

DuraStack[®] Pro

**Modular Double-Wall Positive Pressure Chimney
Boiler Breeching & Stack and Engine Exhaust
Grease Duct**

DuraVent[®]

DuraStack® Pro

The DuraStack® Pro Series, Models DCL, DAS1, DIS1, DIS2, DIS4, and DIS3Z venting systems are designed to offer the ultimate in installation convenience and versatility for a variety of applications. Certified for commercial chimney, boiler breeching and stack, diesel exhaust and grease duct applications. Thick-gauge material for the inner pipe and coupling provides a strong and rigid assembly. Self-centering flue extension significantly simplifies and accelerates the installation process.

A TRADITION OF EXCELLENCE

For over 50 years, DuraVent has been an innovator in the venting field and a market leader in North America. Instrumental in the company's growth has been an ongoing focus on product improvement and the introduction of new, innovative products. The DuraStack Pro venting systems are prime examples of our constant quest for more cost-effective, versatile and reliable product solutions.

DESIGNED WITH PERFORMANCE IN MIND

Available in sizes from 5" to 36" diameters, the DIS models offer a choice of 1", 2", 4", or 3" insulated double wall chimneys, and the DAS1 offers a 1" air insulated product. For premium corrosion resistance and durability, the inner flue is constructed from 0.035" thick 304 or 316 Stainless Steel. This is coupled with a 0.024" thick 304 Stainless Steel or Galvalume (Aluminum-zinc coated) steel outer casing. DIS models are lined with the highest-quality AES Wool insulation, densely packed to ensure low heat loss, maximum draft, and the lowest clearance to combustible materials.

DURAVENT DURASTACK® PRO A POSITIVE PRESSURE SYSTEM

The DuraStack® Pro Series Difference:

Features	Benefits
Self-centering	• Components line up easily and quickly • Fast and efficient installations
Thinner-gauge material on outside casing	• Lower weight • Easier to install

REFRACTORY AES WOOL INSULATION

DuraVent understands the needs of the industry and is always pushing the design envelope to embrace new technologies.

With our dedicated effort to offer the best performing products, DuraStack Pro Series utilizes Refractory Alkaline Earth Silicate (AES) Wool Insulation. AES Wool displaces the old “ceramic fiber” type insulations many manufacturers are still using today.

The AES Wool featured in our products meets the requirements requested under NOTA Q and are exonerated from classification and labelling regulation in Europe.

When compared to ceramic fiber, AES Wool insulation offers:

- **Approximately 80% lower Biopersistence* half-life**
- **Superior thermal insulation properties**
- **Improved tensile strength, compression & resilience**
- **Increased energy efficiency, leading to significant weight and cost savings**

*Biopersistence is the ability of fibers to resist removal from the lungs by natural mechanisms (i.e., dissolution and breakage). Ceramic fiber insulation is classified as a Class 2 Carcinogen in the European Union and classified as a possible carcinogen in the United States and Canada.

TYPICAL BOILER INSTALLATION

Selection guide

PART NUMBERS

These instructions identify major model parts by name and part number.

Example:

DIS1 36" length with inside diameter 14" made of SS inner liner and SS 304 outer casing: Code = DIS1-14L36BC.

Model	Dia.	Part	Material
DIS1-	14	L36	BC

DAS1 30° elbow with inside diameter 22" made of 304 inner flue and galvalume outer casing: Code = DAS1-22E30CE.

Model	Dia.	Part	Material
DAS1-	22	E30	CE

DCL wall support for 8" diameter grease duct made of galvalume: Code = DCL8WSE:

Model	Dia	Part	Material
DCL	8	WS	E

Material Code Designations

B	Type 316 Stainless Steel
C	Type 304 Stainless Steel
E	Alu-Zinc coating (Galvalume)

Example:

DIS1-6T90CC

DIS1-6 = 6" inside diameter

T90 = 90 Tee

CC = 304/304 Inner/Outer Material

Use only factory-supplied components. Failure to do so will void the certification and the warranty of the chimney system.

EFFECTIVE LENGTH AND THICKNESS

The effective length is the length of the part when it is assembled.

