## Mini-light Project Kits

LED key ring light kits designed as an introduction for Key Stage $\mathbf{2}$ \& $\mathbf{3}$ students to design and make in electronics. Project notes are available as a free PDF download, at www.rapidonline.com and are designed to be photocopied for class and teacher use.

Notes include suggested lesson plans and mapping to the National Curriculum, an introduction to circuits and symbols, batteries, LEDs and pricing and costing exercises and a series of homework assignments to support work in class.

- Students start by investigating the need for security and the problems of using locks in the dark
- They can then complete the design process of a mini-light, which can be attached to a key ring
- With careful organisation it should be possible to manufacture the design without specialist workshop facilities
- The component kits include batteries and LEDs, plastazote foam core and high impact polystyrene outer layers
- Available in four styles:
- Standard Mini-light is a keyring torch kit using a red LED
- Super-bright Mini-light is an updated version using a modern white LED
- Rainbow Mini-light has a random colour-changing LED
- Ultraviolet Mini-light has a UV LED and can be used for revealing security coding on banknotes, etc.
- Suitable for Key Stages 1, 2 \& 3 (ages 5 to 14 )
- Kits are supplied in packs of 5

| Type | Order code | $1+$ |
| :--- | :--- | :---: |
| Red | $\mathbf{7 0 - 0 0 1 5}$ | 2.73 |
| White | $\mathbf{7 0 - 0 0 1 2}$ | 4.24 |
| Rainbow | $\mathbf{7 0 - 0 0 1 3}$ | 4.65 |
| Ultraviolet | $\mathbf{7 0 - 0 0 1 4}$ | 5.19 |

## =Rapid

Mini-light Project Classpacks
This simple but interesting project has been designed by Rapid's technical team for Key Stages 1,2 \& 3 students. It will help them to make a fully working mini-light from the parts supplied in this great kit. All the notes for making this kit are available as a free download from: www.rapidonline.com The classpack is supplied in a handy storage tray with lid, containing sufficient components for 20 mini-lights.

- Batteries and LEDs
- Plastazote foam core
- High impact polystyrene outer layers
- Available in four styles:
- Standard Mini-light is a keyring torch kit using a red LED
- Super-bright Mini-light is an updated version using a modern white LED
- Rainbow Mini-light has a random colour-changing LED
- Ultraviolet Mini-light has a UV LED and can be used for revealing security coding on banknotes, etc.
- Suitable for Key Stages 1,2 \& $\mathbf{3}$ (ages 5 to 14)
- Supplied in classpacks of 20
- Also available in an assorted classpack of 20, containing 5 of each type

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| Standard classpack | $\mathbf{1 3 - 0 1 3 8}$ | 14.39 |
| White classpack | $\mathbf{1 3 . 0 1 5}$ | 18.38 |
| Rainnow claspack | $\mathbf{1 3 . 0 1 5 6}$ | 19.92 |
| Assorted classpack | $\mathbf{1 3 . 0 1 5 8}$ | 17.36 |

## =Rapid

## Moisture Tester Project

=Rapid Moisture Tester Project Classpack
The kits contain all the electronic components required, except the PCBs, which are available separately. This provides the option to buy ready-made PCBs or for students to make their own.

The moisture tester project has been designed as an introduction for Key Stage $\mathbf{2}$ \& $\mathbf{3}$ students to the use of resistors and transistors in circuits.

Teachers notes are available to download from www.rapidonline.com/ pdf/70-0030e.pdf.

- Students start by investigating the care of house plants and the problems associated with incorrect moisture content of soil
- Downloadable information and activity sheets then guide the students through a series of exercises to build background knowledge in the use of resistors and transistors in circuits
- For manufacture, the project allows the teacher to select from two alternative methods of circuit construction, either self adhesive copper tape onto card or on a printed circuit board (available separately) see order code 34-0635
- Upon completion of manufacture students are then guided through an evaluation of their work
- They also have the option of producing a 3D model using high density polystyrene foam illustrating how they might develop a final product if the design were manufactured commercially
- Project notes are available for free download and are designed to be photocopied for class use
- They include both detailed student and teacher notes, which contain suggested lesson plans, mapping to the National Curriculum and a series of structured homework assignments to support the work in class
- The component kits are supplied in multiples of 5 and include:
- All components including LEDs, battery clip, resistors and transistors

The project can be produced using PCB available or self adhesive copper tape (see PCB products section)

- Suitable for Key Stages 2 \& 3 (ages 7 to 14)

Each kit requires 1x PP3 battery (not included).

- Youtiobe

A classpack of 20 kits of components to build a functional Moisture Tester that can tell if pot plants require water. The classpack contains all the electronic components required, including ready-made PCBs, in a Gratnell's Tray with lid. It offers a substantial saving compared to parts bought separately.
Students will love this Moisture Tester Project, which is linked to the National Curriculum, as it is simple to assemble and is ideal as an introduction to electronics.

- Dimensions of the box: $43 \mathrm{~cm} \times 31 \mathrm{~cm} \times 7 \mathrm{~cm}$
- Great school resource
- Suitable for Key Stages 2 \& 3 (ages 7 to 14)
- Supplied as a pack

Each kit requires 1x PP3 battery (not included).
Classpack contains:

| Classpack contains: |  |  |
| :--- | :--- | :---: |

## 555 Timer Project Kits

The timer project has been designed as an introduction to the use of the NE555 monostable and resistor-capacitor timing circuits.

- Students start by investigating the need for an accurate timer and are then led through the complete design process

- Upon completion of manufacture, students evaluate their work and start to look into commercial product development
- The information and activity sheets guide the students through a series of exercises, including the use of Crocodile Clips software, to build up knowledge in the use of the NE555 monostable within circuits
- Project notes are available and are designed to be photocopied for class use
- They include both detailed student and teacher notes, which contain suggested lesson plans, mapping to the National Curriculum and a series of structured homework assignments to support the work in class
- The component kits are supplied in multiples of five and include: NE555 and IC holder, resistors and capacitors, buzzers and LEDs, switches and potentiometer and battery clips
- Pre-drilled PCBs are available separately in packs of $\mathbf{5}$, order code 70-0060
- Suitable for Key Stage 3 (ages 11 to 14)

Each kit requires $1 \times$ PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| Class set of 5 kits | $\mathbf{7 0 - 0 0 5 0}$ | 9.08 |
| PCB pack of 5 | $\mathbf{7 0 - 0 0 6 0}$ | 3.66 |

## =Rapid 555 Timer Project Classpack of 20

Your chance to buy a classpack of 20 Timer Project kits offering a substantial saving. Linked to the National Curriculum and supplied in a handy storage tray, complete with lid.

- Great school resource
- Suitable for Key Stage 3 (ages 11 to 14)
- Supplied as a pack of 20 kits

Each kit requires 1x PP3 battery (not included). Each student will also require: $4 \times$ M3 6 mm pan head slotted screws (available as order code $\mathbf{3 3 - 1 5 0 0}$ ), $4 \times$ M3 12 mm pan head slotted screws (33-1510), $4 \times$ M3 spacer 4 mm (33-3632) and $4 \times 18 \mathrm{~mm}$ threaded spacers (33-3535).

## Classpack contains

| Classpack contains |  |  |
| :--- | :--- | :--- |
| 4x Timer project kit (pack 5) | $\mathbf{7 0 - 0 0 5 0}$ |  |
| $4 \times$ Timer projecck kit PCBS (pack 5) | $\mathbf{7 0 - 0 0 6 0}$ |  |
| 1× Shallow tray | $\mathbf{1 4 - 0 4 3 0}$ |  |
| 1x Tray lid | $\mathbf{1 4 - 0 4 3 6}$ |  |
| Type | Order code | $1+$ |
| Timer Classpack | $\mathbf{1 3 - 0 1 0 4}$ | 37.14 |

## =Rapid

## Set of 5 Logic Alarm Project Kits

This project is designed to cover key topics in electronic based exam courses at GCSE level.

- Each unit of work will offer students an opportunity to build a fundamental circuit and incorporate this with their own design
- The student notes are also supported with a set of teaching notes outlining the areas of the syllabus covered, suggested lesson plans and mapping to the National Curriculum
- Care has been taken to ensure that this project provides schools with a cost-effective, flexible method of offering a practical class based assignment
- The Logic Alarm project is an ideal way to introduce students to logic circuit theory and design
- The notes guide students through the fundamentals of logic, the use of truth tables, common logic gates and the design of combination circuits
- The notes also look at the difference between TLL and CMOS based ICs and their use in project work
- Detailed worksheets can be used in conjunction with Crocodile Clips and PCB Wizard software with a range of homework based assignments
- All circuit design is developed from a systems approach

The component kits are supplied in multiples of five and include

- ICs and switches

- Resistors and capacitors
- Piezo sounders and battery clips
- Pre-drilled PCBs are available separately in packs of 5, order code 70-0085
- Suitable for Key Stages $\mathbf{3}$ \& 4 (ages 11 to 16)

Requires 1x PP3 battery per kit (not included).

## =Rapid

Uncased 16GB USB Memory
Stick Module
Fully-functional uncased
memory sticks, ideal for
allowing students to design
and make their own case.
The finished product is a practical item that students can keep for transporting
homework and other data.
The rear section of the PCB
from the front of the rectangular hole does not have any components on it so can be used for fixing part of the case. Case designs should not protrude any further than the front of the circuit board so that the USB connector is not obscured. The maximum thickness of the PCB and components is 5 mm .
The memory stick is an ideal basis for a 3D Printing Project to design and make a suitable case. The cases are relatively small, use only a small amount of filament and are reasonably quick to print. Some 3D printers allow several cases to be printed at once.

- 16GB memory capacity
- USB connection
- On-board LED indicator
- Overall dimensions $14 \times 5 \times 60 \mathrm{~mm}$
- Ideal 3D printer project

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Uncased 16GB stick | $19-9996$ | 4.51 |

## =Rapid

## Flashing LED Christmas Tree Project Kit

A kit of parts for a simple to build
festive project. Supplied with comprehensive instructions. Ideal as a one lesson end of term project.

- Size of finished tree: height 105 mm , width (max.) 65 mm
- Available individually and as a money-saving classpack of $\mathbf{3 0}$ kits supplied in a Gratnells tray
- Suitable for Key Stage 3 (ages 11 to 14)
Each kit requires 1x PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| Christmas tree kit | $\mathbf{7 0 - 1 0 0 0}$ | 3.81 |
| Classpack of 30 | $\mathbf{7 0 - 1 0 0 5}$ | 55.55 |

## Rapid

Clap Switch Project
Build a switch circuit that responds to sharp sounds like clapping your hands, etc.

- Kit contains all components including circuit board
- 3A changeover relay outpu
- Circuit counts two claps before operating to avoid false triggers

- Operates from 6 to 20 V
- Component count 36
- Circuit board dimensions: $55 \times 50 \mathrm{~mm}$
- Also available as a money-saving classpack of $\mathbf{2 0}$ kits packed in a Gratnells tray
- Suitable for Key Stages 2, $\mathbf{3}$ \& $\mathbf{4}$ (ages 7 to 16)

| Type | Order code | $1+$ |  |
| :--- | :--- | :--- | :---: |
| Clap switch project | $\mathbf{7 0 - 2 5 7 0}$ | 4.62 |  |
| Classpack of 20 | $\mathbf{7 0 - 2 6 0 2}$ | 74.44 |  |

| PCB for clap switch project kit | $\mathbf{7 0 - 2 5 7 1}$ | 0.62 |  |
|  |  |  |  |

## =Rapid

## Audio Amplifier Project Kits

Aimed at Key Stage 3, the audio amplifier project provides teachers with a stimulating and inexpensive project through which to study the subject of amplification.
This schools projects package contains a comprehensive selection of components for schools working on audio related projects linked to the National Curriculum. The classpacks of 20 projects include PCBs and offers a worthwhile saving over parts bought separately which is ideal for schools working to tight budgets.
Teaching resources are available for free download at www.rapidonline.com

- Students have the opportunity to build a small amplifier, which can be incorporated into a variety of product designs, e.g., as an amplifier for a personal CD / MP3 player so that they can share their music with their friends
- The students have a number of design situations to select a starting point from, and they are provided with research topics and background material to help build understanding for their chosen design brief
- The student notes provide material for students to explore how a range of simple amplifier circuits work
- They also include guidance on the design and construction of speakers
- To support students during the construction of the circuit, detailed instructions have been included on how to assemble the amplifier, and how to integrate the circuit into student designs
- In addition, care has been taken, through extensive evaluation of the teaching material and PCB designs in schools, to ensure that the circuits are easy and robust enough for student manufacture
- A detailed set of teacher notes is available which includes suggested lesson plans and mapping to the National Curriculum
- The project notes have been designed for photocopying for class use

## =Rapid

## AM Radio Project

This project offers students a cost-effective way to build an AM tuner that is easy to incorporate into a variety of design situations. The Printed Circuit Board (PCB) can be either purchased ready made, or students can manufacture their own from the mask provided in the notes. Project notes are available for free download at www.rapidonline.com and can be photocopied for class use.

- Based on the TA-7642, an updated version of the popular MK484 IC
- Needs only a few external components to build a high quality AM radio
- They contain both detailed teacher and student sections, providing research information, and structured tasks

## Each kit contains the following:

- TBA820M audio amplifier and IC socket
- Resistors, capacitors, and LED
- Switch and connecting jack socket
- Connecting cable
- Speaker and speaker cable
- Battery clip
- Available in packs of 5 kits, 70-0180, (no PCBs)
or classpacks of 20 packs (including PCBs)
- Classpack of 20, 13-0106, is supplied in a $43 \times 31$ $x 7 \mathrm{~cm}$ Gratnells tray
- Classpack of 20, 13-0105, has an enclosed battery box and is supplied without the Gratnells tray
Each kit requires 1x PP3 battery (not included).
Pre-drilled PCBs are available separately in packs of 5, order code 70-0190 (Included in Classpacks of 20, 13-0105 \& 13-0106).

-The notes explain in detail how radio signals are transmitted and received

- They also look at how the design of radios has been influenced by style and technology of the day, from the first radios of the 1900's, through the introduction of the transistor, right up to todays digital radios
- Students are offered a variety of starting design briefs and guidance on how to develop their ideas
- Detailed diagrams and instructions support the radio circuit construction, and the notes provide suggestions for possible case designs and methods of manufacture
- The teacher section of the notes includes suggested lesson plans and mapping to the National Curriculum and a range of homework assignments
The component kits are supplied
in multiples of five and include:
- TA-7642 and transistors

Ferrite rods and wire

- Tuning capacitors and switches
- Battery holders and jack sockets
- Resistors and capacitors
- Screws, nuts and washers
- Schools have the choice to either purchase a PCB or manufacture their own from the mask provided in the notes
- Suitable for Key Stages $\mathbf{3}$ \& 4 (ages 11 to 16)
- Pre-drilled PCBs are supplied separately in packs of 5, order code 70-0120.

## Stereo Audio Amplifier Kit

This project kit is a stereo version of our popular Audio Amplifier Project, 70-0180. Once assembled, the amplifier can be connected to MP3 players, laptops or any other device with a 3.5 mm headphone
 jack socket.

The kit contains all components, speakers, printed circuit board and connecting cable. It is available in packs of 5 kits or as a class pack of 20 kits.

- Stereo version of the popular Audio Amplifier Project, order code 70-0180
- Can be connected to MP3 players, laptops or any other device with a 3.5 mm headphone jack socket
- Kit contains all components, speakers, printed circuit board and connecting cable
- Available in packs of $\mathbf{5}$ kits or as a class pack of $\mathbf{2 0}$ kits Each kit requires a 9V, PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| Pack of 5 | $\mathbf{7 0 - 0 1 9 8}$ | 18.60 |
| Class pack of 20 | $\mathbf{7 0 - 0 1 9 9}$ | 69.21 |
| Empty PCB only | $\mathbf{7 0 - 0 1 9 7}$ | 1.14 |

### 2.5W + 2.5W Stereo Audio Amplifier Kit

This stereo audio amplifier kit gives you more power and more volume than our standard kits. Each channel can deliver up to 2.5 W per channel for a louder, crisper sound. The kit is available with
 speakers or without if you would prefer to add your own

- Kit includes PCB and all components to make one stereo amplifier
- 2.5W power per channel
- Connecting cable supplied
- Available with or without speakers
- Requires $4 \times$ AA batteries (not included)
- Empty printed circuit board also available separately

| Type | Order code | $1+$ | $20+$ |
| :--- | :--- | :--- | :--- |
| 2.5W - No Speakers | $\mathbf{7 0} 0.0186$ | 6.04 | 4.84 |

| PCB Only | $\mathbf{7 0 . 0 1 9 4}$ | 1.97 |  |

## Rapid

## 10W + 10W Stereo Amplifier Kit

Our most powerful audio amplifier kit has 10W per channel, meaning it can drive much larger speakers to give a loud, clear sound. The kit is available with speakers or without if you would prefer to add your own

- Kit includes PCB and all components to make one stereo amplifier
- 10W power per channel
- Connecting cable supplied
- Available with or without speakers
- Requires 4x AA batteries (not included)
- Empty printed circuit board also available separately

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| 10W - No Speakers | $\mathbf{7 0} 0188$ | 6.98 |
| 10W - ith Speakers | $\mathbf{7 0} 0189$ | 11.25 |
| PCB Only | $\mathbf{7 0 . 0 1 9 5}$ | 1.97 |

POV Wand Project

Build this PIC based kit which uses the persistence of vision (POV) of the human eye to create the illusion of a message being written in mid-air. Instruction details are available for free download at www.rapidonline.com and are designed to be photocopied for class use.

