## Structural Requirements

NOTE Job site construction should be completed before the dental equipment installation (including finished floors, ceiling, plumbing, lighting, paint, etc.).

## Dental Patient Chair Interface Requirement

The dental chair requires a solid, level mounting surface that meets these minimum specifications:

- Support a nominal weight of $1192 \mathrm{lb}(5302 \mathrm{~N})$ for the chair, dental light, delivery system, and patient.
- Capability to anchor the chair to the floor, with a minimum pullout load of $350 \mathrm{lb}(1557 \mathrm{~N})$ for one anchor-bolt.

## Utility Requirements

CAUTION Local regulation may require licensed plumbers and electricians to install the utilities. All plumbing and utilities must conform to prevailing local codes.

CAUTION The manner and method for accessing the utilities within the wall is the responsibility of the design team working on the project (dental dealer, architectural services, and contractors). Utilities must be accessible without the use of tools.

General utility requirements and electrical ratings are provided on pages 2 and 4.

IMPORTANT For additional electrical specifications and vacuum head loss data, see the Regulatory Information, Specifications, and Warranty document ( $\mathrm{p} / \mathrm{n} 86.0221 .00$ ), which is available in the Resource Center at www.a-dec.com.

## Plan Views and Dimensions

NOTE The dimensional drawings in this section are not to scale and are for reference only. For complete accuracy, use the appropriate full-sized templates.

## Utility Placement

CAUTION Due to specific plumbing elevation restrictions, the height and placement of utilities in the floor box can affect the ability to use the floor box cover. Failure to provide adequate space will prevent installation and removal of the cover. See "Utility Elevations." Please reference the appropriate full-size template which includes all of the necessary space constraints.