Effective length

		Thickness for Ø5" to Ø36"	
L36	36 1/8"	Inner Wall:	0.035"
L24	24 1/8"	Outer Wall:	0.024"
L18	17 5/8"		
L12	11 5/8"		

Material / Thickness

Models	Material		Thickness	
	Exterior	Interior	Exterior	Interior
DIS3Z Ø5" TO Ø36"	304 / Galvalume	304 / 316	0.025"	0.035"
DCL Ø5" TO Ø36"	--	304 / 316	--	0.035"

*Building heating appliance only

The term 'Pressure Stack' typically refers to positive pressure chimneys that can be used for boiler breeching and stack, as well as diesel and turbine exhaust, building heating equipment, industrial furnaces, processing equipment, kilns and ovens, and other heavy duty applications with high temperature exhaust requirements. DuraVent's Pro Series is also certified for use as Grease Duct, adding to its versatility and use in commercial applications.

In the United States, factory built chimneys are intended for use in accordance with NFPA 211, the Standard for Chimneys, Fireplaces, Vents, and Solid-Fuel Burning Appliances, and in accordance with models codes such as the International Mechanical Code, the International Residential Code, and the Uniform Mechanical Code. In Canada, factory built chimneys are intended for use in accordance with the National Building Code of Canada, Installation Code for Oil Burning Equipment, CAN/CSA-B139, and for Gas Burning Equipment, CAN/CGA-B149.1 and CAN/CGA-B149.2.

Factory built chimneys are designed, tested, and certified for installation inside or outside of buildings, or both, to transport flue gases to the outside. DuraVent's DuraStack Pro series of modular double-wall positive pressure venting systems have been designed and engineered to not only meet, but exceed the rigorous requirements of many test standards

Below is a brief summary of the standards that DuraStack Pro was tested and certified under. For more details about the specifics of our Underwrites Laboratories (UL) product listings, consult the UL Online Certifications Directory.

UL 103 BUILDING HEATING APPLIANCE CHIMNEY LISTING:

Under this category, models DCL, DAS1, DIS1, DIS2, and DIS4 have been determined suitable for venting flue gases at temperatures not exceeding 538°C (1000°F) under continuous operating conditions from gas, liquid, oil or solid fuel fired appliances. Also complies with operation (less than one hour) at temperatures not exceeding 740°C (1400°F) and brief operation (maximum 10 minutes) at temperatures not exceeding 906°C (1700°F). Building heating appliance chimneys are suitable for use with building heating appliances and low heat appliances as described in the chimney selection chart of national fire protection association (nfpa) standard no. 211.

UL 103(HT) - STANDARD FOR FACTORY-BUILT CHIMNEYS FOR RESIDENTIAL TYPE AND BUILDING HEATING APPLIANCES

The UL-103 standard applies to factory-built chimneys intended for venting gas, liquid, and solid-fuel fired residential-type appliances and building heating appliances in which the maximum continuous flue-gas outlet temperatures do not exceed 1000°F (538°C).

Tests included in this standard are designed to test the structural and thermal properties of the chimney and includes tests such as the Thermal Shock Test, Temperature Test (at 1000°F, 1400°F, 1700°F, and if required 2100°F). In order to qualify for the UL-103HT listing, a chimney that is tested under the UL-103 standard must successfully complete the requirements of the 2100°F (1149°C) Flue Gases Temperature Test, conducted 3 times. After being subjected to the tests listed, as applicable, a chimney shall be capable of being used further. The following results indicate compliance:

- **No part of the chimney has become damaged or permanently distorted to an extent that it or the chimney assembly does not continue to function as intended.**
- **The effectiveness of any required protective coating or finish on metal parts has not been reduced.**
- **A ceramic material shows no evidence of cracking, disintegration, or spalling to the extent that serviceability of any part of an assembly has been impaired.**
- **Cracks are not observable in porcelain enamel used as a required protective coating when the surface is examined under a microscope of 60 magnification.**
- **The reflectivity of a surface has not been impaired when the reflectivity is utilized to reduce the risk of fire.**
- **Burning or scaling of metal parts is not evident upon visual observation.**
- **The effectiveness of insulating material has not been reduced.**

Additional tests included in this standard are the Positive Pressure Applications Test, Draft Test, Vertical Support Test, Strength Tests (Impact, Longitudinal Force, Load Test for Chimney Elbows, Joint Load, and Joint Torsion Test), Wind Load Test, Rain Test, and other tests related to the components used in the chimney construction.

