments and adopt a strategy to more clearly focus on the CCD and CMOS image sensor, television- and video-related, and Game-related businesses.

In the area of other key devices, S-LCD, Sony's joint venture with Samsung, which is based in South Korea, started production of 7th generation amorphous TFT LCD panel (glass panel size: 1,870mm x 2,200mm) in April 2005 and since October 2005 has been producing 60,000 sheets a month. In July 2006, S-LCD increased its production capacity to 75,000 sheets a month and further increased its production capacity to 90,000 sheets in January 2007.

In July 2006, Sony and Samsung signed the final contract regarding the manufacturing of 8th generation TFT LCD panels (glass panel size: 2,200mm x 2,500mm) at the S-LCD joint venture. The total amount of the investment is expected to be approximately 200 billion yen (approximately 50 percent of which will be borne by Sony), the major part of which has already been completed. The start of mass production is targeted for summer 2007 with production capacity expected to be 50,000 sheets a month.

Game

In the Game segment, for the PS2, which is in its eighth year since release, Sony estimated a decrease in production shipment volume, including hardware and software, for the fiscal year ended March 31, 2007. However, as the PS2 platform is still recording favorable sales around the world, Sony will continue to try to maintain the scale of this business. Sony is strongly promoting the PSP platform by offering new ways to enjoy it, such as by increasing interconnectivity with the PS3, along with expanding the line-up of software unique to the PSP. Sony expects a significant reduction in the operating loss of the PS3 business with the rollout of an exciting software lineup, in addition to seeking rapid cost reductions, mainly by shrinking the size of semiconductor chips and reducing the number of parts in the console.

Pictures

In the Pictures segment, Sony faces intense competition, rising expenses, including advertising and promotion expenses, and a growing trend toward digital piracy. In addition, the DVD format is ten years old and is showing signs of maturation. To meet these challenges, Sony is working to distribute a diversified portfolio of motion pictures with broad worldwide appeal on existing and new home entertainment formats, including Blu-ray, and on other emerging platforms, including digital download.

Financial Services

In the Financial Services segment, the value of assets accumulated by the businesses in the segment has grown continuously over the past several years, resulting in a large portion (approximately 42 percent as of March 31, 2007) of Sony's total assets being accounted for by the Financial Services segment. To strengthen asset management and risk management in parallel with this growing asset value, enhance disclosure of business details, and offer customers integrated financial services tailored to their individual needs, Sony established SFH in April 2004. SFH functions as a holding company overseeing Sony Life, Sony Assurance and Sony Bank, with the aim of increasing the synergies among these businesses.

With respect to the environment in the financial services industry, Sony expects increasingly intense competition as it confronts changes in its business environment. In particular, Sony expects competition to result from the deregulation and liberalization of additional insurance premiums, postal privatization and the complete lifting of the ban on the sale of insurance products at banks, as well as changes in the macroeconomic environment brought about by Japan's declining population, low birthrate and growing proportion of elderly citizens. In response to this changing environment, each of Sony's financial services businesses, which are latecomers to the life insurance, property and casualty insurance and banking industries, make use of distinctive, individual industry-specific business models and plan to achieve further business expansion and even higher levels of customer satisfaction.

CRITICAL ACCOUNTING POLICIES

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, Sony evaluates its estimates which are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The results of these evaluations form the basis for making judgments about the carrying values of assets and liabilities and the reported amounts of expenses that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions. Sony considers an accounting policy to be critical if it is important to its financial condition and results, and requires significant judgments and estimates on the part of management in its application. Sony believes that the following represent the critical accounting policies of the company.

Investments

Sony's investments are comprised of debt and equity securities accounted for under both the cost and equity method of accounting. If it has been determined that an investment has sustained an other-than-temporary decline in its value, the investment is written down to its fair value by a charge to earnings. Sony regularly evaluates its investment portfolio to identify other-than-temporary impairments of individual securities. Factors that are considered by Sony in determining whether an other-than-temporary decline in value has occurred include: the length of time and extent to which the market value of the security has been less than its original cost, the financial condition, operating results, business plans and estimated future cash flows of the issuer of the security, other specific factors affecting the market value, deterioration of credit condition of the issuers, sovereign risk, and ability to retain the investment for a period of time sufficient to allow for the anticipated recovery in market value.

In evaluating the factors for available-for-sale securities whose fair values are readily determinable, management presumes a decline in value to be other-than-temporary if the fair value of the security is 20 percent or more below its original cost for an extended period of time (generally a period of up to six months). This criteria is employed as a threshold to identify securities which may have a decline in value that is other-than-temporary. The presumption of an other-than-temporary impairment in such cases may be overcome if there is evidence to support that the decline is temporary in nature due to the existence of other factors which overcome the duration or magnitude of the decline. On the other hand, there may be cases where impairment losses are recognized when the decline in the fair value of the security is not more than 20 percent or such decline has not existed for an extended period of time, as a result of considering specific factors which may indicate the decline in the fair value is other-than-temporary.

The assessment of whether a decline in the value of an investment is other-than-temporary often requires management judgment based on evaluation of relevant factors. Those factors include business plans and future cash flows of the issuer of the security, the regulatory, economic or technological environment of the investee, and the general market condition of either the geographic area or the industry in which the investee operates. Accordingly, it is possible that investments in Sony's portfolio that have had a decline in value that are currently believed to be temporary may determine to be other-than-temporary in the future based on Sony's evaluation of additional information such as continued poor operating results, future broad declines in value of worldwide equity markets or circumstances in market interest rate fluctuations. As a result, unrealized losses recorded for investments may be recognized into income in future periods.

Valuation of inventory

Sony values its inventory based on the lower of cost or market. Sony writes down inventory to an amount equal to the difference between the cost of the inventory and the net realizable value — i.e., less reasonably predictable costs of completion and disposal. However, if actual market conditions are less favorable than projected and further price decreases are needed, additional inventory write-downs may be required. Additionally, as Sony evaluates its manufacturing cost in yen while it sets its sales prices in euros and U.S. dollars for some products, Sony's results may be negatively impacted by future exchange rate fluctuations.

Impairment of long-lived assets

Sony reviews the carrying value of its long-lived assets held and used and long-lived assets to be disposed of whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. This review is performed using estimates of future cash flows by product category (e.g. CRT TV display) or entity (e.g. an entertainment complex in the U.S.). If the carrying value of the asset is considered impaired, an impairment charge is recorded for the amount by which the carrying value of the asset exceeds its fair value. Fair value is determined using the present value of estimated net cash flows or comparable market values.

Management believes that the estimates of future cash flows and fair value are reasonable; however, changes in estimates resulting in lower future cash flows and fair value due to unforeseen changes in business assumptions could negatively affect the valuations of those long-lived assets.

In the fiscal year ended March 31, 2005, Sony recorded impairment charges for long-lived assets totaling 19.2 billion yen, which included 7.5 billion yen for the impairment of long-lived assets of CRT TV display manufacturing facilities to be held and used in Europe in connection with certain restructuring activities in the Electronics segment. Fair value of these assets was determined using estimated future discounted cash flows which were based on the best information available.

In the fiscal year ended March 31, 2006, Sony recorded impairment charges for long-lived assets totaling 59.8 billion yen, which included 25.5 billion yen for the impairment of long-lived assets of CRT TV display manufacturing facilities to be held and used in the U.S. in connection with certain restructuring activities in the Electronics segment. Fair value of these assets was determined using estimated future discounted cash flows which were based on the best information available. The impairment charge also included 8.5 billion yen for the impairment of long-lived assets of Sony's entertainment complex to be held for sale in the U.S. in connection with restructuring activities of non-core businesses in All Other. The impairment charge was based on the negotiated sales price of the complex.

In the fiscal year ended March 31, 2007, Sony recorded impairment charges for long-lived assets totaling 16.8 billion yen, which included 3.6 billion yen for the impairment of long-lived assets of CRT TV display manufacturing facilities to be held and used in the U.S., East Asia and Southeast Asia in connection with certain restructuring activities in the Electronics segment. Fair value of these assets was determined using estimated future discounted cash flows which were based on the best information available.

Goodwill and other intangible assets

Goodwill and other intangible assets that are determined to have an indefinite life are not amortized, but are tested annually for impairment in accordance with FAS No. 142 during the fourth quarter of each fiscal year, and the assets are also tested between the annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of these assets below their carrying amount. Such an event would include unfavorable variances from established business plans, significant changes in forecasted results or volatility inherent to external markets and industries, which are periodically reviewed by Sony's management. Specifically, goodwill impairment is determined using a two-step process. The first step of the goodwill impairment test is used to identify potential impairment by comparing the fair value of a reporting unit (Sony's operating segments or one level below the operating segments) with its carrying amount, including goodwill. If the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired and the second step of the impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. That is, the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid to acquire the reporting unit. Other intangible assets are tested for impairment by comparing the fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess.

Determining the fair value of a reporting unit under the first step of the goodwill impairment test and determining the fair value of individual assets and liabilities of a reporting unit (including unrecognized intangible assets) under the second step of the goodwill impairment test is judgmental in nature and often involves the use of significant estimates and assumptions. Similarly, estimates and assumptions are used in determining the fair value of other intangible assets. These estimates and assumptions could significantly impact whether or not an impairment charge is recognized as well as the magnitude of any such charge. In its impairment review, Sony performs internal valuation analyses or utilizes third-party valuations when management believes it to be appropriate, and considers other market information that is publicly available. Estimates of fair value are primarily determined using discounted cash flow analysis. This approach uses significant estimates and assumptions including projected future cash flows, the timing of such cash flows, discount rates reflecting the risk inherent in future cash flows, perpetual growth rates, determination of appropriate market comparables and the determination of whether a premium or discount should be applied to comparables. During the fiscal year ended March 31, 2007, Sony recorded impairment losses of 5,620 million yen in reporting units in the Electronics segment, of which 5,320 million yen was related to the CRT TV business which was downsized in the U.S., and an impairment loss of 237 million yen in a reporting unit included in All Other. These impairment charges reflected the overall decline in the fair value of the subsidiaries. The fair value of the subsidiaries was estimated principally using the expected present value of future cash flows.

Management believes that the estimates of future cash flows and fair value are reasonable; however, changes in estimates resulting in lower future cash flows and fair value due to unforeseen changes in business assumptions could negatively affect the valuations, which may result in Sony recognizing impairment charges for goodwill and other intangible assets in the future. In order to evaluate the sensitivity of the fair value calculations on the impairment analysis, Sony applied a hypothetical 10 percent decrease to the fair value of each reporting unit. As of March 31, 2007, a hypothetical 10 percent decrease to the fair value of each reporting unit would not have resulted in a material impairment loss.

Pension benefits costs

Employee pension benefit costs and obligations are dependent on certain assumptions including discount rates, retirement rates and mortality rates, which are based upon current statistical data, as well as expected long-term rates of return on plan assets and other factors. Specifically, the discount rate and expected long-term rate of return on assets are two critical assumptions in the determination of periodic pension costs and pension liabilities. Assumptions are evaluated at least annually, or at the time when events occur or circumstances change and these events or changes could have a significant effect on these critical assumptions. In accordance with U.S. GAAP, actual results that differ from the assumptions are accumulated and amortized over future periods. Therefore, actual results generally affect recognized costs and the recorded obligations for pensions in future periods. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect Sony's pension obligations and future costs.

Sony's principal pension plans are its Japanese pension plans. Foreign pension plans are not significant, individually, to total plan assets and pension obligations.

To determine the benefit obligation of the Japanese pension plans, Sony used a discount rate of 2.3 percent for its Japanese pension plans as of March 31, 2007. The discount rate was determined by using currently available information about rates of return on high-quality fixed-income investments available and expected to be available during the period to maturity of the pension benefit obligation in consideration of amounts and timing of cash outflows for expected benefit payments. Such available information about rates of returns is collected from Bloomberg and credit rating agencies. The 2.3 percent discount rate represents a 10 basis point increase from the 2.2 percent discount rate used for fiscal year ended March 31, 2006 and reflects current market interest rate conditions. For Japanese pension plans, a 10 basis point increase in the discount rate would decrease pension costs by approximately 0.8 billion yen for the fiscal year ending March 31, 2008.

To determine the expected long-term rate of return on pension plan assets, Sony considers the current and expected asset allocations, as well as historical and expected long-term rates of return on various categories of plan assets. For Japanese pension plans, the expected long-term rate of return on pension plan assets was 3.5 percent and 3.7 percent as of March 31, 2006 and 2007 respectively. The actual gain on pension plan assets for the fiscal year ended March 31, 2007 was 0.8 percent. Actual results that differ from the expected return on plan assets are

accumulated and amortized as a component of pension costs over the average future service period, thereby reducing the year-to-year volatility in pension costs. As of March 31, 2006 Sony had unrecognized actuarial losses of 169.9 billion yen and as of March 31, 2007 Sony had a net actuarial loss of 200.6 billion yen, including losses related to plan assets. For the fiscal year ended March 31, 2007, the net actuarial loss increased due to the difference between the actual rate of return on pension plan assets and the expected long-term rate of return on pension plan assets. The net actuarial loss reflects the overall unfavorable return on investment over the past several years and will result in an increase in pension costs as they are recognized.

Sony recorded a minimum pension liability adjustment for the unfunded accumulated benefit obligation for Japanese pension plans of 35.8 billion yen as of March 31, 2006. FAS No. 158 was adopted by Sony in the financial statements for the year ended March 31, 2007. As a result, Sony recorded a pension liability adjustment for the prior service cost, net actuarial loss and obligation existing at transition for Japanese pension plans of 73.5 billion yen as of March 31, 2007. Both adjustments were established by a charge to stockholders' equity, resulting in no impact to the accompanying consolidated statements of income. Refer to Note 14 of Notes to Consolidated Financial Statements for more information regarding Sony's pension and severance plans.

The following table illustrates the effect of changes in the discount rate and the expected return on pension plan assets, while holding all other assumptions constant, for Japanese pension plans as of March 31, 2007.

Change in Assumption	Pre-Tax PBO	Pension Costs	Equity (Net of Tax)
	(Yen in billions)		
25 basis point increase/ decrease in discount rate	-/+24.9	-/+2.0	+/-1.2
25 basis point increase/ decrease in expected return on assets	—	-/+1.3	+/-0.8

Stock-based compensation

Sony accounts for stock-based compensation using the fair value based method. The fair value is measured on the date of grant using the Black-Scholes option-pricing model. Sony estimates the forfeiture rate based on its historical experience for the stock acquisition rights plans, and recognizes this compensation expense, net of an estimated forfeiture rate, only for the stock acquisition rights expected to vest over the requisite service period. The expense is mainly included in selling, general and administrative expenses.

The Black-Scholes option-pricing model requires various highly judgmental assumptions including expected stock price volatility and the expected life of each award. In addition, judgment is also required to estimate the expected forfeiture rate and recognize expense only for those rights expected to vest.

Management believes that these estimates are reasonable; however, if actual results differ significantly from these estimates, stock-based compensation expense may differ materially in the future from that recorded in the current period.

Deferred tax asset valuation

Sony records a valuation allowance to reduce the deferred tax assets to an amount that management believes is more likely than not to be realized. In establishing the appropriate valuation allowance for deferred tax assets (including deferred tax assets on tax loss carry-forwards), all available evidence, both positive and negative, is considered. Information on historical results is supplemented by all currently available information on future years, because realization of deferred tax assets is dependent on whether each tax-filing unit generates sufficient taxable income. The estimates and assumptions used in determining future taxable income are consistent with those used in Sony's approved forecasts of future operations. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets, less valuation allowance, will be realized.

SCEI and SCEA have recorded cumulative losses in recent years primarily due to the sale of the PS3 at a price lower than production cost during the introductory period, the recording of other charges in association with the preparation for the launch of the PS3 platform and a write-down for semiconductor components used in the PS3. However, Sony expects to establish the same successful business model with the PS3 that it achieved with the PS2,

which has sold over 100 million units. Taxable income is expected to increase during the tax carryforward period due to the rapid reduction in hardware production costs and an enhanced line-up of software titles in the PS3 business. Accordingly, both companies expect to recover these losses within the next five years.

Given sufficiently strong evidence to support the conclusion that a valuation allowance is not necessary, Sony has decided not to record a valuation allowance for SCEI and SCEA's deferred tax assets.

Film accounting

An aspect of film accounting that requires the exercise of judgment relates to the process of estimating the total revenues to be received throughout a film's life cycle. Such estimate of a film's ultimate revenue is important for two reasons. First, while a film is being produced and the related costs are being capitalized, it is necessary for management to estimate the ultimate revenue, less additional costs to be incurred, including exploitation costs which are expensed as incurred, in order to determine whether the value of a film has been impaired and thus requires an immediate write off of unrecoverable film costs. Second, the amount of film costs recognized as cost of sales for a given film as it is exhibited in various markets throughout its life cycle is based upon the proportion that current period actual revenues bear to the estimated ultimate total revenues.

Management bases its estimates of ultimate revenue for each film on several factors including the historical performance of similar genre films, the star power of the lead actors and actresses, the expected number of theaters at which the film will be released, anticipated performance in the home entertainment, television and other ancillary markets, and agreements for future sales. Management updates such estimates based on the actual results to date of each film. For example, a film that has resulted in lower than expected theatrical revenues in its initial weeks of release would generally have its theatrical, home entertainment and television distribution ultimate revenues adjusted downward; a failure to do so would result in the understatement of amortized film costs for the period.

Future insurance policy benefits

Liabilities for future insurance policy benefits are established in amounts adequate to meet the estimated future obligations of policies in force. These liabilities are computed by the net level premium method based upon estimates as to future investment yield, mortality, morbidity, withdrawals and other factors. Future policy benefits are computed using interest rates ranging from 0.90 percent to 5.00 percent. Mortality, morbidity and withdrawal assumptions for all policies are based on either the life insurance subsidiary's own experience or various actuarial tables. Generally these assumptions are "locked-in" upon the issuance of new insurance. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect Sony's future insurance policy benefits.

RECENTLY ADOPTED ACCOUNTING STANDARDS

Inventory Costs -

In November 2004, the Financial Accounting Standards Board ("FASB") issued Statement of FAS No. 151, "Inventory Costs, an amendment of Accounting Research Bulletin No. 43, Chapter 4." This statement requires certain abnormal expenditures to be recognized as expenses in the current period. It also requires that the amount of fixed production overhead allocated to the inventory be based on the normal capacity of the production facilities. Sony adopted FAS No. 151 on April 1, 2006. The adoption of FAS No. 151 did not have a material impact on Sony's results of operations and financial position.

Accounting for Stock-Based Compensation -

Effective April 1, 2006, Sony adopted FAS No. 123 (revised 2004), "Share-Based Payment" ("FAS No. 123(R)"). This statement requires the use of the fair value based method of accounting for employee stock-based compensation and eliminates the alternative to use the intrinsic value method prescribed by Accounting Principle Board Opinion ("APB") No. 25. With limited exceptions, FAS No. 123(R) requires that the grant-date fair value of share-based payments to employees be expensed over the period the service is received. Sony had accounted for its employee stock-based compensation in accordance with the provisions prescribed by APB No. 25 and its related interpretations and had disclosed the net effect on net income and net income per share ("EPS")

allocated to the common stock as if Sony had applied the fair value recognition provisions of FAS No. 123 to stock-based compensation as described in Note 2 to the Consolidated Financial Statements, Significant accounting policies — Stock-based compensation. Sony has elected the modified prospective method of transition prescribed in FAS No. 123(R), which requires that compensation expense be recorded for all unvested stock acquisition rights as the requisite service is rendered beginning with the first period of adoption. As a result of the adoption of FAS No. 123(R), Sony's operating income decreased by 3,670 million yen for the fiscal year ended March 31, 2007.

Derivative Instruments and Hedging Activities -

In February 2006, the FASB issued FAS No. 155, "Accounting for Certain Hybrid Financial Instruments," an amendment of FAS No. 133 and FAS No. 140. This statement permits an entity to elect fair value remeasurement for any hybrid financial instrument if the hybrid instrument contains an embedded derivative that would otherwise be required to be bifurcated and accounted for separately under FAS No. 133. The election to measure the hybrid instrument at fair value is made on an instrument-by-instrument basis and is irreversible. The statement is effective for all financial instruments acquired, issued, or subject to a remeasurement event occurring after the beginning of an entity's fiscal year beginning after September 15, 2006, with earlier adoption permitted as of the beginning of the fiscal year, provided that financial statements for any interim period of that fiscal year have not been issued. Sony early adopted FAS No. 155 on April 1, 2006. As a result of the adoption of FAS No. 155, Sony's operating income increased by 3,828 million yen for the fiscal year ended March 31, 2007. Additionally, on April 1, 2006, Sony recognized a net charge of 3,785 million yen (net of income taxes of 2,148 million yen) as a cumulative-effect adjustment to beginning retained earnings, which consisted of 1,754 million yen (net of income taxes of 996 million yen) of gross gains and 5,539 million yen (net of income taxes of 3,144 million yen) of gross losses.

Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans -

In September 2006, the FASB issued FAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans," an amendment to FASB Statements No. 87, 88, 106 and 132(R). FAS No. 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit pension and other postretirement benefit plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income. FAS No. 158 was adopted by Sony in the financial statements for the year ending March 31, 2007. FAS No. 158 also requires companies to measure the funded status of the plan as of the date of its fiscal year-end, effective for years ending after December 15, 2008. Sony expects to adopt the measurement provisions of FAS No. 158 effective March 31, 2009. Refer to Note 14, "Pension and severance plans", for further details.

Quantifying Effects of Prior Year Misstatements in Current Year Financial Statements -

In September 2006, the U.S. Securities and Exchange Commission ("SEC") staff issued Staff Accounting Bulletin ("SAB") No. 108, "Considering the Effect of Prior Year Misstatement when Quantifying Misstatements in Current Year Financial Statements". SAB No. 108 requires that registrants quantify errors using both a balance sheet approach, generally referred to as the "Iron Curtain" method, and a statement of operations approach, generally referred to as the "Rollover" method, and evaluate whether either approach results in a misstated amount that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 became effective for Sony as of April 1, 2006. Prior to the application of SAB No. 108, Sony used a statement of operations approach to quantify errors. The application of SAB No. 108 did not have a material impact on Sony's consolidated financial statements.

RECENT PRONOUNCEMENTS

Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts -

In September 2005, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants ("AcSEC") issued the Statement of Position ("SOP") 05-1, "Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance

Contracts.” SOP 05-1 provides guidance on accounting for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in FAS No. 97, “Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sales of Investments”. This statement will be effective for Sony as of April 1, 2007. Although Sony is currently evaluating the impact of adopting this new pronouncement, the adoption of SOP 05-1 is not expected to have a material impact on Sony’s results of operations and financial position.

Accounting for Servicing of Financial Assets -

In March 2006, the FASB issued FAS No. 156, “Accounting for Servicing of Financial Assets — an amendment of FASB Statement No. 140.” This statement amends FAS No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities” with respect to the accounting for separately recognized servicing assets and servicing liabilities. This statement will be effective for Sony as of April 1, 2007. Sony is currently evaluating the impact of adopting this new pronouncement.

Accounting for Uncertainty in Income Taxes -

In June 2006, the FASB issued FASB Interpretation (“FIN”) No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109.” FIN No. 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise’s financial statements in accordance with FAS No. 109, “Accounting for Income Taxes.” FIN No. 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This statement will be effective for Sony as of April 1, 2007. Sony is currently evaluating the potential cumulative impact of FIN No. 48 on the consolidated financial statements, and the final evaluation is expected to result in a charge to beginning retained earnings and an increase in tax liabilities.

How Taxes Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement -

In June 2006, the EITF issued EITF Issue No. 06-3, “How Taxes Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement.” EITF Issue No. 06-3 requires disclosure of the accounting policy for any tax assessed by a governmental authority that is imposed concurrently on a specific revenue-producing transaction between a seller and a customer. EITF Issue No. 06-3 should be applied to financial reports for interim and annual reporting periods beginning after December 15, 2006. This statement will be effective for Sony as of April 1, 2007. Although Sony is currently evaluating the impact of adopting this new pronouncement, the adoption of EITF Issue No. 06-3 is not expected to have a material impact on Sony’s results of operations and financial position.

Fair Value Measurements -

In September 2006, the FASB issued FAS No. 157, “Fair Value Measurements.” FAS No. 157 establishes a framework for measuring fair value, clarifies the definition of fair value, and expands disclosures about the use of fair value measurements. FAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements and does not require any new fair value measurements. FAS No. 157 will be effective for Sony beginning April 1, 2008. Sony is currently assessing the potential effect of FAS No. 157 on the financial statements.

Fair Value Option for Financial Assets and Financial Liabilities -

In February 2007, the FASB issued FAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities.” FAS No. 159 permits companies to choose to measure, on an instrument-by-instrument basis, financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Sony is currently evaluating whether to elect the option provided for in this statement. If elected, FAS No. 159 would be effective for Sony as of April 1, 2008.

Item 6. Directors, Senior Management and Employees

Directors and Senior Management

Set forth below are the current members of the Board of Directors and Corporate Executive Officers of Sony Corporation, their date of birth, the year in which they were first elected, their current position at Sony, prior positions, and other principal business activities outside Sony as of June 21, 2007.

Board of Directors

Sir Howard Stringer

Date of Birth: February 19, 1942

Director (Member of the Board) Since: 1999

Corporate Executive Officer Since: 2003

Current Positions within Sony: Chairman and Chief Executive Officer, Representative Corporate Executive Officer
Chairman and Chief Executive Officer, Sony Corporation of America
Member of the Nominating Committee

Prior Positions:

- 2003 Vice Chairman, Chief Operating Officer in charge of Entertainment Business Group, Sony Corporation
- 1997 President, Sony Corporation of America
- 1995 Chairman and Chief Executive Officer, TELE-TV
- 1988 President, CBS Broadcast Group, CBS Inc.
- 1986 President, CBS News

Principal Business Activities Outside Sony: None

Ryoji Chubachi

Date of Birth: September 4, 1947

Director (Member of the Board) Since: 2005

Corporate Executive Officer Since: 2004

Current Positions within Sony: President, Representative Corporate Executive Officer, Electronics Chief Executive Officer
Member of the Nominating Committee

Prior Positions:

- 2004 Chief Operating Officer in charge of Micro Systems Network Company ("MSNC") and Engineering, Manufacturing and Customer Services ("EMCS"), President, Production Strategy Group, Sony Corporation
Executive Deputy President, Corporate Executive Officer, Sony Corporation
- 2003 Executive Vice President, Executive Officer, NC President, MSNC, Sony Corporation
- 2002 NC President, Core Technology & Network Company ("CNC"), Sony Corporation
- 2002 Corporate Senior Vice President, Sony Corporation
- 1999 Corporate Vice President, President, Recording Media Company, CNC, Senior Vice President, CNC, Sony Corporation
- 1977 Entered Sony Corporation

Principal Business Activities Outside Sony: None

Katsumi Ihara

Date of Birth: September 24, 1950

Director (Member of the Board) Since: 2005

Corporate Executive Officer Since: 2004

Current Positions within Sony: Executive Deputy President, Representative Corporate Executive Officer
Officer in charge of Consumer Products Group

Prior Positions:

- 2005 Officer in charge of Procurement Strategies and TV & Video Business
NC President of Home Electronics Network Company, Sony Corporation
- 2004 Group Chief Strategy Officer & Group Chief Financial Officer, Sony Corporation
- 2001 Group Executive Officer, Sony Corporation
President, Sony Ericsson Mobile Communications AB
- 2000 Corporate Senior Vice President, NC President, Personal IT Network Company, Sony Corporation
- 1997 Corporate Vice President, Sony Corporation
- 1996 President, Home A&V Products Company, Sony Corporation
- 1981 Entered Sony Corporation
- 1973 Entered Mitsui Knowledge Industry Co., Ltd.

Principal Business Activities Outside Sony: None

Akishige Okada

Date of Birth: April 9, 1938

Outside Director (Member of the Board) Since: 2002

Current Position within Sony: Chairman of the Compensation Committee

Principal Business Activities Outside Sony:

- Advisor, Sumitomo Mitsui Banking Corporation
- Director, Daicel Chemical Industries, Ltd.
- Director, Mitsui & Co., Ltd.
- Statutory Auditor, Toyota Motor Corporation
- Statutory Auditor, Hotel Okura Co., Ltd.
- Statutory Auditor, Mitsui Fudosan Co., Ltd.

Prior Positions:

- 2002 Chairman of the Board (Representative Director), Sumitomo Mitsui Financial Group, Inc.
- 2001 Chairman of the Board (Representative Director), Sumitomo Mitsui Banking Corporation

Hirobumi Kawano

Date of Birth: January 1, 1946

Outside Director (Member of the Board) Since: 2003

Current Position within Sony: Vice Chairman of the Board
Member of the Nominating Committee

Principal Business Activities Outside Sony: Senior Vice President, JFE Steel Corporation

Prior Positions:

- 2002 Executive Adviser, The Tokio Marine and Fire Insurance Co., Ltd.
- 1999 Director-General, Agency for Natural Resources and Energy, Ministry of International Trade and Industry ("MITI") (later renamed the Ministry of Economy, Trade and Industry)
- 1998 Director-General, Basic Industries Bureau, MITI

- 1996 Director-General, Machinery and Information Industries Policy, Machinery and Information Industries Bureau, MITI
- 1995 Director-General, Petroleum Department, Agency of Natural Resources and Energy, MITI

Yotaro Kobayashi

Date of Birth: April 25, 1933

Outside Director (Member of the Board) Since: 2003

Current Position within Sony: Chairman of the Board and Chairman of the Nominating Committee

Principal Business Activities Outside Sony:

- Chief Corporate Advisor, Fuji Xerox Co., Ltd.
- Director, Nippon Telegraph and Telephone Corporation
- Director, Callaway Golf Company

Prior Positions:

- 1999 Chairman of the Board, Fuji Xerox Co., Ltd.
- 1992 Chairman and Chief Executive Officer, Fuji Xerox Co., Ltd.
- 1987 Director, Xerox Corporation
- 1978 President and Chief Executive Officer, Fuji Xerox Co., Ltd.

Sakie T. Fukushima

Date of Birth: September 10, 1949

Outside Director (Member of the Board) Since: 2003

Current Position within Sony: Member of the Compensation Committee

Principal Business Activities Outside Sony:

- Representative Director & Regional Managing Director — Japan, Korn/Ferry International
- Director, Korn/Ferry International, U.S.A.
- Director, Benesse Corporation

Prior Position:

- 2000 Managing Director, Korn/Ferry International — Japan

Yoshihiko Miyauchi

Date of Birth: September 13, 1935

Outside Director (Member of the Board) Since: 2003

Current Position within Sony: Member of the Compensation Committee

Principal Business Activities Outside Sony:

- Director, Representative Executive Officer, Chairman and Chief Executive Officer, ORIX Corporation
- Director, Aozora Bank, Ltd.
- Director, Showa Shell Sekiyu K.K.
- Director, Daikyo Incorporated
- Director, Access Co., Ltd.
- Director, Sojitz Corporation

Prior Positions:

- 2000 Representative Director, Chairman and Chief Executive Officer, ORIX Corporation
- 1980 Representative Director, President, ORIX Corporation

Yoshiaki Yamauchi

Date of Birth: June 30, 1937

Outside Director (Member of the Board) Since: 2003

Current Position within Sony: Chairman of the Audit Committee

Principal Business Activities Outside Sony:

Director, Sumitomo Mitsui Financial Group, Inc.

Director, Sumitomo Mitsui Banking Corporation

Director, amana Inc.

Statutory Auditor, Stanley Electric Co., Ltd.

Statutory Auditor, Sumitomo Wiring System, Ltd.

Executive Officer, ARI Research Institute

Prior Positions:

1999 Director, Sumitomo Banking Corporation

1993 Executive Director, Asahi & Co.

1991 President, Inoue Saito Eiwa Audit Corporation

1986 President, Eiwa Audit Corporation

Country Managing Partner — Japan, Arthur Andersen & Co.

Sir Peter Bonfield

Date of Birth: June 3, 1944

Outside Director (Member of the Board) Since: 2005

Current Position within Sony: Member of the Nominating Committee

Principal Business Activities Outside Sony:

Director, Telefonaktiebolaget LM Ericsson, Sweden

Director, Mentor Graphics, Inc.

Director and Chairman of Audit Committee, Taiwan Semiconductor Manufacturing Company Ltd.

