

Innovation to advance the Quality of Patient Care

Discover the latest suite of technologies from ASP™

Enhance Compliance Automatically

Discover an unprecedented level of interconnectivity that facilitates productivity and enhances compliance.*

ASP™ technologies now work together to help prevent mistakes before they happen. On-screen, step-by-step instructions with automatic checkpoints help enable compliance with Instructions for Use (IFU) and hospital policy.

- Biological indicator (BI) usage reminders
- Cycle selection and load placement instructions
- Test BIs linked with corresponding control BI
- Automatic and immediate reconciliation of sterilizer cycle and BI results
- Automated record keeping
- Records accessible and audit-ready

ASP ACCESS™ Technology

Smart information-sharing technology that enhances compliance and easily integrates with instrument tracking systems (ITS) and hospital networks

STERRAD VELOCITY™ Biological Indicator System

Results in 15 minutes enable healthcare facilities to reduce the risk of releasing instruments prior to BI confirmation

STERRAD™ Systems with ALLClear™ Technology

ALLClear™ Technology minimizes workflow interruptions and user errors to drive compliance

* ASP ACCESS™ Technology, STERRAD™ Systems with ALLClear™ Technology, and the STERRAD VELOCITY™ Biological Indicator System have features that may enhance compliance, including BI reminders per hospital policy, and on-screen reinforcement of user training.

STERRAD™ Systems with ALLClear™ Technology

Just LOAD and GO

Trusted sterilization from the only system with automated reconciliation of sterilization cycle and BI records

Now featuring ALLClear™ Technology, the STERRAD™ 100NX System and the STERRAD NX™ System are products designed to maximize efficiency and compliance* in the CSSD.

01 Reduce workflow interruptions

- Fast, accurate detection and correction of load and system issues

System Check

System diagnostics process completes prior to the sterilization cycle

Moisture Detection & Correction

Automatically detects and removes moisture

Instrument Warming

Plasma transfers energy into the load, removing gas and warming instruments

02 Enhance compliance automatically*

- Quality control that enhances compliance with hospital policy and IFUs
- Minimize the need for manual record keeping

03 Designed with simplicity in mind, to reduce the potential for human error

- Enhanced user interface enables fast and easy staff training

* STERRAD™ Systems with ALLClear™ Technology have features that may enhance compliance, such as BI reminders per hospital policy, and on-screen reinforcement of user training.

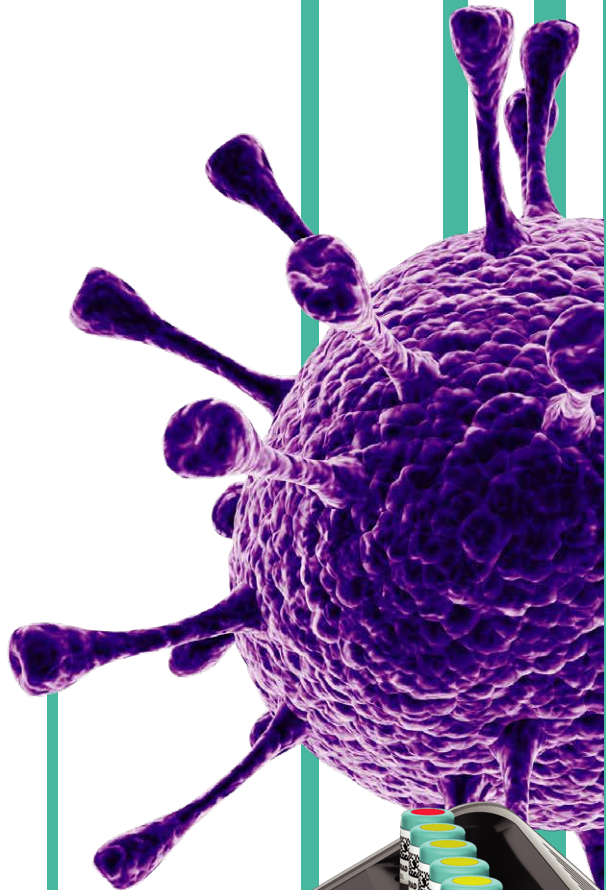

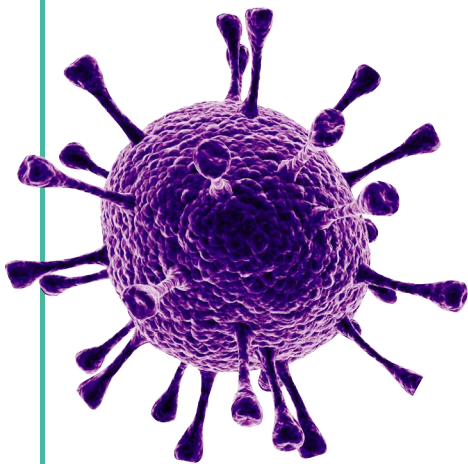

STERRAD VELOCITY™

Biological Indicator / Process Challenge Device

RESULTS IN 15 MINUTES*

Smart BI/PCD technology that is fully integrated with all the latest features of STERRAD™ System sterilizers

- The first all-in-one Process Challenge Device designed by ASP specifically for all STERRAD™ System Cycles to minimize false positives
- Enables healthcare facilities to reduce the risk of releasing instruments prior to BI confirmation
- Provides the protection of the only rapid read Process Challenge Device (PCD) for STERRAD™ Systems that meets the elevated standard of AAMI recommended guidelines (ST58 9.5.4.3)

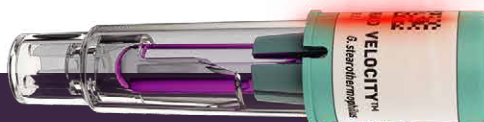

*15 or 30 minutes to result dependent on the software version on the STERRAD VELOCITY™ Reader