UL 2561 - STANDARD FOR 1400 DEGREE FAHRENHEIT FACTORY-BUILT CHIMNEYS

This standard applies to factory-built 1400 degree Fahrenheit chimneys intended for venting gas, liquid, and solid-fuel-fired appliances in which the maximum continuous flue-gas temperatures do not exceed 1400°F (760°C).

Similar in nature to UL-103(HT), this standard covers many of the same tests designed to test the structural and thermal properties of the chimney. UL-2561 is intended for chimneys that will be used in a more industrial application where flue gas exhaust temperatures are higher, and therefore includes a Temperature Test at 1400°F and 1800°F.

ULC-S604 - STANDARD FOR FACTORY-BUILT TYPE A CHIMNEYS

This standard applies to Factory-Built Type 'A' Chimneys which do not require field fabrication. They are for use with gas and liquid fuel-fired residential appliances and building heating equipment, where the appliance or equipment flue-gas temperatures do not exceed 540°C. They are intended for use in accordance with the National Building Code of Canada, Installation Code for Oil Burning Equipment, CAN/CSA-B139, and for Gas Burning Equipment, CAN/CGA-B149.1 and CAN/CGA-B149.2.

Tests included in this standard are designed to test the structural and thermal properties of the chimney and includes tests such as the Thermal Shock Test, Temperature Test (at 540°C and 760°C), Soot Burnout, Draft Test, Support Test, Strength Test, Wind Load Test, and other tests related to the components used in the chimney construction.

ULC/ORD-C959 - CHIMNEYS, INDUSTRIAL 540°C AND 760°C

This standard applies to Factory-Built industrial chimneys intended for use with certain process equipment and large oil or gas burning building heating appliances normally producing flue gas temperatures of 540°C or 760°C, or less as applicable.

Tests included in this standard are designed to test the structural and thermal properties of the chimney and include more stringent tests compared to ULC-C604, including the Thermal Shock Test, Temperature Test (at 540°C and 760°C, and if applicable 925°C and 980°C), Support Test, Strength Test, Wind Load Test, and other tests related to the components used in the chimney construction.

UL 1978 – STANDARDS FOR GREASE DUCTS

This standard applies to factory-built grease ducts, and grease duct assemblies that are intended to be installed at reduced clearances where 18 inch clearance is specified in NFPA 96 and the International Mechanical Code. These requirements also cover modular grease duct assemblies, unwelded connections between adjoining duct parts, fittings, access doors, and the like intended for use with grease ducts installed in accordance with NFPA 96 and the International Mechanical Code.

UL 2221 – STANDARDS FOR TESTS OF FIRE RESISTIVE GREASE DUCT ENCLOSURE ASSEMBLIES

These tests are intended to determine the fire resistance of grease duct enclosure assemblies. These requirements limit the combustibility, the surface flammability, and the smoke generation potential of the coverings used to enclose the grease duct. In addition, these requirements evaluate the effectiveness of the combination of the grease duct and the enclosure as a fire rated enclosure system and through penetration firestop system, as well as the enclosure's effect on the grease duct.

UL 1777 - STANDARD FOR CHIMNEY LINERS

These standards cover metallic and nonmetallic chimney liners intended for field-installation into new or existing masonry chimneys that are used for the natural draft venting of Category I gas-fired, Type L vented oil-fired, and solid-fuel-fired residential-type appliances in which the maximum continuous flue-gas outlet temperatures do not exceed 1000°F (538°C).

CAN/ULC S635 - STANDARD FOR LINING SYSTEMS FOR EXISTING MASONRY OR FACTORY-BUILT CHIMNEYS AND VENTS

This Standard covers lining systems for existing masonry chimneys, which may or may not incorporate a liner of fire-clay tile, or factory-built chimneys and vents.