Prior Positions:

1996 Chief Executive Officer, British Telecom plc

1986 Chairman, ICL plc, U.K.

1984 Managing Director, ICL plc, U.K.

Fueo Sumita

Date of Birth: May 24, 1938

Outside Director (Member of the Board) Since: 2005

Current Position within Sony: Member of the Audit Committee

Principal Business Activities Outside Sony: Chief of Sumita Accounting Office

Prior Positions:

2002 Executive Vice President, Kawada Corporation

2001 Vice Chairman, Ernst & Young ShinNihon

2000 Deputy Director, Ohta-Showa Century Audit Corporation

1999 Chairman, Century Audit Corporation

1985 Deputy General Manager, Corporate Accounting Dept., Hitachi, Ltd.

Fujio Cho

Date of Birth: February 2, 1937

Outside Director (Member of the Board) Since: 2006

Current Position within Sony: Member of the Nominating Committee

Principal Business Activities Outside Sony:

Chairman, Toyota Motor Corporation

Director, Central Japan Railway Company

Statutory Auditor, Denso Corporation

Prior Positions:

2005 Vice Chairman, Toyota Motor Corporation

1999 President, Toyota Motor Corporation

Ned Lautenbach

Date of Birth: February 2, 1944

Outside Director (Member of the Board) Since: 2006

Principal Business Activities Outside Sony:

Partner, Clayton, Dubilier & Rice, Inc.

Lead Director, Fidelity Investments

Director, Eaton Corporation

Prior Positions:

1995 Senior Vice President & Group Executive, IBM Worldwide Sales & Services, International Business Machines Corporation

Ryuji Yasuda

Date of Birth: April 28, 1946

Outside Director (Member of the Board) Since: 2007

Current Position within Sony: Member of the Audit Committee

Principal Business Activities Outside Sony:

Professor, Hitotsubashi University Graduate School of International Corporate Strategy (present)

Director, Daiwa Securities Group Inc. (present)

Director, Fuji Fire and Marine Insurance Co., Ltd. (present)

Prior Positions:

2003 Chairman, J-Will Partners Co., Ltd.

1996 Managing Director and Chairman, A.T. Kearney, Asia

1991 Director, McKinsey & Company

Corporate Executive Officers

In addition to Messrs. Stringer, Chubachi and Ihara, the four individuals set forth below are the current Corporate Executive Officers of Sony Corporation as of June 21, 2007. Refer to "Board Practices" below.

Yutaka Nakagawa

Date of Birth: December 4, 1945

Corporate Executive Officer Since: 2005

Current Positions within Sony: Executive Deputy President, Officer in charge of Semiconductor & Component Group, President of Semiconductor Business Group

Prior Positions:

- 2005 Officer in charge of Products Strategies, Digital Imaging Business and Audio Business
NC President, Personal Audio Visual Network Company, Sony Corporation

NC President, Information Technology Company, Personal Network Company, Sony Corporation
- 1977 Entered Sony Corporation

Principal Business Activities Outside Sony: None

Nicole Seligman

Date of Birth: October 25, 1956

Corporate Executive Officer Since: 2003

Current Positions within Sony: Executive Vice President and General Counsel
Executive Vice President and General Counsel, Sony Corporation of America

Prior Positions:

2003 Group Deputy General Counsel, Sony Corporation

2000 Entered Sony Corporation of America as Executive Vice President and General Counsel

1992 Partner, Williams & Connolly LLP

1985 Entered Williams & Connolly LLP

1978 Associate Editorial Page Editor for The Asian Wall Street Journal, Hong Kong

Principal Business Activities Outside Sony: None

All of the aforementioned persons, with the exception of Messrs. Okada, Kawano, Kobayashi, Miyauchi, Yamauchi, Bonfield, Sumita, Cho, Lautenbach, Yasuda and Ms. Fukushima, are engaged on a full-time basis by Sony. There is no family relationship between any of the persons named above. There is no arrangement or understanding with major shareholders, customers, suppliers, or others pursuant to which any person named above was selected as a Director or a Corporate Executive Officer.

Compensation

The aggregate amount of remuneration, including bonuses paid and benefits in kind granted by Sony during the fiscal year ended March 31, 2007 to all Directors and Corporate Executive Officers (refer to "Board Practices" below) of Sony Corporation who served during the fiscal year ended March 31, 2007, as a group (18 people), totaled 2,600 million yen. Also, as a part of Sony's incentive compensation arrangements, Sony Corporation issued stock acquisition rights during the fiscal year ended March 31, 2007. The stock acquisition rights, which represent rights to subscribe for shares of common stock of Sony Corporation, have been granted to the Directors, Corporate Executive Officers, Corporate Executives, Group Executives, and selected employees. The stock acquisition rights generally vest ratably up to three years from the date of grant and are generally exercisable up to ten years from the date of grant. The portion of those stock acquisition rights which was granted by Sony during the fiscal year ended March 31, 2007 to the Directors and Corporate Executive Officers confers rights to purchase a total number of 686,800 shares of Sony Corporation's Common Stock. The exercise price for these yen-denominated stock acquisition rights issued as of November 16, 2006 was 4,756 yen per share, and the exercise price for these U.S. dollar-denominated stock acquisition rights issued as of November 16, 2006 was 40.05 U.S. dollars.

Regarding the above compensation plans, refer to Note 16 of Notes to Consolidated Financial Statements.

In the fiscal year ended March 31, 2006, the retirement allowance scheme was terminated and a new stock-based retirement remuneration (phantom restricted stock plan) was introduced. With the introduction of this plan, there was no amount accrued for lump-sum severance indemnities by Sony during the fiscal year ended March 31, 2007 for Directors and Corporate Executive Officers of Sony Corporation as of March 31, 2007, as a group (18 people).

Under this new plan, points fixed every year by the Compensation Committee shall be granted to Directors and Corporate Executive Officers every year during his/her tenure in office, and at the time of resignation, the remuneration amount shall be calculated by multiplying Sony's common stock price by accumulated points. The resigning Directors and Corporate Executive Officers shall purchase Sony's common stock with this remuneration. The aggregate number of points granted to Directors and Corporate Executive Officers of Sony Corporation as of March 31, 2007, as a group (16 people) totaled 57,000 points.

Board Practices

Sony has adopted a “Company with Committees” corporate governance system under the Japanese Company Law (*Kaishaho*) and related legislation (collectively the “Company Law”). Under this system, Sony Corporation has three committees: the Nominating Committee, the Audit Committee and the Compensation Committee. Under the Company Law, each committee is required to consist of not less than three Directors, the majority of whom must be outside Directors. Under the committee system, Directors as such have no power to execute the business of Sony Corporation except for limited circumstances as permitted by law. The Board of Directors must elect Corporate Executive Officers (*Shikko-yaku*), who are responsible for the execution of the business of Sony Corporation. A summary of the governance system adopted by Sony Corporation is set forth below.

The Board of Directors determines fundamental management policy and other important matters related to the management of Sony and oversees the performance of the duties of Directors and Corporate Executive Officers. Under the Company Law, all Directors must be elected at the General Meeting of Shareholders from the candidates determined by the Nominating Committee. Under the Company Law, the term of office of Directors expires at the conclusion of the General Meeting of Shareholders held with respect to the last business year ending within one year after their election. Directors may serve any number of consecutive terms although, under the Charter of the Board of Directors of Sony Corporation, outside Directors may not be reelected more than five times without the consent of all Directors.

The Nominating Committee, which pursuant to the Charter of the Board of Directors of Sony Corporation consists of five or more Directors, determines the content of proposals to be submitted for approval at the General Meeting of Shareholders regarding the appointment and dismissal of Directors. As stated above, under the Company Law, a majority of the members of the Nominating Committee must be outside Directors. In order to qualify as an outside Director under the Company Law, a Director must be a person (i) who is not a director of Sony Corporation or any of its subsidiaries engaged in the business operations of Sony Corporation or such subsidiary, as the case may be, or a corporate executive officer or general manager or other employee of Sony Corporation or any of its subsidiaries, and (ii) who has never been a director of Sony Corporation or any of its subsidiaries engaged in the business operations of Sony Corporation or such subsidiary, as the case may be, or a corporate executive officer or general manager or other employee of Sony Corporation or any of its subsidiaries. Under the Charter of the Board of Directors of Sony Corporation, at least two members of the Nominating Committee must concurrently be Corporate Executive Officers. The Nominating Committee is comprised of the following members as of June 21, 2007: Yotaro Kobayashi, who is the Chairman of the Nominating Committee and an outside Director; Hirobumi Kawano, Peter Bonfield and Fujio Cho, who are outside Directors; and Howard Stringer and Ryoji Chubachi, who are Corporate Executive Officers.

Under the Charter of the Board of Directors of Sony Corporation, the Audit Committee must consist of three or more Directors, a majority of whom, as stated above, must be outside Directors. In addition, under the Company Law, a member of the Audit Committee may not concurrently be a director of Sony Corporation or any of its subsidiaries who is engaged in the business operations of Sony Corporation or such subsidiary, as the case may be, or a corporate executive officer of Sony Corporation or any of its subsidiaries, or an accounting counselor, general manager or other employee of any of such subsidiaries. Further, under the Charter of the Board of Directors of Sony Corporation, members of the Audit Committee must meet the independence and other equivalent requirements of U.S. securities laws and regulations to the extent applicable to Sony Corporation. The Audit Committee’s primary responsibility is to review the consolidated and non-consolidated financial statements and business reports to be submitted by the Board of Directors at the General Meeting of Shareholders; to monitor the performance of duties by Directors and Corporate Executive Officers (with respect to the preparation process of financial statements, disclosure controls and procedures, internal controls, compliance structure, risk management structure, internal audit structure, internal hotline system and other matters), in each case pursuant to the Company Law; and to propose appointment/dismissal or non-reappointment of, approve the compensation of, and oversee and evaluate the work of Sony’s independent auditor. Under the Company Law, the Audit Committee has a statutory duty to prepare and submit each year its audit report to the Corporate Executive Officer designated by the Board of Directors. A member of the Audit Committee may note his or her opinion in the audit report if it is different from the opinion of the Audit Committee that is expressed in the audit report.

The Audit Committee discusses with Sony Corporation's independent auditor, PricewaterhouseCoopers Aarata, the scope and results of audits by the independent auditor including their evaluation of Sony Corporation's internal controls, compatibility with Generally Accepted Accounting Principles in the U.S., and the overall quality of financial reporting. The Audit Committee makes an assessment of the independence of PricewaterhouseCoopers Aarata by overseeing their activities through regular communications and discussions with them, and by pre-approving audit and non-audit services to be provided. The Audit Committee is comprised of the following members as of June 21, 2007: Yoshiaki Yamauchi, who is the Chairman of the Audit Committee and an outside Director; and Fueo Sumita and Ryuji Yasuda, who are also outside Directors. Both Yoshiaki Yamauchi and Fueo Sumita are "audit committee financial experts" within the meaning of Item 16A of this report.

As required by the Company Law, the Compensation Committee determines the policy and the contents of compensation, bonus and any other benefits (including equity-related rights or options given for the purpose of stock incentive options) to be received by each Director and Corporate Executive Officer in consideration of the execution of their duties. In addition to such statutory duties, the Compensation Committee sets policy on the composition of individual compensation to be received by other senior management of Sony Group (Directors or other officers of Sony Group companies whose appointment is subject to approval by the Chief Executive Officer ("CEO") of Sony Corporation), and also submits proposals to the Board of Directors regarding the issuance of stock acquisition rights for the purpose of granting stock options and other forms of stock price-based compensation utilizing shares etc. of Sony Group, as individual compensation to the aforementioned senior management. Under the Charter of the Board of Directors, the Compensation Committee shall consist of three or more Directors, and as a general rule, at least one member shall concurrently serve as Corporate Executive Officer; provided, however, that a Director who is the CEO or the COO (Chief Operating Officer) of Sony Group or in any equivalent position shall not be a member of the Compensation Committee. As stated above, a majority of the members of the Compensation Committee must be outside Directors. The Compensation Committee is comprised of the following members as of June 21, 2007: Akishige Okada, who is the Chairman of the Compensation Committee and an outside Director; and Yoshihiko Miyauchi and Sakie T. Fukushima, who are also outside Directors.

During the fiscal year ended March 31, 2007, the Board of Directors convened 8 times. The Nominating Committee met 5 times, the Audit Committee met 14 times and the Compensation Committee met 6 times. In the fiscal year ended March 31, 2007, no incumbent Director attended less than 75 percent of the aggregate number of meetings of the Board and Committees on which he/she served (during the period that he/she served).

No Directors have service contracts with Sony providing for benefits upon termination of service as a Director.

Under the Company Law and the Articles of Incorporation of Sony Corporation, Sony Corporation may, by a resolution of the Board of Directors, exempt Directors from liabilities to Sony Corporation to the extent permitted by law arising in connection with their failure to execute their duties. Also, in accordance with the Company Law and its Articles of Incorporation, Sony Corporation has entered into a liability limitation agreement with each outside Director that limits the maximum amount of their liabilities owed to Sony Corporation arising in connection with their failure to execute their duties to the greater of either 30 million yen or an amount equal to the aggregate sum of the amounts prescribed in each item of Article 425, Paragraph 1 of the Company Law.

The Board of Directors must appoint one or more Corporate Executive Officers who are authorized to determine matters delegated to them by the Board of Directors. The Corporate Executive Officers are responsible for conducting all the business operations of Sony within the scope of authority delegated by the Board of Directors. As of June 21, 2007, there are 7 Corporate Executive Officers, some of whom are also Directors. Significant decision-making authority has been delegated to the CEO and also to each Corporate Executive Officer with respect to investments, strategic alliances and other actions related to the execution of business operations. Sony Corporation believes that this significant delegation enables Sony to be managed in a dynamic and responsive manner. The terms of office of Corporate Executive Officers must expire at the conclusion of the first meeting of the Board of Directors held immediately after the conclusion of the General Meeting of Shareholders held with respect to the last business year ending within one year after their election. From among the Corporate Executive Officers who as a general rule are also Directors, the Board of Directors shall elect Representative Corporate Executive Officers. Each Representative Corporate Executive Officer has the statutory authority to represent Sony Corporation in the conduct of its affairs.

(Reference)

At a Board meeting held on April 26, 2006, the Board of Directors reaffirmed the existing internal control and governance framework and determined to continue to evaluate and improve such framework going forward, as appropriate. This determination was required by and met the requirements of the Company Law.

Details of the determination are posted on the following website:

<http://www.sony.net/SonyInfo/IR/library/control.html>

For an explanation as to the significant differences between the New York Stock Exchange’s corporate governance standards and Sony’s corporate governance practices, please visit Sony’s website at:

<http://www.sony.net/SonyInfo/IR/NYSEGovernance.html>

Employees

As of March 31, 2007, Sony had approximately 163,000 employees, an increase of approximately 4,500 employees from the end of March 2006. Although there was a reduction in the number of employees associated with the deconsolidation of StylingLife Holdings Inc. (“StylingLife”) and restructuring at a number of manufacturing facilities, the total number of employees increased as a result of a significant increase at manufacturing facilities in East Asia. As of March 31, 2007, approximately 59,100 employees were located in Japan and approximately 103,900 employees were located outside Japan. Approximately 24 percent of the total employees were members of labor unions.

As of March 31, 2006, Sony had approximately 158,500 employees, an increase of approximately 7,000 from March 31, 2005. As of March 31, 2006, approximately 61,600 employees were located in Japan and approximately 96,900 employees were located outside Japan. Approximately 19 percent of employees were members of labor unions.

The following table shows the number of employees by segment as of March 31, 2005, 2006 and 2007.

Number of Employees by Segment

	March 31		
	2005	2006	2007
Electronics	124,500	130,800	136,900
Game	4,300	4,700	5,100
Pictures	5,900	6,900	7,300
Financial Services	6,800	6,500	6,600
All Other	8,000	7,400	4,700
Unallocated — Corporate employees	<u>1,900</u>	<u>2,200</u>	<u>2,400</u>
Total	<u>151,400</u>	<u>158,500</u>	<u>163,000</u>

In addition, the average number of employees for the fiscal years ended March 31, 2005, 2006 and 2007 calculated by averaging the total number of employees at the end of each quarter, was 154,200, 156,200 and 162,900, respectively.

Sony generally considers its labor relations to be good. Regarding labor relations in the Electronics segment by area, in Asia, where Sony operates many manufacturing facilities, a few manufacturing facilities have labor unions that have union contracts. In the U.S., no manufacturing facilities have labor unions. In Mexico, one manufacturing facility has a labor union that has a union contract, but labor relations are good and there have been no significant problems in renegotiating the contract. In Europe, Sony maintains good labor relations with the Work Councils in each country, and, while some employees belong to unions, they are not eligible for union contracts. In the Pictures segment, Sony also generally considers its labor relations to be good. A number of Pictures’ subsidiaries are signatories to union contracts. During the fiscal year ended March 31, 2007, negotiations of new three-year agreements for Electronic Digital and Area Standards, and negotiations of new three-year agreements for Local 764, Local 829, Local 798 and Local 873 were successfully concluded with the International Alliance of Theatrical Stage Employees (“IATSE”); a three-year agreement was negotiated with the Association of Canadian Cinema,

Television and Radio Artists (“ACTRA”) and a two and a half year agreement for made-for-basic cable live action performers was negotiated with the Screen Actors Guild (“SAG”). On March 28, 2007, negotiations for a new two year agreement were concluded with the Union of British Columbia Performers (“UBCP”). The tentative agreement is subject to ratification by the UBCP membership. Negotiations with the International Brotherhood of Teamsters Local 399 (“Teamsters”) and the “Basic Crafts” unions (the International Brotherhood of Electrical Workers Local 40, the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry Local 78, the Studio Utility Employees Local 724 and the Plasterers Local 755), commenced on February 8, 2007 and are continuing. It is not anticipated that the Teamster and Basic Craft negotiations will interrupt television or theatrical production.

Sony continuously strives to provide competitive wages and benefits and good working conditions for all of its employees.

Share Ownership

The following is the total number of shares of Sony Corporation’s Common Stock beneficially owned by Directors and Corporate Executive Officers as of May 31, 2007 (18 people). Refer to “Board Practices” above.

<u>Title of class</u>	<u>Identity of person or group</u>	<u>Number of shares beneficially owned</u> (in thousands)	<u>Percentage of class</u>
Common Stock	Directors and Corporate Executive Officers	62	0.006

During the fiscal year ended March 31, 2007, Sony granted stock acquisition rights, which represent rights to subscribe for shares of Common Stock of Sony Corporation, to Directors, Corporate Executive Officers, Corporate Executives, Group Executives, and selected employees. The stock acquisition rights generally vest ratably up to three years from the date of grant and are generally exercisable up to ten years from the date of grant. The following table shows the portion of those stock acquisition rights which were granted by Sony to Directors and Corporate Executive Officers as of May 31, 2007 and which were outstanding as of the same date.

<u>Year granted</u> <u>(Fiscal Year ended March 31)</u>	<u>Total number of shares subject to stock acquisition rights</u> (in thousands)	<u>Exercise price per share</u>
2007	430	40.05 U.S. dollars
2007	257	4,756 yen
2006	430	34.14 U.S. dollars
2006	159	4,060 yen
2005	230	40.34 U.S. dollars
2005	71	3,782 yen
2004	225	40.90 U.S. dollars
2004	42	4,101 yen
2003	215	36.57 U.S. dollars
2003	9	5,396 yen

Prior to the introduction of stock acquisition rights, Sony had granted warrants, which represent rights to subscribe for Sony Corporation’s Common Stock, to Directors, Executive Officers, Group Executive Officers, and selected employees. The warrants generally vest ratably up to three years from the date of grant and are generally exercisable up to six years from the date of grant. The following table shows the portion of those warrants which were granted by Sony to current Directors and Corporate Executive Officers as of May 31, 2007 and which were outstanding as of the same date.

<u>Year granted</u> <u>(Fiscal Year ended March 31)</u>	<u>Total number of shares subject to warrants</u> (in thousands)	<u>Exercise price per share</u> (yen)
2002	19	6,039

In addition, in order to provide equity-based compensation to selected executives at Sony's U.S. subsidiaries, Sony Corporation has issued U.S. dollar-denominated Convertible Bonds ("CBs") to a holding company in the U.S. and the holding company has sold the CBs to those executives. For the purpose of carrying out this plan, the holding company lent an amount equal to the principal amount of CBs to such executives for their purchase of the CBs until the date of conversion. The CBs generally vest ratably up to three years from the date of sale and are generally exercisable up to ten years from the date of sale. The following table shows the portion of those CBs which were held by current Directors and Corporate Executive Officers as of May 31, 2007 and which were outstanding as of the same date.

<u>Year issued</u> <u>(Fiscal Year ended March 31)</u>	<u>Total number of shares</u> <u>subject to CBs</u> <u>(in thousands)</u>	<u>Exercise price per share</u> <u>(U.S. dollars)</u>
2003	115	52.29
2002	106	71.28
2001	60	122.98

Furthermore, Sony has granted stock appreciation rights ("SARs") in the U.S. to selected employees. Under the terms of the plans, employees receive upon exercise cash equal to the amount by which the market price of Sony Corporation's Common Stock exceeds the strike price of the SARs. The SARs generally vest ratably up to three years from the date of grant and are generally exercisable up to ten years from the date of grant. The following table shows the portion of those SARs which were granted by Sony to selected employees who are Directors and Corporate Executive Officers as of May 31, 2007 and which were outstanding as of the same date.

<u>Year granted</u> <u>(Fiscal Year ended March 31)</u>	<u>Total number of shares</u> <u>subject to SARs</u> <u>(in thousands)</u>	<u>Exercise price per share</u> <u>(U.S. dollars)</u>
The U.S. plan 2002	10	44.00

Regarding the above compensation plans, refer to Note 16 of Notes to Consolidated Financial Statements.

Item 7. Major Shareholders and Related Party Transactions

Major Shareholders

Dodge & Cox, an institutional investor based in San Francisco, California, filed a Schedule 13-F with the SEC on May 15, 2007. According to this filing, Dodge & Cox owned 68,921,043 American Depositary Receipts ("ADRs") of Sony Corporation as of March 31, 2007. In addition, while Sony assumes no responsibility for the accuracy of this supplemental information, according to the website of Dodge & Cox, as of March 31, 2007, Dodge & Cox owned 14,737,600 shares of outstanding Sony Corporation Common Stock. As a result, it appears that in total, Dodge & Cox beneficially owned 83,658,643 shares of outstanding Sony Corporation Common Stock representing 8.3 percent of the total. To the knowledge of Sony Corporation, there is no other significant change in the percentage ownership held by any major beneficial shareholders during the past three years. Major shareholders of Sony Corporation do not have different voting rights.

As of March 31, 2007, there were 1,002,062,405 shares of Common Stock outstanding, of which 176,704,973 shares were in the form of ADRs and 135,536,612 shares were held of record in the form of Common Stock by residents in the U.S. The number of registered ADR holders was 7,285, and the number of registered holders of shares of Common Stock in the U.S. was 251.

To the knowledge of Sony Corporation, it is not directly or indirectly owned or controlled by any other corporation, by any foreign government or by any other natural or legal person severally or jointly. As far as is known to Sony Corporation, there are no arrangements the operation of which may, at a subsequent date, result in a change in control of Sony Corporation.

Related Party Transactions

In the ordinary course of business, Sony purchases materials, supplies, and services from numerous suppliers throughout the world, including firms with which certain members of the Board of Directors are affiliated. In addition, in the fiscal year ended March 31, 2007, Sony entered into the following sales/purchase transactions with equity affiliates accounted for under the equity method: sales to Sony Ericsson Mobile Communications, AB (“Sony Ericsson”), a joint venture focused on mobile phone handsets, totaling 199.9 billion yen; sales to Kyoshin Technosonic Co., Ltd. (“Kyoshin”), a joint venture focused on marketing semiconductors and other electronic components, totaling 56.0 billion yen; sales to SONY BMG MUSIC ENTERTAINMENT (“SONY BMG”), a recorded music business joint venture, totaling 27.2 billion yen; purchases from S-LCD Corporation (“S-LCD”), a joint venture with Samsung Electronics Co., Ltd. for the manufacture of amorphous thin film transistor (“TFT”) liquid crystal display (“LCD”) panels, totaling 232.8 billion yen; purchases from Oita TS Semiconductor Corporation (“OTSS”), a semiconductor manufacturing joint venture in Japan, totaling 155.8 billion yen and purchases from S.T. Liquid Crystal Display Corp., a LCD joint venture in Japan, totaling 52.6 billion yen. As of March 31, 2007, Sony held notes and accounts receivable, trade due from Sony Ericsson and Kyoshin worth 32.3 billion yen and 5.7 billion yen, respectively, in addition to notes and accounts payable, trade due to OTSS and S-LCD totaling 22.1 billion yen and 16.2 billion yen, respectively. Sony held advances to SONY BMG worth 16.3 billion yen. Because of the size of these transactions, Sony does not consider the amounts involved to be material to its business. Refer to Note 5 of Notes to Consolidated Financial Statements for additional information regarding Sony’s investments in and transactions with equity affiliates.

Sumitomo Mitsui Financial Group, Inc. and Sumitomo Mitsui Banking Corporation have performed and continue to perform commercial banking services for Sony. Yoshiaki Yamauchi, who has served as a Sony Corporation Director since June 20, 2003, is a Director of Sumitomo Mitsui Financial Group, Inc. and Sumitomo Mitsui Banking Corporation.

Item 8. Financial Information

Consolidated Statements and Other Financial Information

Refer to Consolidated Financial Statements and Notes to Consolidated Financial Statements.

Legal Proceedings

On October 18, 2006, class action lawsuits were filed in California in which the plaintiffs allege that Sony Corporation, Sony Corporation of America, Sony Electronics Inc., other named defendants, and other unnamed parties entered into and carried out an agreement, combination, or conspiracy to fix, raise, maintain or stabilize the prices of, and allocate the market for and production of, Static Random Access Memory (“SRAM”). There have been numerous similar lawsuits filed in various jurisdictions throughout the United States, which have been consolidated in a single federal court for coordinated pre-trial proceedings. Also there have been similar lawsuits filed in Canada (British Columbia and Ontario) against those Sony entities in addition to Sony of Canada Ltd. and other major SRAM manufacturers. Also, in October 2006, Sony Electronics Inc. received a Grand Jury subpoena related to a Department of Justice investigation of potential antitrust violations in the SRAM industry. Sony has cooperated and intends to cooperate fully with the investigation.

On March 13 and 16, 2007, Sony France S.A., Sony Europe Holding B.V., and Sony Corporation received a Statement of Objections issued by the European Commission competition authorities following inspections carried out in 2002. The Statement of Objections alleges that one or more of these Sony entities entered into agreements and/or engaged in concerted practices with competing manufacturers of professional videotape in violation of Article 81 of the EC Treaty. The Statement of Objections is a procedural step to provide the addressees with an opportunity to be heard, and the European Commission has not adopted a decision finding the Sony entities in breach of Article 81 EC. Responses to the Statement of Objections were filed separately by each of the Sony entities

on May 21, 2007. Although there are grounds to contest the allegations made in the Statement of Objections, it is possible that the European Commission may find that each or all of Sony France, Sony Holding, and Sony Corporation infringed Article 81 EC and may impose a fine on each or all of those entities. Should the European Commission render a decision finding an infringement or imposing a fine on any or all Sony entities involved in the proceeding, any such decision could be appealed to the European Court of First Instance.

In addition, Sony Corporation and certain of its subsidiaries are defendants in several other pending legal and regulatory proceedings. However, based upon the information currently available to Sony, management of Sony believes that the outcome from such legal and regulatory proceedings, if any, would not have a material effect on Sony's consolidated financial results and condition.

Dividend Policy

Sony believes that continuously increasing corporate value and providing dividends are essential to rewarding shareholders. It is Sony's policy to utilize retained earnings, after ensuring the perpetuation of stable dividends, to carry out various investments that contribute to an increase in corporate value such as those investments that ensure future growth and strengthen competitiveness.

A fiscal year-end cash dividend of 12.5 yen per share of Sony Corporation Common Stock was approved at the Board of Directors meeting held on May 15, 2007 and was paid on June 1, 2007. Sony Corporation has already paid an interim dividend for Common Stock of 12.5 yen per share to each shareholder; accordingly, the total annual cash dividend per share of Common Stock is 25.0 yen.

Significant Changes

No significant change has occurred since the date of the annual financial statements included in this annual report.

Markets

Trading Markets

The principal trading markets for Sony Corporation's ordinary shares are the Tokyo Stock Exchange (the "TSE") in the form of Common Stock and the New York Stock Exchange (the "NYSE") in the form of American Depositary Shares ("ADSs") evidenced by American Depositary Receipts ("ADRs"). Each ADS represents one share of Common Stock.

Sony Corporation's Common Stock, with no par value per share, has been listed on the TSE since 1958, and is also listed on the London Stock Exchange in the United Kingdom and the Osaka Securities Exchange in Japan. In October 2005, due to the prevalence of borderless stock trading, and the fact that the trading volume of Sony's shares on the following exchanges has been extremely low, the Board of Directors of Sony Corporation resolved to apply for delisting from the following exchanges: Pacific, Chicago, Toronto, Paris, Frankfurt, Düsseldorf, Brussels, Vienna, and Swiss. The delisting procedures of these stock exchanges was completed as of March 31, 2006.

Sony Corporation's ADRs have been traded in the U.S. since 1961 and have been listed on the NYSE since 1970 under the symbol "SNE." Sony Corporation's ADRs are issued and exchanged by JPMorgan Chase Bank, as Depositary.

In June 2001, Sony Corporation issued shares of subsidiary tracking stock in Japan, the economic value of which was intended to be linked to the economic value of Sony Communication Network Corporation (renamed So-net as of October 2006), a consolidated subsidiary of Sony Corporation engaged in Internet-related services. The subsidiary tracking stock, totaling 3,072,000 shares, was issued at 3,300 yen per share and listed on the TSE. The shares were not offered or sold in the U.S. In October 2005, the Board of Directors of Sony Corporation decided to terminate all shares of subsidiary tracking stock with the method of compulsory conversion to shares of Sony's common stock. All shares of subsidiary tracking stock were converted to shares of Sony's common stock on December 1, 2005. Refer to "History and Development of the Company" in "Item 4. *Information on the Company.*"

Trading on the TSE and NYSE

The following table sets forth for the periods indicated the reported high and low sales prices per share of Sony Corporation's Common Stock on the TSE and the reported high and low sales prices per share of Sony Corporation's ADS on the NYSE.

Memorandum and Articles of Association**Organization**

Sony Corporation is a joint stock corporation (*Kabushiki Kaisha*) incorporated in Japan under the Company Law (*Kaishaho*) of Japan. It is registered in the Commercial Register (*Shogyo Tokibo*) maintained by the Minato Branch Office of the Tokyo Bureau of Legal Affairs.

Objects and purposes

The Articles of Incorporation of Sony Corporation provide that its purpose is to engage in the following business activities:

- (i) manufacture and sale of electronic and electrical machines and equipment, medical instruments, optical instruments and other equipment, machines and instruments;
- (ii) planning, production and sale of audio-visual software and computer software programs;
- (iii) manufacture and sale of metal industrial products, chemical industrial products and ceramic industrial products, textile products, paper products and wood-crafted articles, daily necessities, foodstuffs and toys, transportation machines, equipment, petroleum and coal products;
- (iv) real estate activities, construction business, transportation business and warehousing business;
- (v) publishing business and printing business;
- (vi) advertising agency business, insurance agency business, broadcasting enterprise, recreation business such as travel, management of sporting facilities, etc. and other service enterprises;
- (vii) financial business;
- (viii) Type I and Type II telecommunications business under the Telecommunications Business Law;
- (ix) investing in stocks and bonds, etc.;
- (x) manufacture, sale, export and import of products which are incidental to or related to those mentioned above;
- (xi) rendering of services related to those mentioned above;
- (xii) investment in businesses mentioned above operated by other companies or persons; and
- (xiii) all businesses which are incidental to or related to those mentioned above.

Directors

Under the Company Law, Directors have no power to execute the business of Sony Corporation except in limited circumstances as permitted by law. If a Director also serves concurrently as a Corporate Executive Officer, then he or she can execute the business of Sony Corporation in the capacity of Corporate Executive Officer. Under the Company Law, Directors must refrain from engaging in any business competing with Sony Corporation unless approved by the Board of Directors, and any Director who has a material interest in the subject matter of a resolution to be taken by the Board of Directors cannot vote on such resolution. The amount of remuneration to each Director is determined by the Compensation Committee, which consists of Directors, the majority of whom are outside Directors (Refer to “Board Practices” in “Item 6. *Directors, Senior Management and Employees*”). No member of the Compensation Committee may vote on a resolution with respect to his or her own compensation as a Director or a Corporate Executive Officer.

Neither the Company Law nor Sony Corporation’s Articles of Incorporation make a special provision as to the borrowing powers exercisable by Directors (subject to requisite internal authorizations as required by the Company Law), their retirement age, or a requirement to hold any shares of capital stock of Sony Corporation.

For more information on Directors, refer to “Board Practices” in “Item 6. *Directors, Senior Management and Employees.*”

Capital stock

(General)

Unless indicated otherwise, set forth below is information relating to Sony Corporation’s capital stock, including brief summaries of the relevant provisions of Sony Corporation’s Articles of Incorporation and Share Handling Regulations, as currently in effect, and of the Company Law and related legislation.