- Programmable - create your own messages up to 6 characters long
- 57 pre-defined characters
- Complete set of components including printed circuit board
- Ideal demonstration of PIC controlled electronics and construction
- Component count 25
- Also available as a money-saving classpack of 20 kits packed in a Gratnells tray
- Empty PCBs are also available separately
- Suitable for Key Stages 2, $\mathbf{3}$ \& 4 (ages 7 to 16)

Requires $2 \times$ AAA batteries (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| POV wand project | $\mathbf{7 0 - 2 5 5 5}$ | 6.59 |
| Classpack of 20 | $\mathbf{7 0 - 2 5 5 7}$ | 101.39 |

## Rechargeable Solar Buggy

Designed for the purpose of investigating solar cells, this buggy includes a solar panel, a 0.22 F super capacitor and a small circuit board for switching between 'charge' or 'run' modes

In 'charge' mode the capacitor is charged up by the solar panel. In 'run' mode the solar panel is disconnected and the charge stored in the capacitor powers a motor that propels the buggy forwards. The buggy is supplied fully assembled and ready to use.

## Experiments include:

- Charging the solar panel under different types of light source, e.g. tungsten, fluorescent, etc.
- Investigating distance travelled against charge time
- Exploring the effects of coloured filters with the solar panel
- Investigating the effect of charging at various distances from the light source
No batteries required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Solar buggy | $\mathbf{0 6 - 1 5 8 0}$ | 14.94 |

## =RVFM

## Light Sensor Kit Pack of 10

A pack of components to build 10 light sensors, ideal for class projects with students working in small groups.
The general-purpose light-sensing circuit uses a miniature light dependent resistor (LDR) to detect changes in the level of light and switches the LED on or off accordingly. The sensitivity of the circuit can be set by adjusting a potentiometer.

## Pack contains

- 10x PCB
- 10x BC548 transistor
- 10x mini-LDR
- $10 \times 1 \mathrm{k} \Omega$ resistor
- $10 \times 100 \Omega$ resistor
- $10 \times 470 \Omega$ resistor
- 10x standard LED
- $10 \times 47 \mathrm{k} \Omega$ potentiometer
- 10x battery connector
- Designed for use with a 3 to 9 V supply
- Supplied as a pack of $\mathbf{1 0}$ kits

## Temperature Sensor Kit Pack of 10

A pack of components to build 10 temperature sensors, ideal for class projects with students working in small groups.
This general-purpose temperature-sensing circuit uses a thermistor to detect changes in temperature and switches the LED
on or off accordingly.
The sensitivity of the circuit can be set by adjusting
a potentiometer.
Pack contains:

- 10x PCB
- 10x BC548 transistor
- $10 x$ thermistor $(1 \mathrm{k} \Omega)$
- $10 \times 1 \mathrm{k} \Omega$ resistor
- $10 \times 3.3 \mathrm{k} \Omega$ resistor
- $10 x 470 \Omega$ resistor
- 10x standard LED
- $10 \times 10 \mathrm{k} \Omega$ potentiometer
- 10x battery connector
- Designed for use with a 3 to 9 V supply
- Supplied as a pack of $\mathbf{1 0}$ kits

Type Order code $1+$

## =RVFM

## Humidity Sensor Kit Pack of 10

A pack of components to build 10 humidity sensors, ideal for class projects with students working in small groups.

This general-purpose circuit detects changes in humidity and switches the LED on or off accordingly. The sensitivity of the circuit can be set by adjusting a potentiometer.

## Pack contains

- 10x PCB
- 10x BC548 transistor
- 10x humidity sensor
- $10 \times 1 \mathrm{k} \Omega$ resistor
- $10 \times 100 \Omega$ resistor
- $10 x 470 \Omega$ resistor
- 10x standard LED
- $10 \times 5 \mathrm{k} \Omega$ potentiometer
- 10x battery connector
- Designed for use with a 6 to 9V supply
- Supplied as a pack of $\mathbf{1 0}$ kits
Type $\quad$ Order code $1+$

## =RVFM

## Energy Transfer Demonstration Unit

This unit demonstrates
a range of different
energy transfers; for
example, how energy is transferred electrically
from a hand-turned dynamo to a motor. The unit is supplied complete
with a booklet that discusses some of the key teaching and learning issues that surround the energy concept, and provides a series of activities that illustrate how the unit can be used to develop simple and coherent ways of talking about energy.

- Demonstrates a range of different energy transfers
- Unit houses a dynamo, electric fan, solar cell, capacitor and buzzer
- Supplied with booklet containing key teaching and learning topics
- Provides a series of activities

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Energy transfer unit | $\mathbf{0 6 - 1 5 8 4}$ | 114.90 |
|  |  |  |

## Rapid

## 555 Astable/Monostable Project Kit

The 555 Astable/ Monostable PCB projecthas been designed specifically to support and integrate with teaching schemes for Key Stages 3 \& 4. Instruction details are available for free download at
www.rapidonline.com
and are designed to be
photocopied for class use.

- The kit is a timing circuit, which can be used to switch devices or circuits on and off
- Knowledge, skills and understanding can be developed in: component recognition and purpose; PCB circuit assembly and soldering; system and circuit principles; signal tracing and fault finding; product design
- The kit can be used for both class teaching or for individual project work
- All components, including the PCBs, are provided
- The kit includes: resistors and capacitors, NE555 timer, switches and preset resistors, LEDs, wire PCB and PP3 battery clip
- Empty PCBs are also available in packs of 5
- Kit contains components for 5 circuits
- Suitable for Key Stages 3 \& 4 (ages 11 to 16)

Each kit requires 1x PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| 555 project kit | $\mathbf{7 0 - 0 2 2 5}$ | 9.89 |
| Empty PCBS $(5)$ | $\mathbf{7 0 - 0 2 3 0}$ | 7.32 |

## =Rapid

## LDR PCB Project Kit

The LDR PCB project
has been designed specifically to support and integrate with teaching schemes for Key Stages 3 \& 4. Instruction details are available for free download from www.rapidonline.com and can be photocopied
 for class use.

- The kit is a light sensing circuit, which can be used to switch output devices or circuits on and off
- Knowledge, skills and understanding can be developed in: component recognition and purpose, PCB circuit assembly and soldering, system and circuit principles, signal tracing, fault finding and product design
- The kit can be used for both class teaching or for individual project work
- All components, including the PCBs, are provided
- The kit includes: resistors and diodes, transistors and preset resistors, LEDs and relays, LDR PCB and PP3 battery clip
- Empty PCBs are also available in packs of 5
- Kit contains components for 5 circuits
- Suitable for Key Stages 3 \& 4 (ages 11 to 16)

Each kit requires 1x PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| LDR PCB project kit | $\mathbf{7 0 - 0 2 4 5}$ | 24.52 |
| Empty PCBS (5) | $\mathbf{7 0 - 0 2 5 0}$ | 4.16 |

## =Rapid

## Thermistor Temperature Sensor

## Project Kit

The thermisto
temperature
sensorproject has been
designed specifically to support and integrate with teaching schemes
for Key Stages 3 \& 4.

for Key Stages 3 \& 4.
Instruction details are
available for free download at www.rapidonline.com and can be photocopied for class use.

- The kit is a heat sensing circuit, which can be set to recognise various temperatures through the use of a variable resistance
- Knowledge, skills and understanding can be developed in: component recognition and purpose; PCB circuit assembly and soldering; system and circuit principles; signal tracing and fault finding; product design
- The kit can be used for both class teaching or for individual project work
- All components, including the PCBs are provided
- The kit includes: resistors, amplifier IC sockets, diodes, thermistors, preset resistors, transistors, LEDs, thermistor PCB and PP3 battery clip
- Empty PCBs are available separately in packs of 5
- Kit contains components for 5 circuits
- Suitable for Key Stages $\mathbf{3}$ \& 4 (ages 11 to 16)

Each kit requires $1 \times$ PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :--- | :---: |
| Temperature project kit | $\mathbf{7 0 - 0 3 1 5}$ | 14.15 |

| Empty PCBS (5) | $\mathbf{7 0 - 0 2 4 0}$ | 9.71 |
| :--- | :--- | :--- |

## =Rapid

## Keyboard Encoder Project Kit

## The keyboard

encoder project
has beendesigned
specifically to support and integrate with teaching schemes for
Key Stages 3 \& 4 .
Instruction details are
available for free download at www.rapidonline.com and can be photocopied for class use.

- The kit allows students to use a matrix keyboard and encode it to a binary coded decimal number.
- Knowledge, skills and understanding can be developed in: Component recognition and purpose, PCB circuit assembly and soldering, System and circuit principles, Signal tracing and fault finding, Product design
- The kit can be used for both class teaching or for individual project work and all components, including the PCBs are provided
- The kit includes: PIC, resistors, capacitors, voltage regulators, DIL sockets, pin headers, switches, crimp housing, matrix keyboard, thyristors, pan head screws, nuts, LEDs and keyboard PCB
- Kit contains components for 5 circuits
- Suitable for Key Stages 3 \& 4 (ages 11 to 16)

Each kit requires $1 \times$ PP3 battery (not included).

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| Keyboard project kit | $\mathbf{7 0 - 0 3 2 5}$ | 15.62 |
| PCB only - pack of 5 | $\mathbf{7 0 - 0 2 7 0}$ | 5.38 |

## RK Education

## 555 Monostable Projects

This project has been designed to introduce the important concept of timing circuits to students using the 555 monostable circuit. The circuit is very important as it
 features heavily in KS4 curriculums.
It has been designed to have more than one possible outcome and therefore more than one application. It allows for good differentiation and includes a transistor drive circuit.

- Time can be varied with the variable resistor
- Can be used with various trigger inputs
- Battery-powered
- PCB has space for a transistor drive circuit to allow higher powered outputs to be added
- Clear silkscreen text has been used to make construction simpler
- Professional double-sided PCB pre-drilled with silkscreen and solder-resist
- Empty PCBs are available separately, order code 70-9034
- Suitable for Key Stages 2, 3 \& 4 (ages 7 to 16)

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Economy | $\mathbf{7 0 - 6 0 1 2}$ | 2.30 |
| Deluxe with buzzer | $\mathbf{7 0 - 6 0 1 3}$ | 2.46 |
| PCB only | $\mathbf{7 0 - 9 0 3 4}$ | 1.04 |

## RK Education

## 555 Timer Astable Projects

This range of projects has been designed to introduce the important concept of astable timers and pulse-width modulation using a 555 timer astable
 circuit.
Three versions are available - Economy, 70-6017; With drive circuit, 70-6018 and Deluxe, 70-6019. The three kits all use the same PCB, but have a different set of components. Please see Technical Details for more information.
This circuit is very important as it features heavily in KS4 curriculums. The range of projects has been designed to have more than one possible outcome and therefore more than one application.

- Frequency can be varied by adjusting the two variable resistors
- Battery-powered
- Clear silkscreen text has been used to make
construction simpler
- Professional double-sided PCB pre-drilled with silkscreen and solder-resist
- Empty PCBs are available separately, order code 70-9036
- Suitable for Key Stages 2, 3 \& 4 (ages 11 to 16)

## Transistor Switch Projects

This project introduces the transistor switch and is an excellent first electronics/ systems and control project for students.
The project is also excellent for GCSE students as it has been designed with KS4 curriculums in mind. It is a very
 versatile project and
can be used as a moisture sensor, temperature sensor and light sensor. The project has been designed to allow differentiation and has space for up to 5 outputs and a range of inputs including variable resistors.

- A number of different solutions are possible
- Can be used with an LDR, thermistor or moisture sensor
- Battery-powered
- PCB has space for up to five outputs
- Clear silkscreen text has been used to make construction simpler
- Professional double-sided PCB pre-drilled with silkscreen and solder-resist
- A training system, 70-6046, is available to help aid teaching and learning with this project and to help students to arrive at their final solution
- 2 versions available for maximum flexibility
- Available with or without temperature sensor
- Empty PCBs are available separately, order code 70-9040
- Suitable for Key Stages 2, $\mathbf{3}$ \& 4 (ages 7 to 16)

## SCR/Thyristor Projects

This project introduces latching circuits and also other important concepts including different ways of triggering and resetting circuits. There are a number of possible outcomes for the circuit including electronic alarms, an electronic money box, a target game and a
 steady-hand game.

- Different trigger inputs can be used
- Different resets can be used
- Space for up to 3 outputs
- Battery-powered
- Clear silkscreen text has been used to make construction simpler
- Professional double-sided PCB pre-drilled with silkscreen and solder-resist
- Available in 2 versions: economy and complete
- Both versions are supplied with empty PCB, 1x PP3 battery clip, 1x 2N5060G SCR or equivalent, 1x 5mm red LED, $1 \times 270$ ohm resistor, $1 \times 1 \mathrm{k}$ resistor, 1 x 10 k resistor (all 0.25 W ), $1 \times$ SPDT slide switch
- Complete version has additional push-to-make switch and 6V PCB mounting buzzer
- Empty PCBs are available separately, order code 70-9048
- Suitable for Key Stages 2, $\mathbf{3}$ \& 4 (ages 7 to 16)

## Assembled Transistor Switch

 Training KitThis system has been specifically designed to be used alongside the Transistor Switch Project 70-6024. Using this system students can gain an understanding of the operation and application of the transistor switch circuit and this system also helps students make important decisions
that will affect the final

- Curriculum-based
- Allows students to model a light, temperature and moisture sensing circuit
- Allows students to test their designs prior to final construction
- Battery powered to remove the need for power cables and access to power sockets
- Screwless terminal blocks are used to allow students to easily insert different values for the potential divider section
- Clear silkscreen text has been used to aid learning
- Large pads have been included to allow the potential divider, base and collector voltages to be measured using a multimeter
- Professional double-sided PCB with clear white silkscreen and solder-resist
- Suitable for Key Stages 2, $\mathbf{3}$ \& 4 (ages 7 to 16)

## RK Education

RK Education RKL298 H-Bridge Motor Drive IC Project PCB Kit
A kit of parts to build this versatile PCB that has been designed specifically for the L298 H -Bridge motor drive chip. The kit is ideal for DC motor control and robotic projects.
Further details,
schematics and

nstructional notes can
be downloaded from www.rapidonline.com.

- Uses an L298 stepper motor control/driver
- L298 has output current of 2A continuous per channel in DC operation
- Ideal for DC motor control and robotic projects
- Great for use with PIC, PICAXE, Genie, ATMEL and Arduino
- Designed for use in DC motor control and robotic projects
- Maximum output current 2A per channel
- Terminal blocks used for easy interfacing
- Mounting holes for PCB mounts
- Includes smoothing capacitors
- High quality, black, double-sided PCB
- Empty PCB is also available separately
- Suitable for Key Stages 4 \& A Level (ages 14 to 18)

4 Siren Sound and Flashing Lights Generator Kit Based on UM3561 IC
A kit of parts to build a 4 siren sound and flashing lights generator ideal for building into models.

- Uses a UM3561

Sound IC

- High quality speaker
- 4 different
emergency siren

sounds, selected
using a jumper
- Perfect for emergency vehicles
- Sound can be adjusted with a potentiometer
- PCB has space for up to 8 LEDs (available separately)
- LEDs flash
- LEDs can be turned off
- Frequency of flashing can be varied
- Ideal for using RC vehicles, cars, trucks, lorries etc
- Available as a kit or as a blank PCB
- Professional double sided PCB

## Nightlight Kit Project

The nightlight project is
a safe, battery powered a safe, battery powered bedside light that automatically switches on when the room lights are switched off. After a time delay of about 5 minutes the light automatically switches off to conserve
 battery power.

- Light source is a high efficiency, high brightness white LED
- Suitable for illuminating different coloured translucent acrylic, coloured inkjet film or 'fun and fancy' acrylic paints - An excellent platform for creative product design
- Featured in Electronics Education published by the IEE
- Can be used to explore timing circuits using different component values
- Very popular and engaging project
- The key aim of the hubs is to identify the needs of local teachers, and provide ongoing support to encourage teachers and schools offering electronics in the design and technology curriculum. The work undertaken by the hubs includes twilight workshops and half-day training sessions. A variety of material is covered in these sessions, ranging from reviewing developments in software and hardware to allowing teachers the opportunities to discuss Year 10 activities and Year 11 project work. In addition, the hub centres are involved in organising single, two and four-day teacher training programmes in conjunction with an ECT accredited trainer, through funding from both the Department for Skills and Education, and the IEE.
- Suitable for Key Stages 2, 3 \& 4 (ages 7 to 16)
- Component kits are supplied in packs of 5 kits including printed circuit boards
Each kit requires $4 \times$ AAA alkaline batteries (not included).

## Badge Module with Flashing LEDs

Add eye-catching flashing LEDs to your badge designs with this ready-built, battery-powered electronic module.

- Two 3 mm red LEDs flash alternately
- On/Off button on circuit board
- Size only 7 mm thick $\times 25 \mathrm{~mm}$ diameter
- Takes $2 x$ L736 alkaline button cell (supplied)
- Holes can be easily made in most badges for the LEDs
- Complete with badge pin, double-sided adhesive foam
pad for fixing to badge and plastic back cover
- Supplied in packs of 30

For neat LED holders please see order code $\mathbf{5 5 - 0 1 6 0}$.

| Type | Order code | $1+$ |

20 Second Sound Recorder Module

A sound recording module providing up to 20 seconds of playback time for speech, music or sound effects.

- Allows students to include a record and playback element into projects
- 40mm mylar speaker
- Separate microphone, record and play buttons
- A single press of the play button starts playback
- The record push-button is held down during recording
- Separate battery holder
- Non-volatile memory allows the batteries to be changed
without losing the recorded message
- PCB dimensions: $31 \times 27 \mathrm{~mm}$

Requires $3 \times$ AA batteries (not included).