CAN/ULC S662 - STANDARD FOR FACTORY-BUILT GREASE DUCT

This Standard covers factory-built grease ducts and grease duct assemblies that are intended to be installed as alternatives to the grease ducts constructed of all welded 1.37 mm carbon steel or 1.09 mm stainless steel required by ULC-S650, Standard for the Installation and Performance of Ventilation and Fire Suppression Systems for Commercial and Institutional Cooking Equipment.

DuraVent single wall and double wall model venting systems are Listed by Underwriters Laboratories, Inc. (UL) in the following product categories and in the diameters indicated:

Model DCL (Single wall)	
UL 103 - Building Heating Appliance Chimney	5" - 36" ID
UL 1978 - Grease Duct CAN/ULC S662 - Grease Duct	5" - 36" ID
UL 1777 - Chimney Liner - Gas/Oil	5" - 36" ID
CAN/ULC S635 - Chimney Liner for Existing Masonry & Factory-Built Chimneys	5" - 36" ID
UL 2561 - 1400° Fahrenheit Chimney	5" - 36" ID

Model DAS1 (Double wall, 1" air insulation)	
UL 103 - Building Heating Appliance Chimney	5" - 36" ID
UL 2561 - 1400° Fahrenheit Chimney	5" - 36" ID
UL 1978 - Grease Duct ULC S662 - Grease Duct	5" - 36" ID

Model DIS1, DIS2, DIS4 (Double wall, fiber insulation)	
UL 103 - Building Heating Appliance Chimney	5" - 36" ID
UL 103 HT - Building Heating Appliance Chimney (Type HT)	5" - 24" ID
UL 2561 - 1400° Fahrenheit Chimney	5" - 36" ID
UL 1978 - Grease Duct ULC S662 - Grease Duct	5" - 36" ID

Model DIS3Z (Double wall, fiber insulation)	
UL 1978 - 1400° - Grease Duct	5" - 36" ID
UL 2221 - Fire Resistant Enclosure	5" - 36" ID
CAN/ULC S662 - Grease Duct	5" - 36" ID

ADDITIONAL APPLICATIONS

Models DCL, DAS1, DIS1, DIS2, and DIS4 are also suitable for negative, neutral or positive pressure pre-fabricated piping systems intended for use in a variety of applications including but not limited to the following: Fume Venting, Chutes, Particle Conveying, Dryer Vents and Ventilation Ducts.

MIXING PARTS

Model DCL, DAS1, DIS1, DIS2, DIS4 and DIS3Z may be intermixed within a system, assuming proper clearances are maintained for respective components. When penetrating a roof, appropriate roof penetration components must be used. Do not use Model DCL to penetrate through a wall, floor or roof.

DuraVent Models DCL, DAS1, DIS1, DIS2, and DIS4 chimneys may penetrate a combustible floor, wall, or roof using the appropriate parts and openings sizes.

NOTE: Do not enclose with combustible materials

In the case of a fire rated enclosure made of non-combustible or limited combustible construction, the minimum clearance with the Model DCL must be 6" or as required by local code.

Zero Clearance Grease Duct

DuraVent's design is sure to be the industry's choice for new restaurant construction or custom remodelling.

What Sets Us Apart

Integrated centering sleeve stabilizes and helps align the sections during installation. Sleeve also provides a stop for high temperature sealant to keep it in its intended location creating air and moisture tight joints. Extra-large spacing between outer wall sections allows more space for a quick and easy installation of the inner "V" band.

Construction

Integrated, modular grease duct with insulation and outer wall (that qualifies as 2 Hour fire resistive enclosure) eliminates need for a separate, large and expensive fire rated chase or two layers of fire rated wrap – all while occupying a smaller "footprint" in expensive commercial properties.

Available in 5" to 36" Diameters.
Single-Wall (DCL) or Double-Wall Zero Clearance (DIS3Z) with 3" fiber insulation.

Listing

DuraVent Model grease ducts have been tested and listed by UL to UL/ULC Standards. UL 1978 (Models DIS3Z and DCL) Grease Duct and UL 2221 (Model DIS3Z only).

