

# enadoc

We are on a mission to help successful organizations use digital technologies to reimagine their client and employee experiences, their culture, and their business model and to help them bring digital transformation to the core of their strategy.

SCAN ME

Digital transformation starts today by fixing the past; digitize documents and replace paper-based or manual processes with efficient cloud-based solutions such as Enadoc DMS and Flowdoh, and continue by integrating with the tools of the modern workplace such Microsoft Teams and SharePoint.

With over 100 clients, the affordable, modern workplace solutions by Enadoc guarantee better outcomes and returns for all.

**THE FUTURE IS CONNECTED** – and with Megingjord, our block-chain technology - authenticated, secure, and compliant.

# OUR SOLUTIONS

## enadoc

Capture document with desktop- or high-volume scanners or use our free mobile companion app. Tag documents with keywords. Find documents through our distinct Tag Cloud, Advanced Search or from a host of 3rd party applications such as SharePoint, ERP, CRM, HRMS, and many more. Enadoc uses Ai based Computer Vision to convert images to text and Cognitive Services such as language understanding, text analytics, natural language processing, sentiment analysis and key phrase extraction to improve search and create our characteristic Tag clouds. Enadoc's user interface (UI) front end is light and minimalist, easy to learn and adapt while the back-end is complex enough to satisfy the most challenging requirement.

## flowdoh

Transform your organization with efficient collaboration and optimized, automated processes through our low-code workflow and robotic process automation engine. Do away with costly, lengthy development timelines. Customize and create forms, define, and trigger workflows. Get valuable Ai based insights and visualizations for your organization and respond with agility to changing needs. Revise existing processes on the fly, and rapidly deploy new apps in hours. Build for collaboration and fully integrated with Microsoft Teams and SharePoint.

Protect and validate the authenticity of your processes, workflow, and documents through our blockchain private ledger technology.

Megingjord enables organizations to verify documents such as land titles, birth certificates, audit reports, purchase orders, and other certificates, even if distributed publicly, preventing unauthorized distribution of critical digital assets.

## OTHER SOLUTIONS:

**ENADOC FOR HR, ENADOC FOR KYC, ENADOC LEGAL, ENADOC SKALE, ENADOC CAPTURE 365**

### CONNECTED STANDARDS PLATFORM

While all our solutions are ready to implement with zero-coding, we provide extensive customization and integration points using API and RESTful API following the swagger specification conforming to the JSON standards.

### MICROSOFT ISV & CO-SELL READY

Enadoc is a recognized Microsoft Independent Software Vendor (ISV) and Co-Sell partner featured in Microsoft's solutions catalog. Enadoc, Microsoft partners and consultants have empowered hundreds of organizations across many industries and in public administration.

# GO GREEN WITH ENADOC

**Enadoc** is green pledge company; our solutions help companies reduce their carbon footprint and software development, testing and delivery use run 100% Microsoft Azure cloud services.

By the end of **2021**, our Enadoc software development campus will be 100% powered by renewable energy. But we didn't stop there, to compensate for the carbon we do emit thru commute and travel we adopted a 150,000sqm forest, and we have a no plastic policy in all our offices.

Co-Founded in 2016, by IT entrepreneurs Wasantha Weerakoone and Lars Jeppesen, Enadoc is a spin-off from leading regional systems integrator and Microsoft Partner Tech One Global. Today Singapore is our home, with other offices, developers and designers in Sri Lanka and the Philippines, and partners across the world