## Sound Module for Recording/ Playback

A compact sound recording module allowing you to make a 10 -second recording of your own sounds or personalised messages for use in soft toys and textile projects.

- 40 mm diameter mylar speaker for sound quality
- 10 seconds worth of recording time
- Recording is made by setting the slide switch to the recording position, depressing the top of the module and speaking into the microphone at the back of the unit
- An LED lights during the recording period
- With the slide switch set to play, depressing the top of the module plays your message back
- New recording can be made by sliding the switch back to record
- Battery compartment cover for easy battery changing
- Dimensions: $26 \times 45 \mathrm{~mm}$ diameter

Powered by three L1154 button cells (supplied).

| Type | Order code | $1+$ | $10+$ |
| :--- | :--- | :--- | :--- | :--- |
| 10s Record/play | $\mathbf{1 3}-0678$ | 9.10 | 7.70 |

## RVFM

## 10 Flashing LED Module

A flashing LED module, with built-in timer, producing a multicoloured running light effect similar to that see in disco light shows. By arranging the LEDs around the PCB, a large display can be created with minimal effort. The
 module is activated
by a push button switch mounted on the PCB, and runs for approximately 10 to 15 seconds before automatically switching off.

- Ideal for eye-catching displays, notices, etc.
- Each module consists of an assortment of ten red, green and yellow 5 mm LEDs which flash in pairs in sequence
- The module is powered by two, replaceable L1131 button cells. For replacement cells, see www.rapidonline.com
- PCB dimensions: $47 \times 29 \mathrm{~mm}$
- LED lead length: approx. 280 mm

| Type | Order code | $1+$ | $5+$ | $10+$ | $25^{+}$ |
| :--- | :--- | :--- | :--- | :--- | :--- |

## Conductive Paint

Bare Conductive Electric Paint is conductive which means that electricity from the battery can pass through it just like a wire. When you draw a circuit with a Bare Electric Paint Pen, the components and battery are joined together by the paint and make a complete loop, or circuit.
Bare Electric Paint is non-toxic, solvent-free and dries at room temperature.

- Draw a circuit on almost any surface: Paper, plastic, cardboard, fabric, wood, and more!
- Connect batteries, LEDs and other components
- Try it with microcontrollers like Arduino
- Can be used with conductive thread and e-textiles
- Great for attaching components and for PCB repair
- Can be used as a Cold Solder and Wire Paint
- Non-toxic and solvent free
- Dries at room temperature
- Available in $\mathbf{1 0} \mathrm{ml}$ pens, $\mathbf{5 0} \mathbf{m l}$ jars and $\mathbf{1 I}$ tins
- www.rapidonline.com/Bare-Conductive/paint for further information, image gallery, data sheets and downloads.

| Type | Order code | $1+$ |  |
| :--- | :--- | :--- | :--- |
| 10 ml Pen | 70.0873 | 8.57 |  |
| 50 ml Jar | 70.0874 | 18.22 |  |
| 11 Tin | $\mathbf{7 0 . 0 8 8 5}$ | 230.80 |  |

Touch Board

The Bare Conductive Touch Board is a printed circuit board module that can make your projects interactive, responsive, smart or just fun. Change the world around you by using the Touch Board to turn almost anything into a sensor.
Connect anything conductive to one of the 12 electrodes and trigger a sound via the onboard MP3 player, play a MIDI note or do anything else that you might do with an Arduino or Arduino-compatible device.

The Touch Board has been designed to be an easy-to-use platform for a huge range of projects, whether it is painting a lightswitch on your wall, making a paper piano or creating a customised interactive surface.

- Touch sensing
- Distance sensing
- No programming required for basic operation
- Arduino compatible and works with popular shields
- Ideal for use with Bare Conductive paint or any other conductive material
- MP3 Player / MIDI device
- MicroSD card socket
- Standard 3.5 mm audio jack for headphones and speakers
- Lithium Polymer (LiPo) battery recharges via USB
- HID capable - turn the Touch Board into a keyboard or mouse
- Board size: $84 \times 62 \times 10 \mathrm{~mm}$

See www.rapidonline.com/Bare-Conductive/TouchBoard for further information, image gallery, data sheets and downloads.
See www.rapidonline.com/Bare-Conductive/projects to see our Bare Conductive Ideas Page.

## Technical specification

Arduino compatible (recognised as an Arduino Leonardo in IDE)
Atmel ATMega32U4 Microprocessor
Freescale MPR121 dedicated touch interfac
VLSI VS1053B audio processor
Arduino Shield Compatible (check pins available)
32 KB of Flash Memory of which 4 KB is used for bootloader
5 V operating voltage (automatic voltage selector for USB or battery operation) Built in LiPo battery charging with onboard boost circuit for 5 V operation 16 MHz clock speed
Can be powered and programmed via USB
20 digital I/O pins (3 used for Touch IC and 5 for MP3 IC - can be disabled) 12 analogue input
12 analogue input channels
12 Touch electrodes of which 8 can be configured as extra digital inputs or outputs
with
$84 \mathrm{~mm} \times 62 \mathrm{~mm}$ foot
On/Off switch when powered from battery

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Touch board | $\mathbf{7 0 - 0 1 0 5}$ | 49.68 |

## Piggyaxe

6-LED Random Flasher Kit
A kit of parts to make a circuit that flashes 6 LEDs at random. The circuit is really 6 separate circuits combined into a single chip: a CMOS 40106 Hex (6) Schmitt trigger.
The overall circuit is made up of 6 relaxation
 oscillators directly
driving 6 LEDs. The free-running oscillator frequencies soon drift apart and become out of sync, thus producing an eyecatching 'random' display. By angling the LEDs and adding ping-pong balls as light diffusers, striking effects can be achieved with relative simplicity. The circuit is compact and economical enough to be used to enhance anything that would benefit from some flashing LEDs.

- Kit contains printed circuit board and standard components
- See Technical Specification table for list of kit contents
- Construction notes are available for download
at www.rapidonline.com

## Kit contains:

| Order code | Description |
| :---: | :---: |

6 LED flasher kit $\quad \mathbf{7 0 - 1 0 5 3} 1.98$

## No minimum order value UK mainland only

Multi-Timer Kit

A set of parts to build a multi-purpose pocket timer. The timer is fun to build and useful, with great repeatability and long time delays possible. The circuit provides an activity LED, a strident 'beep-beep-beep' warning when the time is up and a visual warning too.
The circuit uses a self-clocking binary counter that controls a number of relaxation oscillators that control each other.

- Kit contains printed circuit board and standard components
- See Technical Specification table for list of kit contents
- Visit www.rapidonline.com to download constructional notes for this kit

14M2 Motherboard Kit
If you run out of
1/0 with the 08M2 then the 14M2 motherboard kit provides a logical step up. Based on the 14M2 and offering 11

pins that offer a huge variety of options, the chances are it will do what you want. With 4 hardware PWM channels, total dimming control of 4 channels of LEDs becomes a possibility, with of course analogue and digital inputs and Infra-red capability too. It's an ideal starting point if you need to switch on more or simply want more ways of sensing and controlling your project.

- Kit contains printed circuit board and standard components

## Velleman Kits

## 

## Flashing LED Module Kit

A simple multivibrator circuit driving two LEDS.

- Suitable for many applications including model construction and education
- Adjustable flashing speed with two potentiometers
Power consumption approx. 8mA
Dimensions: $30 \times 35 \times 15 \mathrm{~mm}$
- Kit contains all components required including printed circuit board and construction instructions
Velleman MK102
Requires 1x PP3 battery (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Flashing LED kit | $\mathbf{7 0 - 4 1 3 8}$ | 3.65 |

## (vellemon

## Dual Super Bright Flashing

## LED Lights Kit

A module with two superbright red
LEDs giving a powerful warning indication.

- Ideal for emergency and warning signs, eye-catchers, etc.
- High visibility ‘alarm-active' simulation, etc.
- 'Auto turn-on at dark' - mode
with adjustable sensitivity
- On/Off switch
- Can be operated from

12V supply

- Dimensions: $55 \times 32 \times 40 \mathrm{~mm}$

Kit contains all components required including printed circuit board and construction instructions

- Velleman MK148

Requires 1x PP3 battery (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |

## 

## MK107 Running LED Light Kit

This kit will produce
a running light effect.

- 8 LEDs
- Different running light effects are selectable
(Prog push button)
- Adjustable effect
speed with
potentiometer
- Includes stand-by push button power switch
(Off push button)
- Suitable for beginners
- Dimensions 95(L) x 40(W)mm
- Velleman MK107

Requires a 9V battery (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |  |
| :--- | :--- | :--- | :--- | :--- |
| Running LED light kit | $70-4010$ | 5.13 |  |
|  |  |  | 078344 |

## Svelleman

## LED Sets

Packs of 5 mm light emitting diodes, ideal for use with Velleman's Advertisement LED Display Kit (available as Rapid part 70-4264), and many other electronics projects.

- Available in packs of $\mathbf{5 0}$ (red or green)

| Set size | Colour | Order code | $1+$ |
| :--- | :--- | :--- | :--- |
| 50 | Green | $\mathbf{7 0 - 4 2 2 2}$ | 4.99 |
| 50 | Red | $\mathbf{7 0 - 4 2 2 4}$ | 5.12 |

## (2) velleman

## Mini-6-LED Chaser Kit

If you've ever wanted to recreate the light sequences from the Star Trek Enterprise or from the 1980s TV show Knight Rider, the Velleman Mini-6-LED Chaser Kit is just what you need. The kit
 provides LED sequences which scan from side to side or go in one direction and is a great attention-grabber.Suitable for use on cars or in shop windows, at exhibitions.. or anywhere where you want to get the point across.

- 6 high-intensity 3mm red LEDs
- Fixed scan speed 0.5 sec
- Dimensions $55 \times 25 \times 10 \mathrm{~mm}$
- Power supply $4-15 \mathrm{Vdc}(20 \mathrm{~mA}$ at 12 Vdc$)$
- Manufacturer's part MK173

Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Chaser Kit | $\mathbf{7 0 - 4 4 1 6}$ | 6.28 |

## (4) vellemon

Infrared Light Beam Kit

This kit will produce an IR light beam that can be used to monitor a doorway, a pathway, an area etc. for the arrival or presence of a person or object.

- When the light beam is interrupted the kit makes an audible noise ( 85 dB )
- Uses an IR transmitter emitter to project a beam
of infrared light to an IR receiver detector
- Ideal for home security
- On/Off switch provided
- Basic soldering techniques required for circuit board assembly
- Suitable for beginners with little or no previous knowledge of electronics
- Not recommended for outdoor use

Velleman MK120
Transmitter and receiver both require a 9V PP3 battery (not included).
Please note: This is a self-assembly kit and requires soldering.

| Technical specification |  |
| :---: | :---: |
| Audible signal | 85db |
| Visible signal | LED alert |
| Range | 1 to 4 m (3.3ft to 13ft) |
| IR transmitter | $5.5 \times 4 \mathrm{~cm}$ |
| IR receiver | $10 \times 5 \mathrm{~cm}$ |
| Transmitter emitter | 9 V DC, 50 mA max. |
| Receiver detector | 9 V DC, $20 \mathrm{~mA} \mathrm{max}$. |
| 9 V battery holder and power adaptor jack included. |  |
| Type | Order code 1+ |
| IR Light barrier | 70-4028 7.13 |

These starter sets from Velleman give you everything you need to start enjoying electronic projects. Each set contains a number of kits for you to enjoy making. Choose from the Minikits Starter Set, with 6 different projects, or the Seasonal Minikit Pack which gives you 5 different kits, each with a festive theme.

Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Starter set | $\mathbf{7 0 . 4 4 6 4}$ | 29.05 |
| Seasonal pack | $\mathbf{7 0 - 4 4 6 6}$ | 20.50 |

## (ivelleman

## Traffic Light Kit

A miniature four way traffic light as seen at many junctions.

- Realistic operation with adjustable delay
- 12 LEDs
- Great for model railroads, exhibitions or as a toy
- Low power consumption 15 mA
- Suitable for beginners
- Dimensions: $115(\mathrm{H}) \times 50(\mathrm{~W})$ x 35(D)mm
- Velleman MK131

Requires a 9V PP3 battery (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code |
| :--- | :--- |

## 

MK191 Classic TV Game with Analog Bats

A modern adaptation of the classic 'tele tennis' TV game: build the kit then play the game. Each player has his own bat with rotary potentiometer for ultra-fast bat movement. The game has 5 single-player levels, 5 two-player levels, 3 ball angles, smash function and game play sound.

- 5 single-player levels
- 5 two-player levels
- 3 ball angles
- Smash function (press the button the moment the ball hits the bat)
- Only the server can score points
- Audio output
- Composite video out
- PAL or NTSC selection
- Brightness control
- Consumption only 7mA
- Auto power-down
- Velleman type MK191

Takes $2 x$ AA batteries, not included.
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- | :--- |
| IV Tennis Game | $70-4147$ | 13.75 |

## (1) vellemaj

MK112 and MK159 Memory Brain Game Electronics Kits
The Velleman Brain
Game Kit will provide hours of fun with just 4 LEDs and 4 push buttons.
It is available either with or without a case.

- Aim of the game is to repeat a pattern,
 which is generated at random
- Pattern is played both visually and audible or visually only (selectable)
- Features 4 difficulty levels, which can be selected at start-up
- Replay speed gradually increases during the game, to make it even more challenging
- Low power consumption
- Microprocessor controlled
- Auto power off
- Basic soldering techniques required for circuit board assembly
- Suitable for beginners with little or no previous knowledge of electronics
- Dimensions 65(L) x50(W)
- Available with or without case

Requires $3 \times$ AAA batteries (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :---: | :---: |
| Without enclosure | $\mathbf{7 0 - 4 0 1 8}$ | 8.72 |
| With enclosure | $\mathbf{7 0 - 4 4 0 2}$ | 13.88 |

## Expandable Quiz Kit

This quiz table will allow up to four players to compete against one another.

- LED indicates first button pushed
- Quizmaster reset button

- Two units can be daisy
chained for eight player fun
- Add your own remote pushbutton and indication
- Suitable for beginners
- On/Off switch
- Dimensions 110(L) x 78(W) x 28 (D)mm
- Velleman MK133

Requires a 9V PP3 battery (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Quiz table | $70-4042$ | 6.10 |
|  |  |  |

## Free Delivery*

## (2) vellemon

Wheel of Fortune Kit
This wheel of fortune acts just like the game, just push the button and the 10 LEDs start showing a spinning action. They gradually slow down until the winning one remains lit.

- Push the button to start spinning action
- 10 LEDs red, yellow and green
- Spinning action gradually decreases
- Auto power-off
- Low power consumption
- Suitable for the intermediate, some previous knowledge of electronics required
- Good soldering techniques for medium dense boards recommended
- Dimensions 33(L) x 0.64(D)mm
- Velleman MK152

Requires 9V PP3 battery (not included)
Please note: This is a self-assembly kit and requires soldering

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Wheel of fortune kit | $\mathbf{7 0 - 4 0 5 8}$ | 6.02 |

## Roulette Kit

This roulette kit is just like the real thing, and will be a sure winner with you, your friends and relatives

- With a push of a button, the LEDs lights flash in a spinning sequence and stop randomly
- Enjoy hours of fun with this game of chance
- 37 LEDs are arranged in a circle
- Winner tune played for each colou
- Pushbutton operation
- Microprocessor technology
- Auto power off
- Low power consumption
- Some previous knowledge of electronics required
- Good soldering techniques for medium dense boards
- Suitable for intermediates
- Diameter 90mm
- Velleman MK119

Requires $3 \times$ AA batteries (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Roulette kit | $\mathbf{7 0 - 4 0 2 6}$ | 13.13 |

## Animated LED Smiley

You can make light of every occasion with the Animated LED Smiley Kit from Velleman. The smiley face goes through a sequence of eight different faces, from sad to happy and a few in between. You can use
this kit as a novelty gift or just build it for the fun of it.

- Great attention grabber
- Choose between static or animated expressions
- On/off expression selection button
- Auto power off
- Power consumption 15 mA
- Dimensions $75 \times 75 \times 32 \mathrm{~mm}$
- Power supply $3 \times$ AAA batteries
- Manufacturer's part MK175

Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |  |

|  |  |  | 518136 |

## 

## Running Microbug Kit

This attractive bright coloured bug-shaped miniature robot is always hungry for light, and will constantly run towards it in a bug-like behaviour.

- A really great gift for the budding robotics enthusiast
- Features two open chassis sub-miniature motors
- Adjustable light sensitivity to work in almost any light condition
- LED eyes to indicate driving direction
- Bug stops in total darkness
- Suitable for beginners
- Dimensions $100(\mathrm{~L}) \times 60(\mathrm{~W}) \mathrm{mm}$
- Velleman MK127

Requires $2 \times 1.5 \mathrm{~V}$ AAA batteries (not included).
Please note: This is a self-assembly kit and requires soldering.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Running microbug kit | $\mathbf{7 0 - 4 0 3 4}$ | 7.31 |
|  |  |  |

## Sound to Light Unit Kit

This kit has four
high-intensity LEDs that light up and react simultaneously on every sound.

- For different funny and practical applications
- Sound indicator

- Simple sound-to-light unit for music
- Can be used to indicate the telephone, door bell for the hearing impaired
- Adjustable sensitivity with potentiometer
- Built-in microphone
- Some soldering experience recommended
- Suitable for beginners
- Dimensions 55(L) x $55(\mathrm{~W}) \times 35(\mathrm{D}) \mathrm{mm}$
- Velleman MK103

Requires $1 \times 9 \mathrm{~V}$ battery (not included).
Please note: This is a self-assembly kit and requires soldering.