Grease Duct is subjected to rigorous and stringent requirements of the UL 1978 & UL 2221 standard, including continuous firing at 500° F (260° C), plus 30 minute firing at 2000° F (1093° C).

0" CLEARANCE GREASE DUCT FACTORY-BUILT GREASE DUCT

Features	Benefits
Modular stainless steel construction	• Installs in sections with no field welding required. • Highly corrosion resistant. • Extremely durable.
Round tubular design	• Maintains structural integrity significantly longer than a rectangular welded steel product. • Superior flow achieved with round tubular design. • Easier to clean and reduces chance of fire from grease accumulation. • Eliminates corners where grease accumulation is most severe and difficult to remove.
0" clearance to combustible materials	• Reduces space requirements and provides ease of mind for clearances.
Two hour fire rating for the Model DIS3Z	Eliminates need for a large, expensive, separate, fire-rated enclosure or multiple, field-applied layers of fire-rated wrap materials.
Extra large spacing between outer wall sections	• Allows for quick and easy installation of the securing band.
DCL single-wall available (18" clearance)	• Possibility to switch from Zero Clearance (DIS3Z) to Single-Wall (DCL) or vice versa, within a grease duct run. • Fast and easy installation. • Less expensive. • Lighter weight.

Factory-Built Grease Duct Systems	
Application	Restaurant Grease Ducts Cooking Appliances Ventilation Hoods Pizza Oven Exhaust
Maximum Operating Temperatures	500°F Continuous 2000°F Intermittent

Assembly

Blanket insulation is already installed in the portion that lines up with the outside casing. We provide an insulation band to be field-installed behind the outside band.

Goes together with the inner flange and inner locking band (with centering extension) and an outer band.

For DuraVent factory-built grease ducts listed to UL 1978, install at a duct slope not less than 1/16 unit vertical slope in 12 units of horizontal toward the hood or toward the grease reservoir. Where DuraVent grease ducts listed to UL 1978 exceed 75 feet in length, the slope shall not be less than 3/16 unit vertical slope in 12 units horizontal. This minimum slope is a result of tests and/or analysis performed by Underwriters Laboratories, where factory-built grease duct was compared to rectangular field-applied grease duct for performance of flow characteristics. Consult with AHJ for acceptance of this alternate method.

PRE-FABRICATED, FIRE-RESISTANCE RATED GREASE DUCT FOR REMOVAL OF GREASE AND SMOKE LADEN VAPORS

PART 1- GENERAL

1.1 SUMMARY

Listed, double-wall, prefabricated, modular, fire-resistance rated grease duct for use with commercial cooking equipment for removal of grease and smoke laden vapors from kitchen hoods (as described in NFPA 96), at a maximum temperature of 500°F under continuous operation.

1.2 REFERENCE STANDARDS

- A. The latest published edition of a reference shall be applicable to this Project unless identified by a specific edition date.
- B. All materials, installation and workmanship shall comply with the applicable requirements and standards addressed within the following references.
- C. Underwriters Laboratories, Inc. (UL):
 - a. Comply with applicable UL safety standards; provide products which have been UL listed and labeled.
 - 1) UL 1978 – “Standard for Grease Ducts”
 - 2) UL 2221 – “Standard for Tests of Fire Resistive Grease Duct Enclosure Assemblies”
- D. National Fire Protection Association (NFPA):
 - a. Comply with NFPA 96 – “Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations”
- E. International Code Congress (ICC)
 - a. Comply with “International Mechanical Code (IMC)” and “International Building Code (IBC)” (if applicable to the project / site)
- F. International Association of Plumbing and Mechanical Officials (IAPMO)
 - a. Comply with “Uniform Mechanical Code” (if applicable to the project / site)

1.3 QUALITY ASSURANCE

- A. Source Limitations: Obtain listed system components through one source from a single manufacturer.
- B. Must install duct in accordance with terms of NFPA96, local code and manufacturer’s installation instructions.

1.4 WARRANTY

- A. Listed grease duct shall have a limited lifetime warranty to begin at the date of installation.

PART 2- PRODUCTS

2.1 GENERAL

- A. All materials shall meet or exceed all applicable referenced standards, federal, state and local requirements, and conform to codes and ordinances of Authorities Having Jurisdiction.