All issued shares are fully-paid and non-assessable, and are in registered form. Transfer of shares is effected by delivery of share certificates, but in order to assert shareholders’ rights against Sony Corporation, a shareholder must, except as set forth below, have its name and address registered on Sony Corporation’s register of shareholders, in accordance with Sony Corporation’s Share Handling Regulations. The registered beneficial holder of deposited shares underlying the American Depositary Shares (“ADSs”) is the Depository for the ADSs. Accordingly, holders of ADSs will not be able to directly assert shareholders’ rights against Sony Corporation.

Mitsubishi UFJ Trust and Banking Corporation is the transfer agent for Sony Corporation’s capital stock. As such, it keeps Sony Corporation’s registers of shareholders and beneficial shareholders in its office at 4-5, Marunouchi 1-chome, Chiyoda-ku, Tokyo and records transfers of shares upon presentation of the certificates representing the transferred shares.

A holder of shares may choose, at its discretion, to participate in the central clearing system for share certificates under the Law Concerning Central Clearing of Share Certificates and Other Securities of Japan. Participating shareholders must deposit certificates representing all of the shares to be included in this clearing system with Japan Securities Depository Center, Inc. (“JASDEC”). If a holder is not a participating institution in JASDEC, it must participate through a participating institution, such as a securities company or bank having a clearing account with JASDEC. All shares deposited with JASDEC will be registered in the name of JASDEC on Sony Corporation’s register of shareholders. Each participating shareholder will in turn be registered on Sony Corporation’s register of beneficial shareholders and be treated in the same way as shareholders registered on Sony Corporation’s register of shareholders. Entry of the share transfer in the book maintained by JASDEC for participating institutions, or in the book maintained by a participating institution for its customers, has the same effect as delivery of share certificates. The registered beneficial shareholders may exercise the rights attached to the shares, such as voting rights, and will receive dividends (if any) and notices to shareholders directly from Sony Corporation. The shares held by a person as a registered shareholder and those held by the same person as a registered beneficial shareholder are aggregated for these purposes. Beneficial owners may at any time withdraw their shares from deposit and receive share certificates.

A law to establish a new central clearing system for shares of listed companies and to eliminate the issuance and use of certificates for such shares was promulgated in June 2004 and the relevant part of the law will come into effect within five years of the date of the promulgation. On the effective date, a new central clearing system will be established and the shares of all Japanese companies listed on any Japanese stock exchange, including the shares of Common Stock of Sony Corporation, will be subject to the new central clearing system. On the same day, all existing share certificates will become null and void. The transfer of such shares will be effected through entry in the books maintained under the new central clearing system.

(Authorized capital)

Under the Articles of Incorporation of Sony Corporation, Sony Corporation may only issue shares of Common Stock. Sony Corporation's Articles of Incorporation provide that the total number of shares authorized to be issued by Sony Corporation is 3.6 billion shares.

All shares of capital stock of Sony Corporation have no par value.

(Distribution of Surplus)

Distribution of Surplus — General

Under the Company Law, distributions of cash or other assets by joint stock corporations to their shareholders, so called "dividends," are referred to as "distributions of Surplus" ("Surplus" is defined in "— Restriction on distributions of Surplus"). Sony Corporation may make distributions of Surplus to shareholders any number of times per business year, subject to certain limitations described in "— Restriction on distributions of Surplus." Distributions of Surplus are required in principle to be authorized by a resolution of a General Meeting of Shareholders, but Sony Corporation shall authorize distributions of Surplus by a resolution of the Board of Directors as long as its non-consolidated annual financial statements and certain documents for the last business year present fairly its assets and profit or loss, as required by ordinances of the Ministry of Justice.

Distributions of Surplus may be made in cash or in kind in proportion to the number of shares of Common Stock held by each shareholder. A resolution of the Board of Directors or a General Meeting of Shareholders authorizing a distribution of Surplus must specify the kind and aggregate book value of the assets to be distributed, the manner of allocation of such assets to shareholders, and the effective date of the distribution. If a distribution of Surplus is to be made in kind, Sony Corporation may, pursuant to a resolution of the Board of Directors or (as the case may be) a General Meeting of Shareholders, grant a right to the shareholders to require Sony Corporation to make such distribution in cash instead of in kind. If no such right is granted to shareholders, the relevant distribution of Surplus must be approved by a special resolution of a General Meeting of Shareholders (refer to "Voting Rights" with respect to a "special resolution").

Under the Articles of Incorporation of Sony Corporation, year-end dividends and interim dividends may be distributed to shareholders of record as of March 31 and September 30 each year, respectively, in proportion to the number of shares of Common Stock held by each shareholder following approval by the Board of Directors or (as the case may be) the General Meeting of Shareholders. Sony Corporation is not obliged to pay any dividends unclaimed for a period of five years after the date on which they first became payable.

In Japan, the ex-dividend date and the record date for dividends precede the date of determination of the amount of the dividends to be paid. The price of the shares of Common Stock generally goes ex-dividend on the third business day prior to the record date.

Distribution of Surplus — Restriction on distribution of Surplus

In making a distribution of Surplus, Sony Corporation must, until the sum of its additional paid-in capital and legal reserve reaches one quarter of its stated capital, set aside in its additional paid-in capital and/or legal reserve an amount equal to one-tenth of the amount of Surplus so distributed.

The amount of Surplus at any given time must be calculated in accordance with the following formula:

$$A + B + C + D - (E + F + G)$$

In the above formula:

- “A” = the total amount of other capital surplus and other retained earnings, each such amount being that appearing on the non-consolidated balance sheet as of the end of the last business year
- “B” = (if Sony Corporation has disposed of its treasury stock after the end of the last business year) the amount of the consideration for such treasury stock received by Sony Corporation less the book value thereof
- “C” = (if Sony Corporation has reduced its stated capital after the end of the last business year) the amount of such reduction less the portion thereof that has been transferred to additional paid-in capital or legal reserve (if any)
- “D” = (if Sony Corporation has reduced its additional paid-in capital or legal reserve after the end of the last business year) the amount of such reduction less the portion thereof that has been transferred to stated capital (if any)
- “E” = (if Sony Corporation has cancelled its treasury stock after the end of the last business year) the book value of such treasury stock
- “F” = (if Sony Corporation has distributed Surplus to its shareholders after the end of the last business year) the total book value of the Surplus so distributed
- “G” = certain other amounts set forth in ordinances of the Ministry of Justice, including (if Sony Corporation has reduced Surplus and increased its stated capital, additional paid-in capital or legal reserve after the end of the last business year) the amount of such reduction and (if Sony Corporation has distributed Surplus to the shareholders after the end of the last business year) the amount set aside in additional paid-in capital or legal reserve (if any) as required by ordinances of the Ministry of Justice.

The aggregate book value of Surplus distributed by Sony Corporation may not exceed a prescribed distributable amount (the “Distributable Amount”), as calculated on the effective date of such distribution. The Distributable Amount at any given time shall be equal to the amount of Surplus less the aggregate of the followings:

- (a) the book value of its treasury stock;
- (b) the amount of consideration for any of treasury stock disposed of by Sony Corporation after the end of the last business year; and
- (c) certain other amounts set forth in ordinances of the Ministry of Justice, including (if the sum of one-half of goodwill and the deferred assets exceeds the total of stated capital, additional paid-in capital and legal reserve, each such amount being that appearing on the non-consolidated balance sheet as of the end of the last business year) all or certain part of such exceeding amount as calculated in accordance with ordinances of the Ministry of Justice.

If Sony Corporation has become at its option a company with respect to which consolidated balance sheets should also be considered in the calculation of the Distributable Amount (*renketsu haito kisei tekiyo kaisha*), Sony Corporation shall further deduct from the amount of Surplus the excess amount, if any, of (x) the total amount of stockholders’ equity appearing on the non-consolidated balance sheet as of the end of the last business year and certain other amounts set forth by ordinances of the Ministry of Justice over (y) the total amount of stockholders’ equity and certain other amounts set forth by ordinances of the Ministry of Justice appearing on the consolidated balance sheet as of the end of the last business year.

If Sony Corporation has prepared interim financial statements as described below, and if such interim financial statements have been approved by the Board of Directors or (if so required by the Company Law) by a General Meeting of Shareholders, then the Distributable Amount must be adjusted to take into account the amount of profit or loss, and the amount of consideration for any of the treasury stock disposed of by Sony Corporation, during the period in respect of which such interim financial statements have been prepared. Sony Corporation may prepare non-consolidated interim financial statements consisting of a balance sheet as of any date subsequent to the end of

the last business year and an income statement for the period from the first day of the current business year to the date of such balance sheet. Interim financial statements so prepared by Sony Corporation must be audited by the Audit Committee and the independent auditor, as required by ordinances of the Ministry of Justice.

(Stock splits)

Sony Corporation may at any time split shares in issue into a greater number of shares at the determination of the Chief Executive Officer (“CEO”).

In the event of a stock split, generally, shareholders will not be required to exchange share certificates for new share certificates, but certificates representing the additional shares resulting from the stock split will be issued to shareholders. When a stock split is to be made Sony Corporation must give public notice of the stock split, specifying the record date thereof, at least two weeks prior to such record date.

(Consolidation of shares)

Sony Corporation may at any time consolidate issued shares into a smaller number of shares by a special shareholders resolution (as defined in “*(Voting Rights)*”). When a consolidation of shares is to be made, Sony Corporation must give public notice and notice to each shareholder that, within a period of not less than one month specified in the notice, share certificates must be submitted to Sony Corporation for exchange. Sony Corporation must disclose the reason for the consolidation of shares at a General Meeting of Shareholders.

(General Meeting of Shareholders)

The Ordinary General Meeting of Shareholders of Sony Corporation for each business year is normally held in June of each year in Tokyo, Japan. In addition, Sony Corporation may hold an Extraordinary General Meeting of Shareholders whenever necessary by giving notice thereof at least two weeks prior to the date set for the meeting.

Notice of a shareholders’ meeting setting forth the place, time and purpose thereof must be mailed to each shareholder having voting rights (or, in the case of a non-resident shareholder, to such shareholder’s resident proxy or mailing address in Japan) at least two weeks prior to the date set for the meeting. Under the Company Law, such notice may be given to shareholders by electronic means, subject to obtaining consent by the relevant shareholders. The record date for an Ordinary General Meeting of Shareholders is March 31 of each year.

Any shareholder or group of shareholders holding at least three percent of the total number of voting rights for a period of six months or more may require the convocation of a General Meeting of Shareholders for a particular purpose. Unless such a shareholders’ meeting is convened promptly or a convocation notice of a meeting which is to be held not later than eight weeks from the day of such demand is dispatched, the requiring shareholder may, upon obtaining a court approval, convene such a shareholders’ meeting.

Any shareholder or group of shareholders holding at least 300 voting rights or one percent of the total number of voting rights for a period of six months or more may propose a matter to be considered at a General Meeting of Shareholders by submitting a written request to Sony Corporation at least eight weeks prior to the date set for such meeting.

If the Articles of Incorporation so provide, any of the minimum voting rights or percentages, time periods and number of voting rights necessary for exercising the minority shareholder rights described above may be decreased or shortened.

(Voting rights)

So long as Sony Corporation maintains the unit share system, a holder of shares constituting one or more units is entitled to one vote for each such unit of stock (refer to “*(Unit share system)*” below; currently 100 shares constitute one unit), except that no voting rights with respect to shares of capital stock of Sony Corporation are afforded to Sony Corporation or any corporate or certain other entity more than one-quarter of the total voting rights of which are directly or indirectly held by Sony Corporation. If Sony Corporation eliminates from its Articles of Incorporation the provisions relating to units of stock, holders of capital stock will have one vote for each share they

hold. Except as otherwise provided by law or by the Articles of Incorporation of Sony Corporation, a resolution can be adopted at a General Meeting of Shareholders by a majority of the number of voting rights of all the shareholders represented at the meeting. The Company Law and Sony Corporation's Articles of Incorporation provide, however, that the quorum for the election of Directors shall not be less than one-third of the total number of voting rights of all the shareholders. Sony Corporation's shareholders are not entitled to cumulative voting in the election of Directors. Shareholders may cast their votes in writing and may also exercise their voting rights through proxies, provided that the proxies are also shareholders holding voting rights. Shareholders may also exercise their voting rights by electronic means pursuant to the method designated by Sony Corporation.

The Company Law and the Articles of Incorporation of Sony Corporation provide that in order to amend the Articles of Incorporation and in certain other instances, including:

- (1) acquisition of its own shares from a specific party other than its subsidiaries;
- (2) consolidation of shares;
- (3) any offering of new shares at a "specially favorable" price (or any offering of stock acquisition rights to acquire shares of capital stock, or bonds with stock acquisition rights at "specially favorable" conditions) to any persons other than shareholders;
- (4) the exemption of liability of a Director, Corporate Executive Officer or independent auditor with certain exceptions;
- (5) a reduction of stated capital with certain exceptions;
- (6) a distribution of in-kind dividends which meets certain requirements;
- (7) dissolution, merger, consolidation, or corporate split with certain exceptions;
- (8) the transfer of the whole or a material part of the business;
- (9) the taking over of the whole of the business of any other corporation with certain exceptions; or
- (10) share exchange or share transfer for the purpose of establishing 100 percent parent-subsidary relationships with certain exceptions,

the quorum shall be one-third of the total number of voting rights of all the shareholders, and the approval by at least two-thirds of the number of voting rights of all the shareholders represented at the meeting is required (the "special shareholders resolutions").

(Issue of additional shares and pre-emptive rights)

Holders of Sony Corporation's shares of capital stock have no pre-emptive rights under its Articles of Incorporation. Authorized but unissued shares may be issued at such times and upon such terms as the Board of Directors or the CEO determines, subject to the limitations as to the offering of new shares at a "specially favorable" price mentioned under "*(Voting rights)*" above. The Board of Directors or the CEO may, however, determine that shareholders shall be given subscription rights regarding a particular issue of new shares, in which case such rights must be given on uniform terms to all shareholders as at a record date of which not less than two weeks' prior public notice must be given. Each of the shareholders to whom such rights are given must also be given notice of the expiry thereof at least two weeks prior to the date on which such rights expire.

Subject to certain conditions, Sony Corporation may issue stock acquisition rights by a resolution of the Board of Directors or a determination by the CEO. Holders of stock acquisition rights may exercise their rights to acquire a certain number of shares within the exercise period as prescribed in the terms of their stock acquisition rights. Upon exercise of stock acquisition rights, Sony Corporation will be obliged to issue the relevant number of new shares or alternatively to transfer the necessary number of treasury stock held by it.

In cases where a particular issue of new shares or stock acquisition rights (i) violates laws and regulations or Sony Corporation's Articles of Incorporation, or (ii) will be performed in a manner materially unfair, and

shareholders may suffer disadvantages therefrom, such shareholders may file an injunction to enjoin such issue with a court.

(Liquidation rights)

In the event of a liquidation of Sony Corporation, the assets remaining after payment of all debts, liquidation expenses and taxes will be distributed among the holders of shares of Common Stock in proportion to the respective numbers of shares of Common Stock held.

(Record date)

As mentioned above, March 31 is the record date for Sony Corporation's year-end dividends, if declared. So long as Sony Corporation maintains the unit share system, the shareholders and beneficial shareholders who are registered as the holders of one or more unit of stock in Sony Corporation's register of shareholders and/or beneficial shareholders at the end of each March 31 are also entitled to exercise shareholders' rights at the Ordinary General Meeting of Shareholders with respect to the business year ending on such March 31. September 30 is the record date for interim dividends. In addition, Sony Corporation may set a record date for determining the shareholders and/or beneficial shareholders entitled to other rights and for other purposes by giving at least two weeks prior public notice.

(Acquisition by Sony Corporation of its capital stock)

Under the Company Law and the Articles of Incorporation of Sony Corporation, Sony Corporation may acquire shares of Common Stock (i) from a specific shareholder other than any of its subsidiaries (pursuant to a special resolution of a General Meeting of Shareholders), (ii) from any of its subsidiaries (pursuant to a determination by the CEO), or (iii) by way of purchase on any Japanese stock exchange on which Sony Corporation's shares of Common stock are listed or by way of tender offer (as long as its non-consolidated annual financial statements and certain documents for the last business year present fairly its assets and profit or loss, as required by ordinances of the Ministry of Justice) in either case pursuant to a resolution of the Board of Directors or (as the case may be) an ordinary resolution of a General Meeting of Shareholders). In the case of (i) above, any other shareholder may make a request to Sony Corporation that such other shareholder be included as a seller in the proposed purchase, provided that no such right will be available if the purchase price or any other consideration to be received by the relevant specific shareholder will not exceed the last trading price of the shares on the relevant stock exchange on the day immediately preceding the date on which the resolution mentioned in (i) above was adopted (or, if there is no trading in the shares on the stock exchange or if the stock exchange is not open on such day, the price at which the shares are first traded on such stock exchange thereafter).

The total amount of the purchase price of shares of Common Stock may not exceed the Distributable Amount, as described in "(Distribution of Surplus) — Distributions of Surplus — Restriction on distributions of Surplus."

Shares acquired by Sony Corporation may be held for any period or may be retired at the determination of the CEO. Sony Corporation may also transfer (by public or private sale or otherwise) to any person the shares held by it, subject to a determination by the CEO, and subject also to other requirements similar to those applicable to the issuance of new shares, as described in "*Issue of additional shares and pre-emptive rights*" above. Sony Corporation may also utilize its treasury stock for the purpose of transfer to any person upon exercise of stock acquisition rights or for the purpose of acquiring another company by way of merger, share exchange or corporate split through exchange of treasury stock for shares or assets of the acquired company.

(Unit share system)

The Articles of Incorporation of Sony Corporation provide that 100 shares constitute one "unit" of shares of stock. The Board of Directors or the Corporate Executive Officer to whom the authority to make such a determination has been delegated by a resolution of the Board of Directors is permitted to amend the Articles of Incorporation to reduce the number of shares that constitute a unit or to abolish the unit share system entirely. The number of shares constituting one unit cannot exceed 1,000 shares.

Under the unit share system, shareholders have one voting right for each unit of stock that they hold. Any number of shares less than one full unit have neither voting rights nor rights related to voting rights. The Articles of Incorporation and Share Handling Regulations of Sony Corporation provide that no share certificates shall be issued with respect to any number of shares constituting less than one full unit, unless Sony Corporation deems the issue of such share certificates to be necessary for any shareholder(s). As the transfer of shares normally requires delivery of the certificates, fractions of a unit for which no share certificate has been issued are not transferable. Moreover, holders of shares constituting less than one unit will have no other shareholder rights if Sony Corporation's Articles of Incorporation so provide, except that such holders may not be deprived of certain rights specified in the Company Law or an ordinance of the Ministry of Justice, including the right to receive distribution of Surplus.

A holder of shares constituting less than one full unit may require Sony Corporation to purchase such Shares at their market value in accordance with the provisions of the Share Handling Regulations of Sony Corporation.

The Articles of Incorporation of Sony Corporation provide that a holder of shares constituting less than one full unit may request Sony Corporation to sell to such holder such amount of shares which will, when added together with the shares constituting less than one full unit, constitute one full unit of stock. Such request by a holder and the sale by Sony Corporation must be made in accordance with the provisions of the Share Handling Regulations of Sony Corporation.

A holder who owns American Depositary Receipts ("ADRs") evidencing less than 100 ADSs will indirectly own less than one full unit. Although, as discussed above, under the unit share system holders of less than one full unit have the right to require Sony Corporation to purchase their shares or sell shares held by Sony Corporation to such holders, holders of ADRs evidencing ADSs that represent other than integral multiples of whole units are unable to withdraw the underlying shares of capital stock representing less than one full unit and, therefore, are unable, as a practical matter, to exercise the rights to require Sony Corporation to purchase such underlying shares or sell shares held by Sony Corporation to such holders. As a result, access to the Japanese markets by holders of ADRs through the withdrawal mechanism will not be available for dispositions of shares in lots less than one full unit. The unit share system does not affect the transferability of ADSs, which may be transferred in lots of any size.

(Sale by Sony Corporation of shares held by shareholders whose location is unknown)

Sony Corporation is not required to send a notice to a shareholder if a notice to such shareholder fails to arrive at the registered address of the shareholder in Sony Corporation's register of shareholders or at the address otherwise notified to Sony Corporation continuously for five years or more.

In addition, Sony Corporation may sell or otherwise dispose of shares of capital stock for which the location of the shareholder is unknown. Generally, if (i) notices to a shareholder fail to arrive continuously for five years or more at the shareholder's registered address in Sony Corporation's register of shareholders or at the address otherwise notified to Sony Corporation, and (ii) the shareholder fails to receive distributions of Surplus on the shares continuously for five years or more at the address registered in Sony Corporation's register of shareholders or at the address otherwise notified to Sony Corporation, Sony Corporation may sell or otherwise dispose of the shareholder's shares at the then market price of the shares by a determination of a Corporate Executive Officer and after giving at least three months' prior public and individual notice, and hold or deposit the proceeds of such sale or disposal of shares for such shareholder.

Reporting of substantial shareholdings

The Securities and Exchange Law of Japan and its related regulations require any person, regardless of residence, who has become, beneficially and solely or jointly, a holder of more than five percent of the total issued shares of capital stock of a company listed on any Japanese stock exchange or whose shares are traded on the over-the-counter market in Japan to file with the Director General of the competent Local Finance Bureau of the Ministry of Finance within five business days a report concerning such shareholdings. A similar report must also be filed in respect of any subsequent change of one percent or more in any such holding, with certain exceptions. For this purpose, shares issuable to such persons upon conversion of convertible securities or exercise of share subscription warrants or stock acquisition rights are taken into account in determining both the number of shares held by such holders and the issuer's total issued share capital. Any such report shall be filed with the Director

General of the relevant Local Finance Bureau of the Ministry of Finance through the Electronic Disclosure for Investors' Network (EDINET) system. Copies of such report must also be furnished to the issuer of such shares.

Except for the general limitation under Japanese anti-trust and anti-monopoly regulations against holding of shares of capital stock of a Japanese corporation which leads or may lead to a restraint of trade or monopoly, and except for general limitations under the Company Law or Sony Corporation's Articles of Incorporation on the rights of shareholders applicable regardless of residence or nationality, there is no limitation under Japanese laws and regulations applicable to Sony Corporation or under its Articles of Incorporation on the rights of non-resident or foreign shareholders to hold or exercise voting rights on the shares of capital stock of Sony Corporation.

There is no provision in Sony Corporation's Articles of Incorporation or by-laws that would have an effect of delaying, deferring or preventing a change in control of Sony Corporation and that would operate only with respect to merger, acquisition or corporate restructuring involving Sony Corporation.

Material Contracts

None

Exchange Controls

The Foreign Exchange and Foreign Trade Law of Japan and its related cabinet orders and ministerial ordinances (the "Foreign Exchange Regulations") govern the acquisition and holding of shares of capital stock of Sony Corporation by "exchange non-residents" and by "foreign investors." The Foreign Exchange Regulations currently in effect do not, however, affect transactions between exchange non-residents to purchase or sell shares outside Japan using currencies other than Japanese yen.

Exchange non-residents are:

- individuals who do not reside in Japan; and
- corporations whose principal offices are located outside Japan.

Generally, branches and other offices of non-resident corporations that are located within Japan are regarded as residents of Japan. Conversely, branches and other offices of Japanese corporations located outside Japan are regarded as exchange non-residents.

Foreign investors are:

- individuals who are exchange non-residents;
- corporations that are organized under the laws of foreign countries or whose principal offices are located outside of Japan; and
- corporations (1) of which 50 percent or more of their shares are held by individuals who are exchange non-residents and/or corporations (a) that are organized under the laws of foreign countries or (b) whose principal offices are located outside of Japan or (2) a majority of whose officers, or officers having the power of representation, are individuals who are exchange non-residents.

In general, the acquisition of shares of a Japanese company (such as the shares of capital stock of Sony Corporation) by an exchange non-resident from a resident of Japan is not subject to any prior filing requirements. In certain limited circumstances, however, the Minister of Finance may require prior approval of an acquisition of this type. While prior approval, as described above, is not required, in the case where a resident of Japan transfers shares of a Japanese company (such as the shares of capital stock of Sony Corporation) for consideration exceeding 100 million yen to an exchange non-resident, the resident of Japan who transfers the shares is required to report the transfer to the Minister of Finance within 20 days from the date of the transfer, unless the transfer was made through a bank, securities company or financial futures trader licensed under Japanese law.

If a foreign investor acquires shares of a Japanese company that is listed on a Japanese stock exchange (such as the shares of capital stock of Sony Corporation) or that is traded on an over-the-counter market in Japan and, as a result of the acquisition, the foreign investor, in combination with any existing holdings, directly or indirectly holds

10 percent or more of the issued shares of the relevant company, the foreign investor must file a report of the acquisition with the Minister of Finance and any other competent Ministers having jurisdiction over that Japanese company within 15 days from and including the date of the acquisition, except where the offering of the company's shares was made overseas. In limited circumstances, such as where the foreign investor is in a country that is not listed on an exemption schedule in the Foreign Exchange Regulations, a prior notification of the acquisition must be filed with the Minister of Finance and any other competent Ministers, who may then modify or prohibit the proposed acquisition.

Under the Foreign Exchange Regulations, dividends paid on and the proceeds from sales in Japan of shares of capital stock of Sony Corporation held by non-residents of Japan may generally be converted into any foreign currency and repatriated abroad.

Taxation

The following is a summary of the major Japanese national tax and U.S. federal income tax consequences of the ownership, acquisition and disposition of shares of Common Stock of Sony Corporation and of ADRs evidencing ADSs representing shares of Common Stock of Sony Corporation by a non-resident of Japan or a non-Japanese corporation without a permanent establishment in Japan. The summary does not purport to be a comprehensive description of all of the tax considerations that may be relevant to any particular investor, and does not take into account any specific individual circumstances of any particular investor. Accordingly, holders of shares of Common Stock or ADSs of Sony Corporation are encouraged to consult their tax advisors regarding the application of the considerations discussed below to their particular circumstances.

This summary is based upon the representations of the Depositary and the assumption that each obligation in the deposit agreement in relation to the ADSs dated as of June 1, 1961, as amended and restated as of October 31, 1991, as further amended and restated as of March 17, 1995, and in any related agreement, will be performed in accordance with its terms.

For purposes of the income tax convention between Japan and the United States (the "Treaty") and the U.S. Internal Revenue Code of 1986, as amended (the "Code"), U.S. holders of ADSs generally will be treated as owning shares of Common Stock of Sony Corporation underlying the ADSs evidenced by the ADRs. For the purposes of the following discussion, a "U.S. holder" is a holder that:

- (i) is a resident of the U.S. for purposes of the Treaty;
- (ii) does not maintain a permanent establishment in Japan (a) with which shares of Common Stock or ADSs of Sony Corporation are effectively connected and through which the U.S. holder carries on or has carried on business or (b) of which shares of Common Stock or ADSs of Sony Corporation form part of the business property; and
- (iii) is eligible for benefits under the Treaty with respect to income and gain derived in connection with shares of Common Stock or ADSs of Sony Corporation.

Japanese Taxation

The following is a summary of the principal Japanese tax consequences (limited to national taxes) to holders of shares of Common Stock of Sony Corporation and of ADRs evidencing ADSs representing shares of Common Stock of Sony Corporation who are non-residents of Japan or non-Japanese corporations, without a permanent establishment in Japan ("non-resident Holders").

Generally, a non-resident of Japan or a non-Japanese corporation is subject to Japanese withholding tax on dividends paid by Japanese corporations. Sony Corporation withholds taxes from dividends it pays as required by Japanese law. Stock splits are, in general, not a taxable event.

In the absence of an applicable tax treaty, convention or agreement reducing the maximum rate of Japanese withholding tax or allowing exemption from Japanese withholding tax, the rate of Japanese withholding tax applicable to dividends paid by Japanese corporations to non-residents of Japan or non-Japanese corporations is generally 20 percent, provided, with respect to dividends paid on listed shares issued by a Japanese corporation

(such as the shares of Common Stock of Sony Corporation) to any non-resident corporate or individual shareholders (including non-resident Holders) other than any individual shareholder who holds 5 percent or more of the total shares issued by the relevant Japanese corporation, the aforementioned 20 percent withholding tax rate is reduced to (i) 7 percent for dividends due and payable on or before March 31, 2009, and (ii) 15 percent for dividends due and payable on or after April 1, 2009. As of the date of this document, Japan has income tax treaties, conventions or agreements whereby the above-mentioned withholding tax rate is reduced, in most cases to 15 percent or 10 percent for portfolio investors (15 percent under the income tax treaties with, among other countries, Australia, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, New Zealand, Norway, Singapore, Spain, Sweden, Switzerland and 10 percent under the income tax treaties with the U.K. and the United States).

Under the Treaty, the maximum rate of Japanese withholding tax that may be imposed on dividends paid by a Japanese corporation to a U.S. holder that does not own directly or indirectly at least 10 percent of the voting stock of the Japanese corporation is generally reduced to 10 percent of the gross amount actually distributed, and Japanese withholding tax with respect to dividends paid by a Japanese corporation to a U.S. holder that is a pension fund is exempt from Japanese taxation by way of withholding or otherwise unless such dividends are derived from the carrying on of a business, directly or indirectly, by such pension fund.

If the maximum tax rate provided for in the income tax treaty applicable to dividends paid by Sony Corporation to any particular non-resident Holder is lower than the withholding tax rate otherwise applicable under Japanese tax law or any particular non-resident Holder is exempt from Japanese income tax with respect to such dividends under the income tax treaty applicable to such particular non-resident Holder, such non-resident Holder is required to submit an Application Form for Income Tax Convention Regarding Relief from Japanese Income Tax on Dividends (together with any other required forms and documents) in advance through Sony Corporation to the relevant tax authority before the payment of dividends. A standing proxy for non-resident Holders of a Japanese corporation may provide this application service. With respect to ADSs, this reduced rate or exemption is applicable if the Depositary or its agent submits two Application Forms (one before payment of dividends and the other within eight months after Sony Corporation's fiscal year-end or semi-fiscal year-end). To claim this reduced rate or exemption, a non-resident Holder of ADSs will be required to file a proof of taxpayer status, residence and beneficial ownership (as applicable) and to provide other information or documents as may be required by the Depositary. A non-resident Holder who is entitled, under an applicable income tax treaty, to a reduced rate which is lower than the withholding tax rate otherwise applicable under Japanese tax law or an exemption from the withholding tax, but failed to submit the required application in advance will be entitled to claim the refund of taxes withheld in excess of the rate under an applicable tax treaty (if such non-resident Holder is entitled to a reduced treaty rate under the applicable income tax treaty) or the full amount of tax withheld (if such non-resident Holder is entitled to an exemption under the applicable income tax treaty) from the relevant Japanese tax authority. Sony Corporation does not assume any responsibility to ensure withholding at the reduced treaty rate or to ensure not withholding for shareholders who would be so eligible under any applicable income tax treaty but do not follow the required procedures as stated above.

Gains derived from the sale of shares of Common Stock or ADSs of Sony Corporation outside Japan by a non-resident Holder holding such shares or ADSs as portfolio investors are, in general, not subject to Japanese income tax or corporation tax. U.S. holders are not subject to Japanese income or corporation tax with respect to such gains under the Treaty.

Japanese inheritance and gift taxes at progressive rates may be payable by an individual who has acquired shares of Common Stock or ADSs of Sony Corporation as a legatee, heir or donee even though neither the individual nor the deceased nor donor is a Japanese resident.

Holders of shares of Common Stock or ADSs of Sony Corporation should consult their tax advisors regarding the effect of these taxes and, in the case of U.S. holders, the possible application of the Estate and Gift Tax Treaty between the U.S. and Japan.

United States Taxation with respect to shares of Common Stock and ADSs

The U.S. dollar amount of dividends received (prior to deduction of Japanese taxes) by a U.S. holder of ADSs or Common Stock will be able to be included in income as ordinary income for U.S. federal income tax purposes to the extent paid out of current or accumulated earnings and profits of Sony Corporation as determined for U.S. federal income tax purposes. Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual prior to January 1, 2011 with respect to the ADSs or Common Stock will be subject to taxation at a maximum rate of 15 percent if the dividends are “qualified dividends.” Dividends paid on the Common Stock or ADSs will be treated as qualified dividends if Sony Corporation was not, in the year prior to the year in which the dividend was paid, and is not, in the year in which the dividend is paid a passive foreign investment company (“PFIC”). Based on Sony Corporation’s audited financial statements and relevant market and shareholder data, Sony Corporation believes that it was not treated as a PFIC for U.S. federal income tax purposes with respect to its 2006 taxable year. In addition, based on Sony Corporation’s audited financial statements and Sony Corporation’s current expectations regarding the value and nature of its assets, the sources and nature of its income, and relevant market and shareholder data, Sony Corporation does not anticipate becoming a PFIC for the 2007 taxable year. The U.S. Treasury has announced its intention to promulgate rules pursuant to which holders of ADSs or Common Stock and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to treat dividends as qualified for tax reporting purposes. Because such procedures have not yet been issued, it is not clear whether Sony Corporation will be able to comply with them. Holders of ADSs and Common Stock should consult their own tax advisors regarding the availability of the reduced dividend tax rate in light of the considerations discussed above and their own particular circumstances.