## Technical specification

Adjustable sensitivity LEDs

Countdown Timer Kit
A very useful kitchen timer that will alert you with timings from 1 minute to 1 hour.

- Single button and straight forward operation
- Clear 16 LED readout
- Audible and visible alarm
- Discrete pre-alarm
- Auto power-off

- Attractive designer enclosure
- Suitable for beginners
- Dimensions 76.5(L) x 75(W) x 32(D)mm
- Velleman MK128

Requires $3 x$ AAA 1.5V DC batteries (not included).
Please note: This is a self-assembly kit and requires soldering.

## Technical specification

## Rolling Message Kit

Create your own moving message with up to 16 self definable characters, the options are many and varied.

- Adjustable scrolling speed
- Press 'SET' to change a particular character

- Press the up or down-
key to select a character and end with the ' $>$ ' sign
- Display standby function press 'Stby' (press RUN to restart)
- 35 LED graphic display
- Requires an 9-12V DC power supply or car battery
- 20 mA maximum
- Suitable for beginners
- Dimensions 46/89(L) x 67(W)mm
- Velleman MK124

Back-up battery 9V PP3 (not included).
Please note: This is a self-assembly kit and requires soldering.

Electronic Clock Kit
Digital clock with red seven-
segment displays in an
attractive case.

- Automatic time base selection (internal or net-frequency controlled $50 / 60 \mathrm{~Hz}$ )
- Internal time base with finetuning adjustment
- Selectable 12 or 24 hour display

- Equipped with optional backup battery facility in case of power failure
- Dimensions: $92 \times 45 \times 101 \mathrm{~mm}$
- Kit contains all components required including printed circuit board and construction instructions
- Velleman MK151

Requires a $9 \mathrm{VV}, 500 \mathrm{~mA} A C / D C$ mains adaptor or $3 \times A A$ batteries (not included).
Please note: This is a self-assembly kit and requires soldering.

USB PC Scope and Signal Generator
The pocket-sized Velleman USB PC Oscilloscope and Signal Generator contains a whole world of
measuring tools in one small box.
It includes apowerful 2-channel
oscilloscope and a handy bode plot function. There is no need for a power supply as the unit is powered over USB.

- Includes function generator,
oscilloscope, transient recorder, bode plotter, spectrum analyser, manual, USB PC scope+generator unit and USB cable
- Dimensions: $100 \times 100 \times 35 \mathrm{~mm}$
- Minimum system requirements - IBM compatible PC, Windows ${ }^{\text {TM }}$ XP, Vista, $7^{*}$, SVGA display card (min. $1024 \times 768$ ), mouse, USB port 1.1 or 2.0
- Manufacturer's part PCSU 200

EDU09 Educational PC
Oscilloscope Kit
Oscilloscopes needn't be expensive and complicated! Build your own oscilloscope and use your PC to display your measurements. This small and easy to build kit has all the
features of a full blown oscilloscope and comes complete with detailed instructions and test leads.

- Self-assembly kit
- Dimensions $94 \times 94 \mathrm{~mm}$
- Velleman type EDU09

## Technical specificatio

Oscilloscope:
Bandwidth: DC to $200 \mathrm{kHz} \pm 3 \mathrm{~dB}$
Input impedance: $100 \mathrm{k} \Omega$ / 20 pF
Maximum input voltage: 30 V (AC + DC
Time base: $10 \mu \mathrm{~s}$ to 500 ms per division
Input range: 100 mV to 5 V /division
Input sensitivity: 3 mV display resolution
Readouts: True RMS, dBV, dBm, p to p, Duty cycle, Frequency ...
Record length: 1 k samples
Sampling frequency: 62.5 Hz to 1.5 MHz
Sample history function
Pre-trigger function : on $0.1 \mathrm{~ms} /$ div. to $500 \mathrm{~ms} /$ div ranges Persistence options: Colour graded, Variable and Infinite Persistence options:
Spectrum analyser:
Frequency range: 0 to 150 Hz to 75 kHz Operating principle: FFT (Fast Fourier Transform)
FFT resolution: 512 lines
Transient recorder:
Timescale: $20 \mathrm{~ms} /$ div to $2000 \mathrm{~s} /$ div
Max. recording time: $9.4 \mathrm{~h} /$ screen
Automatic storage of data
Record and display of screens
Automatic recording for more than 1 yea
Max. number of samples: 1 samp
Min. number of sample:
General information:
Expert or basic mode soltage and frequency/time
Input coupling: DC and AC
8 Bit resolution
Storage of display and data
Power supply through USB: $+/-200 \mathrm{~mA}$
Uses Microsoft ${ }^{\oplus}$ human interface device (HID) driver, no external driver required
Dimensions: $94 \times 94 \mathrm{~mm}$
Minimum system req

## USB Controlled DMX Interface Kit

The Velleman USB-
Controlled DMX Interface Kit enables you to control DMX lighting fixtures using a PC and USB interface. Test software and DMX Light Player software is included, and a Dynamic Link Library (DLL) is provided to write your own software. The
 device includes a standalone test function that outputs all 512 channels at a time, with adjustable levels.

- Kit includes enclosure and USB cable
- Connected and powered through USB
- 512 DMX channels with 256 levels each
- 3 pin XLR-DMX output connector
- Windows 98SE or higher compatible
- 9V battery (not supplied) needed for stand alone test mode
- Solid state - fuse protection on DMX output
- Dimensions $106 \times 101 \times 45 \mathrm{~mm}$
- Power supply 5V DC via USB

Manufacturer's part K8062
Please note: This is a self-assembly kit and requires soldering.

## Multifunction Relay Switch

This kit has a total of 14 different functions including timers,
switching, flashing, interval and random switching.

- Two pre-programmed

## delays

- Learning mode for delays of 2 seconds up to 12 days
- Pushbutton control
- EEPROM for delay time storage in case of power failure
- On-board transient filter for the relay contacts
- Suitable for control of incandescent lighting, halogen
lighting, fluorescent lighting, fans, valves, buzzers
- Maximum load 2.5A (550W/220V; 275W/110V)
- Suitable for intermediate with knowledge with previous electronics knowledge and good soldering techniques
- Dimensions 87 (L) $\times 39$ (W) $\times 26$ (D) mm
- Velleman K8015

Requires a 12V DC battery or 9 to 12V AC power supply (not included).
Please note: This is a self-assembly kit and requires soldering.

USB Experiment Interface Board
The Velleman USB
Experiment Interface board has 5 digital input channels and 8 digital output channels, plus two analogue inputs and two analogue outputs
 with 8 bit resolution.
The number of inputs/outputs can be further expanded by connecting up to 4 more cards to the PC's USB connectors. All communication routines are contained in a Dynamic Link Library (DLL). You may write custom Windows (XP, Vista, Windows7) applications in Delphi, Visual Basic, C++ Builder or any other 32-bit Windows application development tool that supports calls to a DLL. Available either as a kit for you to make yourself or as a pre-assembled module.

Source code examples for Visual Basic, Visual C++, Visua C\#, Excel, Delphi and Borland C++ builder available

- 5 digital inputs (on board test buttons provided)
- 2 analogue inputs with attenuation and amplification option
- digital open collector output switches

2 analogue outputs

- Up to 4 cards can be connected to PC
- General conversion time: 2 ms per command
- Uses Microsoft human interface device (HID) driver, no external driver required
- Power supply through USB: approx. 70 mA
- Dimensions $145 \times 89 \times 20 \mathrm{~mm}$
- Manufacturer's part K8055N

| Type | Order code | $1+$ |
| :--- | :--- | :--- |

## Solderless Experimental Electronics Starter Kit

Take your first steps into the world of electronics with the Velleman EDU01 Solderless Experimental Starter Kit. If you eve needed proof that electronics can be fun, this is it, as the EDU01 allows you to build your
 own circuits in a fun, safe and educational way.
The kit contains a breadboard and all the components needed to get started, so you can finish assembling your first circuit in just a few minutes.

- Projects include: LED with push button
- Transistor as current amplifier
- Astable multivibrator
- Simple burglar alarm with LED indication and sound
- Light detector
- Polarity tester
- Start-Stop circuit
- Timer circuit
- Light switch

Water alarm

- No soldering required
- High-quality breadboard with 456 contact terminals
- Extended manual
- Dimensions: $80 \mathrm{~mm} \times 60 \mathrm{~mm}$

Requires 9V battery (not included)
Type $\quad$ Order code 1+
$\begin{array}{lll}\text { Solderless Experiment } & \mathbf{7 0 - 4 2 0 4} & 9.63\end{array}$

## 2 velleman

## Oscilloscope Tutor Board

The Velleman EDU06 Oscilloscope Tutor Boar will show you how to get the most out of your digital oscilloscope. The board generates a number ofsignals, which
 you can use to become
familiar with AC, DC and frequency measurements, sine and square waves, power supply ripple, full and half wave rectifiers and oscillators. The kit will also help you learn the meaning of terms such as $\mathrm{V} /$ div, Time/div, trigger level and auto-setup. Most of the experiments involved can be done using any digital storage scope. Some experiments can be performed with an analogue scope.

- Assembled and tested
- No soldering required

Dimensions: $116 \times 74 \times 24 \mathrm{~mm}$

- Power supply $9-12 \mathrm{~V}$ AC/ 100 mA min

## Nuelleman

## USB Interface Card

The Velleman USB
Experiment Interface Board has 5 digital input channels and 8 digital output
channels, plus two analogue inputs and two analogue outputs with 8 bit resolution.
The number of inputs/
outputs can be further expanded by connecting up to 4 more cards to the PC's USB connectors. All communication routines are contained in a Dynamic Link Library (DLL). You may write custom Windows (XP, Vista, Windows7) applications in Delphi, Visual Basic, C++ Builder or any other 32-bit Windows application development tool that supports calls to a DLL. Also available as a kit for you to make yourself.

- Source code examples for Visual Basic, Visual C++, Visual

C\#, Excel, Delphi and Borland C++ builder available

- 5 digital inputs (on board test buttons provided)
- 2 analogue inputs with attenuation and
amplification option
- 8 digital open collector output switches
- 2 analogue outputs

Up to 4 cards can be connected to PC

- General conversion time: 2 ms per command
- Uses Microsoft human interface device (HID) driver,
no external driver required.
- Power supply through USB: approx. 70mA
- Dimensions $145 \times 89 \times 20 \mathrm{~mm}$

## MitchElectronics(8)

## 555 Astable Kit

A kit of parts to make an astable circuit using a 555 timer IC.
The circuit is known as an 'astable' circuit because it is not stable in any state (either on or off). This makes it ideal for applications like flashing a warning light by continually switching it on and off.

The 555 timer is
arguably the most famous integrated circuit ever invented. Created by Hans Camenzind in 1971 for Signetics (now NXP), the 555 timer is still widely used and in production. These devices are so common that over 1 billion are made each year.

- Frequency range: approx. 0.5 Hz to 100 Hz

Component count: 10

- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |  |
| :--- | :--- | :--- | :--- |
| 555 astable kit | $70-0051$ | 1.95 |  |
|  |  |  | 568027 |

## =Rapid

...where price meets quality

## MitchElectronics(8)

## 555 Monostable Kit

A kit of parts to make a monostable circuit using a 555 timer IC. The circuit is known as a 'monostable' circuit because it is only stable in one state, the Off state. While the 555 is in the $0 n$
 state it will only be a matter of time (depending on the resistance of the potentiometer and the size of C 1 ), before the system is reset back into the off state. This makes it ideal for controlling applications like security lights that switch off after a certain length of time.
The 555 timer is arguably the most famous integrated circuit ever invented. Created by Hans Camenzind in 1971 for Signetics (now NXP), the 555 timer is still widely used and in production. These devices are so common that over 1 billion are made each year.

- Component count: 12
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires $1 \times$ PP3, 9 V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

## MitchElectronics( ${ }^{\text {(8) }}$

AC-DC 5V Regulator Kit
Many circuits require a voltage supply that is constant and unchanging, e.g. radios, calculators, computers, monitors, phones and even cars.
Batteries are a good source of constant voltage but since they are usually limited by size, weight and power capacity, the mains electricity supply is often used. But the mains electricity supply is constantly changing as it is AC (alternating current), which is not suitable for DC (direct current) circuits.
Therefore, an AC-DC converter is required to convert the alternating current into direct current! This kit will not only do this, but will also regulate the DC output so that it is a smooth, constant 5 V which can be used to power many projects and circuits.

- Component count: 15
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires an AC input from a suitable mains transformer with a maximum output voltage of 16 V AC, not included
- Do not connect directly to the mains supply

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| 5 V regulator kit | $70-0053$ | 1.95 |
|  |  |  |

## MitchElectronics(8)

## Transistor Flasher Kit

A kit of parts to make a circuit that continuously flashes 2 LEDs
alternately.
In electronics it is often required to have a circuit that creates a continuous series of pulses (like the second hand on a clock which
ticks every second).
Examples of where this is useful include: digital clocks (to track time) and computers - the CPU needs to be triggered by pulses. Most digital systems usually require a central 'clock' that synchronises all the various parts.
A circuit which produces a pulse every so often is called an oscillator. Once powered, an oscillator's output will turn on and then turn off. Once this cycle has been completed it repeats itself indefinitely as long as there is power.
But how is an oscillator made? How do you get some components to keep on pulsing? With this kit you will be creating an circuit that uses two transistors and a few other components to create an oscillator that generates a few pulses every second so that it flashes LEDs (that is why it is called a flasher).

- Component count: 12
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Flasher kit | 70.0054 | 1.45 |

## MitchElectronics(8)

## Simple Function Generator Kit

A kit of parts for you
to build into a simple function generator.
In just about every electronic circuit there will be a signal that changes with time, and in many circuits this signal may be continuous. For example, the electricity from the
 mains supply has a sinusoidal shape (like an ocean wave). Another example would be the clock for a computer which has a square shape.

Imagine a scenario where a digital circuit has been created and requires a clock from an external source. One could be built especially for the task, however the clock source would most likely have a fixed frequency. Even if one was designed to have a variable frequency (which takes time), the device would only output a square wave.
This is where the humble function generator steps in! Not only does the SFG (Simple Function Generator), have both a square and triangle output but the frequency is also adjustable. The square and triangle wave are generated by the same source and thus are always in the same phase which means that the two waveforms follow each other constantly (useful if both waves are being used).
But how does this circuit work? What active devices are used to create the oscillations and how is the frequency adjusted? Let's find out .....

- Component count: 18
- Includes high quality printed circuit board (PCB)

Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board

- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires a 5 V power supply, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Iype | Order code | $1+$ |
| :--- | :--- | :--- | :--- |
| Simple generator kit | 70.0056 | 2.45 |

## MitchElectronics(8)

## PWM Generator Kit

A kit of parts to build a Pulse Width Modulation (PWM) generator.
PWM signals are those that have variable duty-cycles and are found in many thousands of circuits. Just a few examples of how PWM signals can be used
include Digital-To-
Analogue conversion, high efficiency power controllers, servo control, timing and much more.

This kit will allow you to build a simple PWM generator that runs on voltages between 3 and 28 V and has two potentiometers for adjusting both the frequency of the PWM wave and the duty-cycle between $0 \%$ and $100 \%$.

- Component count: 18
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires a 3 to 28 V power supply, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| PWM generator kit | $70-0058$ | 2.45 |

## MitchElectronics ${ }^{\text {(8) }}$

## Continuity Probe Kit

A kit of parts to build
yourself a continuity probe.

If you need to check for continuity but
want to use a tool
that won't damage
sensitive devices, then
this continuity probe
is just for you!
A simpler continuity probe could be built with a buzzer, a battery and two probes, which combine to make a simple buzzer circuit. While this is fine for checking the continuity of wires, it is not recommended for circuits containing potentially sensitive components as they could be damaged.

- Component count: 25
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires $1 \times$ PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.
Type $\quad$ Order code $1+$

## MitchElectronics(8)

## Logic Probe Kit

A kit of parts to build a test probe that will indicate the logic levels in your circuits.
Circuits are often tested with multi-meters and oscilloscopes, but
this is not always the
best method. For example, not everyone has access to an oscilloscope and multi-meters are no good for fast-changing signals. Another reason is ease of use: testing a circuit with an oscilloscope can be tricky as you need to probe the contact and then turn away to look at the display. All it takes is for the probe to slip slightly and then the oscilloscope will be showing the signal trace for a completely different connection.
This is where the logic probe saves the day! Instead of having numbers to show voltages, or a display to show signals over time, the logic probe has just three LEDs for outputs. These outputs can show On, Off, Floating, and Oscillating! So long as the probe has a common ground to the circuit under test (which can be done easily by either using the same power supply or connecting the probe's GND-REF to the circuit's ground), the probe will display one of the four listed conditions above when connected to a point in the circuit. But how does this probe work? Get this kit and find out!

- Component count: 17
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- No battery required - uses the same power supply as the circuit being tested
Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- | :--- |
| Logic probe kit | $\mathbf{7 0 - 0 0 5 9}$ | 2.45 |

## MitchElectronics(

## Discrete Op-Amp Kit

A kit of parts to make an Operational Amplifier (op-amp) using individual (discrete) components.
Operational Amplifiers are key components used in electronics and are found in many (if not most) circuits
 today! Op-amps can be used for amplifying voltages, comparing voltages, producing waveforms and even for converting analogue signals into digital numbers.

But how does an op-amp work? What components make up an op-amp? With this kit you will build your own simple opamp and learn about its inner workings, as well as its many possible basic configurations including unity buffer, amplifier and comparator!