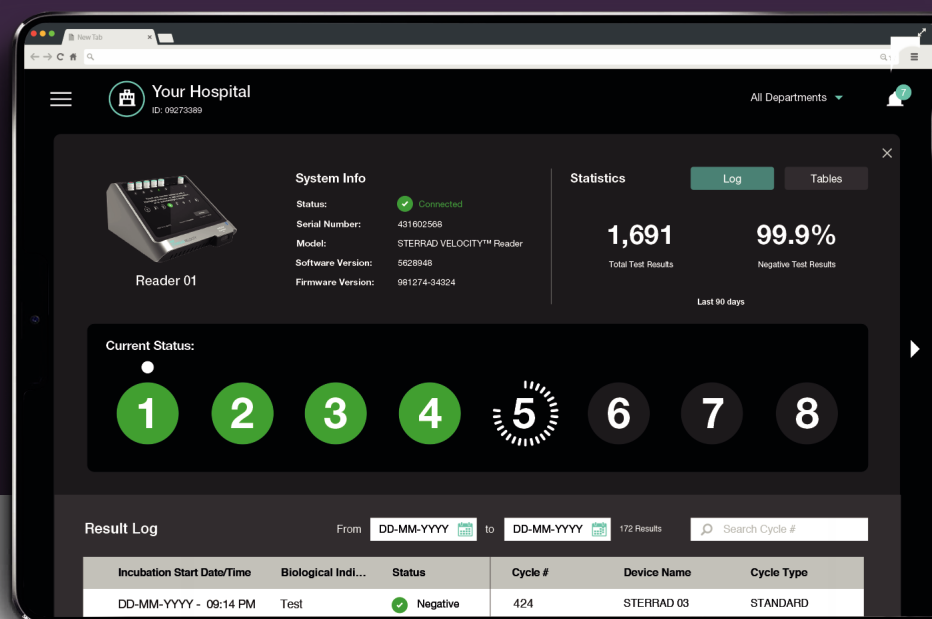

Engineered to be easy to use

- Intuitive on-screen guidance enable correct operation, reducing the incidence of user error

Enhanced compliance* through connectivity

- Reduces the need for manual record keeping through automated correlation of BI results and sterilization cycle records¹
- Communicates across STERRAD™ Systems, ITS, and hospital networks through connection with ASP ACCESS™ Technology

* The STERRAD VELOCITY™ Biological Indicator System has features that may enhance compliance, including BI reminders per hospital policy, as well as improved record handling and record keeping. 1 Automated integration of information requires connection to ASP ACCESS™ Technology.

ASP ACCESS™ Technology

CONNECT. CORRELATE. COMMUNICATE.

ASP ACCESS™ Technology facilitates communication between STERRAD™ Systems, STERRAD VELOCITY™, ITS, and hospital networks

Delivers smart information-sharing technology designed to enhance compliance* and provide unique workflow insights

01

Automatically and immediately communicates important sterilizer cycle results and system status changes to connected devices

- Cloud technology enables staff to receive alerts via email and text

02

Keeps data accessible and ready for review

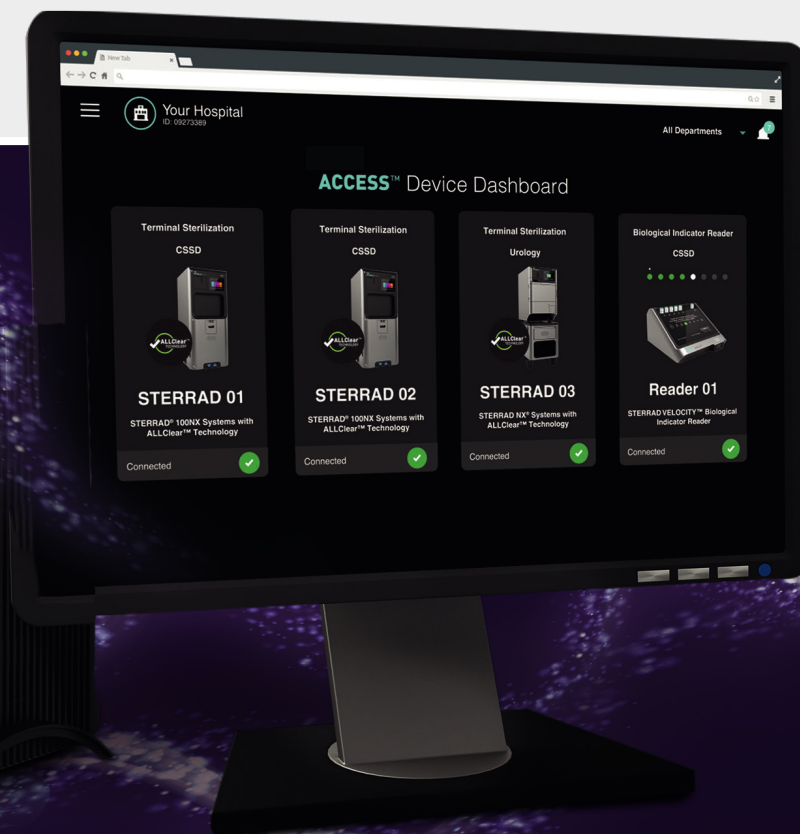

- Seamless collection of vital reprocessing information reduces the risk of human error by simplifying the documentation process
- Cloud technology enables immediate access to sterilization records for multiple departments and hospital sites

ITS

INSTRUMENT
TRACKING SYSTEMS

HOSPITAL NETWORK

* ASP ACCESS™ Technology has features that may enhance compliance, including automatic reconciliation of sterilization records and communication with hospital networks and instrument tracking systems, to improve record handling and record keeping.