Subject to applicable limitations and special considerations discussed below, a U.S. holder of ADSs or Common Stock of Sony Corporation will be entitled to a credit for Japanese tax withheld in accordance with the Tax Convention from dividends paid by Sony Corporation. For purposes of the foreign tax credit limitation, dividends will be foreign source income, and will constitute “passive” or “financial services” income. Foreign tax credits will not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions and may not be allowed in respect of arrangements in which economic profit, after non-U.S. taxes, is insubstantial. Holders of Ads and Common Stock should consult their own tax advisors regarding the implications of these rules in light of their particular circumstances.

Dividends paid by Sony Corporation to U.S. corporate holders of ADSs or Common Stock will not be eligible for the dividends-received deduction.

In general, a U.S. holder will recognize capital gain or loss upon the sale or other disposition of ADSs or Common Stock equal to the difference between the amount realized on the sale or disposition and the U.S. holder’s tax basis in the ADSs or Common Stock. Such capital gain or loss will be long-term capital gain or loss if the ADSs or Common Stock have been held for more than one year on the date of the sale or disposition. The net amount of long-term capital gain recognized by an individual holder after May 5, 2003 and before January 1, 2011 generally is subject to taxation at a maximum rate of 15 percent. The net long-term capital gain recognized by an individual holder before May 6, 2003 or after December 31, 2010 generally is subject to taxation at a maximum rate of 20 percent.

Item 11. *Quantitative and Qualitative Disclosures about Market Risk*

Sony's normal course of business is continuously exposed to market fluctuation, such as fluctuations in currency exchange rates, interest rates or stock prices. Sony utilizes several derivative instruments, such as foreign exchange forward contracts, foreign currency option contracts, interest rate swap agreements and currency swap agreements in order to hedge the potential downside risk on the cash flow from the normal course of business caused by market fluctuation. Sony uses foreign exchange forward contracts and foreign currency option contracts primarily to reduce the foreign exchange volatility risk that accounts receivable or accounts payable denominated in yen, U.S. dollars, Euros or other currencies have through the normal course of Sony's worldwide business. Interest rate swap agreements and currency swap agreements are utilized to diversify funding conditions or to reduce funding costs, and in the Financial Services segment, these transactions are used for asset liability management. Sony uses these derivative financial instruments mainly for risk-hedging purposes as described above, and few derivative transactions, such as bond futures and bond options are held or utilized for trading purposes in the Financial Services segment. If hedge accounting cannot be applied because the accounts receivable or accounts payable to be hedged are not yet booked, or because cash flows from derivative transactions do not coincide with the underlying exposures recorded on Sony's balance sheet, then Sony understands that such derivatives agreements should be subject to a mark-to-market evaluation and their unrealized gains or losses are recognized in earnings. In addition, Sony holds marketable securities such as straight bonds, convertible bonds, and stocks in yen or other currencies in the Financial Services segment in order to obtain interest income or capital gain on the financial assets under management. Sony understands that such investment in marketable securities is also subjected to market fluctuation.

Sony measures the economic impact of market fluctuations on the value of derivatives agreements and marketable securities by using Value-at-Risk ("VaR") analysis in order to comply with Item 11 disclosure requirements. VaR in this context indicates the potential maximum amount of loss in fair value resulting from adverse market fluctuations for a selected period of time and at a selected level of confidence.

The following table shows the results of VaR. These analyses for the fiscal year ended March 31, 2007 indicate the potential maximum loss in fair value as predicted by the VaR analysis resulting from market fluctuations in one day at a 95 percent confidence level. The VaR of currency exchange rate risk principally consists of risks arising from the volatility of the exchange rates between the yen and U.S. dollar and between the yen and the Euro, the currencies in which a significant amount of financial assets and liabilities and derivative transactions are maintained on a consolidated basis. The VaR of interest rate risk and stock price risk consists of risks arising from the volatility of the interest rates and stock prices against invested securities and derivatives transactions in the Financial Services segment.

The net VaR for Sony's entire portfolio is smaller than the simple aggregate of VaR for each component of market risk. This is due to the fact that market risk factors such as currency exchange rates, interest rates, and stock prices are not completely independent, and potential profits and losses arising from each market risk may to some degree be mutually offsetting.

The disclosed VaR amounts simply represent the calculated potential maximum loss on the specified date and does not necessarily indicate an estimate of actual or future loss.

Item 12. Description of Securities Other Than Equity Securities

Not Applicable

Item 13. Defaults, Dividend Arrearages and Delinquencies

None

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

None

Item 15. Controls and Procedures

Item 15(a). Disclosure Controls and Procedures

Sony has carried out an evaluation under the supervision and with the participation of Sony’s management, including the Chief Executive Officer, President, and Chief Financial Officer, of the effectiveness of the design and operation of Sony’s disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as of March 31, 2007. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon Sony’s evaluation, the Chief

Executive Officer, President and Chief Financial Officer have concluded that, as of March 31, 2007, the disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports Sony files or submits under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported as and when required, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to Sony's management, including the Chief Executive Officer, President, and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Item 15(b). Management's Annual Report on Internal Control over Financial Reporting

Sony management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Sony's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable generally accepted accounting principles. Sony's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of Sony;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of Sony are being made only in accordance with authorizations of management and directors; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Sony's assets that could have a material effect on the financial statements.

Sony management evaluated the effectiveness of Sony's internal control over financial reporting as of March 31, 2007 based on the criteria established in "Internal Control — Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the evaluation, management has concluded that Sony maintained effective internal control over financial reporting as of March 31, 2007.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management's assessment of the effectiveness of Sony's internal control over financial reporting as of March 31, 2007 has been audited by PricewaterhouseCoopers Aarata, an independent registered public accounting firm, as stated in its report, presented on page F-2.

Item 15(c). Attestation Report of the Registered Public Accounting Firm

Refer to the Report of Independent Registered Public Accounting Firm on page F-2.

Item 15(d) — Changes in Internal Control over Financial Reporting

There has been no change in Sony's internal control over financial reporting during the fiscal year ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, Sony's internal control over financial reporting.

Item 16. [Reserved]

Item 16A. Audit Committee Financial Expert

Sony's Board of Directors has determined that Mr. Yoshiaki Yamauchi and Mr. Fueo Sumita both qualify as an "audit committee financial expert" as defined in this Item 16A. In addition, both are independent as defined under the New York Stock Exchange Corporate Governance Standards.

Item 16B. Code of Ethics

Sony has adopted a code of ethics, as defined in Item 16B of Form 20-F under the Securities Exchange Act of 1934, as amended. The code of ethics applies to Sony's Chief Executive Officer, Chief Financial Officer, chief accounting officer and persons performing similar functions, as well as to directors and all other officers and employees of Sony, as defined in the code of ethics. The code of ethics is available at http://www.sony.net/SonyInfo/Environment/management/compliance/qfhh7c000006e52h-att/code_of_conduct.pdf

Item 16C. Principal Accountant Fees and Services

Audit and Non-Audit Fees

The following table presents fees for audit and other services rendered by PricewaterhouseCoopers for the fiscal years ended March 31, 2006 and 2007.

	Fiscal Year Ended March 31	
	2006	2007
	Yen in millions	
Audit Fees(1)	2,180	4,900
Audit-Related Fees(2)	206	204
Tax Fees(3)	486	110
All Other Fees(4)	<u>12</u>	<u>16</u>
	<u>2,884</u>	<u>5,230</u>

- (1) Audit Fees consist of fees billed for the annual audit services engagement and other audit services, which are those services that only the external auditor can provide. The year-over-year increase in audit fees for the fiscal year ended March 31, 2007 compared to the prior year is mostly related to the attestation services in connection with Section 404 of the Sarbanes-Oxley Act of 2002.
- (2) Audit-Related Fees consist of fees billed for assurance and related services, and mainly include the audits of employee benefit plans. The audit-related fees for the fiscal year ended March 31, 2006 included the advisory services related to the implementation of Sarbanes-Oxley Act Section 404 and employee benefit plan audits.
- (3) Tax Fees primarily include tax compliance, tax advice and expatriate tax services.
- (4) All Other Fees comprise fees for all other services not included in any of the other categories noted above.

Audit Committee's Pre-Approval Policies and Procedures

Consistent with U.S. Securities and Exchange Commission rules regarding auditor independence, Sony's Audit Committee is responsible for appointing, reviewing and setting compensation, retaining, and overseeing the work of Sony's independent auditor, so that the auditor's independence will not be impaired, including overseeing any separate firm that audits the financial statements of any subsidiary if Sony's independent auditor expressly relies on the audit report of such firm. The Audit Committee has established a formal policy requiring pre-approval of all audit and permissible non-audit services provided by the independent auditor to Sony or any of its subsidiaries. The Audit Committee shall periodically review this policy with due regard for compliance with laws and regulations of host countries where Sony is listed.

Prior to the engagement of the independent auditor for the following fiscal year's audit, management shall submit an application form to the Audit Committee for comprehensive pre-approval of all recurring services expected to be rendered during that year. In order to obtain comprehensive pre-approval, management shall provide sufficient information regarding each service so that each service can be classified into one of four categories (Audit, Audit-related, Tax, or All Other) as well as information regarding the fees expected to be budgeted for each service. Management shall describe each service in detail and indicate precisely and unambiguously the nature and scope of each particular service. Any additional services not contemplated in the application form shall require the Audit Committee's separate pre-approval on an individual basis. The Audit Committee will approve, if necessary, any changes in terms, conditions and fees, resulting from changes in the scope of services to be provided or from

other circumstances. The Audit Committee Chairman retains pre-approval authority and evaluates items for approval on request basis. The Audit Committee or its designee shall establish procedures to assure that the independent auditor is aware in a timely manner of the services that have been pre-approved.

During the fiscal year ended March 31, 2007, the Audit Committee has continued to include individual tax services, recruiting services and corporate tax service to the list of prohibited services stipulated by U.S. Securities and Exchange Commission rules and related regulations to enhance auditor independence. The Audit Committee has carefully checked these services and only permitted exceptional instances where the services had already been pre-approved prior to the effective date and instances in which difficulties were encountered in finding an alternative service provider immediately, or when a brief transitional period has been needed.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table sets out information concerning purchases made by Sony during the fiscal year ended March 31, 2007.

<u>Period</u>	<u>(a) Total Number of Shares Purchased</u>	<u>(b) Average Price Paid per Share</u>	<u>(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs</u>

Total	104,754	5,324.93	N/A	N/A

Under the Company Law of Japan, a holder of shares constituting less than one full unit may require Sony Corporation to purchase such shares at their market value (Refer to “Memorandum and Articles of Association — Capital stock — (Unit share system)” in “Item 10. Additional Information”). During the fiscal year ended March 31, 2007, Sony Corporation purchased 104,754 shares for a total purchase price of 557,807,980 yen upon such requests from holders of shares constituting less than one full unit.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of
Sony Corporation (Sony Kabushiki Kaisha)

We have completed an integrated audit of Sony Corporation's March 31, 2007 consolidated financial statements and of its internal control over financial reporting as of March 31, 2007 and audits of its March 31, 2005 and 2006 consolidated financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Consolidated Financial Statements and Financial Statement Schedule

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Sony Corporation and its subsidiaries ("Sony") at March 31, 2006 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2007 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Sony's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 2 to the consolidated financial statements, Sony changed its methods of accounting for defined benefit pensions and other postretirement benefits, stock-based compensation and certain hybrid financial instruments during the fiscal year ended March 31, 2007.

Internal Control Over Financial Reporting

Also, in our opinion, management's assessment, included in the accompanying "Management's Annual Report on Internal Control over Financial Reporting" appearing under Item 15(b), that Sony maintained effective internal control over financial reporting as of March 31, 2007 based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, Sony maintained, in all material respects, effective internal control over financial reporting as of March 31, 2007, based on criteria established in Internal Control — Integrated Framework issued by the COSO. Sony's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of Sony's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Notes to Consolidated Financial Statements

Sony Corporation and Consolidated Subsidiaries

1. *Nature of operations*

Sony Corporation and its consolidated subsidiaries (hereinafter collectively referred to as “Sony”) are engaged in the development, design, manufacture, and sale of various kinds of electronic equipment, instruments, and devices for consumer and industrial markets. Sony also develops, produces, manufactures, and markets home-use game consoles and software. Sony’s manufacturing facilities are located in Japan, the United States of America, Europe, and Asia. Its electronic products are marketed throughout the world and game products are marketed mainly in Japan, the United States of America and Europe by sales subsidiaries and unaffiliated local distributors as well as direct sales via the Internet. Sony is engaged in the development, production, manufacture, marketing, distribution and broadcasting of image-based software, including film, video and television product. Sony is also engaged in various financial service businesses including insurance operations through a Japanese life insurance subsidiary and a non-life insurance subsidiary, banking operations through a Japanese internet-based banking subsidiary and leasing and credit financing operations in Japan. In addition to the above, Sony is engaged in the development, production, manufacture, and distribution of recorded music, a network service business, an animation production and marketing business, and an advertising agency business in Japan.

2. *Summary of significant accounting policies*

Sony Corporation and its subsidiaries in Japan maintain their records and prepare their financial statements in accordance with accounting principles generally accepted in Japan while its foreign subsidiaries maintain their records and prepare their financial statements in conformity with accounting principles generally accepted in the countries of their domiciles. Certain adjustments and reclassifications have been incorporated in the accompanying consolidated financial statements to conform with accounting principles generally accepted in the United States of America (“U.S. GAAP”). These adjustments were not recorded in the statutory books.

(1) **Newly adopted accounting pronouncements:**

Inventory Costs -

In November 2004, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards (“FAS”) No. 151, “Inventory Costs, an amendment of Accounting Research Bulletin (“ARB”) No. 43, Chapter 4”. This statement requires certain abnormal expenditures to be recognized as expenses in the current period. It also requires that the amount of fixed production overhead allocated to the inventory be based on the normal capacity of the production facilities. Sony adopted FAS No. 151 on April 1, 2006. The adoption of FAS No. 151 did not have a material impact on Sony’s results of operations and financial position.

Accounting for Stock-Based Compensation -

Effective April 1, 2006, Sony adopted FAS No. 123 (revised 2004), “Share-Based Payment” (“FAS No. 123(R)”). This statement requires the use of the fair value based method of accounting for employee stock-based compensation and eliminates the alternative to use the intrinsic value method prescribed by Accounting Principle Board Opinion (“APB”) No. 25. With limited exceptions, FAS No. 123(R) requires that the grant-date fair value of share-based payments to employees be expensed over the period the service is received. Sony had accounted for its employee stock-based compensation in accordance with the provisions prescribed by APB No. 25 and its related interpretations and had disclosed the net effect on net income and net income per share (“EPS”) allocated to the common stock as if Sony had applied the fair value recognition provisions of FAS No. 123 to stock-based compensation as described in (2) Significant accounting policies — Stock-based compensation. Sony has elected the modified prospective method of transition prescribed in FAS No. 123(R), which requires that compensation expense be recorded for all unvested stock acquisition rights as the requisite service is rendered

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

beginning with the first period of adoption. As a result of the adoption of FAS No. 123(R), Sony's operating income decreased by 3,670 million yen for the fiscal year ended March 31, 2007.

Derivative Instruments and Hedging Activities -

In February 2006, the FASB issued FAS No. 155, "Accounting for Certain Hybrid Financial Instruments", an amendment of FAS No. 133 and FAS No. 140. This statement permits an entity to elect fair value remeasurement for any hybrid financial instrument if the hybrid instrument contains an embedded derivative that would otherwise be required to be bifurcated and accounted for separately under FAS No. 133. The election to measure the hybrid instrument at fair value is made on an instrument-by-instrument basis and is irreversible. The statement is effective for all financial instruments acquired, issued, or subject to a remeasurement event occurring after the beginning of an entity's fiscal year beginning after September 15, 2006, with earlier adoption permitted as of the beginning of the fiscal year, provided that financial statements for any interim period of that fiscal year have not been issued. Sony early adopted FAS No. 155 on April 1, 2006. As a result of the adoption of FAS No. 155, Sony's operating income increased by 3,828 million yen for the fiscal year ended March 31, 2007. Additionally, on April 1, 2006, Sony recognized a net charge of 3,785 million yen (net of income taxes of 2,148 million yen) as a cumulative-effect adjustment to beginning retained earnings, which consisted of 1,754 million yen (net of income taxes of 996 million yen) of gross gains and 5,539 million yen (net of income taxes of 3,144 million yen) of gross losses.

Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans -

In September 2006, the FASB issued FAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", an amendment to FASB Statements No. 87, 88, 106 and 132(R). FAS No. 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit pension and other postretirement benefit plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income. FAS No. 158 was adopted by Sony in the financial statements for the year ended March 31, 2007. FAS No. 158 also requires companies to measure the funded status of the plan as of the date of its fiscal year-end, effective for years ending after December 15, 2008. Sony expects to adopt the measurement provisions of FAS No. 158 effective March 31, 2009. See Note 14, Pension and severance plans, for further details.

Quantifying Effects of Prior Year Misstatements in Current Year Financial Statements -

In September 2006, the U.S. Securities and Exchange Commission ("SEC") staff issued Staff Accounting Bulletin ("SAB") No. 108, "Considering the Effect of Prior Year Misstatement when Quantifying Misstatements in Current Year Financial Statements". SAB No. 108 requires that registrants quantify errors using both a balance sheet approach, generally referred to as the "Iron Curtain" method, and a statement of operations approach, generally referred to as the "Rollover" method, and evaluate whether either approach results in a misstated amount that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 became effective for Sony as of April 1, 2006. Prior to the application of SAB No. 108, Sony used a statement of operations approach to quantify errors. The application of SAB No. 108 did not have a material impact on Sony's consolidated financial statements.

(2) Significant accounting policies:

Basis of consolidation and accounting for investments in affiliated companies -

The consolidated financial statements include the accounts of Sony Corporation and its majority-owned subsidiary companies, general partnerships in which Sony has a controlling interest, and variable interest entities for which Sony is the primary beneficiary. All intercompany transactions and accounts are eliminated. Investments in business entities in which Sony does not have control, but has the ability to exercise significant influence over operating and financial policies generally through 20-50% ownership, are accounted for under the equity method. In addition, investments in general partnerships in which Sony does not have a controlling interest and limited

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

partnerships are also accounted for under the equity method if more than minor influence over the operation of the investee exists (generally through more than 3-5% ownership). When the interest in the partnership is so minor that Sony may have virtually no influence over the operation of the investee, the cost method is used. Under the equity method, investments are stated at cost plus/minus Sony's portion of equity in undistributed earnings or losses. Consolidated net income includes Sony's equity in current earnings or losses of such companies, after elimination of unrealized intercompany profits. If the value of an investment has declined and is judged to be other-than-temporary, the investment is written down to its fair value.

On occasion, a consolidated subsidiary or an affiliated company accounted for by the equity method may issue its shares to third parties in either a public or private offering or upon conversion of convertible debt to common stock at amounts per share in excess of or less than Sony's average per share carrying value. With respect to such transactions, where the sale of such shares is not part of a broader corporate reorganization and the reacquisition of such shares is not contemplated at the time of issuance, the resulting gains or losses arising from the change in interest are recorded in income for the year the change in interest transaction occurs. If the sale of such shares is part of a broader corporate reorganization, the reacquisition of such shares is contemplated at the time of issuance or realization of such gain is not reasonably assured (i.e., the entity is newly formed, non-operating, a research and development or start-up/development stage entity, or where the entity's ability to continue in existence is in question), the transaction is accounted for as a capital transaction.

The excess of the cost over the underlying net equity of investments in consolidated subsidiaries and affiliated companies accounted for on an equity basis is allocated to identifiable assets and liabilities based on fair values at the date of acquisition. The unassigned residual value of the excess of the cost over Sony's underlying net equity is recognized as goodwill as a component of the investment balance.

Use of estimates -

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Translation of foreign currencies -

All asset and liability accounts of foreign subsidiaries and affiliates are translated into Japanese yen at appropriate year-end current exchange rates and all income and expense accounts are translated at exchange rates that approximate those rates prevailing at the time of the transactions. The resulting translation adjustments are accumulated as a component of accumulated other comprehensive income.

Foreign currency receivables and payables are translated at appropriate year-end current exchange rates and the resulting translation gains or losses are taken into income.

Cash and cash equivalents -

Cash and cash equivalents include all highly liquid investments, with original maturities of three months or less, that are readily convertible to known amounts of cash and are so near maturity that they present insignificant risk of changes in value because of changes in interest rates.

Marketable debt and equity securities -

Debt and equity securities designated as available-for-sale, whose fair values are readily determinable, are carried at fair value with unrealized gains or losses included as a component of accumulated other comprehensive income, net of applicable taxes. Debt and equity securities classified as trading securities are carried at fair value with unrealized gains or losses included in income. Debt securities that are expected to be held-to-maturity are carried at amortized cost. Individual securities classified as either available-for-sale or held-to-maturity are reduced

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

to net realizable value by a charge to income for other-than-temporary declines in fair value. Realized gains and losses are determined on the average cost method and are reflected in income.

Equity securities in non-public companies -

Equity securities in non-public companies are carried at cost as fair value is not readily determinable. If the value of a non-public equity investment is estimated to have declined and such decline is judged to be other-than-temporary, Sony recognizes the impairment of the investment and the carrying value is reduced to its fair value. Determination of impairment is based on the consideration of several factors, including operating results, business plans and estimated future cash flows. Fair value is determined through the use of methodologies such as discounted cash flows, valuation of recent financings and comparable valuations of similar companies.

Inventories -

Inventories in electronics and game as well as non-film inventories for pictures are valued at cost, not in excess of market, cost being determined on the “average cost” basis except for the cost of finished products carried by certain subsidiary companies in electronics which is determined on the “first-in, first-out” basis. The market value of inventory is determined as the net realizable value — i.e., estimated selling price in the ordinary course of business less predictable costs of completion and disposal. Sony does not consider a normal profit margin when calculating the net realizable value.

Film costs -

Film costs related to theatrical and television products (which include direct production costs, production overhead and acquisition costs) are stated at the lower of unamortized cost or estimated fair value and classified as non-current assets. Film costs are amortized, and the estimated liabilities for residuals and participations are accrued, for an individual product based on the proportion that current period actual revenues bear to the estimated remaining total lifetime revenues. These estimates are reviewed on a periodic basis.

Property, plant and equipment and depreciation -

Property, plant and equipment are stated at cost. Depreciation of property, plant and equipment is primarily computed on the declining-balance method for Sony Corporation and its Japanese subsidiaries, except for certain semiconductor manufacturing facilities whose depreciation is computed on the straight-line method, and on the straight-line method for its foreign subsidiaries at rates based on estimated useful lives of the assets, principally, ranging from 15 years up to 50 years for buildings and from 2 years up to 10 years for machinery and equipment. Significant renewals and additions are capitalized at cost. Maintenance and repairs, and minor renewals and betterments are charged to income as incurred.

Goodwill and other intangible assets -

Goodwill and certain other intangible assets that are determined to have an indefinite life are not amortized and are tested annually for impairment during the fourth quarter of the fiscal year and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value below its carrying amount. Fair value for those assets is generally determined using a discounted cash flow analysis.

Intangible assets with finite lives that are determined not to have an indefinite life mainly consist of artist contracts, music catalogs, acquired patent rights and software to be sold, leased or otherwise marketed. Artist contracts and music catalogs are amortized on a straight-line basis, generally, over 10 to 40 years. Acquired patent rights and software to be sold, leased or otherwise marketed are amortized on a straight-line basis, generally, over 3 to 8 years.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Accounting for computer software to be sold -

Sony accounts for software development costs in accordance with FAS No. 86, "Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed".

In the Electronics segment, costs related to establishing the technological feasibility of a software product are expensed as incurred as a part of research and development in cost of sales. Costs that are incurred to produce the finished product after technological feasibility is established are capitalized and amortized over the estimated economic life of the product, which is generally three years.

In the Game segment, technological feasibility of game software is established when the product master is completed. Consideration to capitalize game software development costs before this point is limited to the development costs of games for which technological feasibility can be proven to be at an earlier stage.

Sony performs periodic reviews to ensure that unamortized capitalized software costs remain recoverable from future profits.

Deferred insurance acquisition costs -

Costs that vary with and are primarily related to acquiring new insurance policies are deferred as long as they are recoverable. The deferred insurance acquisition costs include such items as commissions, medical examination and inspection report fees. The deferred insurance acquisition costs for traditional life insurance contracts are amortized over the premium-paying period of the related insurance policies using assumptions consistent with those used in computing policy reserves. The deferred insurance acquisition costs for non-traditional life insurance contracts are amortized over the expected life in proportion to the estimated gross profits.

Product warranty -

Sony provides for the estimated cost of product warranties at the time revenue is recognized by either product category group or individual product. The product warranty is calculated based upon product sales, estimated probability of failure and estimated cost per claim. The variables used in the calculation of the provision are reviewed on a periodic basis.

Certain subsidiaries in the Electronics segment offer extended warranty programs. The consideration received through extended warranty service is deferred and amortized on a straight-line basis over the term of the extended warranty.

Future insurance policy benefits -

Liabilities for future insurance policy benefits are primarily comprised of the present value of estimated future payments to policyholders. These liabilities are computed by the net level premium method based upon the assumptions, including future investment yield, morbidity, mortality and withdrawals. These assumptions are reviewed on a periodic basis. Liabilities for future insurance policy benefits also include liabilities for guaranteed benefits related to certain non-traditional long-duration life and annuity contracts.

Accounting for the impairment of long-lived assets -

Sony periodically reviews the carrying value of its long-lived assets held and used, other than goodwill and intangible assets with indefinite lives, and assets to be disposed of, whenever events or changes in circumstances indicate that the individual carrying amount of an asset may not be recoverable. Long-lived assets to be held and used are reviewed for impairment by comparing the carrying value of the assets with their estimated undiscounted future cash flows. If it is determined that an impairment loss has occurred, the loss would be recognized during the period. The impairment loss would be calculated as the difference between the asset carrying value and the present value of estimated net cash flows or comparable market values, giving consideration to recent operating performance. Long-lived assets that are to be disposed of other than by sale are considered held and used until they are

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

disposed of. Long-lived assets that are to be disposed of by sale are reported at the lower of their carrying value or fair value less cost to sell. Reductions in carrying value are recognized in the period in which the long-lived assets are classified as held for sale.

Derivative financial instruments -

All derivatives are recognized as either assets or liabilities in the balance sheet at fair value. Changes in the fair value of derivative financial instruments are either recognized periodically in income or stockholders' equity (as a component of accumulated other comprehensive income), depending on whether the derivative financial instrument qualifies as a hedge and the derivative is being used to hedge changes in fair value or cash flows.

In accordance with FAS No. 133, "Accounting for Derivative Instruments and Hedging Activities", the various derivative financial instruments held by Sony are classified and accounted for as described below.

Fair value hedges

Changes in the fair value of derivatives designated and effective as fair value hedges for recognized assets or liabilities or unrecognized firm commitments are recognized in earnings as offsets to changes in the fair value of the related hedged assets or liabilities.

Cash flow hedges

Changes in the fair value of derivatives designated and effective as cash flow hedges for forecasted transactions or exposures associated with recognized assets or liabilities are initially recorded in other comprehensive income and reclassified into earnings when the hedged transaction affects earnings. Changes in the fair value of the ineffective portion are recognized in current period earnings.

Derivatives not designated as hedges

Changes in the fair value of derivatives that are not designated as hedges under FAS No. 133 are recognized in current period earnings.

When applying hedge accounting, Sony formally documents all hedging relationships between the derivatives designated as hedges and hedged items, as well as its risk management objectives and strategies for undertaking various hedging activities. Sony links all hedges that are designated as fair value or cash flow hedges to specific assets or liabilities on the balance sheet or to the specific forecasted transactions. Sony also assesses, both at the inception of the hedge and on an on-going basis, whether the derivatives that are designated as hedges are highly effective in offsetting changes in fair value or cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge, Sony discontinues hedge accounting.

Stock-based compensation -

With the adoption of FAS No. 123(R) effective April 1, 2006, Sony accounts for stock-based compensation using the fair value based method. Sony recognized 3,838 million yen of stock-based compensation expense for the fiscal year ended March 31, 2007. The expense is mainly included in selling, general and administrative expenses. The income tax benefit related to the stock-based compensation expense for the fiscal year ended March 31, 2007, was 790 million yen. Sony has elected the modified prospective method of transition prescribed in FAS No. 123(R) and therefore has not restated the results for prior periods. Under this transition method, stock-based compensation expense for the fiscal year ended March 31, 2007 included the expense for all stock acquisition rights granted prior to, but not yet vested as of April 1, 2006, based on the grant-date fair value estimated in accordance with the original provision of FAS No. 123. Stock-based compensation expense for all stock acquisition rights granted after April 1, 2006 is based on the grant-date fair value estimated in accordance with FAS No. 123(R). The fair value is measured on the date of grant using the Black-Scholes option-pricing model. Sony recognizes this compensation expense, net of an estimated forfeiture rate, for only the rights expected to vest ratably over the requisite service period of the

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

stock acquisition rights, which is generally a period of three years. Sony estimated the forfeiture rate for the fiscal year ended March 31, 2007, based on its historical experience in the stock acquisition rights plans where the majority of the vesting terms have been satisfied.

Prior to the adoption of FAS No. 123(R), Sony had applied APB No. 25, “Accounting for Stock Issued to Employees”, and its related interpretations in accounting for its stock-based compensation plans and followed the disclosure-only provisions of FAS No. 148, “Accounting for Stock-Based Compensation — Transition and Disclosure — an Amendment of FASB Statement No. 123”. As prescribed by APB No. 25, Sony had accounted for stock-option compensation using the intrinsic value method. Compensation expense for the years ended March 31, 2005 and 2006 was not significant as the exercise prices for the stock acquisition rights plans were determined based on the prevailing market price shortly before the date of grant.

The following table reflects the net effects on net income and net income per share allocated to the common stock as if Sony had applied the fair value recognition provisions of FAS No. 123, “Accounting for Stock-Based Compensation”, to its stock-based compensation. See Note 16 for detailed assumptions.

Free distribution of common stock -

On occasion, Sony Corporation may make a free distribution of common stock which is accounted for either by a transfer from additional paid-in capital to the common stock account or with no entry if free shares are distributed from the portion of previously issued shares in the common stock account.

Under the Japanese Company Law, a stock dividend can be affected by an appropriation of retained earnings to the common stock account, followed by a free share distribution with respect to the amount appropriated by resolution of the Board of Directors.

Free distribution of common stock is recorded in the consolidated financial statements only when it becomes effective, except for the calculation and presentation of per share amounts.

Stock issue costs -

Stock issue costs are directly charged to retained earnings, net of tax, in the accompanying consolidated financial statements as the Japanese Company Law prohibits charging such stock issue costs to capital accounts which is the prevailing practice in the United States of America.

Revenue recognition -

Revenues from electronics and game sales are recognized upon delivery which is considered to have occurred when the customer has taken title to the product and the risks and rewards of ownership have been substantively transferred. If the sales contract contains a customer acceptance provision, then sales are recognized after customer acceptance occurs or the acceptance provisions lapse.

Revenues from the theatrical exhibition of motion pictures are recognized as the customer exhibits the film. Revenues from the licensing of feature films and television programming are recorded when the material is available for telecast by the licensee and when any restrictions regarding the exhibition or exploitation of the product lapse. Revenues from the sale of home videocassettes and DVDs and Blu-ray discs are recognized upon availability of sale to the public.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Traditional life insurance policies that the life insurance subsidiary underwrites, most of which are categorized as long-duration contracts, mainly consist of whole life, term life and accident and health insurance contracts. Premiums from these policies are reported as revenue when due from policyholders.

Amounts received as payment for non-traditional contracts such as interest sensitive whole life contracts, single payment endowment contracts, single payment juvenile contracts and other contracts without life contingencies are recognized as deposits to policyholder account balances and included in future insurance policy benefits and other. Revenues from these contracts are comprised of fees earned for administrative and contract-holder services, which are recognized over the period of the contracts, and included in financial service revenue. Property and casualty insurance policies that the non-life insurance subsidiary underwrites are primarily automotive insurance contracts which are categorized as short-duration contracts. Premiums from these policies are reported as revenue over the period of the contract in proportion to the amount of insurance protection provided.

Accounting for consideration given to a customer or a reseller -

In accordance with the Emerging Issue Task Force (“EITF”) Issue No. 01-9, “Accounting for Consideration Given by a Vendor to a Customer or Reseller of the Vendor’s Products”, cash consideration given to a customer or a reseller including payments for buydowns, slotting fees and cooperative advertising programs, is accounted for as a reduction of revenue unless Sony receives an identifiable benefit (goods or services) in exchange for the consideration, the fair value of the benefit is reasonably estimated and documentation from the reseller is received to support the amounts paid to the reseller. Payments meeting these criteria are recorded as selling, general and administrative expenses. For the fiscal years ended March 31, 2005, 2006 and 2007, consideration given to a reseller, primarily for free promotional shipping and cooperative advertising programs included in selling, general and administrative expense totaled 27,946 million yen, 29,489 million yen and 31,933 million yen, respectively.