- Component count: 23
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |  |
| :--- | :--- | :--- | :--- |
| Discrete op-amp kit | $\mathbf{7 0 . 0 1 0 3}$ | 1.95 |  |
|  |  |  | 568034 |

## MitchElectronics(8)

Simple Power Supply Kit
A kit of parts for you to build a simple multi-output power supply.
While PP3 and AA batteries can be used to power some kits directly, not every kit can handle these unregulated voltages. For example, any kit with an active buzzer requires a 5 V source and some other kits (such as the M602 Door Bell) can only handle up to 4V! Providing these voltages can be cumbersome and any project that requires more than a single 5 V source may prove challenging.

This is where the Simple Power Supply comes in! This kit is directly powered from a 9V battery and provides many different outputs including: 9V Out, -9V (approx), 5V Out, and 3.3V Out. The kit generates the 3.3 V output with the use of the AMS1117 which is a Surface Mount Device (SMD). However, this is arguably one of the easiest SMD parts to solder and can provide great soldering practice for surface mount devices!

- Component count: 42

Includes high quality printed circuit board (PCB)

- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires $1 \times$ PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Simple PSU kit | $\mathbf{7 0 - 0 1 0 4}$ | 3.95 |
|  |  |  |

## MitchElectronics(8)

## M602 Door Bell Kit

A kit of parts for you to build a 'ding-dong' door bell.

While creating circuits from discrete parts and carefully planning out glue logic can be fun for some makers, it can be a pain for others. This kit allows you to create a fully working door bell

based around the M602 which perfectly demonstrates how some scenarios can justify a specialised IC.

- Component count: 18
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- This circuit requires a power supply between 3 and $4 V$ to operate correctly, so $2 x$ AA batteries, not included, could be used. Alternatively, the Simple Power Supply kit, not included, could be used as it has a 3.3V output
Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Door bell kit | $\mathbf{7 0 - 0 1 0 6}$ | 2.95 |

## MitchElectronics(8)

## 4017 Audible Beacon Kit

A kit of parts for you to build an audible locator beacon.
The 4017 is a 5 -stage Johnson counter that has 10 outputs which turn on
one after another. The IC is a commonly used 4000 series part and can be used in many scenarios including finite state machines, simple counters, and even time division.

With this kit you can build a 4017-based beacon that can be used for locating fallen radio-controlled drones or planes, or just for soldering practice!

- Component count: 25
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires a 5V power supply, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |

## MitchElectronics(8)

## RTL Logic Gate Kits (Packs of 5)

Kits of parts to build Resistor-Transistor Logic (RTL) gates.
Logic gates can be constructed using many different technologies, with one of the most famous ones being called CMOS, which stands for Complementary Metal Oxide Semiconductor. However, while this technology is employed
 in almost all electronic circuits, it was not always the popular choice
Back in the 80s, TTL (Transistor-Transistor logic) was the popular choice for logic components, but again, this too was not the only option available for logic gates. During the days of the Apollo moon missions there existed a logic family called RTL, which stands for Resistor-Transistor Logic and, as the name suggests, logic gates built using this method relied on resistors and transistors to enable their logic functions.

- Low component count
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Require a 1 V to 12 V power supply, not included

Supplied as a kit of parts for assembly. Soldering is required.

## 4017 Light Chaser Kit

A kit of parts for you to build into a 10-LED lightchaser.
The 4017 is a 5-stage Johnson counter that ha 10 outputs which turn on one after another. This IC is a commonly used 4000 series part
 and can be used in many scenarios including finite state machines, simple counters and even time division.
With this kit you will build a 4017 based variable light chaser that is great for creating futuristic sci-fi looking displays and lighting effects.

- Component count: 24
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| 4017 light chaser kit | $\mathbf{7 0 - 0 1 0 8}$ | 2.95 |

## MitchElectronics(3)

Negative Voltage Generator Kit
A kit of parts for you to build a negative voltage generator. Many projects require a negative voltage source such as those heavily based around op-amps and generating a negative voltage can be difficult.

With this kit you will
 learn how to build a simple negative voltage generator that can be useful in scenarios where a negative voltage is needed from a single rail supply such as a battery or solar panel! This kit is also great for solder practice and teaches how capacitive coupling can be exploited in electronic circuits.

- Component count: 21
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires $1 \times$ PP3, 9 V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| -ve generator kit | $\mathbf{7 0 - 0 1 0 9}$ | 1.95 |

## MitchElectronics( ${ }^{\text {( })}$

## 5V Source Kit

A kit of parts for you to
make a regulated 5 V power source.
Many circuits require
a 5 V supply that is smoothed and reliable.
 The reason for this is that some components are not able to handle other voltages, for example, the buzzer found in many MitchElectronics kits.

The buzzers are rated for 5 V operation only. If a different voltage is used, the buzzer may either fail to work properly, or be permanently damaged! Creating a 5 V source can be done with the use of a 7805 regulator, but bread-boarding a 5 V source can be cumbersome, as breadboards are often large in size and inconvenient.
The 5 V source kit, however, is compact and convenient, and produces a stable and regulated 5 V source from a standard 9V, PP3 battery.

- Component count: 11
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

\section*{| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| $5 V$ source kit | 70.0114 | 1.9 |}

## MitchElectronics( ${ }^{\text {( })}$

## Sound Activated Alarm Kit

A kit of parts for you to make a sound-activated intruder alarm.
When it comes to valuables we all know
 that security is critical. Whether it be a pesky co-worker pinching your cookies, or a more devious pet finding their way into the pantry, this sound-activated alarm kit can inform you when someone or something is trying to rob you if they make any noise.
The sound-activated alarm is made up of four different stages; input stage from the microphone, a comparator stage, a latch stage and an oscillator stage that produces an audible warning.

- Component count: 29
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires a 5 V power source, not included

Supplied as a kit of parts for assembly. Soldering is required.

## MitchElectronics(8)

## Datacorder Kit

A kit of parts for you
to build a datacorder.
Modern storage for computers include USB drives, hard
 disks, and even cloud storage. Computers of the past, however, did not have such technological capabilities, with hard disks having megabytes instead of terabytes of storage and portable storage being in the form of large floppy disks. Even then, only the most expensive computers had access to such storage methods and home users would be lucky to have a floppy drive.
One storage method that was popular with home computers from the 70s to 90 s was cassette tapes which could be used to store large amounts of data very cheaply. But how can computer data be stored on a cassette tape that is designed to play music? With sound of course!
With this kit you can build a Serial to Audio converter that lets you store UART data as sound onto a tape cassette, a Dictaphone, or even a computer.

- Component count: 33
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires a 5 V power supply, not included

Supplied as a kit of parts for assembly. Soldering is required.

|  |  |  |  |

## MitchElectronics( ${ }^{\text {( })}$

## Electronic Dice Kit

A kit of parts for you to make an electronic dice.
If you find yourself inside on a rainy day
 without dice to play
your favourite board games, then look no further because the MitchElectronics Electronic Dice kit is just for you!
The circuit consists of 3 main sub-circuits: a 555 monostable circuit, a 555 astable circuit and a 4017 counter circuit. The finished kit simulates an electronic dice with a simple cool-down system so you can watch the numbers roll.
Press and hold the switch to start the dice rolling, then let go when you're feeling lucky for that number which gets you past those expensive hotels or past that snake!

- Component count: 40
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.
Type $\quad$ Order code 1+

## MitchElectronics(8)

## MitchElectronics Reaction Game Kit

Want to test your reaction speed? Build this reaction tester kit that uses glue logic to display the result on a dual 7 segment display!
While it would be very easy to design a single-
 chip solution with the use of a microcontroller, this kit demonstrates how glue logic can be used to create complex systems with discrete parts - and no processors!

- Component count: 61
- Includes high quality printed circuit board (PCB)
- Downloadable Electronics Construction Manual includes sections on how to solder and how to identify and mount all types of components on to the printed circuit board
- Downloadable instructions include information specific to this kit including circuit diagrams, schematic diagrams and explanations, 'how it works' circuit descriptions as well as component identification and constructional notes
- Requires 1x PP3, 9V battery, not included

Supplied as a kit of parts for assembly. Soldering is required.

# BUILD YOUR OWN ARDUINO! <br> rangepip <br> Segments328 

## Orangepip Segments328

- An Arduino compatible board you can use in your own projects.
- Test your soldering skills!
- Understand the components needed to support a microcontroller.

Contents includes:
1 Orangepip Segments PCB
$2 \times 1 \mathrm{~K}$ resistors
$1 \times 16 \mathrm{MHz}$ crystal
1 ATmega328 microcontroller
$2 \times 47 \mu \mathrm{~F}$ electronic capacitors $1 \times 1$ N4007 diode
1 Dual in line socket $1 \times 7805$ voltage regulator
1 Tactile switch $1 \times 7133$ voltage regulator
1 Red LED
1 Green LED $1 \times 7133$ voltage regula
1 PTC resettable fuse
$1 \times 6$-pin dual row header
$2 \times 8$-pin single row sockets
$2 \times 6$-pin single row sockets
1 ISB socket
$5 \times 0.1 \mu \mathrm{~F}$ ceramic capacitors
$2 \times 22 \mathrm{pF}$ ceramic capacitors

Order code 75-1200

CLASSPACK OF 15 £ 0.00

Order code 75-1201
$1 \times 10 \mathrm{~K}$ resistor
$2 \times 330 \mathrm{R}$ resistors

## Clock Movements

## Trumotion

Quartz Clock Movement and Numerals
These quartz crystal controlled clock movements and numerals are ideal for replacing defective units or for creating your own personalised clock projects

They allow you to make any number of different clocks from CDs, papier mache, even paper plates, the only limits are your imagination. Use paper crafting techniques to design and build clocks that will suit any room and express your creativity.

- Quartz crystal controlled clock movements ideal for replacing defective units or for creative clock projects
- Black self-adhesive Arabic Numerals, 20 mm high

| Type | Order code | $1+$ | $5+$ | $25+$ | $100+$ |
| :--- | :---: | :---: | :---: | :---: | :---: |

## Wooden Clock Face Blanks

Have fun with
these handy
wooden clock
face blanks.

- Great for painting and
decorating
with your own design
- Suitable for use with TruMotion clock movement 85-1430 and numerals 85-1421 \& 85-1422
- Choose from square or round shape
- Size: $170 \times 170 \mathrm{~mm}$ (square), 170 mm diameter (round)
- Made from 6mm thick MDF
- 8 mm central hole
- Supplied in packs of 10

| Type | Order code | $1+$ |
| :--- | :--- | :--- |
| Square clock blanks | $\mathbf{0 6 - 0 7 8 2}$ | 7.14 |
| Round clock blanks | $\mathbf{0 6 - 0 7 8 3}$ | 5.30 |

## Rapid

Clock Group Kit

This kit enables pupils to create and design their own working clocks

## Kit contains

- 10x wooden clock blanks, 10x clock mechanisms, 10x numeral sets and 100 sheets of A4 white card
- Clock blanks $170 \times 170 \mathrm{~mm}$
- Suitable for all ages
- Supplied as a pack

## Education Components Spares Kit

A comprehensive range of essential electronic consumables offering a huge saving over individually purchased items.

- The kit is ideal for the classroom and contains LEDs, resistors,
 capacitors, etc.
- All the pieces are neatly packed into a well laid out stackable storage box with lid
- Dimensions of the box: $43 \mathrm{~cm} \times 31 \mathrm{~cm} \times 7 \mathrm{~cm}$
- Great school resource
- Total number of components = 1945
- Supplied as a pack

Equipment Wire 16/0.2mm

A high quality wire produced to DEF61-12 (Part 6) standards for general use and interconnection within apparatus.

- $16 / 0.2 \mathrm{~mm}\left(0.5 \mathrm{~mm}^{2}\right)$ tinned copper conductor

Overall diameter 1.6 mm

- Rating 1 kV 3 A at $70^{\circ} \mathrm{C}$
- Supplied on reels of $\mathbf{1 0 0} \mathbf{m}$ and $\mathbf{5 0 0} \mathbf{m}$

UL2651 Ribbon Cable 30m Reels
A range of unscreened
flat ribbon cable to
UL2651.
Consists of parallel
stranded tinned
copper wire conductors
laminated between
layers of PVC film. The
laminate ensures precise alignment and spacing between conductors during assembly.
The cables are suitable for use on computers, peripherals and interface units, audio and digital equipment and are used in internal connection for computer, duplicator, facsimile, game, interface and other electronic equipment.

- Colour: grey
- Available as a 10 -way with rainbow colours
- Suitable for Speedbloc insulation displacement connectors
- Cable one edge has a red marker to indicate the first conductor
- Supplied on 30m reels

## STBAN1

## Black Weather Resistant Cable Ties

These black cable ties are ideally suited for any outdoor application.

- Weather-resistant ties have

Carbonate A

- Offers UV resistance
- Fastens wires, cables and hose
- One-piece construction for consistent performance and reliability
- High strength and low thread force
- For outdoor use
- Supplied in packs of 100
- 100 mm cable ties also available in packs of $\mathbf{1 0 0 0}$, order code 04-0725

## High Visibility Cable Protectors

A range of high visibility
cable protectors
manufactured from
a special compound.

- Elastomer rubber is $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$
Normal service tem
UL 94V-2
Service temperature $135^{\circ} \mathrm{C}$
Made to comply with mil-spec drawing
no. MS-3367
MIL-S-23190E standard
Order code Dimensions (LxW)
4-0637 $100 \times 2.5 \mathrm{~mm}$
4-0638 $\quad 00 \times 3.6 \mathrm{~mm}$
04-0639 $292 \times 3.6 \mathrm{~mm}$
$\begin{array}{ll}\mathbf{0 4 - 0 6 4 0} & 368 \times 4.8 \mathrm{~mm} \\ \mathbf{0 4 - 0 7 2 5} & 100 \times 2.5 \mathrm{~mm}\end{array}$
flexible, rugged and hard
wearing
- Eye catching warning stripe along each side of the profile
- Enhances safety at work by preventing accidents caused by loose cables
- Ideal solution for trailing cables
- Low lying profile geometry with a unique 'snap open'
feature for fast and simple installation
- Housing suitable for one or more cables

Easily re-laid as required

- Produced from a flame retardant compound to BS476

Part 7 Class 3 and European equivalent DIN 4102
Part 1 and Class B1

- Tested for non-conductivity to BS903-C5 500V, and UV stabilised for extended life
- Available in $\mathbf{6 8}$ and $\mathbf{8 3 m m}$ widths
- Supplied in Iengths of 3 m

## INISTRAND

## 2:1 Heat Shrinkable Sleeving

- 25m Reels

Available in a wide range of sizes.

- Excellent flame retardant properties
- Excellent flexibility and insulation

- Thermally
stabilised flame retardant polyolefin
- 2:1 shrink ratio
- Temperature range $-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$
- Shrinking temperature starts at $+70^{\circ} \mathrm{C}$ and totally shrunk at $115^{\circ} \mathrm{C}$
- Available in black (for other colours see order code 03-0351)
- Sizes quoted before shrinking
- Supplied on reels of $\mathbf{2 5 m}$
- UL224 approved

| Nominal pre-shrunk diameter | Order code | $1+$ | $5+$ | $10+$ |

## Shrinktek

## Heat Shrink Sleeving

A highly flexible,
polyolefin tubing
supplied on small boxed
reels for convenient
storage and ease of use

- Shrink ratio 2:1
- Operating temperature $+105^{\circ} \mathrm{C}$
- Shrink temperature $+100^{\circ} \mathrm{C}$
- Resistant to fuel and oils
- Suitable for a wide range of uses including military and professional electronics, and industrial electronics manufacturing
- Applications include insulation, marking, strain relieving, building of wire bundles, colour coding and identification and mechanical protection
- Dielectric strength $20 \mathrm{kV} / \mathrm{mm}$
- Flame retardant to UL224
- Sizes quoted before shrinking
- Available in black, clear, red, yellow, blue, white, green and brown
Please note: The un-shrunk size may vary, but it does not affect the shrunk size.

## 1 TMTRAND

## 2:1 Heat Shrinkable Sleeving

Flame retardant heat shrinkable sleeving with 2:1 shrink ratio. Available in a wide range of colours and sizes.

- Excellent flame
 retardant properties
- Excellent flexibility and insulation
- Thermally stabilised flame retardant polyolefin
- 2:1 shrink ratio
- Temperature range $-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$
- Shrinking temperature starts at $+70^{\circ} \mathrm{C}$ and totally shrunk at $115^{\circ} \mathrm{C}$
- Available in red, yellow, green, clear, blue, grey, purple and white
- Supplied on reels of $\mathbf{2 5 m}$

## Shrinktek

## 3:1 Heat Shrinkable Sleeving

A range of general purpose, black, flexible polyolefin heat shrink tubing.

- Shrink ratio of $3: 1$ when
heated above $+125^{\circ} \mathrm{C}$
- Operating temperature $-75^{\circ} \mathrm{C}$ to $+135^{\circ} \mathrm{C}$
- Suitable for a wide range of uses including military and professional electronics, and industrial electronics manufacturing
- Applications include insulation, marking, strain relieving, building of wire bundles, colour coding, identification and mechanical protection
- Dielectric strength $25 \mathrm{kV} / \mathrm{mm}$
- All sizes quoted before shrinking
- Supplied in lengths of $\mathbf{1 . 2 m}$

## Extension Cables

## brennenstuhl ${ }^{*}$ <br> Energy Cube

A double sided, height
adjustable, hanging
extension reel.

- 6x 240V socket outlets
(3 each side)
- Galvanised steel hanging
chain (3m)
- Housing made from break resistant plastic
- Rated 13A
- Supplied with cable
length of 5 m

Low Temperature 10m Extension Reel
A 10 m mains cassette cable reel fitted with four UK mains sockets and a UK plug fused at 13 A .

- Super flexible cable
- Thermal cut out and reset
button
- Tough fused 13A plug to

BS1363/A

- 10A maximum load
- 240 V AC
- Four outlet sockets
- Suitable for use down to $-20^{\circ} \mathrm{C}$

- Smooth winding action
- Easy grip recess and handle for effortless winding
- Complies to all relevant British Standards
- Guaranteed for 25 years against materials and
workmanship
- Manufactured to BSEN61242
- CE approved

## brennenstuhl ${ }^{*}$

Automatic Cable Reel, $9+2 \mathrm{~m} / \mathbf{1 6 + 2 m}$

## This range of

## Brennenstuhl

 Wall and Ceiling Mountable Cable Reels, are ideal for Garage and Workshop use.They feature an easy to use automatic cable rewind function. This makes sure
 that the durable rubber-neoprene cable is safely stored inside the plastic outer casing, reducing the risk of damage to the cable and preventing the cable becoming a potential trip hazard.
The automatic cable reel is suitable for use in dry interior rooms.

- Automatic cable reel
- Convenient automatic rewind
- Ideal for fitting on walls and ceilings
- Slewable up to $180^{\circ}$
- Robust plastic housing
- Safety cut-out
- Childproof socket
- Cable quality: Rubber-Neoprene
- Body colour: Yellow
- Cable colour: Black
- Available in $\mathbf{2 4 0}$ and $\mathbf{1 1 0 V}$ power options
- Available with cable length of $\mathbf{1 6 + 2 m}$ and $\mathbf{9 + 2 m}$

## 13A Mains Extension Reels

A range of compact, handy
extension cable reels ideal for
home, office and DIY.

- 5 or 15 m cable lengths
- Three 13A, 240V sockets with
self-closing covers
- Maximum overall current rating 13A
- Safety cut-out
- Colour: blue
- Housing made of break-

resistant plastic
- Practical carrying handle
- Twin feet for excellent stability
- Easy to unwind and rewind
- Compact, handy cable reel for home, office and DIY
- Brennenstuhl Vario Line series

DIL (Dual In Line) Turned Pin Sockets

A range of good quality DIL sockets with closed pins that accept round pin headers. The range includes both 7.62 mm ( 0.3 in ) and $15.24 \mathrm{~mm}(0.6 \mathrm{in})$ pitch options. The pins been machine turned and the main body has been manufactured from Polybutylene terephthalate (PBT) with glass fibre.

- Closed pin design

Contacts: Copper alloy
Moulded in PBT with glass-filled flame retardant polyester - Please see technical specification for more details

- Approved to UL 94 V-0

## TuOGnnect

### 2.54mm Pitch Single Row Long Pin Female Headers

## These TruConnect Lon

 Pin Headers with $\qquad$ 2.54 mm pitch have gold plated brass contacts
for PCB connection.
They are available with
either 6, 8 or 10 pins in a single row. The longer pins means these headers can be used with more than one PCB at the same time.

- Pin length 10.9 mm
- Terminal height 8.5 mm
- Straight terminals
- Current rating 3A max.
- Contact resisitance $\leq 20 \mathrm{~m} \Omega$
- Operating temperature -55 to $+105^{\circ} \mathrm{C}$

MOQ 5 - In Multiples of 5

## Terminal Blocks

## Tru@nnect

10A 3.5mm Terminal Blocks

If you mount terminal blocks on PCBs we can probably help you with our fine selection of terminal blocks. Rapid is pleased to offer you these 2,3 and 5 -way 3.5 mm pitch vertical moulded types that are UL94V-0 approved.
Current carrying capacity of these pluggable terminal blocks is 10 A per pole. They feature a tin-plated pin header and a Phosphor bronze wire guard. The terminals are housed in moulded green flame proof polyamide PA66.

- 3.5 mm pitch
- Slotted screws
- Rated voltage 130 V
- Rated current 10A
- Moulded housing in green flame retardant PA66
- Screws zinc plated steel
- Pin header tin plated brass
- Wire guard Phosphor bronze

## Screwless Terminal Blocks

These screwless pushbutton
terminal blocks from Metway offer
customers many benefits.

- Speed, on average, screwless connections can be made in half the time
- Cuts installation costs in half
- No need for twisting and turning screws
- Easier on the installer's hands and arms
- Never have a problem with loose connections from
loose screws again
- Provide a vibration proof connection
- Spring clamp conforms to the wire with constant tension
making it maintenance-free
- 5mm pitch

## Easy Break Terminal Strips

These easy break terminal strips from CamdenBoss make life simpler for installers to create the exact number of poles required without having to use cutting tools when connecting copper conductors.

- Easily snapped into the required number of poles
- No remaining burrs
- No tools needed to cut to length

Save time and money

- Supplied in strips of 12 -poles
- Three sizes available encompassing insert sizes of 3,3.5 and 4.4 diameter
- Available in black Polyamide 6,6 UL94 V2
- Standard insert is nickel-plated brass with zinc-plated steel screws
- Screws are supplied in open position
- Continuous working temperature range is $-30^{\circ} \mathrm{C}$ to $+110^{\circ} \mathrm{C}$
Rapid is an official distributor of CamdenBoss products. The products listed here are those that Rapid hold in stock - but we have access to many more, including the company's complete range of terminal blocks.

## 12-Pole Kwik Snap Terminal Blocks

This range of 12-pole
terminal blocks
features Kwik Snap
technology, enabling
pole separation without
the use of tools. This
method of block
separation means that
the pole dividers are
still strong enough
to support screws for
terminal block assembly.
The connectors are available in $24,32,57$ and 76A ratings and are manufactured from white UL 94V-2 grade polypropylene.

- Kwik Snap technology for easy and clean break
no tools required
- Pole dividers support screws for assembly
- Formed, zinc plated steel insert
- VDE approved and rated to $\mathbf{~ 8 5 5 - 1 1 0}$
- Complies with IEC/EN60998-1,60998-2-1
- Manufactured from UL 94V-2 grade materials

## 4mm Sockets

These 4 mm panel
mounting sockets have tin plated brass inserts designed to accept a wide
range of 4 mm plugs.

- Sockets have double flat to assist positive location in panel
- Supplied with panel mounting hardware
- Rated 10A 125V AC
- Solder termination
- SCI R1-22 series

4mm Stackable Test Plugs
with Screw Termination

Build your own safety cable test leads with these high quality 4 mm plugs. They can accept up to 4 mm diameter cable and can either be terminated with a screw or solder. This stackable 4 mm plug has a rigid insulating sleeve for easy self-assembly of the test lead. The hexangular body makes the connection more stable. They feature a spring loaded plug for good connection.

- Body: Brass
- Spring: Beryllium copper, nickel plated
- Housing: PE
- Cable diameter: 4 mm
- Contact: Screw-in or solder
- Length: 52.5 mm
- Voltage: 30V AC - 60V DC
- Maximum current rating: 30A
- Available in black, blue, green, red, and yellow

## 4mm Binding Posts

These shrouded 4 mm
binding posts are ideal for panel mounting.
They require a cut-out
of 8.2 mm and are
terminated by means of
twin nut fastening. Ideal for audio speaker connectors and other applications where robust high power connections are required. They have a 4 mm end hole suitable for a wide variety of leads and probes terminals and a strong threaded insert for added reliability and to ensure a secure fixing.

- Body: Brass
- Spring: Nickel plated
- Insulation: ABS
- Mounting hole 8.2 mm
- Contact: Twin nut fastening
- Length: 44 mm
- Voltage: 30V AC - 60VDC
- Maximum current rating: 19A
- Available in black, green and red

## LEDs

## Kingbright

## Super Bright LED 3mm

The Kingbright Super Bright LEDs employ the latest technology to produce LEDs that are highly visible and therefore suitable for a wide variety of applications.
Available with diffused, water clear, or transparent lenses in a variety of colours and luminous intensities, the Super Bright LEDs rugged design adds to their long life reliability Meanwhile, these high intensity components have been manufactured using only the best materials - the color devices are made with GaN on Sapphire Light Emitting Diode.
Overall, these unique Super Bright LEDs, along with low power consumption, offer excellent value and are a clear market leader in their field - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- Cathode identified by short leg
- Particularly suitable for signalling applications and as an alternative to filament lamps
- Kingbright L-7104 series (Formerly L-934 series)

Low power consumption

- Long life - solid state reliability
- 3.2 mm length

### 2.54mm LED Holder Solderless

A novel LED connector, with 200 mm pre-stripped and tinned leads. The connector simply clips to the rear of a panel- mounted LED and is retained in position by a patented clamping device.

## Nichia

NSPB Series Super Bright Blue LEDs
The tremendous luminous intensity of these superbright LEDs from Nichia's top-quality NSPB Series opens new application opportunities for analysis equipment in chemistry, medicine and photographic technology.

## Rainbow Colour Cycling 5mm LED

Innovative, eye catching colour change LEDs. The 5mm LED contains an inbuilt IC that causes the LED to cycle through the red, green and blue elements, individually and then in combination. Colour cycles in 33 s .

- Water clear or diffused lens types
- Ideal for use in warning devices, indication panels, alarm systems, mood lighting, toys

## 5mm White LEDs

LEDS that are available in high luminous intensities of up to $30,000 \mathrm{mcd}$ at 20 mA and provide white LED technology at the cost of lower technology indicators.
Suitable for a wide range of illumination and indication
applications where high luminous intensity is required, such as: small area illumination, back lighting and general purpose indication.

- Housed in an industry standard 5 mm water clear package
- Viewing angle $15^{\circ}$
- Superior weather resistance
- UV resistant epoxy
- Suitable alternative for filament lamps

## High Intensity LEDs

A range of high intensity LEDs in a 5 mm package that
features a blade cathode which acts as a heat sink to
dissipate heat at high current levels.

- High luminous intensity for use in a wide range of indication and illumination applications requiring a high output
- Manufactured using the latest technologies for long life, energy efficiency and high reliability
- Suitable for PCB and panel mounting applications
-Water clear lens

## Kingbright

## Ultrabright LED 5mm

The Kingbright Ultrabright LED employs the latest
technology to produce lamps that are highly visible and
therefore suitable for a wide variety of applications.
Available with diffused, water clear, or transparent lenses in a variety of colours and luminous intensities, the Ultrabright LEDs rugged design adds to their long life reliability. Meanwhile,
these high intensity components have been manufactured with only the best materials - the color devices are made with Gallium Arsenide Phosphide.

Overall, these unique Ultrabright LEDs, along with low power consumption, offer excellent value and are a clear leader in their field - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- Cathode identified by flat on body
- Suitable for signalling applications and as an alternative to filament lamps
- General purpose leads

Reliable and rugged

- Long life - solid state reliability
- Available on tape and reel
- RoHS compliant

## 5mm White LEDs High Luminosity

These 5 mm high intensity white LEDs are
available in a choice of luminous intensities and
are suitable for a wide range of applications such
as: electronic signs and signals, small area illumination, and back lighting.

- High luminosity
- 5 mm Round standard directivity
- Long operational lifetime
- Superior weather resistance
- UV Resistant epoxy
- Housed in a water clear package

## Kingbright

## LED Low Current 5mm

Kingbright are a worldwide leading manufacturer of LEDs, offering a low current 5 mm LED housed in diffused coloured packages.
These well designed components have been manufactured to last and are incredibly reliable, while using only the best materials, including source color devices made with Gallium Arsenide Phosphide.
The unique Kingbright LEDs have also been made RoHS compliant, while boasting low power consumption, in the process offering excellent value in the market place - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- Luminous intensity remains consistent down to 2 mA
- Suited to portable equipment and are fully CMOS/MOS compatible
- General purpose leads
- Reliable and rugged
- Long life - solid state reliability
- Available on tape and reel

## Kingbright

## Flashing LED 5mm 14V

Kingbright are a worldwide leading manufacturer of
LEDs, offering a superb range of flashing 5 mm LEDs
in a diffused package that have a built-in IC which
produces continuous flashing at between 1.5 and 3.0 Hz .
These well designed components from the L-56 Series have an operation voltage from 3.5 V to 14 V , and have been manufactured using only the best materials, including source color devices are made with Gallium Arsenide Phosphide.
These unique Kingbright LEDs do not require a series resistor, and offer excellent value in the market place - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- Supply voltage 3.5 to 14 V
- Ideal for use in warning devices, alarms, etc
- Kingbright L-56 series
- With built-in blinking IC
- RoHS compliant

## Tru ${ }^{\prime}$ poto

## 5 mm LED Warm White 1120 mcd

An LED that has a warm white colour and a 5 mm standard directivty design. Its very high luminosity and long lifetime
operation makes it ideal for use in electronic signs and
signals, small area illumination and back lighting.

- Luminosity 1120 mcd
- Superior weather resistance
- UV Resistant epoxy
- Water clear lens
- Viewing angle $60^{\circ}$

## Tru ${ }^{2}$ pto

## AC 5mm LEDs High Brightness

5 mm LEDs from TruOpto that are designed to work with an AC power supply. These LEDs, available in various colours, use $80 \%+$ less energy than their incandescent counterparts. These LED lamps also have water clear
lenses and standard directivity along with a $15^{\circ}$ viewing angle.
With features such as high luminous intensity and low energy consumption there are many applications suitable for these 5 mm LEDs, such as: AV equipment, lighting, indicator panels, games and toys, etc. The red and yellow LEDs have a 26 mm leg length and the green, blue and white LEDs have a shorter 13.5 mm leg length.
Caution: These LEDs are not to be used with a rectifier.

- AC LED
- 5 mm Round standard directivity

Water clear lens

- High luminous intensity
- Long lifetime operation
- Superior weather-resistance
- UV Resistant Epoxy
- Temperature range $-30^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$

## Kingbright

## LED Standard 5mm

Kingbright are a worldwide leading manufacturer of LED, offering a superb range of high efficiency 5 mm LEDs that are suitable for PCB and panel mounting applications.
These well designed components from the Kingbright L-7113 series are available with diffused, transparent or water clear lenses in a variety of colours, while the source color devices are made with Gallium Arsenide Phosphide.
These unique Kingbright LEDs are also RoHS compliant, while boasting low power consumption, making them excellent value on the market place - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- All devices are intensity and colour matched
- Cathode identified by flat on body
- General purpose leads
- Reliable and rugged
- Long life - solid state reliability
- Available on tape and reel
- RoHS compliant

## Tru ${ }^{2}$ Poto

## 5mm Oval High Power LEDs

These 5 mm high power, oval LEDs from TruOpto feature a directivity pattern that is ideally suited to applications such as: traffic signals and portable light sources, signage and channel lettering, decorating and entertainment lighting, architectural lighting, small area illumination and back lighting.

- High power suitable for many applications
$5.1 \times 4.3 \mathrm{~mm}$ lens
- Superior weather resistance
- UV Resistant epoxy

## Full Colour 5mm LED $60^{\circ}$

Versatile full-colour RGB LEDs from TruOpto that are suitable for a very wide range of applications. These LED lamps
can be used in products such as toys, electronic games, AV equipment, indicator panels, decorative lighting. These solid state LED lights also feature high luminous intensity and a common anode configuration. These LEDs can produce red, green, blue and white light, making them a versatile addition to any project.

- Full colour LED
- Available in water clear or diffused lens types
- Common anode type
- 5 mm Round standard directivity
- Excellent weather resistance
- Wide $60^{\circ}$ viewing angle

## Kingbright

## 5mm 5V and 12V LEDs

The Kingbright 5 mm LEDs are a superb, high quality range of components incorporating an inbuilt series resistor enabling the LED to be directly connected to 5 V or 12 V supply lines.
Tough, reliable and built to last, these high intensity components have been manufactured with only the best materials - the color devices are made with Gallium Arsenide Phosphide.
Overall, these unique 3 mm LEDs, along with low power consumption, offer excellent value and are a clear leader in their field - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- High intensity
- Colour matched and housed in diffused coloured packages
- Cathode identified by shorter lead

Low power consumption

- Long life - solid state reliability
- General purpose leads
- Kingbright L-7113 series

## 5mm Ultraviolet LED

A high power ultraviolet 5 mm LED.
The features of this LED make
it particularly suitable for use in
applications such as: backlighting,
security and detection applications, and automotive dashboard lighting.

- Water clear lens
- General purpose leads on a 2.54 mm ( 0.1 in ) pitch
- Superior weather-resistance
- Made from UV resistant expoxy

## 5mm LEDs Water Clear

These 5 mm LEDs have an ultra
high luminous efficacy and water clear lenses. Available in a choice of colours, these LEDs are suitable for a wide range of applications such as indicator lights, traffic signal light, marker lights,
commercial outdoor advertising,
energy saving lamp, backlighting,
LED displays, electronic and optical
indicators, etc.

- Low energy consumption
- High reliability
- Low current requirement
- Fast switching
- No UV/IR radiation

Easy installation

- Versatile mounting on PC boards

## Kingbright

## 5mm T-1 3/4 Super Bright LEDs

A range of low power consumption
5 mm LEDs that are suitable for PCB
and panel mounting applications.

- Low power consumption

Popular T-1 3/4 diameter package

- General purpose leads
- Reliable and rugged
- Long life - solid state reliability
- All devices are intensity and colour matched
- Cathode identified by flat on body
- Kingbright L-53 series

## High Intensity LEDs $\mathbf{1 0 m m}$

Kingbright are a worldwide leading manufacturer of LEDs, offering a superb range of high intensity 10 mm diameter LEDs housed in a diffused package.
These well designed components from the Kingbright
L-813 Series are particularly suited to warning devices and alarms, and have been manufactured using only the best materials, such as the source color devices that are made with Gallium Arsenide Phosphide.