Cost of sales -

Costs classified as cost of sales relate to the producing and manufacturing of products and include items such as material cost, subcontractor cost, depreciation of fixed assets, amortization of intangible assets, personnel expenses, research and development costs, and amortization of film costs related to theatrical and television products.

Research and development costs -

Research and development costs are expensed as incurred.

Selling, general and administrative -

Costs classified as selling expense relate to promoting and selling products and include items such as advertising, promotion, shipping, and warranty expenses.

General and administrative expenses include operating items such as officer’s salaries, personnel expenses, depreciation of fixed assets, office rental for sales, marketing and administrative divisions, a provision for doubtful accounts and amortization of intangible assets.

Selling, general and administrative expenses are expensed as incurred.

Financial service expenses -

Financial service expenses include a provision for policy reserves and amortization of deferred insurance acquisition cost, and all other operating costs such as personnel expenses, depreciation of fixed assets, and office rental of subsidiaries in the Financial Services segment.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Advertising costs -

Advertising costs are expensed when the advertisement or commercial appears in the selected media, except for advertising costs for acquiring new insurance policies which are deferred and amortized as part of insurance acquisition costs.

Shipping and handling costs -

The majority of shipping and handling, warehousing and internal transfer costs for finished goods are included in selling, general and administrative expenses. An exception to this is in the Pictures segment where such costs are charged to cost of sales as they are an integral part of producing and distributing films under SOP 00-2, "Accounting by Producers or Distributors of Films". All other costs related to Sony's distribution network are included in cost of sales, including inbound freight charges, purchasing and receiving costs, inspection costs and warehousing costs for raw materials and in-process inventory. Amounts paid by customers for shipping and handling costs are included in net sales.

Income taxes -

The provision for income taxes is computed based on the pretax income included in the consolidated statements of income, and the tax liability attributed to undistributed earnings of subsidiaries and affiliated companies accounted for by the equity methods. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Sony records valuation allowances to reduce deferred tax assets to the amount that management believes is more likely than not to be realized. In assessing the likelihood of realization, Sony considers all currently available evidence for future years, both positive and negative, supplemented by information of historical results for each tax jurisdiction.

Net income per share -

Basic net income per share is computed based on the weighted-average number of shares of common stock outstanding during each period.

Prior to December 1, 2005, Sony calculated and presented per share data separately for Sony's common stock and for the subsidiary tracking stock by the "two-class" method based on FAS No. 128. As the holders of the subsidiary tracking stock had the right to participate in earnings, together with common stockholders, under this method, basic net income per share for each class of stock was calculated based on the earnings allocated to each class of stock for the applicable period, divided by the weighted-average number of outstanding shares in each class during the applicable period.

The earnings allocated to the subsidiary tracking stock were determined based on the subsidiary tracking stock holders' economic interest in the targeted subsidiary's earnings available for dividends. The earnings allocated to the common stock were calculated by subtracting the earnings allocated to the subsidiary tracking stock from Sony's net income for the period.

On October 26, 2005, the Board of Directors of Sony Corporation decided to terminate all shares of subsidiary tracking stock and convert such shares to shares of Sony common stock at a conversion rate of 1.114 share of Sony common stock per share of subsidiary tracking stock. All shares of subsidiary tracking stock were converted to shares of Sony common stock on December 1, 2005. As a result of the conversion, for the fiscal year ended March 31, 2006, Sony calculated per share data separately for Sony's common stock and for the subsidiary tracking stock by the "two-class" method based on FAS No. 128, but did not present per share data for the subsidiary tracking stock. The earnings allocated to common stock for the fiscal year ended March 31, 2006 were calculated by subtracting the earnings allocated to the subsidiary tracking stock for the eight months ended November 30, 2005.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The computation of diluted net income per share reflects the maximum possible dilution from conversion, exercise, or contingent issuance of securities including the conversion of contingently convertible debt instruments (“Co-Cos”) regardless of whether the conditions to exercise the conversion rights have been met.

(3) Recent Pronouncements:

Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts -

In September 2005, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants (“AcSEC”) issued the Statement of Position (“SOP”) 05-1, “Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts”. SOP 05-1 provides guidance on accounting for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in FAS No. 97, “Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sales of Investments”. This statement will be effective for Sony as of April 1, 2007. Although Sony is currently evaluating the impact of adopting this new pronouncement, the adoption of SOP 05-1 is not expected to have a material impact on Sony’s results of operations and financial position.

Accounting for Servicing of Financial Assets -

In March 2006, the FASB issued FAS No. 156, “Accounting for Servicing of Financial Assets — an amendment of FASB Statement No. 140”. This statement amends FAS No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities” with respect to the accounting for separately recognized servicing assets and servicing liabilities. This statement will be effective for Sony as of April 1, 2007. Sony is currently evaluating the impact of adopting this new pronouncement.

Accounting for Uncertainty in Income Taxes -

In June 2006, the FASB issued FASB Interpretation (“FIN”) No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109.” FIN No. 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise’s financial statements in accordance with FAS No. 109, “Accounting for Income Taxes.” FIN No. 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This statement will be effective for Sony as of April 1, 2007. Although Sony is currently evaluating the potential cumulative impact of FIN No. 48 on the consolidated financial statements, the final evaluation is expected to result in a charge to beginning retained earnings and an increase in the tax liabilities.

How Taxes Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement -

In June 2006, the EITF issued EITF Issue No. 06-3, “How Taxes Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement”. EITF Issue No. 06-3 requires disclosure of the accounting policy for any tax assessed by a governmental authority that is imposed concurrently on a specific revenue-producing transaction between a seller and a customer. EITF Issue No. 06-3 should be applied to financial reports for interim and annual reporting periods beginning after December 15, 2006. This statement will be effective for Sony as of April 1, 2007. Although Sony is currently evaluating the impact of adopting this new pronouncement, the adoption of EITF Issue No. 06-3 is not expected to have a material impact on Sony’s results of operations and financial position.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Fair Value Measurements -

In September 2006, the FASB issued FAS No. 157, "Fair Value Measurements". FAS No. 157 establishes a framework for measuring fair value, clarifies the definition of fair value, and expands disclosures about the use of fair value measurements. FAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements and does not require any new fair value measurements. FAS No. 157 will be effective for Sony beginning April 1, 2008. Sony is currently assessing the potential effect of FAS No. 157 on the financial statements.

Fair Value Option for Financial Assets and Financial Liabilities -

In February 2007, the FASB issued FAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". FAS No. 159 permits companies to choose to measure, on an instrument-by-instrument basis, financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Sony is currently evaluating whether to elect the option provided for in this statement. If elected, FAS No. 159 would be effective for Sony as of April 1, 2008.

(4) Reclassifications:

Effective April 1, 2006, Sony reclassified royalty income as a component of sales and operating revenue, rather than as a component of other income as previously recorded. In connection with this reclassification, sales and operating revenue, operating income and other income for the fiscal years ended March 31, 2005 and 2006 have been reclassified to conform with the presentation of these items for the fiscal year ended March 31, 2007. The amounts of royalty income reclassified from other income to sales and operating revenue for the fiscal years ended March 31, 2005 and 2006 were 31,709 million yen and 35,161 million yen, respectively. In addition to the above, certain reclassifications of the financial statements for the fiscal years ended March 31, 2005 and 2006 have been made to conform to the presentation for the fiscal year ended March 31, 2007.

3. Inventories

Inventories are comprised of the following:

	<u>Yen in millions</u>	
	<u>March 31</u>	
	<u>2006</u>	<u>2007</u>
Finished products	534,766	649,848

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

4. *Film costs*

Film costs are comprised of the following:

	Yen in millions	
	March 31	
	2006	2007
Theatrical:		
Released (including acquired film libraries)	153,992	150,396
Completed not released	13,377	16,255
In production and development	156,019	93,584
Television licensing:		
Released (including acquired film libraries)	36,918	48,313
In production and development	66	146
	360,372	308,694

Sony estimates that approximately 89% of unamortized costs of released films (excluding amounts allocated to acquired film libraries) at March 31, 2007 will be amortized within the next three years. Approximately 98 billion yen of released film costs are expected to be amortized during the next twelve months. As of March 31, 2007, unamortized acquired film libraries of approximately 8 billion yen are expected to be amortized on a straight-line basis over an average of the remaining lives of 3 years. Approximately 126 billion yen of accrued participation liabilities included in accounts payable, other and accrued expenses are expected to be paid during the next twelve months.

5. *Related party transactions*

Sony accounts for its investments in affiliated companies over which Sony has significant influence or ownership of 20% or more but less than or equal to 50% under the equity method. In addition, investments in general partnerships in which Sony does not have a controlling interest and limited partnerships are also accounted for under the equity method. Significant investments of this nature include, but are not limited to Sony's interest in Sony Ericsson Mobile Communications, AB ("Sony Ericsson") (50%), SONY BMG MUSIC ENTERTAINMENT ("SONY BMG") (50%), S-LCD Corporation ("S-LCD") (50% minus 1 share), and MGM Holdings Inc. ("MGM") (45%).

Summarized combined financial information that is based on information provided by the equity investees is shown below:

	Yen in millions	
	March 31	
	2006	2007

Number of companies at end of the fiscal year	58	62

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

	Yen in millions		
	Fiscal Year Ended March 31		
	2005	2006	2007
Sales and revenue	1,473,273	2,357,172	3,288,212
Gross profit	477,796	668,226	894,232
Net income	63,404	32,982	148,495

Sony Ericsson, a 50/50 joint venture with Telefonaktiebolaget LM Ericsson focused on mobile phone handsets, was established in October 2001 and is included in affiliated companies accounted for under the equity method. Sony Ericsson is engaged in the development, design, production, marketing and sale of mobile phones and related accessories.

In addition, Sony Ericsson has been able to differentiate its product through its close relationship with Sony. Sony Ericsson purchases several key components such as camera modules, memory, batteries and LCD panels from Sony.

S-LCD, a joint venture with Samsung Electronics Co., LTD focused on manufacturing amorphous TFT panel, was established in April 2004 with Sony's ownership interest of 50% minus 1 share. Sony invested 100,073 million yen and 63,512 million yen in S-LCD during the fiscal years ended March 31, 2005 and 2007, respectively.

As of August 1, 2004, Sony combined its recorded music business, except for the operations of its recorded music business in Japan, with the recorded music business of Bertelsmann AG in a 50/50 joint venture known as SONY BMG, after approval from, among others, the European Commission competition authorities. As a result, the operations of the recorded music business, except for the recorded music business in Japan, are no longer consolidated, but are accounted for under the equity method. On December 3, 2004, Impala, an international association consisting of 2,500 independent recorded music companies applied for annulment of the decision to clear the merger. On July 13, 2006, the European Court of First Instance overruled the Commission's decision to allow the merger to go forward, requiring the Commission to re-examine the merger. The transaction was renotified, in accordance with applicable EU merger control rules, on January 31, 2007, and an in-depth investigation opened on March 1, 2007. While the Commission completes its reexamination, Sony continues to account for the results of Sony BMG under the equity method.

On April 8, 2005, a consortium led by Sony Corporation of America ("SCA") and its equity partners, Providence Equity Partners, Texas Pacific Group, Comcast Corporation and DLJ Merchant Banking Partners, completed the acquisition of MGM. Under the terms of the acquisition agreement, the aforementioned investor group acquired MGM for a total purchase price of approximately 5.0 billion U.S. dollars. As part of this transaction, Sony Pictures Entertainment ("SPE") entered into agreements to co-finance and produce certain new motion pictures with MGM as well as distribute MGM's existing film and television content in most markets through SPE's global distribution channels. In June 2006, MGM and SPE modified this arrangement with respect to the co-financing of motion pictures and also allowed MGM to bring its worldwide television distribution business in-house and to consolidate substantially all of its worldwide home entertainment distribution activities with another major studio. MGM continues to operate under the Metro-Goldwyn-Mayer name as a private company, headquartered in Los Angeles, California, and is focused on new film production and distribution activities. As part of the acquisition, SCA invested 257 million U.S. dollars for 20% of the total equity capital, which includes both common stock and a significant amount of non-voting preferred stock with detachable common stock warrants. Although Sony owns 20% of MGM's total equity, on a fully diluted basis as a result of the warrants dilution, Sony owns 45% of the total outstanding common stock and therefore, records 45% of MGM's net income (loss) as equity in net income of affiliated companies. As a result of the cumulative losses recorded by MGM through March 31, 2007, the carrying value of Sony's investment in MGM was written down to zero as of March 31, 2007. As Sony has not guaranteed the obligations of MGM nor is it otherwise committed to provide further financial support to MGM, Sony will no longer record its share of MGM's future equity losses.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

In September 2005, Sony sold 230,000 shares of Monex Beans Holdings, Inc. As a result of this sale, Sony's ownership interest has been reduced from 20.1% to 10.3%. Therefore, Monex Beans Holdings, Inc. is no longer accounted for under the equity method. The financial position and operating results of Monex Beans Holdings, Inc. as of and for the fiscal years ended March 31, 2006 and 2007 are not included in the above summarized combined financial information. See Note 19 for more information on this transaction.

Sony's proportionate share in the underlying net assets of the investees exceeded the carrying value of investments in affiliated companies by 36,875 million yen and 40,534 million yen at March 31, 2006 and 2007, respectively. These differences primarily relate to the differences in the carrying value of the net assets contributed by Sony and Bertelsmann AG upon the formation of SONY BMG in August 2004. The contribution of assets to SONY BMG was accounted for at book value. Acquisitions by Bertelsmann AG's recorded music business shortly prior to the formation of SONY BMG resulted in goodwill comprising a significant portion of the assets contributed to SONY BMG by Bertelsmann AG, whereas Sony's contributed assets had a lower historical basis. As a result, Sony's carrying value of the investment in SONY BMG is below its 50% share of the underlying assets of SONY BMG. Since the contributions for both Sony and Bertelsmann AG were recorded at historical book value by SONY BMG, there is a basis difference attributable to non-depreciable assets which are not being amortized. Differences in the carrying value of Sony's other equity investments and the proportionate share of the fair value of underlying net assets primarily relate to unamortizable goodwill.

Affiliated companies accounted for under the equity method with an aggregate carrying amount of 4,588 million yen and 5,587 million yen at March 31, 2006 and 2007, were quoted on established markets at an aggregate value of 34,462 million yen and 36,701 million yen, respectively.

Account balances and transactions with affiliated companies accounted for under the equity method are presented below:

	Yen in millions	
	March 31	
	2006	2007
Accounts receivable, trade	44,837	45,617
Advances	15,985	20,740
Accounts payable, trade	40,507	51,894

	Yen in millions		
	Fiscal Year Ended March 31		
	2005	2006	2007
Sales	256,799	234,636	299,487
Purchases	101,976	282,071	463,578

As of April 1, 2004, Sony Corporation made Sony Computer Entertainment Inc. ("SCE") a wholly-owned subsidiary through a stock for stock exchange pursuant to the provision of Article 358 of the Japanese Commercial Code which did not require the approval of the General Meeting of Shareholders. The stock for stock exchange ratio was determined based on the estimated equity values of SCE and Sony on a consolidated basis. Through the stock for stock exchange, Sony Corporation provided 1,000,000 shares of its common stock to the then Executive Deputy President, Corporate Executive Officer of Sony Corporation who had owned 100 shares of SCE's common stock. This transaction did not have a material impact on Sony's results of operations and financial position for the fiscal year ended March 31, 2005.

Dividends from affiliated companies accounted for under the equity method for the fiscal years ended March 31, 2005, 2006 and 2007 were 13,391 million yen, 22,970 million yen and 10,475 million yen, respectively.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

6. *Accounts receivable securitization programs*

In Japan, Sony set up several accounts receivable sales programs whereby Sony can sell up to 47,500 million yen of eligible trade accounts receivable. Through these programs, Sony can sell receivables to special purpose entities owned and operated by banks. Sony can sell receivables in which the agreed upon original due dates are no more than 190 days after the sales of receivables. These transactions are accounted for as sales in accordance with FAS No. 140, because Sony has relinquished control of the receivables. The initial sale of these receivables was completed in March 2005 in which Sony sold a total of 10,041 million yen. Total receivables sold for the fiscal years ended March 2006 and 2007 were 146,193 million yen and 152,519 million yen, respectively. Losses from these transactions were insignificant. Although Sony continues servicing the receivables subsequent to being sold, no servicing liabilities are recorded as the costs of collection of the sold receivables are insignificant.

7. *Marketable securities and securities investments and other*

Marketable securities and securities investments and other include debt and equity securities of which the aggregate cost, gross unrealized gains and losses and fair value pertaining to available-for-sale securities and held-to-maturity securities are as follows:

	Yen in millions							
	March 31, 2006				March 31, 2007			
	Cost	Gross unrealized gains	Gross unrealized losses	Fair value	Cost	Gross unrealized gains	Gross unrealized losses	Fair value
Available-for-sale:								
Debt securities	2,522,864	17,021	(22,810)	2,517,075	2,517,849	23,716	(8,903)	2,532,662
Equity securities	227,079	171,921	(1,589)	397,411	281,012	128,888	(7,332)	402,568
Held-to-maturity								
Securities	33,193	132	(221)	33,104	36,035	165	(127)	36,073
Total	2,783,136	189,074	(24,620)	2,947,590	2,834,896	152,769	(16,362)	2,971,303

At March 31, 2007, debt securities classified as available-for-sale securities and held-to-maturity securities mainly consist of Japanese government and municipal bonds and corporate debt securities with maturities of one to ten years.

Proceeds from sales of available-for-sale securities were 613,035 million yen, 524,268 million yen and 374,612 million yen for the fiscal years ended March 31, 2005, 2006 and 2007, respectively. On those sales, gross realized gains computed on the average cost basis were 24,080 million yen, 68,096 million yen and 38,448 million yen and gross realized losses were 5,940 million yen, 3,143 million yen and 4,031 million yen, respectively.

Marketable securities classified as trading securities at March 31, 2006 and 2007 were 401,561 million yen and 376,541 million yen, respectively, which consist of debt and equity securities.

In the ordinary course of business, Sony maintains long-term investment securities, included in securities investments and other, issued by a number of non-public companies. The aggregate carrying amounts of the investments in non-public companies at March 31, 2006 and 2007, totaled 59,575 million yen and 64,894 million yen, respectively. Non-public equity investments are valued at cost as fair value is not readily determinable. If the value is estimated to have declined and such decline is judged to be other than temporary, the impairment of the investment is recognized and the carrying value is reduced to its fair value.

For the fiscal years ended March 31, 2005, 2006 and 2007, Sony booked 5,696 million yen, 45,092 million yen and 11,550 million yen of net unrealized gains on trading securities primarily in the life insurance business.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The following table presents the gross unrealized losses on, and fair value of, Sony's investment securities with unrealized losses, aggregated by investment category and the length of time that individual investment securities have been in a continuous unrealized loss position, at March 31, 2007.

	Yen in millions					
	Less than 12 months		12 months or More		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
Available-for-sale:						
Debt securities	67,840	(124)	404,486	(8,779)	472,326	(8,903)
Equity securities	59,790	(7,104)	962	(228)	60,752	(7,332)
Held-to-maturity						
Securities	<u>2,110</u>	<u>(6)</u>	<u>14,906</u>	<u>(121)</u>	<u>17,016</u>	<u>(127)</u>
Total	<u>129,740</u>	<u>(7,234)</u>	<u>420,354</u>	<u>(9,128)</u>	<u>550,094</u>	<u>(16,362)</u>

In evaluating the factors for available-for-sale securities whose fair values are readily determinable, Sony presumes a decline in value to be other-than-temporary if the fair value of the security is 20 percent or more below its original cost for an extended period of time (generally for a period of up to six months). This criterion is employed as a threshold to identify securities which may have a decline in value that is other-than-temporary. The presumption of an other-than-temporary impairment in such cases may be overcome if there is evidence to support that the decline is temporary in nature due to the existence of other factors which overcome the duration or magnitude of the decline. On the other hand, there may be cases where impairment losses are recognized when the decline in the fair value of the security is not more than 20 percent or such decline has not existed for an extended period of time, as a result of considering specific factors which may indicate the decline in the fair value is other-than-temporary. For the fiscal years ended March 31, 2005, 2006 and 2007, total impairment losses were 4,198 million yen, 4,029 million yen and 7,413 million yen, respectively.

At March 31, 2007, Sony determined that the decline in value for securities with unrealized losses shown in the above table is not other-than-temporary in nature.

8. *Leased assets*

Sony leases certain communication and commercial equipment, plant, office space, warehouses, employees' residential facilities and other assets. Certain of these leases have renewal and purchase options.

An analysis of leased assets under capital leases is as follows:

<u>Class of property</u>	Yen in millions	
	March 31	
	2006	2007
Land	193	80
Buildings	7,437	1,859
Machinery, equipment, film costs, and others	28,870	50,506
Accumulated depreciation	<u>(14,820)</u>	<u>(13,675)</u>
	<u>21,680</u>	<u>38,770</u>

Sony has also entered into capital lease arrangements with third parties to finance certain of its theatrical productions. Film costs under capital leases at March 31, 2006 and 2007, included in the table above, were 6,589 million yen and 23,490 million yen, respectively.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The following is a schedule by year of the future minimum lease payments under capital leases together with the present value of the net minimum lease payments as of March 31, 2007:

	<u>Yen in millions</u>
Fiscal Year Ending March 31:	
2008	14,113
2009	9,911
2010	6,756
2011	4,838
2012	3,405
Later years	<u>21,491</u>
Total minimum lease payments	60,514
Less — Amount representing interest	<u>11,111</u>
Present value of net minimum lease payments	49,403
Less — Current obligations	<u>12,559</u>
Long-term capital lease obligations	<u><u>36,844</u></u>

Total minimum lease payments have not been reduced by minimum sublease income of 9,584 million yen due in the future under noncancelable subleases.

Minimum rental expenses under operating leases for the fiscal years ended March 31, 2005, 2006 and 2007 were 81,391 million yen, 80,014 million yen and 85,598 million yen, respectively. Sublease rentals received under operating leases for the fiscal years ended March 31, 2005, 2006 and 2007 were 1,933 million yen, 1,350 million yen and 2,689 million yen, respectively. The total minimum rentals to be received in the future under noncancelable subleases as of March 31, 2007 were 8,936 million yen. The minimum rental payments required under operating leases that have initial or remaining noncancelable lease terms in excess of one year at March 31, 2007 are as follows:

	<u>Yen in millions</u>
Fiscal Year Ending March 31:	
2008	46,154
2009	36,869
2010	27,942
2011	17,322
2012	13,807
Later years	<u>60,629</u>
Total minimum future rentals	<u><u>202,723</u></u>

9. *Goodwill and intangible assets*

Intangible assets acquired during the fiscal year ended March 31, 2007 totaled 54,155 million yen, which are subject to amortization and primarily consist of acquired patent rights of 24,806 million yen and software to be sold, leased or otherwise marketed of 16,694 million yen. The weighted average amortization period for acquired patent rights and software to be sold, leased or otherwise marketed is 7 years and 3 years, respectively.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Intangible assets subject to amortization are comprised of the following:

	<u>Yen in millions</u>			
	<u>March 31</u>			
	<u>2006</u>		<u>2007</u>	
	<u>Gross carrying amount</u>	<u>Accumulated amortization</u>	<u>Gross carrying amount</u>	<u>Accumulated amortization</u>
Artist contracts	15,218	(12,218)	15,218	(13,019)
Music catalog	71,921	(24,012)	79,930	(27,669)
Acquired patent rights	67,467	(30,200)	84,482	(37,173)
Software to be sold, leased or otherwise marketed	40,007	(24,194)	42,028	(21,435)
Other	<u>36,833</u>	<u>(15,133)</u>	<u>57,022</u>	<u>(26,287)</u>
Total	<u>231,446</u>	<u>(105,757)</u>	<u>278,680</u>	<u>(125,583)</u>

The aggregate amortization expense for intangible assets for the fiscal years ended March 31, 2005, 2006 and 2007 was 24,993 million yen, 28,390 million yen and 33,168 million yen, respectively. The estimated aggregate amortization expense for intangible assets for the next five years is as follows:

	<u>Yen in millions</u>
Fiscal Year Ending March 31,	
2008	37,334
2009	31,265
2010	23,234
2011	19,534
2012	7,515

Total carrying amount of intangible assets having an indefinite life are comprised of the following:

	<u>Yen in millions</u>	
	<u>March 31</u>	
	<u>2006</u>	<u>2007</u>
Trademarks	58,195	58,212
Distribution agreement	18,848	18,834
Other	<u>4,145</u>	<u>3,112</u>
	<u>81,188</u>	<u>80,158</u>

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The changes in the carrying amount of goodwill by operating segment for the fiscal years ended March 31, 2006 and 2007 are as follows:

	Yen in millions					Total
	Electronics	Game	Pictures	Financial Services	All Other	
Balance at March 31, 2005	70,815	114,740	77,934	441	19,993	283,923
Goodwill acquired during year	3,337	1,317	947	536	382	6,519
Reallocated from music business to Electronics segment	634	—	—	—	(634)	—
Impairment losses	—	—	—	—	(534)	(534)
Other *	<u>1,577</u>	<u>207</u>	<u>7,031</u>	<u>—</u>	<u>301</u>	<u>9,116</u>
Balance at March 31, 2006	76,363	116,264	85,912	977	19,508	299,024
Goodwill acquired during year	371	301	8,595	698	1,068	11,033
Impairment losses	(5,620)	—	—	—	(237)	(5,857)
Other *	<u>155</u>	<u>80</u>	<u>(321)</u>	<u>—</u>	<u>555</u>	<u>469</u>
Balance at March 31, 2007	<u>71,269</u>	<u>116,645</u>	<u>94,186</u>	<u>1,675</u>	<u>20,894</u>	<u>304,669</u>

* Other consists of translation adjustments and reclassification to/from other accounts.

Consistent with the presentation of business segment information in Note 24, the music business is included within All Other. Effective April 1, 2005, the Japan based disc manufacturing businesses formerly included within the music business, were reclassified to the Electronics segment, and accordingly, Sony reclassified 634 million yen of goodwill from All Other to the Electronics segment.

As described in Note 2, Sony performs an annual impairment test for goodwill. During the fiscal year ended March 31, 2006, Sony recorded an impairment loss of 534 million yen in a reporting unit included in All Other. During the fiscal year ended March 31, 2007, Sony recorded impairment losses of 5,620 million yen in reporting units in the Electronics segment, of which 5,320 million yen was related to the CRT TV business which was downsized in the U.S., and an impairment loss of 237 million yen in a reporting unit included in All Other. These impairment charges reflected the overall decline in the fair value of the subsidiaries. The fair values of the subsidiaries were estimated principally using the expected present value of future cash flows.

10. Insurance-related accounts

Sony's life and non-life insurance subsidiaries in Japan maintain their accounting records as described in Note 2 in accordance with the accounting principles and practices generally accepted in Japan, which vary in some respects from U.S. GAAP.

Those differences are mainly that insurance acquisition costs for life and non-life insurance are charged to income when incurred in Japan whereas in the United States of America those costs are deferred and amortized generally over the premium-paying period of the related insurance policies, and that future policy benefits for life insurance calculated locally under the authorization of the supervisory administrative agencies are comprehensively adjusted to a net level premium method with certain adjustments of actuarial assumptions for U.S. GAAP purposes. For purposes of preparing the consolidated financial statements, appropriate adjustments have been made to reflect the accounting for these items in accordance with U.S. GAAP.

(1) Insurance policies:

Life insurance policies that the life insurance subsidiary underwrites, most of which are categorized as long-duration contracts, mainly consist of whole life, term life and accident and health insurance contracts. The life insurance revenues for the fiscal years ended March 31, 2005, 2006 and 2007 were 426,774 million yen,

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

453,496 million yen and 481,764 million yen, respectively. Property and casualty insurance policies that the non-life insurance subsidiary underwrites are primarily automotive insurance contracts, which are categorized as short-duration contracts. The non-life insurance revenues for the fiscal years ended March 31, 2005, 2006 and 2007 were 35,454 million yen, 42,743 million yen and 48,937 million yen, respectively.

(2) Deferred insurance acquisition costs:

Insurance acquisition costs, including such items as commission, medical examination and inspection report fees, that vary with and are primarily related to acquiring new insurance policies are deferred as long as they are recoverable. The deferred insurance acquisition costs for traditional life insurance contracts are amortized over the premium-paying period of the related insurance policies using assumptions consistent with those used in computing policy reserves. The deferred insurance acquisition costs for non-traditional life insurance contracts are amortized over the expected life in proportion to the estimated gross profits. Amortization charged to income for the fiscal years ended March 31, 2005, 2006 and 2007 amounted to 47,120 million yen, 42,933 million yen and 51,027 million yen, respectively.

(3) Future insurance policy benefits:

Liabilities for future policy benefits are established in amounts adequate to meet the estimated future obligations of policies in force. These liabilities are computed by the net level premium method based upon estimates as to future investment yield, mortality, morbidity and withdrawals. Future policy benefits are computed using interest rates ranging from 0.90% to 5.00%. Mortality, morbidity and withdrawal assumptions for all policies are based on either the subsidiary's own experience or various actuarial tables. At March 31, 2006 and 2007, future insurance policy benefits amounted to 1,901,716 million yen and 2,085,715 million yen, respectively.

11. Short-term borrowings and long-term debt

Short-term borrowings are comprised of the following:

	Yen in millions	
	March 31	
	2006	2007
Unsecured loans:		
with a weighted-average interest rate of 3.63%	32,066	
with a weighted-average interest rate of 4.14%		42,291
Secured call money:		
with a weighted-average interest rate of 0.01%	40,000	
with a weighted-average interest rate of 0.21%		10,000
Secured bills sold:		
with a weighted-average interest rate of 0.01%	70,700	—
	142,766	52,291

At March 31, 2007, securities investments with a book value of 10,000 million yen were pledged as collateral for call money by Sony's Japanese bank subsidiary.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Long-term debt is comprised of the following:

	Yen in millions	
	March 31	
	2006	2007
Unsecured loans, representing obligations principally to banks:		
Due 2006 to 2015, with interest rates ranging from 0.13% to 5.89% per annum	128,148	
Due 2007 to 2018, with interest rates ranging from 0.51% to 5.89% per annum		374,091
Medium-term notes of consolidated subsidiaries:		
Due 2006 with an interest rate of 4.95% per annum	58,698	—
Unsecured zero coupon convertible bonds, due 2008, convertible currently at 5,605 yen for one common share, redeemable before due date	250,000	250,000
Unsecured 1.55% bonds, due 2006 with detachable warrants	12,000	—
Unsecured 0.9% bonds, due 2007 with detachable warrants	7,300	7,300
Unsecured 0.9% bonds, due 2007 with detachable warrants	150	150
Unsecured 0.64% bonds, due 2006, net of unamortized discount	99,999	—
Unsecured 1.01% bonds, due 2010, net of unamortized discount	39,996	39,997
Unsecured 2.04% bonds, due 2010, net of unamortized discount	49,987	49,990
Unsecured 0.80% bonds, due 2010, net of unamortized discount	49,991	49,993
Unsecured 1.52% bonds, due 2011, net of unamortized discount	49,997	49,998
Unsecured 1.16% bonds, due 2012, net of unamortized discount	39,981	39,985
Unsecured 1.52% bonds, due 2013, net of unamortized discount	34,997	34,997
Unsecured 1.57% bonds, due 2015, net of unamortized discount	29,980	29,982
Unsecured 1.75% bonds, due 2015, net of unamortized discount	24,993	24,993
Unsecured 1.99% bonds, due 2007	15,000	15,000
Unsecured 2.35% bonds, due 2010	4,900	4,900
Capital lease obligations:		
Due 2006 to 2019, with interest rates ranging from 1.45% to 16.00% per annum	38,280	
Due 2007 to 2020, with interest rates ranging from 1.50% to 17.57% per annum		49,403
Guarantee deposits received	24,056	23,396
	958,453	1,044,175
Less — Portion due within one year	193,555	43,170
	764,898	1,001,005

There are no significant adverse debt covenants or cross-default provisions related to the above borrowings.

A summary of the exercise rights of the detachable warrants as of March 31, 2007 is as follows:

Issued on	Exercisable during	Exercise price Yen	Number of shares per warrant	Status of exercise
December 21, 2001	January 6, 2003 through December 20, 2007	6,039	100 shares of common stock of Sony Corporation	11,459 warrants outstanding

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Aggregate amounts of annual maturities of long-term debt during the next five years are as follows:

<u>Fiscal Year Ending March 31</u>	<u>Yen in millions</u>
2008	43,170
2009	296,659
2010	165,419
2011	209,841
2012	69,008

At March 31, 2007, Sony had unused committed lines of credit amounting to 700,426 million yen and can generally borrow up to 90 days from the banks with whom Sony has committed line contracts. Furthermore, Sony has Commercial Paper Programs, the size of which was 1,326,630 million yen. There was no commercial paper outstanding at March 31, 2007. Under those programs, Sony can issue commercial paper for a period generally not in excess of 270 days up to the size of the programs. In addition, Sony has Medium Term Notes programs, the size of which was 590,450 million yen. There were no Medium Term Notes outstanding at March 31, 2007.