These unique Kingbright LEDs also boast low power consumption, making them excellent value on the market place - to find out more about the full range of Kingbright products please visit Rapid's Kingbright page.

- 10mm diameter big lamp

## Addressable RGB LED Strips

A range of LED strips containing data addressable full colour RGB LEDs. Using an SBC or development board with a suitable LED driver it is possible to build a simple and scalable light project that can achieve stunning effects, such as chasing, scanning and running water effects. There are two versions with either 30 LEDs per metre or 60 LEDs per metre. Each version comes in either 1m or 5 m strips.

When choosing an SBC or development board it should be noted that the input data line has very specific timing requirements. The LED strip requires the use of a real-time microcontroller such as an AVR, Arduino, or PIC type device. Linux based single board computers such as the Raspberry Pi will not work without additional RTC hardware.
Each of the LEDs contains an integrated WS2812B constant current driver that can achieve 256 levels of brightness and up to 16.7 m colours. The LEDs require an external power supply, with each LED using 60 mA if the red, green and blue components are all on maximum brightness.
As a way to quickly get up and running, Adafruit have a very handy library that can be used (Adafruit call them NeoPixels, but they share the same WS2812B driver ICs).

- Control each colour separately
- High brightness
- Suitable for a wide range of commercial and artistic applications
- Terminated by 200 mm of AWG22 cables
- Adhesive strip backing
- 5 V Data signal required, to use 3.3 V a logic level shifter is required

Note: It is recommended that a large capacitor ( $1000 \mu \mathrm{~F}, 6.3 \mathrm{~V}$ or higher) is added across the + and terminals. Also place a 300 to $500 \Omega$ resistor between the data output pin and the input to the strip.

## HRM138BB5100 2.4-5.5V IR Reciever Module 38kHz

Miniaturised receivers for infra-red remote control systems.

- PIN diode and pre-amplifier are assembled on lead frame, the epoxy package is designed as IR filter
- Demodulated output signal can directly be decoded by a microprocessor
- Highly reliable
- No external parts, inner shield
- Highly sensitive
- Long transmission range
- High immunity against ambient light, power noise and
electromagnetic interference
- Low power consumption
- TL and CMOS compatibility

## LDRs

## Tru ${ }^{2}$ Spto

## Miniature Light Dependent Resistor

A compact low cost cadmium sulphide light dependent resistor (LDR) housed in a small package.

- 5 mm diameter
- Clear epoxy finish
- Resistance reduces as the light falling on the device increases
- Note: This product contains cadmium sulphide, the use of which is restricted by the RoHS directive

| Technical specification |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Dark resistance | $1 \mathrm{M} \Omega$ | Max. voltage |  | 150 V peak AC or DC |  |  |
| Resistance @ 10 Lux | 10-20ks | Power dissipation |  | 100 mW |  |  |
| Resistance @ 100 Lux | 2-4k | Lead pitch Operating temperature |  | 3 mm |  |  |
| Peak spectral response | 540 nm |  |  | $-30^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ |  |  |
|  |  |  | MOQ 5 - In Multiples of 5 |  |  |  |

| Miniature LDR |  | 58-0134 | 0.589 | 0.482 | 0.365 | 0.316 |

## Silonex

## Light Dependent Resistor NORPS12

Cadmium sulphide light dependent resistor (LDR).

- Housed in a robust plastic package with clear end window
- Resistance reduces as the light falling on the LDR increases
- Silonex type NORPS12
- Note: This product contains cadmium sulphide, the use of which is restricted by the RoHS directive

| Technical specification |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Dark resistance | $1 \mathrm{M} \Omega$ | Power dissipation Operating temperature |  | 250mW max. |  |  |
| Resistance @ 1ftc | $5.4 \mathrm{k} \Omega$ min, $12.6 \mathrm{k} \Omega$ max. |  |  |  | $0+75^{\circ} \mathrm{O}$ |  |
| Peak spectral response | 550 nm | Dimensions |  | 14.35 mm dia. $\times 7.0 \mathrm{~mm}$ high 9.53 mm pitch pins |  |  |
| Max. voltage | 250 V peak AC or DC |  |  |  |  |  |
| Type |  | Order code | 1+ | 25+ | 100+ | 500+ |
| N0RPS12 |  | 58-0132 | 1.48 | 1.26 | 1.14 | 0.961 |

## Tiu Kpopo

## Miniature Light Dependent Resistor

## Lead Free Terminals

A compact cadmium sulphide light dependent resistor (LDR) housed in a compact 5 mm diameter package.

- Radial leads with 3.4 mm pitch
- Lead free terminals
- Note: This product contains cadmium sulphide, the use of which is restricted by the RoHS directive

## Technical specification

Light resistance at 10 Lux
Dark resistance ( 10 sec. after shut off 10 Lux )
Gamma value at 10-100 Lux
Peak spectral response
Power dissipation
Maximum voltage

## Tru

## 12mm Light Dependent Resistor Non-RoHS

A CdS (Cadmium Sulphide) light dependent resistor (LDR) that is housed in a small package. Typical applications for this device include: camera automatic photometry, photelectric control, annunciator, light control switch, industrial control, and electronic toys.

- Resistance reduces as the light falling on the device increases
- Small volume
- Clear epoxy finish
- Fast response
- High sensitivity
- Very reliable
- Note: This product contains cadmium sulphide, the use of which is restricted by the RoHS directive

## Lasers ifuchs

## Red Laser Modules Aluminium Housing Battery Powered

A range of low cost, fixed focus laser modules that are battery powered and provide a constant illumination from a compact aluminium body. The modules are available in a choice of beam types (line, dot or cross) and all modules have an acrylic lens that helps to produce a sharp beam without the need for rotating polygonal mirrors or motors. The compact size and battery power makes these modules suitable for applications where space and accessibility are an issue.

- Wavelength 650 nm
- Diode laser technology
- Acrylic lens
- Divergence 1 mrad
- Long lifetime >3000h
- Dimensions $ø 15 \times 68 \mathrm{~mm}$
- Operating temperature $-20^{\circ} \mathrm{C}$ to $+40^{\circ} \mathrm{C}$

Powered by $2 \times$ LR44 alkaline button cells (included).

## lasersolechs

## Red Laser Modules Brass Housing

A range of high quality laser modules that project a red beam in one of three types - line, spot or cross. The modules use a special acrylic lens that produces a shar
 beam without the use of rotating polygonal mirrors or motors. The lens and electronics are built-in to a robust brass housing and can be operated under dusty and harsh industrial environments. Operation is possible without series resistors or control electronics, the module simply being connected to a power supply. Suitable
applications include laser levels, laser marking systems, robotics, and laser entertainment areas.

- Diode laser technology
- Acrylic lens
- Divergence 1 mrad
- Long lifetime >3000h
- Cable length 100 mm
- Dimensions $\varnothing 9 \times 20 \mathrm{~mm}$
- Operating temperature $-20^{\circ} \mathrm{C}$ to $+40^{\circ} \mathrm{C}$

## Displays

## Kingbright

## LED Display 14.2mm

Kingbright are a worldwide leading manufacturer of LEDs, offering a range of 14.2 mm ( 0.56 in high) seven segment displays available in red, high efficiency red, super red or green.

These well designed components have been categorised for luminous intensity, and use only the best materials with
the source colour devices made of Gallium Phosphide on Light Emitting Diode. On top of that, the connectors along top and bottom simplify wiring in multi-digit applications.
The unique Kingbright LED Display is also economical to use, in the process making it excellent value on the market place - to find out more about the full range of Kingbright products please visit Rapid's Kingbrightpage.

- Low current operation
- White segments and grey display surface to maximise on/off contrast
- Attractive character appearance
- Easy mounting on PC Boards or sockets
- I.C. Compatible
- 14 mm ( 0.56 inch) digit height

## Kingbright

## 45mm (1.8in) LED Display

A range of 45 mm (1.8in high) seven segment displays available in high efficiency red or super red employing advanced GaAIAs technology to produce a very high output display.

- Right hand decimal point
- Connections running along the top and bottom of the display
simplifying wiring in multi-digit applications
- All displays are categorised for luminous intensity
- White diffused segments on a grey background
- Kingbright S18 series

## Kingbright

## 38.1mm (1.5in) LED Display

38.1 mm (1.5in high) seven segment displays available in high efficiency red or bi-colour red/green.

- Right hand decimal point
- Connections run along the top and bottom of the display simplifying wiring in multidigit applications
- All displays are categorised for luminous intensity with white diffused segments on a grey background
- Red version has common cathode configuration
- Bi-colour version has independent common anode pins for red and green segments
- Kingbright types SC15-11EWA (red) and SBA23-11EGWA (red/green)

## Power LEDs

## 

Flexible LED Strips 30-way
A range of separable LED strips on a flexible printed circuit board. The whole strip contains 30 LEDs and associated circuitry, and the strips are available in a spectrum of colours. Each strip can be separated in to $10 \times 3$ LEDs pieces and are adhesive backed.
The versatility and operating performance of these LEDs make them ideally suited to a wide range of applications including: channel letter signs, indirect accent decor light, large area back lighting, under counter lighting, building
 contour delineation, substitution for neon lighting and signage.

- Simple to use, just connect to suitable voltage
- Self-adhesive backing can be fixed almost anywhere
- High intensity output with low power consumption
- Energy saving
- Excellent beam control
- Long life
- Each LED has $120^{\circ}$ viewing angle for even light distribution
Technical specification

## Flexible LED Strips 24-way

A range of separable LED strips on a flexible printed circuit board. The whole strip contains 24 LEDs and associated circuitry, and the strips are available in white or warm white colours. Each strip can be separated in to $8 \times 3$ LEDs pieces and are adhesive backed.

The versatility and operating performance of these LEDs make them ideally suited to a wide range of applications including: channel letter signs, indirect accent decor light, large area back lighting, under counter lighting, building contour delineation, substitution for neon lighting and signage.

- Simple to use, just connect to suitable voltage
- Self-adhesive backing can be fixed almost anywhere
- High intensity output with low power consumption
- Energy saving
- Excellent beam control
- Long life
- Each LED has $120^{\circ}$ viewing angle for even light distribution

## 5m LED Strips

These 5m LED strips are high brightness lighting systems that are available in a selection of colours, including RGB, and with a choice of LED quantity. The low voltage and power consumption together with the high level light output make these LED strips suitable for a wide range of illuminative and indicative lighting applications.

- Each 5 m length is terminated by 2.1 mm DC jack socket
- Extremely low cost
- Can be cut to length

- Viewing angle $120^{\circ}$
- Available in 300 LEDs per 5 m or 600 LEDs per 5m

## TT Electronics

12V LED Strip Power Supplies
These 12 V power supplies from $T$ Electronics are ideal for use with the range of LED strips available from Rapid. The various power supply units can tackle anything from
1 to 20 metres of LED tape.

- Variety of fixing options available

1W High Luminosity Power LED Stars
These power star LEDs are high luminosity modules that are mounted on an PCB substrate. Being more energy efficient than incandescent and most halogen lamps and available in a range of colours, including white and warm white, these LEDs are ideal for a wide range of applications including: electronic signs and signals, small area illumination, back lighting and other lighting, bollards, security and garden uses, traffic signalling and beacons.

- High Iuminous flux
- Super energy efficiency
- Long operational life
- Superior ESD protection
- Superior UV resistance

## 3W 3-LED Round Module

These round type LED modules consist of three power LEDs
arranged on an aluminium substrate to produce a module that is ideal for a wide range of applications such as: small space lighting and mechanical equipment lights.
Also available are high efficiency lenses suitable for use with both LED modules. The lenses are available with either a diffused,
transparent or crystal diffused surface treatment.

- Super bright
- Green light source
- Fast response
- Long lifetime
- Easy installation
- Large viewing angle
- Superior ESD protection
- Superior UV resistance

Note: For longer periods of use it is recommended that thermal management (e.g. heatsink) is employed.

## Barthelme

## E10 Globe lamps

A range of E10 base, spherically-bulbed lamps available in a range of voltages and current ratings. There are lamps suitable for torches (including coloured lamps), bicycle lamps and for general purpose use.

- Clear lens
- Dimensions $11.5 \times 24 \mathrm{~mm}$

## LED Miniature Lamps MES

High brightness LED lamps that come with an MES base. These solid state lamps have a lifespan of up to eight times that of conventional filament lamps, as well as being more robust, making them an extremely cost effective alternative. These lamps can be used in a wide range of applications as a direct replacement for filament lamps and are suitable for
both illumination and indication for torches, indicator panels, automotive and backlighting.

- Water clear lens
- AC/DC Operation
- 240mW Power consumption
- Long lifespan
- Low power consumption
- Shockproof
- $30^{\circ}$ or $100^{\circ}$ Viewing angle

Note: LED lamps are polarity sensitive, please ensure correct wiring polarity is observed.

## Solar

## 

Solar Module 3V 100mA 60 x 48 x 3 mm with 20 cm Flying Leads
The TruOpto 3 V solar module measures only $60 \times 48 \times 3 \mathrm{~mm}$ $(2.36 \times 1.90 \times 0.12$ in $)$ making it ideal for compact outdoor jobs. Made from high efficiency crystalline silicon this module is designed to be durable, with a long working life.

- Supplied with 20 cm output leads (red and black)

- Protected to IP65

## Technical specification

## Tru ${ }^{3}$ poto

## Solar Cell Modules

These solar cell modules will gather natural or artificial light and produce an output voltage. The solar panels use crystalline silicon solar cells and have output leads soldered in place. The light weight and high efficiency of these modules make them suitable for a range of low voltage power generation applications.

- Small size enables easy series or parallel connection for higher voltage/current output
- Two Pre-wired output leads 300 mm X 24AWG black and red
- Resin laminated solar cell
- IP65 Ingress protection

## =RVFM

## Solar Cells

Fully encapsulated solar cell modules mounted in black polycarbonate
cases.

- Output of 0.45 V
- Fitted with threaded stud terminals and a copper busbar

## Capacitors

## Suntan.

## Ceramic Disc Capacitors

General purpose disc capacitors manufactured from
high dielectric constant ceramics.

- Linear temperature coefficient
- High stability
- Low loss
- Durez coated
- High temperature wax impregnated
- Available in 2.5 mm and 5.0 mm pitch

Note: Additional discounts are available for high volume purchases.
Please contact us with your requirements.

## Radial Electrolytic Capacitor Kit 93－Piece

This 93 －piece capacitor kit contains a range of micro miniature radial leaded electrolytic capacitors．The capacitors have a high capacitance per unit volume and are ideal for applications where high density packaging and low profile capacitors are required．
－Each value individually packed
－A total of 12 different values
－ 7 mm height
－Tolerance $\pm 20 \%$
－Temperature Range $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$

## KEMET

## R82 Series Miniature Metallised Polyester Capacitors

A range of miniature metallised polyester capacitors from the Kemet R82 series.
The R82 series are encapsulated in thermosetting resin in a UL $94 \mathrm{~V}-0$ rated case and have radial leads of 5 mm pitch. These capacitors are ideal for inline use in applications such as blocking, coupling,
decoupling, timing and oscillator circuits.

- Width 7.2 mm - ideal for high packing density
- Working voltage 100 V
- Self-healing
- Formerly Arcotronics R82 series

Note: Not for new designs. Contact Rapid for details and samples
of the replacement series.

(smmin

High-capacity condensers, which can serve as a replacement or as a supplement for battery systems.

## Tru@hm

CR25 0.25W Carbon Film Resistors Boxes of 1000

Miniature high stability 0.25 W carbon film resistors for industrial and consumer electronic equipment. A zero-Ohm resistor is also available which is a useful alternative to jumper or wire links on PCBs.

- 5\% tolerance
- 0.25 W rated
- Supplied in boxes of $\mathbf{1 0 0 0}$

## Tru@hm

CR25 0.25W Carbon Film Resistors Packs of 100

Miniature high stability 0.25 W carbon film resistors for industrial and consumer electronic equipment. A zero-Ohm resistor is also available which is a useful alternative to jumper or wire links on PCBs.

- 5\% tolerance
- 0.25 W rated
- Supplied in packs of $\mathbf{1 0 0}$

## Tru@hm

CR25 Carbon Film Resistor Kit

CR25 TruOhm CR25 series carbon film resistor kit containing 1000 pieces supplied in 8 packs containing $0.25 \mathrm{~W} 5 \%$ Carbon Film Resistors.
These range from 4.7 R to 10 M , equalling a total of 63 different values throughout the resistor range provided.

- Values ranging from $4.7 \Omega$ through to $10 \mathrm{M} \Omega$
- A total of 63 different values
- Supplied in 8 packs

See www.rapidonline.com for suitable storage cabinets.

## FRCOL

## 25W 5\% Arcol Power Resistor (Aluminium Clad) HS Series <br> 25W Aluminium clad

 resistors designed for applications requiring high power dissipation in a limited space. These resistors are designed for direct heatsink mounting using thermal compoundto achieve maximum
performance.To find out
more about our range of Arcol resistors, please visit our Arcol brand page at www.rapidonline.com.

- Resistance tolerance $5 \%$
- High power to volume
- Wound to maximise high pulse capacity
- Temperature coefficient $=1 \mathrm{k} 100 \mathrm{ppm} /{ }^{\circ} \mathrm{C},>1 \mathrm{k} 25 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$
- Solder terminations
- Wide range of resistances
- Manufactured in line with the requirements of IEC 115 and MIL-18546

## 16 mm Commercial Potentiometers

 20\% Metal Case PCB MountingA range of $\emptyset 16 \mathrm{~mm}$ carbon track single potentiometers suitable for PCB mounting in commercial applications. Offered in a range of popular values with $20 \%$ tolerance.

- Choice of Linear or Log taper
- Metal case
- Supplied with serrated 6 mm diameter shaft
- Bush mount

## 24mm Commercial Potentiometers

20\% Metal Case
A range of $ø 24 \mathrm{~mm}$
carbon track single potentiometers suitable for panel mounting in commercial applications. Offered in a range of popular values with 20\% tolerance.

- Choice of Linear or Log taper
- Metal case
- Supplied with 6 mm shaft
- Shaft length (including bush) 50 mm
- Solder tag termination

| Technical specification |  |

## Wirewound Potentiometers

Wirewound potentiometers in various
values. The encased pots have a nominal width of 24 mm .

- Solder tag terminals
- Angle of rotation (electrical) $280^{\circ}$ $\left( \pm 5^{\circ}\right)$
- Metal axle diameter 6 mm
- Electrical load capacity 4W
- Nominal resistances $10 \Omega$ to $25 \mathrm{k} \Omega$
- Resistance tolerance $\pm 10 \%$
- Linearity $\pm 2 \%$
- Continuous voltage 500V
- Electrical adjustment range $280^{\circ}\left( \pm 5^{\circ}\right)$
- Case diameter 24 mm
- Spindle length 42 mm
- Spindle diameter 6 mm
- Thread size M10 x 0.75
- Test voltage $1 \mathrm{kV} / \mathrm{AC}$

| Technical specification |  |  |  |
| :--- | :--- | :--- | :--- |

## Tru@hm

## Carbon Preset Potentiometers

Miniature single turn carbon track preset potentiometers.

- Horizontal mounting
- Linear law
- 30\% tolerance
- 0.1 W rated

| Technical specification |  |
| :--- | :--- |
| Dimensions | $8.2 \times 11.2 \times 2.6 \mathrm{~mm}$ |
| Pitch | $5 \times 10 \mathrm{~mm}$ |
| Tolerance | $\pm 0 \%$ |
| End resistance | $>20 \Omega$ |
| Power rating | 0.1 W |
| Maximum operating voltage | $100 \mathrm{~V} \mathrm{AC}, 20 \mathrm{VDC}$ |
| Electrical rotation | $250 \pm 5^{\circ}$ |
| Rotational torque | $30-60 \mathrm{gf} / \mathrm{cm}$ |
|  |  |

## 3/8in Single Turn Finger Adjustable Cermet Potentiometer

A range of fully enclosed single turn potentiometers that feature a finger adjustment knob with adjustment slot. Suitable for a wide range of applications.

- Single turn adjustment
- 10\% tolerance
- $0.1 \times 0.2$ in pitch spacing

## Technical specification

## Integrated Circuits

# Selected brands 4000 Series CMOS Logic Family 

4000 Series CMOS logic devices with a DC supply voltage rating of up to 20 V . The family has a large number of functions including analogue switches, monostable multivibrators, leve converters, counters, timers, display drivers, and phase-locked loops (PLLs).

- Through hole packages
- CMOS technology for low power consumption
- Wide operating voltage range
- Applications include instrumentation, control and communications

## ST Stepper Motor Control/Driver

The L293D is a monolithic integrated, high voltage, high current, 4-channel driver.

- L293E is a quad push-pull driver capable of delivering output currents up to 1 A per channel
- L297 generates four phase drive signals for two phase bipolar and four phase unipolar stepper motors in microcomputer controlled applications

## echnical specification

$\begin{array}{lll}\text { Device } & \text { Function } & \text { Package } \\ \text { Order code }\end{array}$
L293D Accepts DTL/TLL logic levels, will drive inductive loads, DC and stepper motors, switching DIL-16 $\quad \mathbf{8 2 - 0 1 9 2}$
L293E Tower transistors. TL compatible control, inhibit input on each pair of drivers, external connections for
DIL-20
TL compatible co
sensing resistors. permit switch-mode control of the current in the windings. Requires only clock, direction and mode input signals.

| Type | Order code | $1+$ | $10+$ | $25+$ | $100+$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| L293D | $\mathbf{8 2 - 0 1 9 2}$ | 3.71 | 2.39 | 2.08 | 1.60 |
| L293E | $\mathbf{8 2 - 0 1 9 4}$ | 2.97 | 2.38 | 2.24 |  |
| L297 | $\mathbf{8 2 - 0 1 9 8}$ | 7.24 | 6.05 | 5.79 |  |

## Relays \& Solenoids

## finder

## Miniature Relays DPDT

A range of industry standard vertical PCB or socket mounted relays.

- The Finder $\mathbf{4 0 . 5 2}$ series incorporate 8 mm isolation gap between coil and contacts as required by VDE0700
- Housed in a dustproof IP40 tinted case (AC versions have an orange tint)
- Widely approved including VDE, BEAB, UL, CSA, SEV, NF-USE, SETI, IMQ, SEMKO and DEMKO
- Finder $\mathbf{4 0 . 5 2}$ series

## GOODSKY

Subminiature Relay DPCO 1A - GS
A range of compact, lightweight double pole changeover relays to give high density PCB mounting.

- Coil consumption is 360 mW
- 92/8 gold silver alloy on silver palladium contacts allows low level switching (1V DC 1mA)
- Casing is epoxy resin sealed for washing

BT47 style relays

- GS-D series

## Intertec

## Cylindrical Linear Solenoids

A comprehensive range of cylindrically-bodied solenoids. There is a choice of push or pull linear actuators and the further choice of diameter and voltage means that there is a solenoid to suit any of the many applications that these devices are designed for.

- Closed design
- Higher efficiency than bar magnets
- Can be used in harsh environments
- Installation via screw caps
- Push type includes return spring
- Fixings M3

## Sounders, Buzzers \& Speakers

## =RVFM

## Electronic Buzzers

A range of compact, low-cost electronic buzzers.

- Available with either flying leads ( 10 cm long) or PCB mounting pins

- $3 \mathrm{~V}, 6 \mathrm{~V}$ or 12 V operating versions
- Resonant frequency is 400 Hz
- Black ABS case material

Suitable for education and hobbyist use only.

| Technical specification |  |  |
| :---: | :---: | :---: |
| Operating voltage |  | 2 V to 5V DC or 4 V to 8 V DC or 9 V to 15 V |

## Low Profile Buzzers

These PCB mounting buzzers have a loud but pleasant 85 dB tone and operate from a either 6 or 12V DC supply. They are only 7.5 mm high when mounted on the PCB. They will work with supply voltages ranging from 3 to 8 V DC or 8 to 15V DC depending which version is required. Supply polarity is marked on

the bottom of the top of the housing as an aid
to installation. The case is finished in black.

- The base of the device is potted to maximise protection against flux contamination
- Masking label is included over the sound emission hole to permit board cleaning
- Encapsulated in a low profile housing making them particularly suitable for inclusion in miniature electronics instrumentation
- Supplied with PCB pins for direct mounting to PCBs
- Small / low profile design
- Compact rich sound
- Pitch 7.6 mm
- Application: cellular phones, pagers, communication equipment, computers, household appliances, security of electronic devices
- Dimensions $11.6 \times 11.6 \times 7.5 \mathrm{~mm}$

6V and 12V Low Profile
Electromagnetic Buzzers
The SoniCrest HCM12BX series of electromagnetic sound generators are low profile buzzer units that have a sealed structure and are washable and compatible with wave soldering.

These low profile sounders are efficient, board mounting devices that are suitable for a wide applications such as: multi-tone audio signals (e.g. GSM), mobile
 phones and pagers, PDAs,
automotive, domestic appliances, portable equipment, medical devices and computer motherboards.

- Available in 6 V or 12 V variants
- Supply polarity marked on housing as an aid to installation
- Supplied with PCB pins for direct mounting to PCBs
- Sealing label for wash protection
- SoniCrest HCM12BX series

## Miniature Electromagnetic Buzzers - 5V and 12V

A miniature profile electromagnetic buzzer that is available in 5 V or 12 V versions. The SoniCrest HCM12X series of PCB mounting sounders feature a sealed construction making them suitable for washing and wave soldering manufacturing techniques.
These miniature buzzers have PCB pins for direct board mounting and are suitable for a wide applications
 such as: GSM, PDAs, cell phones and pagers, automotive, domestic appliances, portable equipment, medical devices and computer motherboards.

- Available in 5 V or 12 V variants
- Supply polarity marked on housing as an aid to installation
- Supplied with PCB pins for direct mounting to PCBs
- Sealing label for wash protection
- SoniCrest HCM12X series

## 90dB Piezo Sound Generator 5V

SoniCrest have produced a sound generator that operates using the piezoelectronic effect. Producing a loud 90 dB of sound, this 5 V buzzer is suitable for use in alarms, sirens, audio alerts, telephone ringers, industrial/household appliances, control modules, high end toys, medical instruments, etc.

- Unsealed structure and non-washable
- With PCB pins for direct board mounting
- SoniCrest HPA17F type

| Technical specification |  |  |  |  |  |

## $8 \Omega$ Speaker Sound Generator

A low-cost, low power sound generator has been designed for use in toy and other applications. This very compact sound module is ideal for PCB fitting and produces a sound of up to 83 dB .

- Good quality
- Suitable for soldering directly to a circuit board
- Dimensions: 30 mm (dia) $\times 11 \mathrm{~mm}$ (depth)

| Technical specification |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Rated power | 0.15 W |  |  |  |  |
| Input power max. | 0.3 W |  |  |  |  |
| Frequency range | $700-5000 \mathrm{~Hz}$ |  |  |  |  |
| Rated frequency | $1200 \pm 200 \mathrm{~Hz}$ |  |  |  |  |
| Rated impedance | $8 \Omega$ |  |  |  |  |
| Sound pressure level | 83 dB |  |  |  |  |

## 5V Electro-Magnetic Sound Generator

A 5 V electro-magnetic sound generator encapsulated in a low profile housing making it particularly suitable for inclusion in miniature electronics instrumentation.

- Electro magnetic sound generator
- 5 V voltage rating
- 45 mA current
- 85 dB at 10 cm sound output
- 2400 Hz frequency
- 12 mm diameter
- 1.2 g weight
- Noryl housing
- Sealed base
- Positive terminal marked
- PCB pins
- Requires external drive circuit

Megaphones with Sirens

35-4643
Compact and lightweight megaphones available in 25 W or 30W power outputs. The feature sets of these compact and durable loudhailers make them ideal for a variety of outdoor uses in schools, work, construction sites, etc.
The megaphones all feature a good quality built-in microphone, comfortable pistol grip handle, rotary volume control and carrying strap. In addition, the 25W and 30W versions also include a hand-held microphone that gives the option of a different operating style.

- Comfortable strong strap included
- Built-in switchable siren function
- Pistol grip handle with push-to-talk trigger switch
- Anti-feedback hand-held microphone
- Rotary volume control
- Robust ABS construction

Miniature Push-button Switches

A range of low-cost, miniature push to make and push to break switches that are available in various button colours.

- Ideal for school projects and prototyping
- Non-locking
- Rated 125 V AC 250 mA
- Panel cut-out 7 mm
- Dimensions 28 mm Iong, $ø 10.5 \mathrm{~mm}$

Note: These switches are not recommended for industrial applications. MOQ $\mathbf{1 0} \cdot \operatorname{In}$ Multiples of 10

## Miniature Push Switches

Miniature low cost push-to-make switches with an all-plastic body and chrome locking nut, offered in a variety of button colours.

- Non-locking action
- Rated 250 mA 60 V AC
- Panel cut-out 7 mm

- Overall dimensions 28 mm long, 10.5 mm diameter These switches are not recommended for industrial applications.

## TAIWAY

Switches
1260 Ultraminiature Slide Switch
A miniature slide switch with SPDT contacts.

- Body measures just $9.0 \times 3.5$ x 3.5 mm
- Ideally suited to a wide range
of low voltage applications
- Right angle actuator button making it ideal for edge of board applications
- Pins are on a 2.50 mm pitch making the switch suitable as an alternative to jumpers etc
- Contacts rated 0.3A at 6V

|  | M0Q $\mathbf{5} \cdot \boldsymbol{\text { In Multiples of } \mathbf { 5 }}$ |  |  |  |  |

## Lever Operated Microswitches

A range of value for money superminiature microswitches that are suitable for a wide variety of applications.

- Straight, right angle left or right angle right mounting
- Choice of 0.1 A 30 V DC or 3 A 125 V AC rating
- Solder terminals
- Minimum 1,000,000 operations for extended life

## V3 Microswitches

A range of high quality standard size microswitches.

- Switching capacity 15 A at 250 V AC
- Connection may be made by a 6.35 mm ( $1 / 4 \mathrm{in}$.) connector or by soldering
- Can be connected as normally open or normally closed
- Compact and precise operation
- Variety of actuator types
- Phenolic resin push buttons
- Stainless steel levers

Subminiature V4 Microswitches

A range of subminiature microswitches.

- Switching capacity of 3A at 250V AC
- Available with solder terminal or PCB terminal connections
- Can be connected as normally open or normally closed
- All switch types are free from overtravel restrictions and permit easy setting
- Wide variety of actuator types
- Phenolic resin push buttons
- Stainless steel levers
- UL approved

## jos

Miniature $12 \times 12$ Tactile Switches
$12 \times 12 \mathrm{~mm}$ PCB mounted tactile switches.

- Positive switch action
- Round button
- Single pole normally open contacts
- Diptronic DTS series

| $l$ |  |
| :--- | :--- |
| Technical specification |  |
| Dimensions | $12 \times 12 \times 4 \mathrm{~mm}$ |
| Pitch | $12.5 \times 5 \mathrm{~mm}$ |
| Contact rating | 50 mA 12 V DC |
| Initial contact resistance | $<250 \mathrm{~m} \Omega$ max. |
| Insulation resistance | $>10 \mathrm{M} \mathrm{\Omega}$ min. at 100 V DC |
| Dielectric strength | 250 VAC for 1 minute |
| Travel | 0.3 mm |
| Operating life | $>100,000$ ops |
| Operating temperature range | $-20^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ |
| PCB footprint | $12.5 \times 5.0 \mathrm{~mm}$ |

## 깅

Tactile Switches $6 \times 6 \mathrm{~mm}$
A range of miniature through hole tactile switches.

- $6 \times 6 \mathrm{~mm}$
- Positive switch action
- Normally open single pole contacts
- Available in various
heights
- Four terminal mounting for additional stability

Technical specification

| Dimensions | $6 \times 6 \times 3.5 \mathrm{~mm}$ |
| :--- | :--- |
| Pitch | $6.5 \times 4.5 \mathrm{~mm}$ |

## =RVFM

## Key Operated Switches

Random operated SPS
2-position key switch.

- Key removal in two positions
- Random keys
- Spare keys available for common key switches (see below)
- Zinc alloy die cast

housing and cylinder
- Bright chrome plated
- 4-pin tumbler mechanism
- Chrome plated zinc alloy tubular keys
- Silver plated contacts and terminals
- Hex nut mounted
- M12 panel cut-out

| Key removal | Key type | Order code | $1+$ | $25+$ | $100+$ |
| :--- | :--- | :--- | :--- | :--- | :--- |

|  |  |  |  |  |  |

## =RVFM

## Common Key Operated Switch

A mini electric lock switch with two tubular keys and fixing nut.

- SPST operation
- Panel mounting
- Key may be removed in the off position only
- Zinc body and core
- Chrome plated
- Supplied with two common keys

## =RVFM

Matrixed $3 \times 4$ Data Entry Keypad
A low-profile numeric data entry keypad, with black bezel and white keys. The keypad has conductive rubber contacts and positive action keys requiring only a low operating force.
It is connected via solder pads on the lower edge of the keypad PCB and can be secured via four mounting holes. Suitable for use on a wide range of hand-held and other small equipment.

- Data entry keypad
- 24 V DC contact voltage
- 20 mA contact current
- 200 2 contact resistance
- $3 \times 4$ layout
- -20 to $+60^{\circ} \mathrm{C}$ operating temperature
- 1,000,000 ops operating life
- 100 gf operating force
- 51 mm long, 64 mm wide, 7.8 mm high

## COMUS

## M1219 Neodymium Disc Magnets

A range of disc magnets
manufactured from Neodymium Iron Boron which is up to 5 times more powerful than Alnico.

- All magnets are nickel plated
to reduce the onset of corrosion when used under normal circumstances
- Ideally suited to proximity switch triggering or biasing where space is at a premium

## Tru(S)ens

## Non-Mercury Tilt Switches

A range of economical,
non-mercury tilt switches,
which operate when
tilted approximately $10^{\circ}$
from the horizontal.

- Contact is made by gold-plated ball-bearings which roll onto the contact
- Two styles are available:
- 78-0752 has a single gold-plated pin, with a lead attached to the case
- 78-0754 has two nickel-plated leads

## COMUS

Non-mercury Tilt Switch
A gas filled hermetically
sealed tilt switch employing non toxic materials in
a miniature completely
mercury free sealed metal
package.

- Normally open contacts which will close when tilted more than $10^{\circ}$ from the horizontal
- Suited to a wide range of applications including toys, games, automotive and water treatment equipment - Formerly Assemtech type CW1300-1

## COMUS

Low Cost Non-mercury Tilt Switches
Low cost PCB mounting non-mercury tilt switches fitted with gold contacts.

- Available with straight or right angle pins for direct mounting to a PCB

- Ideal low cost solution in
alarm systems and general angle sensing
- Supplied in Polyamide 6,6 case with UL 94V-0 rating
- Formerly Assemtech types M1230-1 (vertical) and M1230-2 (horizontal)