12. Deposits from customers in the banking business

All deposits from customers in the banking business are interest bearing deposits, and are owned by Sony's Japanese bank subsidiary which was established as an Online Internet bank for individuals. At March 31, 2006 and 2007, the balance of time deposits issued in amounts of 10 million yen or more were 75,459 million yen and 116,220 million yen, respectively.

At March 31, 2007, aggregate amounts of annual maturities of time deposits with a remaining term of more than one year are as follows:

<u>Fiscal Year Ending March 31</u>	<u>Yen in millions</u>
2009	25,296
2010	15,143
2011	4,415
2012	6,570
2013	697

13. Financial instruments

(1) Derivative instruments and hedging activities:

Sony has certain financial instruments including financial assets and liabilities acquired in the normal course of business. Such financial instruments are exposed to market risk arising from the changes of foreign currency exchange rates and interest rates. In applying a consistent risk management strategy for the purpose of reducing such risk, Sony uses derivative financial instruments, which include foreign exchange forward contracts, foreign currency option contracts, and interest rate and currency swap agreements. Foreign exchange forward contracts and foreign currency option contracts are utilized primarily to limit the exposure affected by changes in foreign currency exchange rates on cash flows generated by anticipated intercompany transactions and intercompany accounts receivable and payable denominated in foreign currencies. Interest rate and currency swap agreements are utilized primarily to lower funding costs, to diversify sources of funding and to limit Sony's exposure associated with underlying debt instruments and available-for-sale debt securities resulting from adverse fluctuations in interest rates, foreign currency exchange rates and changes in the fair value. These instruments are executed with creditworthy financial institutions, and virtually all foreign currency contracts are denominated in U.S. dollars, euros and other currencies of major countries. Although Sony may be exposed to losses in the event of nonperformance by counterparties or unfavorable interest and currency rate movements, it does not anticipate significant losses due to the nature of Sony's counterparties or hedging arrangements. These derivatives generally mature or expire within 6 months after the balance sheet date. Sony does not use these derivative financial

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

instruments for trading or speculative purposes, except for certain derivatives utilized for portfolio investments such as interest rate swap agreements and bond future contracts in the Financial Services segment. These derivative transactions utilized for portfolio investments in the Financial Services segment are executed within a certain limit in accordance with an internal risk management policy.

Derivative financial instruments held by Sony are classified and accounted for as described below pursuant to FAS No. 133.

Fair value hedges

The derivatives designated as fair value hedges include interest rate and currency swap agreements.

Both the derivatives designated as fair value hedges and the hedged items are reflected at fair value in the consolidated balance sheet. Changes in the fair value of the derivatives designated as fair value hedges as well as offsetting changes in the carrying value of the underlying hedged items are recognized in income.

For the fiscal year ended March 31, 2005, the amount of ineffectiveness of these fair value hedges, that was reflected in earnings, was not material. For the fiscal years ended March 31, 2006 and 2007, these fair value hedges were fully effective. In addition, there were no amounts excluded from the assessment of hedge effectiveness of fair value hedges.

Cash flow hedges

The derivatives designated as cash flow hedges include foreign exchange forward contracts, foreign currency option contracts and interest rate and currency swap agreements.

Changes in the fair value of derivatives designated as cash flow hedges are initially recorded in other comprehensive income and reclassified into earnings when the hedged transaction affects earnings. For the fiscal year ended March 31, 2005, the amount of ineffectiveness of these cash flow hedges that was reflected in earnings was not material. For the fiscal years ended March 31, 2006 and 2007, these cash flow hedges were fully effective. In addition, there were no amounts excluded from the assessment of hedge effectiveness of cash flow hedges. At March 31, 2007, amounts related to derivatives qualifying as cash flow hedges amounted to a net reduction of equity of 1,075 million yen. Within the next twelve months, 311 million yen is expected to be reclassified from equity into earnings as a loss.

Derivatives not designated as hedges

The derivatives not designated as hedges under FAS No. 133 include foreign exchange forward contracts, foreign currency option contracts, interest rate and currency swap agreements, interest rate and bond future contracts, stock price index option contracts and other derivatives. Changes in the fair value of derivatives not designated as hedges are recognized in income.

A description of the purpose and classification of the derivative financial instruments held by Sony is as follows:

Foreign exchange forward contracts and foreign currency option contracts

Sony enters into foreign exchange forward contracts and purchased and written foreign currency option contracts primarily to fix the cash flows from intercompany accounts receivable and payable and forecasted transactions denominated in the functional currencies (Japanese yen, U.S. dollars and euros) of Sony's major operating units. The majority of written foreign currency option contracts are a part of range forward contract arrangements and expire in the same month with the corresponding purchased foreign currency option contracts. In January, 2007, certain derivatives that had been previously designated as cash flow hedges in accordance with FAS No. 133, were no longer designated as cash flow hedges and, accordingly, changes in the fair value of those derivatives were recognized into income after January, 2007. At March 31, 2007, the notional amount and the

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

estimated fair value of those derivatives remaining to be designated as cash flow hedges were 50,936 million yen and 169 million yen, respectively.

Sony also enters into foreign exchange forward contracts, which effectively fix the cash flows from foreign currency denominated debt. Accordingly, these derivatives have been designated as cash flow hedges in accordance with FAS No. 133.

Foreign exchange forward contracts and foreign currency option contracts that do not qualify as hedges are marked-to-market with changes in value recognized in other income and expenses.

Foreign exchange forward contracts and foreign currency option contracts held by certain subsidiaries in the Financial Services segment are marked-to-market with changes in value recognized in financial service revenue.

Interest rate and currency swap agreements

Sony enters into interest rate and currency swap agreements, which are used for reducing the risk arising from the changes in the fair value of fixed rate debt and available-for-sale debt securities. Sony enters into interest rate and currency swap agreements, which effectively swap foreign currency denominated fixed rate debt for functional currency denominated variable rate debt. These derivatives are considered to be a hedge against changes in the fair value of Sony's foreign denominated fixed-rate obligations. Accordingly, these derivatives have been designated as fair value hedges in accordance with FAS No. 133.

Sony also enters into interest rate and currency swap agreements that are used for reducing the risk arising from the changes in anticipated cash flows of variable rate debt and foreign currency denominated debt. Sony enters into interest rate and currency swap agreements, which effectively swap foreign currency denominated variable rate debt for functional currency denominated fixed rate debt. These derivatives are considered to be a hedge against changes in the anticipated cash flows of Sony's foreign denominated variable rate obligations. Accordingly, these derivatives have been designated as cash flow hedges in accordance with FAS No. 133.

Certain subsidiaries in the Financial Services segment have interest rate swap agreements as part of their portfolio investments, which are marked-to-market with changes in value recognized in financial service revenue. Interest rate and currency swap agreements held by certain subsidiaries in the Financial Services segment are also marked-to-market with changes in value recognized in financial service revenue.

Any other interest rate and currency swap agreements that do not qualify as hedges, which are used for reducing the risk arising from changes of variable rate debt, are marked-to-market with changes in value recognized in other income and expenses.

Interest rate and bond future contracts

Certain subsidiaries in the Financial Services segment have interest rate and bond future contracts as part of their portfolio investments, which are marked-to-market with changes in value recognized in financial service revenue.

Bond option contracts and Stock price index option contracts

Certain subsidiaries in the Financial Services segment have bond option and stock price index option contracts as part of their portfolio investments, which are marked-to-market with changes in value recognized in financial service revenue.

Embedded derivatives

Until March 31, 2006, changes in the fair value of embedded derivatives held by certain subsidiaries in the Financial Services segment as part of their portfolio investments, which must be bifurcated from the host contracts and accounted for as derivative instruments under FAS No. 133 were recognized in income. Sony early adopted FAS No. 155 on April 1, 2006 and measures embedded derivatives at fair value as hybrid financial instruments

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

without bifurcating them. These embedded derivatives are marked-to-market with changes in value recognized in financial service revenue. See Note 2, for further details of the adoption of FAS No. 155.

(2) Fair value of financial instruments:

The estimated fair values of Sony's financial instruments are summarized as follows. The following summary excludes cash and cash equivalents, time deposits, notes and accounts receivable, trade, short-term borrowings, notes and accounts payable, trade and deposits from customers in the banking business that are carried at amounts which approximate fair value. The summary also excludes debt and equity securities which are disclosed in Note 7.

	Yen in millions					
	March 31					
	2006			2007		
Notional amount	Carrying amount	Estimated fair value	Notional amount	Carrying amount	Estimated fair value	
Long-term debt including the current portion	—	(958,453)	(981,006)	—	(1,044,175)	(1,075,359)
Foreign exchange forward contracts	1,489,213	1,184	1,184	1,768,609	(291)	(291)
Currency option contracts purchased	457,380	2,540	2,540	287,833	2,404	2,404
Currency option contracts written	163,746	(2,576)	(2,576)	67,180	(462)	(462)
Interest rate swap agreements	172,430	(165)	(165)	272,608	(1,512)	(1,512)
Interest rate and currency swap agreements	14,518	(488)	(488)	8,718	(816)	(816)
Interest rate future contracts	—	—	—	115,291	9	9
Bond future contracts	13,934	111	111	6,993	1	1
Bond option contracts written	—	—	—	49,964	130	130
Stock price index option purchased	26,650	40	40	—	—	—
Embedded derivatives	411,252	70,712	70,712	—	—	—

The following are explanatory notes regarding the estimation method of fair values in the above table.

Long-term debt including the current portion

The fair values of long-term debt, including the current portion, were estimated based on either the market value or the discounted amounts of future cash flows using Sony's current incremental debt rates for similar liabilities.

Derivative financial instruments

The fair values of foreign exchange forward contracts, foreign currency option contracts, interest rate future contracts, bond future contracts, and stock price index option contracts were estimated based on market quotations. The fair values of interest rate and currency swap agreements were estimated based on the discounted amounts of future net cash flows. The fair values of bond option contracts were based on the price obtained from brokers. As a result of the adoption of FAS No. 155, the fair values of the embedded derivatives were evaluated as hybrid financial instruments without bifurcating them and the information of these transactions are disclosed in Note 7 as debt securities.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

14. *Pension and severance plans*

Upon terminating employment, employees of Sony Corporation and its subsidiaries in Japan are entitled, under most circumstances, to lump-sum indemnities or pension payments as described below. In July, 2004, Sony Corporation and certain of its subsidiaries amended their pension plans and introduced a point-based plan under which a point is added every year reflecting the individual employee's performance over that year. Under the point-based plan, the amount of payment is determined based on sum of cumulative points from past services and interest points earned on the cumulative points regardless of whether or not the employee is voluntarily retiring.

Under the plans, in general, the defined benefits cover 65% of the indemnities under existing regulations to employees. The remaining indemnities are covered by severance payments by the companies. The pension benefits are payable at the option of the retiring employee either in a lump-sum amount or monthly pension payments. Contributions to the plans are funded through several financial institutions in accordance with the applicable laws and regulations.

Sony Corporation and most of its subsidiaries in Japan had contributory funded defined benefit pension plans pursuant to the Japanese Welfare Pension Insurance Law, which consisted of a substitutional portion of the governmental welfare pension program and an additional portion which was established at the discretion of each employer. In June, 2001, the Japanese Government issued the Defined Benefit Corporate Pension Plan Act, which permitted each employer and employees' pension fund plan to separate the substitutional portion from its employees' pension fund and transfer the obligation and related assets to the government. In July, 2004, in accordance with the law, the Japanese Government approved applications submitted by Sony Corporation and most of its subsidiaries in Japan for an exemption from the obligation to pay benefits for future employee services related to the substitutional portion of the governmental welfare pension program. In January 2005, the government also approved applications for an exemption from the obligation to pay benefits for past employee services related to the substitutional portion. On September 20, 2005, the benefit obligation for past employee services related to the substitutional portion and the related government-specified portion of the plan assets were transferred to the government. As a result of the transfer to the government of the substitutional portion, as of March 31, 2006, Sony Corporation and most of its subsidiaries in Japan maintain funded defined benefit plans, which were established by succeeding the additional portion established at the discretion of each employer, pursuant to the Defined Benefit Corporate Pension Plan Act.

EITF Issue No. 03-2, "Accounting for the Transfer to the Japanese Government of the Substitutional Portion of Employee Pension Fund Liabilities", requires employers to account for the entire separation process of a substitutional portion from an entire plan upon completion of the transfer of the substitutional portion of the benefit obligation and related plan assets to the government as the culmination of a series of steps in a single settlement transaction. For the fiscal year ended March 31, 2006, in accordance with EITF Issue No. 03-2, Sony recognized a government subsidy of 133,322 million yen which is the net of the amount of the accumulated benefit obligation settled and the plan assets transferred to the government. Sony also recognized a settlement loss of 59,850 million yen, the amount of which is the net of 100,253 million yen of unrecognized losses related to the substitutional portion and 40,403 million yen for the derecognition of previously accrued salary progression. The net gain of 73,472 million yen is included in selling, general and administrative expenses.

Several of Sony's foreign subsidiaries have defined benefit pension plans or severance indemnity plans, which substantially cover all of their employees. Under such plans, the related cost of benefits is currently funded or accrued. Benefits awarded under these plans are based primarily on the current rate of pay and length of service.

Sony uses a measurement date of March 31 for substantially all of its pension and severance plans.

In September 2006, the FASB issued FAS No. 158 which requires an employer to fully recognize the over-funded or under-funded status of its pension and other postretirement benefit plans as an asset or liability in its financial statements. In addition, the company is required to recognize as a component of other comprehensive income, net of tax, the actuarial gains or losses and prior service costs or credits that arise during the period but are not immediately recognized as components of net periodic benefit cost. FAS No. 158 should be implemented on a

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

prospective basis rather than retrospective basis. As of March 31, 2007, Sony adopted FAS No. 158 and as a result, recognized the funded status of each applicable plan on the balance sheet. The initial impact of adopting FAS No. 158 was a 9,508 million yen reduction in accumulated other comprehensive income, net of tax. Previously established additional minimum liabilities and related intangible assets were derecognized upon the adoption of FAS No. 158.

The effect of adopting FAS No. 158 on the individual line items on the balance sheet as of March 31, 2007 was as follows:

	<u>Before Adoption of FAS No. 158</u>	<u>Adjustments</u>	<u>After Adoption of FAS No. 158</u>
Intangibles	114	(114)	0
Other assets	2,198	(1,711)	487
Deferred income tax assets	22,214	5,412	27,626
Other current liabilities	6,067	489	6,556
Accrued pension and severance costs	157,047	8,269	165,316
Other long term liabilities	14,138	2,850	16,988
Deferred income tax liabilities	41	1,487	1,528
Accumulated other comprehensive Income (loss)	(61,951)	(9,508)	(71,459)

The components of net periodic benefit costs for the fiscal years ended March 31, 2005, 2006 and 2007 were as follows:

Japanese plans:

	<u>Yen in millions</u>		
	<u>Fiscal Year Ended March 31</u>		
	<u>2005</u>	<u>2006</u>	<u>2007</u>
Service cost	31,971	26,561	27,175
Interest cost	21,364	16,504	13,494
Expected return on plan assets	(16,120)	(17,290)	(17,299)
Amortization of net transition asset	(375)	(104)	—
Recognized actuarial loss	20,236	14,393	10,072
Amortization of prior service costs	(7,216)	(10,229)	(10,321)
Gains on curtailments and settlements	(876)	—	—
Settlement loss resulting from the transfer of the substitutional portion	—	59,850	—
Net periodic benefit costs	<u>48,984</u>	<u>89,685</u>	<u>23,121</u>

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Foreign plans:

	Yen in millions		
	Fiscal Year Ended March 31		
	2005	2006	2007
Service cost	6,419	6,852	7,664
Interest cost	8,091	8,318	10,179
Expected return on plan assets	(6,712)	(7,112)	(9,123)
Amortization of net transition asset	(18)	21	27
Recognized actuarial loss	1,637	1,674	2,536
Amortization of prior service costs	(114)	(240)	(295)
Losses on curtailments and settlements	<u>1,713</u>	<u>915</u>	<u>120</u>
Net periodic benefit costs	<u><u>11,016</u></u>	<u><u>10,428</u></u>	<u><u>11,108</u></u>

The estimated net actuarial loss, prior service cost and obligation (asset) existing at transition for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit costs over the next fiscal year are 12,958 million yen, 10,373 million yen and 20 million yen, respectively.

The changes in the benefit obligation and plan assets as well as the funded status and composition of amounts recognized in the consolidated balance sheets were as follows:

	Japanese plans		Foreign plans	
	Yen in millions		Yen in millions	
	March 31		March 31	
	2006	2007	2006	2007

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The accumulated benefit obligation for all defined benefit pension plans follows:

	<u>Japanese plans</u>		<u>Foreign plans</u>	
	<u>Yen in millions</u>		<u>Yen in millions</u>	
	<u>March 31</u>		<u>March 31</u>	
	<u>2006</u>	<u>2007</u>	<u>2006</u>	<u>2007</u>
Accumulated benefit obligation	613,055	635,603	143,031	181,356

The projected benefit obligations, the accumulated benefit obligations and fair value of plan assets for pension plans with accumulated benefit obligations in excess of plan assets were as follows:

	<u>Japanese plans</u>		<u>Foreign plans</u>	
	<u>Yen in millions</u>		<u>Yen in millions</u>	
	<u>March 31</u>		<u>March 31</u>	
	<u>2006</u>	<u>2007</u>	<u>2006</u>	<u>2007</u>
Projected benefit obligations	617,883	638,560	158,353	187,637
Accumulated benefit obligations	612,410	634,847	139,431	171,735
Fair value of plan assets	488,588	518,375	99,798	136,361

Weighted-average assumptions used to determine benefit obligations as of March 31, 2006 and 2007 were as follows:

Japanese plans:

	<u>March 31</u>	
	<u>2006</u>	<u>2007</u>
	Discount rate	2.2%
Rate of compensation increase	3.2	2.5

Foreign plans:

	<u>March 31</u>	
	<u>2006</u>	<u>2007</u>
	Discount rate	5.1%
Rate of compensation increase	3.7	3.6

Weighted-average assumptions used to determine the net periodic benefit costs for the fiscal years ended March 31, 2005, 2006 and 2007 were as follows:

Japanese plans:

	<u>Fiscal Year Ended</u>		
	<u>March 31</u>		
	<u>2005</u>	<u>2006</u>	<u>2007</u>
Discount rate	2.4%	2.3%	2.2%
Expected return on plan assets	3.2	3.5	3.7
Rate of compensation increase	3.0	3.3	3.2

Foreign plans:

	<u>Fiscal Year Ended</u>		
	<u>March 31</u>		
	<u>2005</u>	<u>2006</u>	<u>2007</u>
Discount rate	5.8%	5.4%	5.1%
Expected return on plan assets	7.8	7.8	7.3
Rate of compensation increase	4.0	3.7	3.6

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

As required under FAS No. 87, “Employers’ Accounting for Pensions”, the assumptions are reviewed in accordance with changes in circumstances.

To determine the expected long-term rate of return on pension plan assets, Sony considers the current and expected asset allocations, as well as historical and expected long-term rate of returns on various categories of plan assets.

Following FAS No. 132(R), “Employers’ Disclosure about Pensions and Other Postretirement Benefits”, the weighted-average rate of compensation increase is calculated based on the pay-related plans only. The point-based plans discussed above are excluded from the calculation because payments made under the plan are not based on employee compensation.

Weighted-average pension plan asset allocations based on the fair value of such assets as of March 31, 2006 and 2007 were as follows:

Japanese plans:

	<u>March 31</u>	
	<u>2006</u>	<u>2007</u>
Equity securities	38.1%	38.6%
Debt securities	47.7	48.6
Cash	6.0	5.3
Other	<u>8.2</u>	<u>7.5</u>
Total	<u>100.0%</u>	<u>100.0%</u>

Foreign plans:

	<u>March 31</u>	
	<u>2006</u>	<u>2007</u>
Equity securities	69.1%	69.0%
Debt securities	20.8	18.4
Real estate	6.8	6.3
Other	<u>3.3</u>	<u>6.3</u>
Total	<u>100.0%</u>	<u>100.0%</u>

For the pension plans of Sony Corporation and most of its subsidiaries in Japan, the target allocation as of March 31, 2007, is, as a result of our Asset Liability management, 34% of public equity, 56% of fixed income securities and 10% of other. When determining an appropriate asset allocation, diversification among assets is duly considered.

Sony makes contributions to its defined benefit pension plans as deemed appropriate by management after considering the fair value of plan assets, expected return on plan assets and the present value of benefit obligations. Sony expects to contribute approximately 37 billion yen to the Japanese plans and approximately 5 billion yen to the foreign plans during the fiscal year ending March 31, 2008.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The expected future benefit payments are as follows:

	<u>Japanese plans</u>	<u>Foreign plans</u>
	<u>Yen in millions</u>	<u>Yen in millions</u>
Fiscal Year Ending March 31, 2008	19,204	9,310
2009	21,096	8,034
2010	25,443	8,893
2011	28,984	9,824
2012	30,357	10,337
2013 — 2017	169,549	68,489

15. *Stockholders' equity*

(1) **Subsidiary tracking stock:**

On June 20, 2001, Sony Corporation issued shares of subsidiary tracking stock in Japan, the economic value of which was intended to be linked to the economic value of Sony Communication Network Corporation (“SCN”), a directly and indirectly wholly-owned subsidiary of Sony Corporation which is engaged in Internet-related services. The subsidiary tracking stock holders had no direct rights in the equity or assets of SCN or the assets of Sony Corporation.

On October 26, 2005, the Board of Directors of Sony Corporation decided to terminate all shares of subsidiary tracking stock and convert such shares to shares of Sony common stock. All shares of subsidiary tracking stock were converted to shares of Sony common stock on December 1, 2005. As a result of the conversion, the number of shares of Sony common stock to be issued upon conversion was calculated by multiplying the number of shares of subsidiary tracking stock as of November 30, 2005 by 1.114. The number of shares of Sony common stock issued upon conversion was 3,452,808. SCN subsequently changed its name to So-net Entertainment Corporation (“So-net”) in October, 2006.

(2) **Common stock:**

Changes in the number of shares of common stock issued and outstanding during the fiscal years ended March 31, 2005, 2006 and 2007 have resulted from the following:

	<u>Number of shares</u>
Balance at March 31, 2004	926,418,280
Conversion of convertible bonds	70,765,533
Exercise of stock acquisition rights	27,400
Balance at March 31, 2005	997,211,213
Conversion of convertible bonds	484,200
Conversion of subsidiary tracking stock	3,452,808
Exercise of stock acquisition rights	531,443
Balance at March 31, 2006	1,001,679,664
Conversion of convertible bonds	197,700
Exercise of stock acquisition rights	1,019,900
Balance at March 31, 2007	1,002,897,264

At March 31, 2007, 58,790,733 shares of common stock would be issued upon the conversion or exercise of all convertible bonds, warrants and stock acquisition rights outstanding.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Conversions of convertible bonds into common stock are accounted for in accordance with the provisions of the Japanese Company Law by crediting approximately one-half of the conversion proceeds to the common stock account and the remainder to the additional paid-in capital account.

Sony Corporation may purchase its own shares at any time by a resolution of the Board of Directors up to the retained earnings available for dividends to shareholders, in accordance with Japanese Company Law. No common stock and subsidiary tracking stock had been acquired by the resolution of the Board of Directors during the fiscal years ended March 31, 2006 and 2007.

(3) Retained earnings:

The amount of statutory retained earnings of Sony Corporation available for dividends to shareholders as of March 31, 2007 was 660,036 million yen. The appropriation of retained earnings for the fiscal year ended March 31, 2007, including cash dividends for the six-month period ended March 31, 2007, has been incorporated in the accompanying consolidated financial statements. This appropriation of retained earnings was approved at the meeting of the Board of Directors of Sony Corporation held on May 15, 2007 and was then recorded in the statutory books of account, in accordance with the Japanese Company Law.

Retained earnings include Sony's equity in undistributed earnings of affiliated companies accounted for by the equity method in the amount of 13,557 million yen and 102,216 million yen at March 31, 2006 and 2007, respectively.

(4) Other comprehensive income:

Other comprehensive income for the fiscal years ended March 31, 2005, 2006 and 2007 is comprised of the following:

	Yen in millions		
	Pre-tax amount	Tax benefit/(expense)	Net-of-tax amount
For the fiscal year ended March 31, 2005:			
Unrealized gains on securities —			
Unrealized holding gains (losses) arising during the period	7,184	(1,541)	5,643
Less: Reclassification adjustment included in net income	(18,140)	5,216	(12,924)
Unrealized losses on derivative instruments —			
Unrealized holding gains (losses) arising during the period	(2,015)	1,806	(209)
Less: Reclassification adjustment included in net income	(2,848)	1,167	(1,681)
Minimum pension liability adjustment	(1,700)	931	(769)
Foreign currency translation adjustments —			
Translation adjustments arising during the period	76,585	(2,361)	74,224
Other comprehensive income	59,066	5,218	64,284

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

	Yen in millions		
	<u>Pre-tax amount</u>	<u>Tax benefit/(expense)</u>	<u>Net-of-tax amount</u>
For the fiscal year ended March 31, 2006:			
Unrealized gains on securities —			
Unrealized holding gains (losses) arising during the period	125,263	(45,633)	79,630
Less: Reclassification adjustment included in net income	(64,953)	23,458	(41,495)
Unrealized losses on derivative instruments —			
Unrealized holding gains (losses) arising during the period	14,888	(7,023)	7,865
Less: Reclassification adjustment included in net income	(12,597)	5,173	(7,424)
Minimum pension liability adjustment	88,941	(38,735)	50,206
Foreign currency translation adjustments —			
Translation adjustments arising during the period	143,888	(3,415)	140,473
Less: Reclassification adjustment included in net income	<u>(17)</u>	<u>—</u>	<u>(17)</u>
Other comprehensive income	<u>295,413</u>	<u>(66,175)</u>	<u>229,238</u>
For the fiscal year ended March 31, 2007:			
Unrealized gains on securities —			
Unrealized holding gains (losses) arising during the period	6,242	721	6,963
Less: Reclassification adjustment included in net income	(34,416)	12,745	(21,671)
Unrealized losses on derivative instruments —			
Unrealized holding gains (losses) arising during the period	10,786	(3,879)	6,907
Less: Reclassification adjustment included in net income	(10,056)	4,123	(5,933)
Minimum pension liability adjustment	(8,160)	5,406	(2,754)
Foreign currency translation adjustments —			
Translation adjustments arising during the period	<u>88,957</u>	<u>(2,644)</u>	<u>86,313</u>
Other comprehensive income	<u>53,353</u>	<u>16,472</u>	<u>69,825</u>

During the fiscal year ended March 31, 2006, gains of 17 million yen of foreign currency translation adjustments were transferred from other comprehensive income to net income as a result of the liquidation of certain foreign subsidiaries.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

16. *Stock-based compensation plans*

Sony has four types of stock-based compensation plans as incentive plans for selected directors, corporate executive officers and employees.

(1) **Warrant plan:**

Upon issuance of unsecured bonds with detachable warrants, which are described in Note 11, Sony Corporation has purchased all of the detachable warrants and distributed them to selected directors, corporate executive officers and employees of Sony. By exercising a warrant, directors, corporate executive officers and employees can purchase the common stock of Sony Corporation, the number of which is designated by each plan. The warrants generally vest ratably over a period of three years, and are exercisable up to six years from the date of grant.

Presented below is a summary of the activities regarding common stock warrants during the fiscal year ended March 31, 2007.

	Fiscal Year Ended March 31			
	2007			
	Number of Shares	Weighted- average exercise price <u>Yen</u>	Weighted- average remaining life <u>Years</u>	Total Intrinsic Value <u>Yen in millions</u>
Outstanding at beginning of the fiscal year	2,068,300	8,901		
Expired	<u>(922,400)</u>	12,457		
Outstanding at end of the fiscal year	<u>1,145,900</u>	6,039	0.75	—
Exercisable at end of the fiscal year	<u>1,145,900</u>	6,039	0.75	—

There were no warrants granted or exercised during the fiscal years ended March 31, 2005, 2006 and 2007. All outstanding warrants were exercisable at March 31, 2007.

(2) **Convertible Bond plan:**

Sony has an equity-based compensation plan for selected executives of Sony's U.S. subsidiaries using U.S. dollar-denominated non-interest bearing convertible bonds, which have characteristics similar to that of an option plan. Each convertible bond can be converted into 100 shares of the common stock of Sony Corporation at an exercise price based on the prevailing market rate shortly before the date of grant. The convertible bonds vest ratably over a three-year period and are exercisable up to ten years from the date of grant. As the convertible bonds were issued in exchange for a non-interest bearing employee loan and a right of offset exists between the convertible bonds and the employee loans, no accounting recognition was given to either the convertible bonds or the employee loans in Sony's consolidated balance sheet.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Presented below is a summary of the activities regarding the convertible bond plan during the fiscal year ended March 31, 2007.

	Fiscal Year Ended March 31			
	2007			
	Number of Shares	Weighted- average exercise price Yen	Weighted- average remaining life Years	Total Intrinsic Value Yen in millions
Outstanding at beginning of the fiscal year	2,493,500	8,133		
Exercised	(197,700)	5,975		
Expired	(560,500)	6,186		
Outstanding at end of the fiscal year	<u>1,735,300</u>	9,008	4.27	—
Exercisable at end of the fiscal year	<u>1,735,300</u>	9,008	4.27	—

There were no shares granted under the convertible bond plan during the fiscal years ended March 31, 2005, 2006 and 2007. The total intrinsic value of shares exercised under the convertible bond plan during the fiscal years ended March 31, 2006 and 2007 was 122 million yen and 73 million yen, respectively. There were no shares exercised under the convertible bond plan during the fiscal year ended March 31, 2005. All shares under the convertible bond plan were exercisable as of March 31, 2007.

(3) Stock Acquisition Rights plan:

During the fiscal year ended March 31, 2003, Sony adopted an equity-based compensation plan that issues common stock acquisition rights for the purpose of granting stock options to selected directors, corporate executive officers and employees of Sony, pursuant to the Commercial Code of Japan. The stock acquisition rights generally vest ratably over a period of three years and are exercisable up to ten years from the date of grant.

The weighted-average fair value per share at the date of grant of stock acquisition rights granted during the fiscal years ended March 31, 2005, 2006 and 2007 were 1,085 yen, 1,585 yen and 1,770 yen, respectively. The fair value of stock acquisition rights granted on the date of grant and used to recognize compensation expense for the fiscal year ended March 31, 2007, and the pro-forma impacts on net income for the fiscal years ended March 31, 2005 and 2006 were estimated using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	Fiscal Year Ended March 31		
	2005	2006	2007
Weighted-average assumptions			
Risk-free interest rate	2.04%	2.90%	3.28%
Expected lives	3.54 years	6.14 years	6.30 years
Expected volatility	35.56%	39.50%	34.17%
Expected dividends	0.62%	0.61%	0.53%

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Presented below is a summary of the activities regarding the stock acquisition rights plan during the fiscal year ended March 31, 2007.

	Fiscal Year Ended March 31			
	2007			
	Number of Shares	Weighted- average exercise price <u>Yen</u>	Weighted- average remaining life <u>Years</u>	Total Intrinsic Value <u>Yen in millions</u>
Outstanding at beginning of the fiscal year	9,100,700	4,351		
Granted	2,519,300	4,693		
Exercised	(1,019,900)	4,235		
Forfeited or expired	<u>(301,500)</u>	<u>4,457</u>	<u>—</u>	<u>—</u>
Outstanding at end of the fiscal year	<u>10,298,600</u>	<u>4,461</u>	<u>7.97</u>	<u>15,606</u>
Exercisable at end of the fiscal year	<u>4,796,300</u>	<u>4,470</u>	<u>6.92</u>	<u>7,237</u>

The total intrinsic value of shares exercised under the stock acquisition rights plan during the fiscal years ended March 31, 2005, 2006 and 2007 was 12 million yen, 383 million yen and 1,622 million yen, respectively.

Presented below is a summary of the activities regarding the nonvested stock acquisition rights during the fiscal year ended March 31, 2007.

	Fiscal Year Ended March 31	
	2007	
	Number of Shares	Weighted- average Grant-date Fair value <u>Yen</u>
Outstanding at beginning of the fiscal year	5,964,500	1,437
Granted	2,519,300	1,770
Vested	(2,734,500)	1,362
Forfeited or expired	<u>(247,000)</u>	<u>1,483</u>
Outstanding at end of the fiscal year	<u>5,502,300</u>	<u>1,625</u>

As of March 31, 2007, there was 4,249 million yen of total unrecognized compensation expense related to nonvested stock acquisition rights. This expense is expected to be recognized over a weighted-average period of 1.89 years. The total fair value of stock acquisition rights vested during the fiscal years ended March 31, 2005, 2006 and 2007 was 4,690 million yen, 4,182 million yen and 3,670 million yen, respectively.

The total cash received from the exercises under all the stock-based compensation plans during the fiscal years ended March 31, 2005, 2006 and 2007 was 105 million yen, 4,681 million yen and 5,566 million yen, respectively. There was no actual income tax benefit realized for tax deductions from the exercise for the fiscal year ended March 31, 2005. The actual income tax benefit realized for tax deductions from the exercise of all the stock-based compensation plans totaled 152 million yen for the fiscal year ended March 31, 2006. There was no actual income tax benefit realized for tax deductions from the exercise for the fiscal year ended March 31, 2007.

As a result of the establishment of the joint venture between Sony's recorded music business with the recorded music business of Bertelsmann AG (Note 5), employees of Sony's recorded music business who were granted options under the convertible bond and stock acquisition rights plans prior to the establishment of the joint venture are no longer considered employees of Sony under FAS No. 123 as these individual are now employees of SONY BMG which is accounted for under the equity method. As a result, a compensation charge of 340 million yen was

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

recorded in the fiscal year ended March 31, 2005 based on the fair value method of accounting for stock-based compensation using the Black-Scholes option-pricing model.

(4) Stock appreciation rights (“SARs”) plan:

Sony granted SARs in Japan, Europe and the United States of America for selected employees. Under the terms of these plans, employees upon exercise of such rights receive cash equal to the amount that the market price of Sony Corporation’s common stock exceeds the strike price of the SARs. The SARs generally vest ratably over a period of three years, and are generally exercisable up to six to ten years from the date of grant. Sony uses various strategies to minimize the compensation expense associated with the SAR plans in the United States of America and Europe.

There were no SARs granted during the fiscal years ended March 31, 2005, 2006 and 2007. As of March 31, 2007, there were 111,200 SARs outstanding and the weighted-average exercise price was 9,133 yen. All SARs were exercisable as of March 31, 2007.

As all outstanding SARs were fully vested upon the adoption of FAS No. 123(R), compensation expense for the SARs continues to be accounted for under the intrinsic value method in which compensation expense is measured as the excess of the quoted market price of Sony Corporation’s common stock over the SARs strike price, which was the method used under FAS No. 123. For the fiscal year ended March 31, 2005, Sony recognized a reduction in SARs compensation expense of 74 million yen. For the fiscal years ended March 31, 2006 and 2007, Sony recognized 70 million yen and 7 million yen of SARs compensation expense.

17. Restructuring charges and asset impairments

As part of its effort to improve the performance of the various businesses, Sony has undertaken a number of restructuring initiatives within its Electronics segment, Pictures segment and All Other. For the fiscal years ended March 31, 2005, 2006 and 2007, Sony recorded total restructuring charges of 89,963 million yen, 138,692 million yen and 38,770 million yen, respectively. Significant restructuring charges and asset impairments include the following:

Electronics Segment

In an effort to improve the performance of the Electronics segment, Sony has undergone a number of restructuring efforts to reduce its operating costs. For the fiscal years ended March 31, 2005, 2006 and 2007, Sony recorded total restructuring charges of 83,227 million yen, 125,802 million yen and 37,421 million yen, respectively, within the Electronics segment. Significant restructuring activities are as follows:

Downsizing of CRT TV display operations -

Due to the worldwide market shrinkage and demand shift from CRT displays to LCD panel displays, Sony has implemented a worldwide plan to rationalize production facilities of CRT TV display and has been downsizing its business over several years.

In the fiscal year ended March 31, 2005, as part of this restructuring program, Sony recorded a non-cash impairment charge of 7,479 million yen for CRT TV display manufacturing facilities located in Europe.

In the fiscal year ended March 31, 2006, Sony continued to restructure its CRT TV operations. As part of this restructuring program, Sony made a decision to discontinue certain CRT TV display manufacturing operations in the U.S. Restructuring charges totaling 32,488 million yen consisted of personnel related costs of 1,962 million yen and non-cash equipment impairment, disposal and other costs of 30,526 million yen. Of the total restructuring charges, 6,982 million yen was recorded in cost of sales, and 25,506 million yen was included in loss on sale, disposal or impairment of assets, net in the consolidated statements of income. In addition, Sony recorded a non-cash impairment charge of 2,856 million yen for CRT TV display manufacturing facilities located in Southeast Asia.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

In the fiscal year ended March 31, 2007, as part of this restructuring program, Sony recorded a non-cash impairment charge of 1,670 million yen for CRT TV display manufacturing facilities located in the U.S. The impairment charges were calculated as the difference between the carrying value of the asset group and the present value of estimated future cash flows. The charges were recorded in loss on sale, disposal or impairment of assets, net in the consolidated statements of income. These restructuring programs were all completed by March 31, 2007 and no liability existed as of March 31, 2007.

Closing of a semiconductor plant in the U.S. -

Due to a significant decline in the business conditions of the U.S. semiconductor industry, Sony made a decision in the fourth quarter of the fiscal year ended March 31, 2003, to close a semiconductor plant in the U.S. In connection with this restructuring activity, Sony sold the facilities and recorded a gain on disposal of 1,794 million yen during the fiscal year ended March 31, 2005. The gain was included in loss on sale, disposal or impairment of assets, net in the consolidated statements of income. This restructuring activity was completed in the fiscal year ended March 31, 2005 and total restructuring charges of 4,936 million yen, net of the gain on the sale of the facilities discussed above, have been incurred through March 31, 2005. No liability existed as of March 31, 2007.

Downsizing of LCD rear-projection televisions operations -

Due to a significant decline in the business conditions of the European LCD rear-projection television industry, Sony made a decision in the fiscal year ended March 31, 2007, to discontinue LCD rear-projection television production in Europe. Restructuring charges totaling 3,844 million yen consisted of inventory write downs and accruals for supplier claims. Of the total restructuring charges, 3,782 million yen was recorded in cost of sales in the consolidated statements of income. This phase of the restructuring program was completed in the fiscal year ended March 31, 2007 and the remaining liability balance as of March 31, 2007 was 1,190 million yen with the balance of the liabilities expected to be paid during the fiscal year ending March 31, 2008.

Retirement Programs -

In addition to the restructuring efforts disclosed above, Sony has undergone several headcount reduction programs to further reduce operating costs in its Electronics segment. As a result of these programs, Sony recorded restructuring charges totaling 50,960 million yen, 45,116 million yen and 9,704 million yen for the fiscal years ended March 31, 2005, 2006 and 2007, respectively, and these charges were included in selling, general and administrative expenses in the consolidated statements of income. These staff reductions were achieved worldwide mostly through the implementation of early retirement programs. The remaining liability balance as of March 31, 2007 was 7,226 million yen and will be paid throughout the fiscal year ending March 31, 2008. Sony will continue to implement programs to reduce headcount by streamlining business operations, including closure and consolidation of manufacturing sites, as well as headquarters and administrative functions.

Pictures Segment

In an effort to improve the performance of the Pictures segment, Sony underwent a fixed cost reduction program during the fiscal year ended March 31, 2005 to reduce its operating costs. The Pictures segment completed the fixed cost reduction program during the fiscal year ended March 31, 2005 and recorded 385 million yen of restructuring costs. These restructuring charges consisted primarily of personnel related costs of 292 million yen, which were included in selling, general and administrative expenses in the consolidated statements of income. There were no restructuring charges incurred for the fiscal years ended March 31, 2006 and 2007 and no liability existed for this activity as of March 31, 2007.

All Other (Music Business)

Due to the continued contraction of the worldwide music market, Sony has been actively repositioning the music business for the future by looking to create a more effective and profitable business model. As part of this

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

restructuring program, Sony combined its recorded music business with the recorded music business of Bertelsmann AG to form SONY BMG, a joint venture that is accounted for under the equity method. See Note 5 for more information on this transaction. The most significant restructuring charge in the music business for the past three years was in the fiscal year ended March 31, 2005, where a charge of 3,025 million yen was recorded. This worldwide restructuring of the music business was completed during the fiscal year ended March 31, 2006, and the total cost of the program was 52,702 million yen, which was incurred from the inception of the program through the fiscal year ended March 31, 2006. The restructuring costs within the music business do not include the restructuring costs of SONY BMG since the establishment of the joint venture. At March 31, 2007, the remaining liability balance was 211 million yen, which is expected to be settled during the fiscal year ended March 31, 2008.

In addition to the above, Sony also recorded restructuring charges of 803 million yen, 346 million yen and 1,329 million yen for the fiscal years ended March 31, 2005, 2006 and 2007, respectively, in Japan, which were primarily personnel related costs included in selling, general and administrative expenses in the consolidated statements of income.

During the fiscal year ended March 31, 2005, in continuation of the worldwide restructuring program and in connection with the establishment of the joint venture with Bertelsmann AG (Note 5), Sony recorded restructuring charges totaling 3,025 million yen within the music business. Restructuring activities included the shutdown of certain distribution operations that were no longer required as a result of the recorded music joint venture with Bertelsmann AG as well as the further rationalization of overhead functions through staff reductions. The restructuring charges consisted of personnel related costs of 883 million yen and other related costs of 2,142 million yen.

All Other (U.S. Entertainment Complex)

As part of its efforts to restructure and eliminate certain non-core businesses, Sony reached an agreement to sell a U.S. entertainment complex in March 2006. As a result, Sony recorded an impairment charge of 8,522 million yen. The impairment charge was based on the negotiated sales price of the complex, and was recorded in loss on sale, disposal or impairment of assets, net in the consolidated statements of income.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The changes in the accrued restructuring charges for the fiscal years ended March 31, 2005, 2006 and 2007 are as follows:

	Yen in millions			
	Employee termination benefits	Non-cash write-downs and disposals	Other associated costs	Total
Balance at March 31, 2004	24,650	—	7,988	32,638
Restructuring costs	53,563	25,564	10,836	89,963
Non-cash charges	—	(25,564)	—	(25,564)
Cash payments	(61,523)	—	(10,427)	(71,950)
Adjustments*	<u>(1,705)</u>	<u>—</u>	<u>(3,096)</u>	<u>(4,801)</u>
Balance at March 31, 2005	14,985	—	5,301	20,286
Restructuring costs	48,255	76,999	13,438	138,692
Non-cash charges	—	(76,999)	—	(76,999)
Cash payments	(42,152)	—	(7,929)	(50,081)
Adjustments	<u>(1,227)</u>	<u>—</u>	<u>3</u>	<u>(1,224)</u>
Balance at March 31, 2006	19,861	—	10,813	30,674
Restructuring costs	10,790	15,467	12,513	38,770
Non-cash charges	—	(15,467)	—	(15,467)
Cash payments	(23,052)	—	(14,705)	(37,757)
Adjustments	<u>(152)</u>	<u>—</u>	<u>1,277</u>	<u>1,125</u>
Balance at March 31, 2007	<u>7,447</u>	<u>—</u>	<u>9,898</u>	<u>17,345</u>

* Adjustments primarily consist of the transfer of the accrued restructuring charges to SONY BMG, a joint venture with Bertelsmann AG (Note 5).

18. *Research and development costs, advertising costs and shipping and handling costs*

(1) **Research and development costs:**

Research and development costs charged to cost of sales for the fiscal years ended March 31, 2005, 2006 and 2007 were 502,008 million yen, 531,795 million yen and 543,937 million yen, respectively.

(2) **Advertising costs:**

Advertising costs included in selling, general and administrative expenses for the fiscal years ended March 31, 2005, 2006 and 2007 were 359,661 million yen, 419,508 million yen and 505,462 million yen, respectively.

(3) **Shipping and handling costs:**

Shipping and handling costs for finished goods included in selling, general and administrative expenses for the fiscal years ended March 31, 2005, 2006 and 2007 were 107,983 million yen, 114,500 million yen and 120,442 million yen, respectively, which included the internal transportation costs of finished goods.

19. *Gain on change in interest in subsidiaries and equity investees*

On August 2, 2004, Monex Inc., which provided on-line security trading services in Japan, and Nikko Beans, Inc. established Monex Beans Holdings, Inc. by way of share transfer of the then existing shares of Monex Inc. and Nikko Beans, Inc. At this establishment, 1 share of Monex Beans Holdings, Inc. was allotted to each share of Monex Inc. and 3.4 shares of Monex Beans Holdings, Inc. were allotted to each share of Nikko Beans, Inc. As a result of this

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

share transfer, Monex Beans Holdings, Inc. issued 2,344,687 shares and Sony recorded a gain of 8,951 million yen and provided deferred taxes on this gain. This issuance reduced Sony's ownership interest from 29.9% to 20.1%.

In September 2004, So-net M3 Inc., which provides medical services via the Internet in Japan, issued 2,800 shares at 850,000 yen per share with a total value of 2,380 million yen in connection with its initial public offering. So-net, a parent company of So-net M3 Inc., sold 3,260 shares of So-net M3 Inc., at 790,500 yen per share with a total value of 2,577 million yen. In October 2004, So-net sold 740 shares of So-net M3 Inc., at 790,500 yen per share with a total value of 585 million yen. As a result of these transactions, Sony recorded a 1,823 million yen gain on issuance of stock by So-net M3 Inc. and provided deferred taxes on this gain. In addition, Sony recorded a 2,876 million yen gain on the sale of its shares of So-net M3 Inc. These transactions reduced Sony's ownership interest from 90.0% to 74.8%.

In January 2005, DeNA Co., Ltd., whose field of business is the operation of on-line auction websites in Japan, issued 14,000 shares at 204,600 yen per share with a total value of 2,864 million yen in connection with its initial public offering. In March 2005, So-net, which had owned a 27.7% interest in DeNA Co., Ltd., sold 2,000 shares of DeNA Co., Ltd. at 204,600 yen per share with a total value of 409 million yen. As a result of these transactions, Sony recorded a 686 million yen gain on issuance of stock by DeNA Co., Ltd. and provided deferred taxes on this gain. In addition, Sony recorded a 76 million yen gain on the sale of its shares of DeNA Co., Ltd. These transactions reduced Sony's ownership interest from 27.7% to 24.8%.

In addition to the above transactions, for the fiscal year ended March 31, 2005, Sony recognized 1,911 million yen of other gains on change in interest in subsidiaries and equity investees resulting in total gains of 16,322 million yen.

In June 2005, So-net sold 17,935 shares of So-net M3 Inc., at 694,600 yen per share with a total value of 12,458 million yen. As a result of this sale, Sony recorded an 11,979 million yen gain and provided deferred taxes on this gain. This sale reduced Sony's ownership interest from 74.8% to 60.8%.

In June 2005, So-net sold 7,000 shares of DeNA Co., Ltd. at 863,040 yen per share with a total value of 6,041 million yen. In March 2006, DeNA Co., Ltd. issued 14,300 shares at 314,138 yen per share with a total value of 4,492 million yen in connection with its private offering. As a result of these transactions, Sony recorded an 821 million yen gain on issuance of stock by DeNA Co., Ltd. and provided deferred taxes on this gain. In addition, Sony recorded a 5,817 million yen gain on the sale of its shares of DeNA Co., Ltd. These transactions reduced Sony's ownership interest from 24.8% to 19.1%.

In September 2005, Sony Corporation sold 230,000 shares of Monex Beans Holdings, Inc. at 119,040 yen per share with a total value of 27,379 million yen. As a result of this sale, Sony recorded a 20,590 million yen gain and provided deferred taxes on this gain. This sale reduced Sony's ownership interest from 20.1% to 10.3%. See Note 5 for more information on this transaction.

In December 2005, So-net issued 20,000 shares at 320,960 yen per share with a total value of 6,419 million yen in connection with its initial public offering. Sony Corporation and Sony Finance International Inc., which had owned 82.6% and 17.4% interests in So-net, respectively, sold 66,000 shares and 4,000 shares of So-net, respectively, at 320,960 yen per share with a total value of 22,467 million yen. In January 2006, Sony Corporation sold 12,000 shares of So-net at 320,960 yen per share with a total value of 3,852 million yen. As a result of these transactions, Sony recorded a 4,226 million yen gain on issuance of stock by So-net and provided deferred taxes on this gain. In addition, Sony recorded a 17,321 million yen gain on the sale of its shares of So-net. These transactions reduced Sony's ownership interest from 100% to 60.1%.

In addition to the above transactions, for the fiscal year ended March 31, 2006, Sony recognized 80 million yen of other gains on change in interest in subsidiaries and equity investees resulting in total gains of 60,834 million yen.

In June 2006, Sony sold 51.0% of its ownership interest in StylingLife Holdings Inc., a holding company covering six retail companies within Sony Group previously included within All Other. In November 2006, Sony sold an additional portion of its ownership interest in StylingLife Holdings Inc. These transactions reduced Sony's

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

ownership interest from 100% to 22.5%. As a result of this sale, Sony recorded a 27,398 million yen gain and provided deferred taxes on this gain.

In addition to the above transaction, for the fiscal year ended March 31, 2007, Sony recognized 4,111 million yen of other gains on change in interest in subsidiaries and equity investees resulting in total gains of 31,509 million yen.

These transactions were not part of a broader corporate reorganization and the reacquisition of such shares was not contemplated at the time of issuance.

20. *Income taxes*

Income before income taxes and income tax expense is comprised of the following:

	Yen in millions		
	Fiscal Year Ended March 31		
	2005	2006	2007
Income (loss) before income taxes:			
Sony Corporation and subsidiaries in Japan	5,005	243,927	174,689
Foreign subsidiaries	<u>152,202</u>	<u>42,402</u>	<u>(72,652)</u>
	<u>157,207</u>	<u>286,329</u>	<u>102,037</u>
Income taxes — Current:			
Sony Corporation and subsidiaries in Japan	23,497	55,154	51,395
Foreign subsidiaries	<u>62,013</u>	<u>41,246</u>	<u>15,686</u>
	<u>85,510</u>	<u>96,400</u>	<u>67,081</u>
Income taxes — Deferred:			
Sony Corporation and subsidiaries in Japan	4,976	105,938	27,331
Foreign subsidiaries	<u>(74,442)</u>	<u>(25,823)</u>	<u>(40,524)</u>
	<u>(69,466)</u>	<u>80,115</u>	<u>(13,193)</u>
Total income tax expense	<u>16,044</u>	<u>176,515</u>	<u>53,888</u>

Reconciliation of the differences between the statutory tax rate and the effective income tax rate is as follows:

	Fiscal Year Ended March 31		
	2005	2006	2007
	Statutory tax rate	41.0%	41.0%
Increase (reduction) in taxes resulting from:			
Non deductible expenses	1.5	0.9	12.2
Income tax credits	(0.1)	(1.3)	(28.8)
Change in valuation allowances	(22.7)	21.6	(2.9)
Increase (decrease) in deferred tax liabilities on undistributed earnings of foreign subsidiaries and affiliates	(4.0)	4.5	12.8
Lower tax rate applied to life and non-life insurance business in Japan	(1.9)	(3.2)	(4.0)
Foreign income tax differential	(3.1)	(1.4)	13.1
Adjustments to tax accrual and reserves	3.1	(1.2)	4.9
Other	<u>(3.6)</u>	<u>0.7</u>	<u>4.5</u>
Effective income tax rate	<u>10.2%</u>	<u>61.6%</u>	<u>52.8%</u>

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The significant components of deferred tax assets and liabilities are as follows:

	Yen in millions	
	March 31	
	2006	2007
Deferred tax assets:		
Operating loss carryforwards for tax purposes	146,206	174,685
Accrued pension and severance costs	95,226	97,791
Film costs	51,937	54,881
Warranty reserve and accrued expenses	52,008	87,775
Future insurance policy benefits	24,785	40,784
Accrued bonus	27,353	24,723
Inventory — intercompany profits and write-down	47,578	80,580
Depreciation	34,052	31,519
Tax credit carryforwards	39,443	54,075
Reserve for doubtful accounts	7,479	6,312
Impairment of investments	52,658	50,582
Deferred revenue in the Pictures segment	16,713	28,476
Other	144,337	92,069
Gross deferred tax assets	739,775	824,252
Less: Valuation allowance	(150,899)	(174,408)
Total deferred tax assets	588,876	649,844
Deferred tax liabilities:		
Insurance acquisition costs	(136,919)	(143,329)
Unbilled accounts receivable in the Pictures segment	(49,953)	(55,680)
Unrealized gains on securities	(63,739)	(50,273)
Intangible assets acquired through stock exchange offerings	(34,627)	(33,067)
Undistributed earnings of foreign subsidiaries and affiliates	(66,719)	(97,429)
Gain on securities contribution to employee retirement benefit trust	(3,992)	(5,315)
Other	(65,151)	(80,156)
Gross deferred tax liabilities	(421,100)	(465,249)
Net deferred tax assets	167,776	184,595

The valuation allowance mainly relates to deferred tax assets of Sony Corporation and certain consolidated subsidiaries with operating loss carryforwards and tax credit carryforwards for tax purposes that are not expected to be realized. The net changes in the total valuation allowance were a decrease of 38,467 million yen for the fiscal year ended March 31, 2005 and increases of 61,789 million yen and 23,509 million yen for the fiscal years ended March 31, 2006 and 2007, respectively. The increase during the fiscal year ended March 31, 2006 resulted from a provision for additional valuation allowances due to continued losses recorded by Sony Corporation and certain subsidiaries, mainly in the electronics business. The increase during the fiscal year ended March 31, 2007 resulted from a provision for additional valuation allowances due to continued losses recorded by certain subsidiaries, mainly in the electronics business.

As a result of operating losses in the past, certain consolidated subsidiaries in the U.S. had recognized valuation allowances against deferred tax assets for the U.S. federal and certain state taxes. However, because of improved operating results in recent years and a sound outlook for the future operating performance of certain

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

consolidated subsidiaries in the U.S., Sony reversed 67,892 million yen of valuation allowance, resulting in a reduction of income tax expenses for the fiscal year ended March 31, 2005.

Although Sony Computer Entertainment Inc. (“SCEI”) and Sony Computer Entertainment America Inc. (“SCEA”) have recorded cumulative losses in recent years, both companies plan to recover these losses within the next 5 years as the PlayStation 3 is expected to establish the same successful business model that it achieved with the PlayStation 2, which has sold over 100 million units. Given sufficiently strong evidence to support the conclusion that a valuation allowance is not necessary, Sony has decided not to record a valuation allowance for SCEI and SCEA’s deferred tax assets.

Tax benefits which have been realized through the utilization of operating loss carryforwards for the fiscal years ended March 31, 2005, 2006 and 2007, were approximately 30 billion yen, 42 billion yen and 56 billion yen, respectively.

Net deferred tax assets are included in the consolidated balance sheets as follows:

	Yen in millions	
	March 31	
	2006	2007
Current assets — Deferred income taxes	221,311	243,782
Other assets — Deferred income taxes	178,751	216,997
Current liabilities — Other	(15,789)	(15,082)
Long-term liabilities — Deferred income taxes	(216,497)	(261,102)
Net deferred tax assets	167,776	184,595

At March 31, 2007, deferred income taxes have not been provided on undistributed earnings of foreign subsidiaries not expected to be remitted in the foreseeable future totaling 969,477 million yen, and on the gain of 61,544 million yen on a subsidiary’s sale of stock arising from the issuance of common stock of Sony Music Entertainment (Japan) Inc. in a public offering to third parties in November 1991, as Sony does not anticipate any significant tax consequences on possible future disposition of its investment based on its tax planning strategies. The unrecognized deferred tax liabilities as of March 31, 2007 for such temporary differences can not be determined.

Operating loss carryforwards for corporate income tax and local income tax purposes of Sony Corporation and certain consolidated subsidiaries in Japan at March 31, 2007 amounted to 42,318 million yen and 368,189 million yen, respectively, which are available as an offset against future taxable income. Deferred tax assets provided on the operating loss carryforwards for corporate income taxes and local income taxes in Japan are calculated by using effective tax rates of approximately 28% and 13%, respectively.

Operating loss carryforwards for income tax purposes of certain foreign consolidated subsidiaries at March 31, 2007 amounted to 364,175 million yen.

With the exception of 127,149 million yen with no expiration period, total available operating loss carryforwards expire at various dates primarily up to 10 years.

Tax credit carryforwards for tax purposes at March 31, 2007 amounted to 53,116 million yen. With the exception of 9,565 million yen with no expiration period, total available tax credit carryforwards expire at various dates primarily up to 15 years.

Realization of deferred tax assets related to loss carryforwards and tax credit carryforwards is dependent on whether sufficient taxable income will be generated prior to the expiration period. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets, less valuation allowance, will be realized. However, the amount of such net deferred tax assets considered realizable, could change in the near term if estimates of future taxable income during the carryforward period change.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

21. Reconciliation of the differences between basic and diluted net income per share

(1) Income before cumulative effect of accounting changes and net income allocated to each class of stock:

	Yen in millions		
	Fiscal Year Ended March 31,		
	2005	2006	2007
Income before cumulative effect of an accounting change allocated to common stock	168,498	122,308	126,328
Income allocated to subsidiary tracking stock	53	1,308	—
Income before cumulative effect of an accounting change	168,551	123,616	126,328
Net income allocated to common stock	163,785	122,308	126,328
Net income allocated to subsidiary tracking stock	53	1,308	—
Net income	163,838	123,616	126,328

As discussed in Note 2, the earnings allocated to subsidiary tracking stock were determined based on the subsidiary tracking stockholders' economic interest. The accumulated losses of SCN (the subsidiary tracking stock entity as discussed in Note 15) used for computation of net income per share attributable to subsidiary tracking stock were 1,358 million yen as of March 31, 2005.

As discussed in Notes 2 and 15, on October 26, 2005, the Board of Directors of Sony Corporation decided to terminate all shares of subsidiary tracking stock and convert such shares to shares of Sony common stock at a conversion rate of 1.114 share of Sony common stock per share of subsidiary tracking stock. All shares of subsidiary tracking stock were converted to shares of Sony common stock on December 1, 2005. As a result of the conversion, the earnings allocated to common stock for the fiscal year ended March 31, 2006 are calculated by subtracting the earnings allocated to the subsidiary tracking stock for the eight months ended November 30, 2005. The accumulated gains of SCN used for computation of net income per share attributable to subsidiary tracking stock were 8,578 million yen as of November 30, 2005.

(2) EPS attributable to common stock:

Reconciliation of the differences between basic and diluted EPS for the fiscal years ended March 31, 2005, 2006 and 2007 is as follows:

	Yen in millions		
	Fiscal Year Ended March 31		
	2005	2006	2007
Income before cumulative effect of an accounting change allocated to common stock	168,498	122,308	126,328
Effect of dilutive securities:			
Convertible bonds	1,209	—	—
Subsidiary tracking stock	(0)	(29)	—
Income before cumulative effect of an accounting change allocated to common stock for diluted EPS computation	169,707	122,279	126,328

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

	Thousands of shares		
Weighted-average shares	931,125	997,781	1,001,403
Effect of dilutive securities:			
Warrants and stock acquisition rights	61	915	2,413
Convertible bonds	112,589	47,468	46,355
Weighted-average shares for diluted EPS computation	1,043,775	1,046,164	1,050,171
	Yen		
Basic EPS	180.96	122.58	126.15
Diluted EPS	162.59	116.88	120.29

Potential shares of common stock upon the exercise of warrants and stock acquisition rights, which were excluded from the computation of diluted EPS since they have an exercise price in excess of the average market value of Sony's common stock during each fiscal year, were 7,987 thousand shares, 10,483 thousand shares and 10,541 thousand shares for the fiscal years ended March 31, 2005, 2006 and 2007, respectively.

Stock options issued by affiliated companies accounted for under the equity method for the fiscal years ended March 31, 2005, 2006 and 2007, which have a potentially dilutive effect by decreasing net income allocated to common stock, were excluded from the computation of diluted EPS since such stock options did not have a dilutive effect.

(3) EPS attributable to subsidiary tracking stock:

Weighted-average shares used for the computation of EPS attributable to subsidiary tracking stock for the fiscal year ended March 31, 2005 were 3,072 thousand shares.

As discussed, all shares of subsidiary tracking stock were converted to shares of Sony common stock on December 1, 2005. As a result of the conversion, net income per share of the subsidiary tracking stock for the fiscal year ended March 31, 2006 was not presented.

22. Variable interest entities

Sony has, from time to time, entered into various arrangements with variable interest entities ("VIEs"). These arrangements include facilities which provide for the leasing of certain property, the financing of film production, the implementation of a stock option plan for Japanese employees and the U.S. based music publishing business. The FASB issued FIN No. 46 (revised), "Consolidation of Variable Interest Entities — an Interpretation of Accounting Research Bulletin No. 51", which requires the consolidation or disclosure of VIEs. The VIEs that have been consolidated by Sony are described as follows:

Sony leases the headquarters of its U.S. subsidiary from a VIE. Sony has the option to purchase the building at any time during the lease term which expires in December 2008 for 255 million U.S. dollars. The debt held by the VIE is unsecured. At the end of the lease term, Sony has agreed to either renew the lease, purchase the building or remarket it to a third party on behalf of the owner. If the sales price is less than 255 million U.S. dollars, Sony is obligated to make up the lesser of the shortfall or 214 million U.S. dollars. There is no recourse to the creditors outside of Sony.

A subsidiary in the Pictures segment entered into a joint venture agreement with a VIE for the purpose of funding the acquisition of certain international film rights. The subsidiary acquired the international distribution rights, as defined, to twelve pictures meeting certain minimum requirements within the time period provided in the agreement. The subsidiary is required to distribute the product internationally, for contractually defined fees determined as percentages of gross receipts, as defined, and is responsible for all distribution and marketing

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

expenses, which are recouped from such distribution fees. The VIE was capitalized with total financing of 406 million U.S. dollars. Of this amount, 11 million U.S. dollars was contributed by the subsidiary, 95 million U.S. dollars was provided by unrelated third party investors and the remaining funding is provided through a 300 million U.S. dollars bank credit facility. As of March 31, 2007, there were no amounts outstanding under the bank credit facility. Under the agreement, the subsidiary's 11 million U.S. dollars equity investment is the last equity to be repaid. Additionally, it must pay to the third party investors up to 19 million U.S. dollars of any losses out of a portion of its distribution fees. As of March 31, 2007, the remaining unpaid portion of the third party investors' investment was 5 million U.S. dollars.

Sony utilized a VIE to implement a SAR plan (Note 16) for selected Japanese employees. The VIE has been consolidated by Sony since its establishment. Under the terms of the SAR plan, upon exercise, Japanese employees receive cash equal to the amount that the market price of Sony Corporation's common stock exceeds the grant price of the plan. In order to minimize cash flow exposure associated with the plan, Sony held treasury stock through the VIE. The VIE purchased the common stock with funding provided by the employee's cash contribution and a bank loan. The SAR plan was terminated during the fiscal year ended March 31, 2006.

Sony's U.S. based music publishing subsidiary is a joint venture with a third party investor and has been determined to be a VIE. The subsidiary owns and acquires rights to musical compositions, exploits and markets these compositions and receives royalties or fees for their use. Under the terms of the joint venture, Sony has the obligation to fund any working capital deficits. In addition, the third party investor receives a guaranteed annual dividend of up to 8.5 million U.S. dollars. Sony has also issued a guarantee to a creditor of the third party investor in which Sony will provide a minimum offer of 300 million U.S. dollars to the creditor to purchase certain assets that are being held as collateral by the third party creditor against the obligation of the third party investor. The assets of the third party investor that are being used as collateral were placed in a separate trust which was established in April 2006. The trust is also a VIE in which Sony has had a significant variable interest since establishment, but is not the primary beneficiary. Included in the assets held by the trust is the third party investor's 50% ownership interest in the music publishing subsidiary. At March 31, 2007, the fair value of the assets held by the trust exceeded 300 million U.S. dollars.

VIEs in which Sony holds a significant variable interest, but is not the primary beneficiary are described as follows:

As described in Note 5, on April 8, 2005, a consortium led by SCA and its equity partners completed the acquisition of MGM. Sony has reviewed the investment and determined that MGM is a VIE. However, MGM is not consolidated but accounted for under the equity method as Sony is not the primary beneficiary of this VIE as Sony absorbs less than 50% of expected losses and does not have the right to receive greater than 50% of expected residual returns. MGM continues to operate as a private company and continues to engage in the production and distribution of film content. Through its current ownership of MGM's common stock, Sony records 45% of MGM's net income (loss) as equity in net income of affiliated companies. As a result of the cumulative losses recorded by MGM through March 31, 2007, the carrying value of Sony's investment in MGM was written down to zero as of March 31, 2007. As Sony has not guaranteed any obligations of MGM, nor has it otherwise committed to provide further financial support to MGM, Sony will no longer record its share of MGM's future equity losses.

On December 30, 2005, a subsidiary in the Pictures segment entered into a production/co-financing agreement with a VIE to co-finance 11 films that were released over the 15 months ended March 31, 2007. The subsidiary received 373 million U.S. dollars over the term of the agreement to fund the production or acquisition cost of films (including fees and expenses). The subsidiary is responsible for the marketing and distribution of the product through its global distribution channels. The VIE shares in the net profits, as defined, of the films after the subsidiary recoups a distribution fee, its marketing and distribution expenses, and third party participation and residual costs, each as defined. The subsidiary did not make any equity investment in the VIE nor issue any guarantees with respect to the VIE. On April 28, 2006, the subsidiary entered into a second production/co-financing agreement with a VIE to co-finance additional films. Nine films are anticipated to be released under this financing arrangement. The subsidiary will receive approximately 240 million U.S. dollars over the term of the agreement to fund the production

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

or acquisition cost of films (including fees and expenses). Similar to the first agreement, the subsidiary is responsible for the marketing and distribution of the product through its global distribution channels. The VIE shares in the net profits, as defined, of the films after the subsidiary recoups a distribution fee, its marketing and distribution expenses, and third party participation and residual costs, each as defined. As of March 31, 2007, three co-financed films have been released by the subsidiary and 37 million U.S. dollars has been received from the VIE under this agreement. The subsidiary did not make any equity investment in the VIE nor issue any guarantees with respect to the VIE. On January 19, 2007, the subsidiary entered into a third production/co-financing agreement with a VIE to co-finance a majority of the films to be submitted through March 2012. The subsidiary has received a commitment from the VIE that the VIE will fund up to 525 million U.S. dollars on a revolving basis to fund the production or acquisition cost of films (including fees and expenses). As of March 31, 2007, no films of the subsidiary have been funded by this VIE. Similar to the first two agreements, the subsidiary is responsible for marketing and distribution of the product through its global distribution channels. The VIE shares in the net profits, as defined, of the films after the subsidiary recoups a distribution fee, its marketing and distribution expenses, and third party participation and residual costs, each as defined. The subsidiary did not make any equity investment in the VIE nor issue any guarantees with respect to the VIE.

23. Commitments and contingent liabilities

(1) Commitments:

A. Loan Commitments

Commitments outstanding at March 31, 2007 totaled to 374,909 million yen. The main components of these commitments are as follows:

Subsidiaries in the Financial Services segment have entered into loan agreements with their customers in accordance with the condition of the contracts. As of March 31, 2007, the total unused portion of the line of credit extended under these contracts was 348,359 million yen.

In August 2004, Sony and Bertelsmann AG combined their recorded music businesses in a joint venture. In connection with the establishment of the SONY BMG joint venture, Sony and Bertelsmann AG have entered into a 5 year Revolving Credit Agreement with the joint venture. Under the terms of the Credit Agreement, Sony and Bertelsmann have each agreed to provide one-half of the funding. The Credit Agreement, which matures on August 5, 2009, provides for a base commitment of 300 million U.S. dollars and additional incremental borrowings of up to 150 million U.S. dollars. As of March 31, 2007, the joint venture had no borrowings outstanding under the Credit Agreement. Accordingly, Sony's outstanding commitment under the Credit Agreement as of March 31, 2007 was 26,550 million yen.

The aggregate amounts of future year-by-year payments for these loan commitments cannot be determined.

B. Purchase Commitments and other

Commitments outstanding at March 31, 2007 amounted to 296,080 million yen. The major components of these commitments are as follows:

In the ordinary course of business, Sony makes commitments for the purchase of property, plant and equipment. As of March 31, 2007, such commitments outstanding were 43,329 million yen.

Certain subsidiaries in the Pictures segment have entered into agreements with creative talent for the development and production of films and television programming as well as agreements with third parties to acquire completed films, or certain rights therein. These agreements mainly cover various periods through March 31, 2011. As of March 31, 2007, these subsidiaries were committed to make payments under such contracts of 56,466 million yen.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

A subsidiary in the Pictures segment has also entered into a distribution agreement with a third party to distribute, in certain markets and territories, all feature length films produced or acquired by the third party during the term of the agreement. The distribution agreement expired on December 31, 2006. The third party produced, put into production or acquired a total of 41 films under the distribution agreement (a minimum of 36 films were required). The subsidiary has the right to distribute the films for 15 years from the initial theatrical release of the film. Under the terms of the distribution agreement, the subsidiary must fund a portion of the production cost and is responsible for all distribution and marketing expenses. As of March 31, 2007, 38 films have been released or funded by the subsidiary. The subsidiary's estimated commitment to fund the production of the remaining films under this agreement is 11,250 million yen.

In April 2005, Sony Corporation has entered into a partnership program contract with Fédération Internationale de Football Association ("FIFA"). Through this program Sony Corporation will be able to exercise various rights as an official sponsor of FIFA events including the FIFA World Cup™* from 2007 to 2014. As of March 31, 2007, Sony Corporation was committed to make payments under such contract of 30,939 million yen.

In July 2006, Sony Corporation and Samsung Electronics Co., Ltd. signed the final contract for constructing an 8th generation amorphous TFT-LCD panel manufacturing line at their joint venture, S-LCD Corporation. As of March 31, 2007, Sony Corporation was committed to make payments under such contract of 50,200 million yen.

The schedule of the aggregate amounts of year-by-year payment of purchase commitments during the next five years and thereafter is as follows:

<u>Fiscal Year Ending March 31,</u>	<u>Yen in millions</u>
2008	176,943
2009	53,947
2010	10,057
2011	7,704
2012	6,841
Thereafter	<u>40,588</u>
Total	<u><u>296,080</u></u>

(2) Contingent liabilities:

Sony had contingent liabilities including guarantees given in the ordinary course of business, which amounted to 21,681 million yen at March 31, 2007. The major components of the contingent liabilities are as follows:

Sony has issued loan guarantees to related parties comprised of affiliated companies accounted for under the equity method and unconsolidated subsidiaries. The terms of these guarantees are mainly for a period of one year. Sony would be required to perform under these guarantees upon non-performance of the primary borrowers. The contingent liability related to these guarantees was 11,100 million yen and was not recorded on the consolidated balance sheet as of March 31, 2007.

In the second quarter of the fiscal year ended March 31, 2007, Sony recorded a provision for 51,200 million yen that relates to charges incurred as a result of the recalls by Dell Inc., Apple Inc. and Lenovo, Inc. of notebook computer battery packs that use lithium-ion battery cells manufactured by Sony and the subsequent global replacement program initiated by Sony for certain notebook computer battery packs used by Sony and several other notebook computer manufacturers that use lithium-ion battery cells manufactured by Sony. Sony expects that payments or product replacements related to the recalls and global replacement program will be substantially made or provided by March 31, 2008.

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

The European Commission (“EC”) issued the Waste Electrical and Electronic Equipment (“WEEE”) directive in February 2003. The WEEE directive requires electronics producers after August 2005 to finance the cost for collection, treatment, recovery and safe disposal of waste products. In most member states of the European Union (“EU”), the directive has been transposed into national legislation subject to which Sony recognizes the liability for obligations associated with WEEE. As of the fiscal year ended March 31, 2007, the accrued amounts in respect to the above mentioned WEEE responsibilities total 946 million yen and cost incurred amount to 1,855 million yen for all European countries. However, since the regulation has not been finally adopted and put into practice in all individual member states, Sony will continue to evaluate the impact of this regulation.

Sony has agreed to indemnify certain third parties against tax losses resulting from transactions entered into in the normal course of business. The maximum amount of potential future payments under these guarantees cannot be estimated at this time. These guarantees were not recorded on the consolidated balance sheet as of March 31, 2007.

Sony Corporation and certain of its subsidiaries are defendants in several pending lawsuits and are subject to inquiries by various government authorities. However, based upon the information currently available to both Sony and its legal counsel, management of Sony believes that damages from such lawsuits or inquiries, if any, are not likely to have a material effect on Sony’s consolidated financial statements.

The changes in product warranty liability for the fiscal years ended March 31, 2006 and 2007 are as follows:

	Yen in millions	
	Fiscal Year Ended	
	March 31,	
	2006	2007
Balance at beginning of the fiscal year	44,919	49,470
Additional liabilities for warranties	48,471	77,418
Settlements (in cash or in kind)	(45,162)	(72,368)
Changes in estimate for pre-existing warranty reserve	70	(2,954)
Translation adjustment	1,172	3,738
Balance at end of the fiscal year	49,470	55,304

24. Business segment information

The Electronics segment designs, develops, manufactures and distributes audio-visual, informational and communicative equipment, instruments and devices throughout the world. The Game segment designs, develops and sells PlayStation 2, PlayStation 3 and PlayStation Portable game consoles and related software mainly in Japan, the United States of America and Europe, and licenses to third party software developers. The Pictures segment develops, produces and manufactures image-based software, including film, video, and television mainly in the United States of America, and markets, distributes and broadcasts in the worldwide market. The Financial Services segment represents primarily individual life insurance and non-life insurance businesses in the Japanese market, leasing and credit financing businesses and a bank business in Japan. All Other consists of various operating activities, primarily including a music business, a network service business, an animation production and marketing business, and an advertising agency business in Japan. Sony’s products and services are generally unique to a single operating segment.

In July 2004, in order to establish a more efficient and coordinated semiconductor supply structure, the Sony group has integrated its semiconductor manufacturing business by transferring Sony Computer Entertainment’s semiconductor manufacturing operation from the Game segment to the Electronics segment. As a result of this transfer, sales revenue and expenditures associated with this operation are now recorded within the “Semiconductor” category in the Electronics segment. The results for the three months ended June 30, 2004 have not been restated as such comparable figures cannot be practically obtained given that it was not operated as a separate line business within the Game segment. This integration of the semiconductor manufacturing businesses is a part of

SONY CORPORATION AND CONSOLIDATED SUBSIDIARIES

Sony's semiconductor strategy of utilizing semiconductor technologies and manufacturing equipment originally developed or designed for the Game business within the Sony group as a whole.

The operating segments reported below are the segments of Sony for which separate financial information is available and for which operating profit or loss amounts are evaluated regularly by executive management in deciding how to allocate resources and in assessing performance.

Consolidated total	<u><u>356,818</u></u>	<u><u>384,347</u></u>	<u><u>414,138</u></u>

The capital expenditures in the above table represent the additions to fixed assets of each segment.

The following table is a breakdown of Electronics sales and operating revenue to external customers by product category. The Electronics segment is managed as a single operating segment by Sony's management. Effective for the fiscal year ended March 31, 2007, Sony has partly changed its product category configuration. The main change is that the low-temperature polysilicon thin film transistor LCD product group has been moved from "Semiconductors" to "Components". Accordingly, sales and operating revenue for the fiscal years ended March 31, 2005 and 2006 have been restated to conform to the presentation for the fiscal year ended March 31, 2007.

SONY ERICSSON MOBILE COMMUNICATIONS

1. *Accounting Principles*

The consolidated financial statements of Sony Ericsson Mobile Communications AB and its subsidiaries are prepared in accordance with accounting principles generally accepted in Sweden, applying the Swedish Accounting Standards Board's (Bokföringsnämnden, BFN) recommendations and the Swedish Annual Accounts Act (ÅRL).

Principle of Consolidation

The consolidated financial statements include the accounts of the Parent Company and all subsidiaries in which the company has a voting majority. The inter company transactions and internal profit have been eliminated. The consolidated financial statements have been prepared in accordance with the purchase method, whereby consolidated stockholders' equity includes equity earned only after acquisition. Minority interest in net earnings is reported in the consolidated income statement. Minority interest in the equity of subsidiaries is reported as a separate item in the consolidated balance sheet.

Translation of financial statements in foreign currency

Sony Ericsson's results are presented in EUR which is the reporting currency and the functional currency of the parent company. The group has sales and cost of sales in a large number of currencies. For all companies, including subsidiary companies, the functional (business) currency is the currency in which the companies primarily generate and expend cash. Their financial statements plus goodwill related to such companies are translated to EUR by translating assets and liabilities at the closing rate on the balance sheet day and income statement items at average exchange rates, with translation adjustments reported directly in consolidated equity.

Revenue recognition

Sales revenue is recorded upon the delivery of products according to contractual terms and represents amounts realized, excluding value-added tax, and is net of goods returned, trade discounts and allowances. Sales revenue is recognized with reference to all significant contractual terms when the product has been delivered, when the revenue amount is fixed or determinable and when collection is reasonably assured.

Accruals for sales bonuses such as cash discounts, quarterly and yearly bonuses, quality bonus, co-op and stock protection are shown as deductions from gross sales to arrive at net sales.

For product and equipment sales, delivery generally does not occur until the products or equipment have been shipped, risk of loss has transferred to the customer, and objective evidence exists that customer acceptance provisions, if any, have been met. The Company records revenue when allowances for discounts, price protection, returns and customer incentives can be reliably estimated. Recorded revenues are reduced by these allowances. The Company bases its estimates on historical experience taking into consideration the type of products sold, the type of customer, and the type of transaction specific in each arrangement.

Costs related to shipping and handling are included in cost of sales in the Consolidated Income Statement.

Research and development costs

Research and development costs are charged to expenses as incurred. Expenses related to the third party development of new platforms for mobile phones are capitalized as other non-current asset and are amortized when the platforms are put into commercial use. Such costs are capitalized as intangible assets when technological feasibility has been established and when future economic benefits can be demonstrated.

Hedge accounting

The Group applies hedge accounting for financial instruments intended to hedge foreign currency exposures having a future impact on results.

SONY ERICSSON MOBILE COMMUNICATIONS

At the point in time at which the contract is established, the relationship between the hedging instrument and the hedged item is documented, as well as the purpose of this risk management and the strategy for taking various hedging measures. The company also documents its assessment, both when the contract is entered into and on an ongoing basis, as to whether the derivative used in the hedging transaction is effective in counteracting changes in fair value or income statement effects, in terms of the hedged items in question.

The hedging is designed in such a manner as to ensure, to the greatest degree possible, its effectiveness. The changes in fair value for those derivative instruments which do not meet the conditions for hedge accounting are reported directly in the income statement.

Future foreign currency exposures are hedged primarily by forward cover agreements but also via currency options. The effective portion of changes in the fair value of hedging instruments is recognized in equity. Any gain or loss relating to the ineffective portion is recognized in the income statement. Amounts accumulated in equity are recycled in the income statement in the periods in which the hedged item affects profit or loss, for example, when the forecasted sale which is hedged takes place.

Intangible and tangible fixed assets

Intangible and tangible fixed assets are stated at cost less accumulated depreciation and impairment losses. Annual depreciation is reported as plan depreciation, generally using the straight line method with estimated useful lives ranging from 3 years up to 10 years for machineries and equipments. Intangible assets are amortized over a period ranging from 3 years up to 5 years or based on the contract's economic reality. Land improvements are amortized in 20 years. The costs of computer software developed or obtained for internal use are capitalized as intangible assets when technological feasibility has been established and when future economic benefits can be demonstrated.

Tooling

Tooling owned by Sony Ericsson but used in its manufacturing partners operations is capitalized and amortized over useful life.

Financial assets

Financial assets that are intended for long-term holding are accounted at acquisition value and depreciations are made if a permanent decrease in the value can be stated. These assets include strategic long-term investments in private companies over which Sony Ericsson does not have the ability to exercise significant influence.

Impairment test of assets

Impairment tests are performed on a regular basis whenever there is an indication of possible impairment. An impairment loss is determined based on the amount by which the carrying value exceeds the fair value of those assets.

Leases

Leases on terms in which Sony Ericsson assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset, although the depreciation period would not exceed the lease term. Other leases are operating leases, and the leased assets under such contracts are not recognized on the balance sheet. Costs under operating leases are recognized in the income statement on a straight-line bases over the term of the lease. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease. Sony Ericsson has not identified any financial leases for the reported periods.

SONY ERICSSON MOBILE COMMUNICATIONS

Income tax

Reported income tax includes tax, which is to be paid or received, regarding the current year, adjustments concerning the previous years' current taxes and changes in deferred taxes.

All income tax liabilities and receivables are valued at their nominal amount according to the tax regulations and are measured at the tax rate that is expected to be applied to the temporary differences when they reverse, based on the tax laws that have been enacted or substantively enacted by the reporting date. An adjustment of deferred tax asset/liability balances due to a change in the tax rate is recognized in the income statement unless it relates to a temporary difference earlier recognized directly in equity, in which case the adjustment is also recognized in equity.

In the case of items reported in the income statement, the related tax effects are also reported in the income statement. The tax effects of items that are accounted for directly against equity are also reported directly against equity.

Deferred tax is calculated according to the balance sheet method on all temporary differences arising between the reported value and the tax value of the assets and liabilities.

Receivables

Receivables with maturities greater than 12 months after balance sheet date are reported as fixed assets, and other receivables as current assets. Receivables are reported in the amounts at which they are expected to be received, on the basis of individual assessment.

Accounts Receivables

Accounts receivables are reported as current assets in the amounts at which they are expected to be received net of individual bad debt assessment.

Inventories

Inventories, which include the cost of materials, labor and overhead, are measured at the lower of cost or net realizable value on a first-in, first-out (FIFO) basis. Risk of obsolescence have been measured by estimating market value based on future customer demand and customer acceptance of new products.

Borrowings

Borrowings are reported initially at fair value, net of transaction costs incurred. If the reported amount differs from the amount to be repaid at maturity date, then the difference is allocated as interest expense or interest income over the tenure of the loan. In this manner, the initial amount reported agrees, at maturity date, with the amount to be repaid.

Financial liabilities first cease to be reported when they have been settled on the basis of repayment or when repayment has been waived.

All transactions are reported on settlement date.

Provisions

Provisions are made when there are legal or constructive obligations as a result of past events and when it is probable that an outflow of resources will be required to settle the obligations and the amounts can be reliably estimated. However, the actual outflow as a result of the obligation may differ from such estimate.

Warranty provisions include provisions for faulty products based on estimated return rates and costs. The best estimate is based on sales, contractual warranty periods and historical failure data of products sold.

SONY ERICSSON MOBILE COMMUNICATIONS

Post-employment benefits

The Group has both defined benefit and defined contribution plans.

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions. The contributions are recognized as employee benefit expenses when they are due.

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee or former employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. The Group is responsible for the fulfillment of the pension obligation. Part of the pension plans in Sweden is secured through an insurance solution with the insurance company Alecta. This part is classified as a multi-employer defined benefit plan. It has not been possible, however, for Sony Ericsson to get sufficient information to account for the plan as a defined benefit plan. The plan has therefore been accounted for as a defined contribution plan.

The schemes are both funded and unfunded.

The liability or receivable recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, unrecognized actuarial gains and losses and unrecognized past service cost.

Independent actuaries using the Projected Unit Credit Method calculate the defined benefit obligations and expenses annually. This method indicates that past-service costs are amortized on a straight-line basis over the vesting period. The present value of the defined benefit obligation is determined by discontinuing the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains and losses, arising from experience adjustments and changes in actuarial assumptions, to the extent these exceed 10% of the pension obligations' present value or the fair value of plan assets are charged or credited to income over the employees' expected average remaining working lives. The used principle for defined benefit plans is only effective in the consolidated financial statements.

Contingent liabilities

The Business records a liability when a loss is known or considered probable and the amount can be reasonably estimated. If a loss is not probable or a probable loss cannot be reasonably estimated, a liability is not recorded. If a reasonable estimate of a known or probable loss is a range, and no amount within the range is a better estimate, the minimum amount of the range is accrued. Legal costs expected to be incurred in connection with loss contingencies are expensed as incurred.

Statement of Cash Flow

Foreign subsidiaries' transactions are translated at the average exchange rate during the period. Subsidiaries purchased and/or sold, net of cash acquired/sold, are reported as cash flow from investment activities and do not affect reported cash flow from operations. Cash and cash equivalents consist of cash and bank and short term cash investments. The statement of Cash Flow for 2004, 2005 and 2006 complies with International Accounting Standards (IAS) No. 7.

Related party transactions

Transactions and balances related to Sony and Ericsson are classified as external items.

SONY ERICSSON MOBILE COMMUNICATIONS

Changed accounting principles 2005

As per 1 January 2005, the Group and parent company changed the principles for hedge accounting, which implies that the effective portion of the change in fair value of unrealized currency hedging effects is reported in equity. The effects of this principle are disclosed in Note 15 in the item "Fair value reserve" (TEUR 1 624).

Dividend

Each year the Board of Directors assesses the company's and the group's results and financial position in order to determine the appropriate disposition of earnings. This disposition, including any payment of dividends, is based on a number of factors including: the latest profit and loss account, the company's equity, the company's and the group's cash flows, the equity ratio and liquidity of the company and the group after the proposed dividend in relation to the industry standards in which the company and the group conducts its business, and both the company's and the group's ability to fulfill both their short and long-term obligations.

As a result of this assessment, dividends of TEUR 247,000 were paid in 2006. No dividends were paid in either 2005 or 2004. In April, 2007, the Board of Directors proposed the payment of dividends totaling TEUR 548,000.

5. Income taxes for the year

Income statement

The following items are included in income taxes for the year:

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Current income taxes for the period	(368,308)	(114,810)	(63,108)
Deferred income/expense (-) taxes related to temporary differences	101,252	(15,134)	39,832
Deferred income/expense (-) taxes related to tax loss carryforwards	—	(4,643)	(126,160)
Income taxes for the period	(267,056)	(134,587)	(149,436)

A reconciliation between actual tax income (-expense) for the year and the theoretical tax income (expense) that would arise when applying statutory tax rate in Sweden, 28 percent on income before taxes, is shown in the table:

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Income before taxes	1,297,704	512,039	487,775
Tax rate in Sweden (28%)	(363,357)	(143,371)	(136,577)
Effect of foreign tax rates	29,020	21,687	(2,094)
Current income taxes related to prior years	(876)	745	1,435
Tax effect of expenses that are non deductible for tax purpose	(4,858)	(1,839)	(3,210)
Tax effect of income that are non-taxable for tax purpose	10,014	4,775	646
Tax effect of changes in tax rates	19	(16,584)	5,500
Release of valuation allowance*	62,982	—	—
Tax effect of tax losses carryforwards, net	—	—	(15,136)
Income taxes for the year	(267,056)	(134,587)	(149,436)

* The release of valuation allowance mainly refers to temporary differences in Japan and US.

SONY ERICSSON MOBILE COMMUNICATIONS

Balance sheet

Deferred tax assets and liabilities

Tax effects of temporary differences have resulted in deferred tax assets and liabilities as follows:

	2006	2005
Deferred tax assets	139,621	41,455
Deferred tax liabilities	(13)	643

Deferred tax assets relate to temporary differences due to certain provisions such as warranty and scrap liabilities. Deferred tax assets are amounts recognized in countries where we expect to be able to generate corresponding taxable income in the future to benefit from tax reductions.

Transfer between non-restricted and restricted reserves***	—	17,001	(17,001)	—
Net income for the year	—	—	997,319	997,319
Dividend	—	—	(247,000)	(247,000)
Shareholder's equity December 31, 2006	100,000	722,889	957,720	1,780,609

* Share capital consists of 100 000 200 shares at a quota value of EUR 1 per share.

** The fair value reserve is related to the effective portion of changes in the fair value of hedging instruments that is recognized in equity. Amounts accumulated in equity are recycled in the income statement in the periods in which the hedged item affects profit or loss, for example, when the forecasted sale which is hedged takes place.

*** The transfer between non-restricted and restricted reserves is in accordance with the proposals of the respective companies' boards of directors. In evaluating the consolidated financial position, it should be

SONY ERICSSON MOBILE COMMUNICATIONS

noted that earnings in foreign companies may be subject to taxation when transferred to Sweden and, in some instances, such transfer of earnings may be limited by currency restrictions.

**** Cumulative translation adjustments have been distributed among unrestricted and restricted stockholders equity.

16. Pensions

Sony Ericsson participates in local pension plans in countries in which we operate. There are principally two types of pension plans:

- Defined contribution plans, where the Company's only obligation is to pay fixed pension premiums into a separate entity (a fund or insurance company) on behalf of the employee. No provision for pensions is recognized in the balance sheet other than accruals for premium pensions earned, but not yet paid.
- Defined benefit plans, where the Company's undertaking is to provide pension benefits that the employees will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

In Sony Ericsson most of the companies have defined contribution plans and therefore no pension provisions on the balance sheet. The subsidiaries companies in Japan and UK have defined benefit plans. In Sweden, the total pension benefits are accounted as defined contribution plans, even though the Financial Accounting Standards Council's interpretations committee defined the ITP pension plan, financed through insurance with Alecta as a defined benefit plan. Sony Ericsson did not have access to information from Alecta that would have made it possible for this plan to be reported as a benefit plan.

	Consolidated	
	2006	2005
Pensions and similar commitments	19,409	18,418

The following table summarizes the total pension cost during 2006 for Sony Ericsson:

Total annual pension cost:

2006	Sweden	UK	Japan	Others	Total
Pension cost for defined benefit plans	—	592	3,780	—	4,372
Pension cost for defined contributions plans	24,436	415	—	5,007	29,858
Total	24,436	1,007	3,780	5,007	34,230

Provisions for pensions and similar benefits:

2006	Sweden	UK	Japan	Others	Total
Provision for post-employment benefits	—	4,204	12,734	—	16,938
Other employee benefits	—	—	—	2,471	2,471

Of which CO compensation	1,082	999	901
CO pension costs	190	142	577
bonus & similar to CO	268	269	1,002

Severance pay

For the President and the Corporate Management the following applies. Severance payments are not payable if an employee resigns voluntarily, or if the employment is terminated as a result of flagrant disregard of responsibilities. An exception to this is if the notice of termination given by the employee is due directly to significant structural changes or other events that affect the content of work or the condition of the position. In such an instance,

SONY ERICSSON MOBILE COMMUNICATIONS

the notice is treated as if it were given by the Company and severance payments are made to the individual. Upon termination of employment, severance pay amounting to one years' salary is normally paid. The severance payments will be paid out currently during agreed severance period.

Pension

Sony Ericsson's policy regarding pension is to follow the competitive practice in the home country of the executive. For the president and corporate management there is in principal one pension plan in which the pension based salary is calculated on the fixed salary and a target value of the variable short-term incentive plan. The company pays to the capital insurance company on salary portions in excess of 20 base amounts (one base amount = SEK 39,700) a percentage of the executive's total pension based salary, between 25 and 35 percent per year, depending on the age of the executive.

Long term incentive

Sony Ericsson operates a synthetic option plan for selected employees. The option price is determined on an annual basis by independent valuation and is approved by the Remuneration Committee of the Board. The options granted under the plan will vest in three years. Financial commitments' resulting from the price trend of the synthetic options are reported amongst operating costs and the calculated future payments for such options have been expensed according to following;

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Calculated future payments for synthetic option plan charged to operating costs	20,826	12,018	17,300

At 31 December 2006, a provision in the amount of TEUR 33,415 (TEUR 24,578) was established for payments under the synthetic options plan.

27. Financial risks

Foreign exchange risk — Transaction exposure

Sony Ericsson's results are presented in EUR which is the reporting currency and the functional currency of the parent company. The group has sales and cost of sales in a large number of currencies. The company's hedging activities are designed to mitigate the risk posed by exchange rate fluctuations over time between the EUR and these other currencies. The main part of the net exposure is concentrated to the parent company. The group's currency exposures are hedged up to 6 months. The group's net exposure is to 80% USD, JPY and GBP. The currency exposures are primarily hedged with forward contracts. The market value of derivatives not being used to revalue balance sheet items by December 31, 2006 was EUR -8.4 Million; all of these derivatives were forward contracts. Hence, these losses correspond to net gains in the underlying future sales and purchases during the hedged period.

Foreign exchange risk — Translation exposure

All equity in the groups companies is translated in accordance with the "current method" hence the translation exposure is taken directly in to equity in the balance sheet. This type of currency exposure is not hedged.

Interest rate risk

Sony Ericsson's interest rate risk is primarily derived from cash and short term deposits, other balance sheet items are to a very small extent affected by shifts in the interest rate. Cash and short-term deposits, EUR 2 273 Million at year end, are primarily held in short and medium term money market funds with highest possible rating given the duration.

Credit Risk

Credit risk is divided into two categories; credit risk in trade receivables and financial credit risk.

Credit risk in Trade receivables The value of outstanding trade receivables were at year end EUR 1 653 Million. Provisions for expected losses at year end were EUR 4.4 Million. Over 59% of the trade receivables are towards countries with a country risk in the interval "negligible to moderate".

Financial credit risk

Financial instruments carry an element of risk in that counterparts may be unable to fulfill their payment obligations. These exposures arise in the investments of cash and cash equivalents and from derivative positions with positive unrealized result against banks and other counterparties. Sony Ericsson mitigates these risks by investing cash in a well diversified portfolio of money market funds with the highest possible rating. Part of the liquidity is also deposited with a few chosen banks with the highest possible short-term rating. How much to be invested with each fund and bank is regulated in the policy.

Liquidity risk

The liquidity risk is that Sony Ericsson is unable to meet its short term payment obligations due to insufficient or illiquid cash reserves. At year end Sony Ericsson had a very large net cash position invested in liquid funds and very short deposits with banks. Sony Ericsson has decided to have a minimum cash level of 15% of annual turnover. The company's net cash widely exceeds this requirement at year end.

28. Reconciliation to accounting principles generally accepted in the United States

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Sweden for unlisted companies, applying the Swedish Accounting Standards Board's (Bokföringsnämnden, BFN) recommendations and the Swedish Annual Accounts Act (ÅRL) (the "Swedish GAAP"), which differs in certain significant respects from the generally accepted accounting principles in the United States

SONY ERICSSON MOBILE COMMUNICATIONS

("US GAAP"). Sony Ericsson Mobile Communication has reconciled its net income / loss and equity under Swedish GAAP to the accounting principles according to generally accepted principles in the United States.

The principle differences between Swedish GAAP and US GAAP that affect our net income, as well as our stockholders equity relate to the treatment of business combinations (negative goodwill) and synthetic option plan.

Business combinations — Negative Goodwill

Under both Swedish GAAP and US GAAP, when the fair value of net assets acquired exceeds total purchase price, the Company first assess whether all acquired assets and assumed liabilities have been properly identified and valued. Under Swedish GAAP, negative goodwill is not subject to amortization and any excess remaining after reassessment is recognized in income statement immediately. During 2004, a negative goodwill amounted to TEUR 3 717 was identified by the Company in connection with the acquisition of Beijing SE Putian Mobile Communications Co. Ltd (BMC), and it was recognized in income statement by the end of 2004.

Under US GAAP, the Company must first reassess whether all acquired assets and assumed liabilities have been identified and properly valued. If an amount of negative goodwill still results after this reassessment, all acquired assets (including research and development assets) are then subject to pro rata reduction, except for (1) financial assets other than investments accounted for by the equity method, (2) assets to be disposed of by sale, (3) deferred taxes, (4) prepaid assets relating to pension and other postretirement benefit plans, and (5) any other current assets. If all eligible assets are reduced to zero and an amount of negative goodwill still remains, the remaining unallocated negative goodwill must be recognized immediately as an extraordinary gain. A negative goodwill was identified by the Company amounted to TEUR 3,717, and it was recognized in income statement by the end of 2004. All adjustments according to US GAAP are specified in this report (see separate information for adjustments).

Provision for social security cost on synthetic option plan

Under Swedish GAAP, the Company accrues social security costs for the synthetic option plan during the vesting period. Under US GAAP, no social security cost is recorded until the options are exercised or matching of the options takes place, which increases net income by TEUR 1,472 (TEUR 906 in 2005).

Deferred Income Taxes

Deferred tax is calculated on US GAAP adjustments and the US GAAP balance sheet reflects the gross recognition of deferred tax assets and liabilities.

Non-current and current assets

Swedish GAAP requires deferred tax assets to be classified as non-current assets on the balance sheet. Under US GAAP, deferred tax liabilities and assets are classified as current or non-current based on the classification of the related asset or liability for financial reporting. A deferred tax liability or asset that is not related to an asset or liability for financial reporting, including deferred tax assets related to carryforwards, shall be classified according to the expected reversal date of the temporary difference. The balance sheet shows a difference in non-current and current assets between Swedish GAAP and US GAAP which relates to the classification of deferred tax assets.

Adjustment of net income, comprehensive income, equity and balance sheet items

Application of US GAAP as described above would have had the following effects on consolidated net income.

SONY ERICSSON MOBILE COMMUNICATIONS

Adjustment of Net Income

	2006	2005
Net income per Swedish GAAP	997,319	350,342
US GAAP adjustments before taxes:

SONY ERICSSON MOBILE COMMUNICATIONS

Multi-employer plan

The Swedish ITP pension plan financed through insurance with Alecta is a multi-employer plan defined by Statement of Financial Accounting Standards No. 87, Employers' Accounting for Pensions, and therefore it is accounted for as a defined contribution plan.

Report of Independent Auditors

To the Shareholders of Sony Ericsson Mobile Communications AB

We have audited the accompanying consolidated balance sheets of Sony Ericsson Mobile Communications AB and its subsidiaries as of December 31, 2006 and December 31, 2005 and the related consolidated statements of income and of cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sony Ericsson Mobile Communications AB and its subsidiaries at December 31, 2006 and December 31, 2005, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2006 in conformity with accounting principles generally accepted in Sweden.

Accounting principles generally accepted in Sweden vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 28 to the consolidated financial statements.

/s/ PricewaterhouseCoopers AB

Stockholm, June 17, 2007