2.2 AVAILABLE MANUFACTURERS

- A. Listed and Classified (Fire Resistance Rated) Double-Wall insulated grease duct shall be model DIS3Z, as manufactured by DuraVent.

2.3 LISTED GREASE DUCT

- A. The grease duct shall be insulated, double-wall factory-built type for use with Type 1 kitchen hoods, as described in NFPA 96 for the transportation of air and grease-laden vapors from commercial cooking operations.
- B. Product Description:
 - a. Zero Clearance, Two (2) Hour Fire-Resistance rated model DIS3Z Grease Duct by DuraVent.
 - b. All section joints shall incorporate a self-centering feature to ensure proper alignment of mating flanges and proper spacing between the inner wall (flue) and the outer wall (casing).
 - c. The inner wall (flue) shall be laser or plasma welded.
 - d. System shall be rated for continuous operation at 500° F and intermittent operation at 2000° F.
 - e. All components of the grease duct system shall be provided by the manufacturer to ensure the system meets the requirements of the listing including duct supports, guides, fittings, cleanouts, and expansion joints required to install the duct.
 - f. System shall be designed to provide access for inspection and cleaning of each change of duct direction, permit drainage of grease residue through a duct section and enable the system to allow various types of fire suppression equipment to be installed into the grease ductwork.
 - g. Grease duct shall be certified to:
 - i. UL 1978 – “Grease Ducts for Restaurant Cooking Appliances”, and
 - ii. UL 2221 – “Standard for Tests of Fire Resistive Grease Duct Enclosure Assemblies”
 - h. The duct sections shall be constructed of an inner wall and an outer wall with fiber blanket insulation between the walls.
 - i. The inner wall shall be constructed of Types 304 or 316 stainless steel.
 - 1. 5 through 36 inch diameter materials: 0.035 inch thick inner wall.
 - ii. The outer wall shall be constructed of Galvalume steel, Aluminized steel or Types 430, 304, or 316 stainless steel.
 - 1. 5 thru 36 diameter inch materials: 0.025 inch thick outer wall.
 - iii. The duct shall include a minimum 3" thickness of 10 pcf density of body-soluble, high temperature capable, non-refractory fiber insulation between the inner and outer walls.

PART 3-EXECUTION

3.1 INSTALLATION OF FACTORY-BUILT GREASE DUCT

- A. Locate to comply with minimum clearances from combustibles and minimum termination heights according to product listing or NFPA 96, whichever is most stringent.
- B. The installation shall be in accordance with the manufacturer's installation instructions and shall conform to all applicable state and local codes.
- C. Inner pipe joints shall be held together by means of formed 'V' bands and sealed with S650 Sealant.
- D. Connection to the hood shall be made with a round hood collar or a square-to-round transition.
- E. Curb mounted fans shall incorporate a fan adaptor plate.
- F. All construction and supporting of the kitchen ventilation system will be in accordance with DuraVent installation instructions.
- G. Store grease duct sections inside or covered adequately to protect from weather or accidental damage.
- H. The entire grease duct system from the appliance to the termination, including all accessories, except as noted, shall be from one manufacturer.

Grease Duct Accessories	
No Tool Inline Access Door	74
Through Penetration Firestop Kit	74
90° Tees and 90° Tees with a Dam	75-76
90° Tees with Nozzle	77
No Tool Access Tee Cap	78
Drain Bucket	78
Round Flanged Hood Adaptor	78
Square to Round Adaptor	79
Grease Duct Roof/Floor Thimble	79-80
Grease Duct Wall Thimble	81-82

Length (L12, L18, L24, L36)

Used as standard duct lengths. Available in sizes from 5" to 36".

- Included:**
For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).
For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).
For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).
For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

- Ø5" to Ø16": K = 0.4 (eff. length [ft] / Ø [in])
Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])
For Engine and Turbine Exhausts: K = 0.25 (eff. length [ft] / Ø [in])

Adjustable Lengths (LA)

Used to adjust to fit odd dimensions and compensate for thermal expansion. Suitable for application on low positive pressure system with less than 1" water column.

- Included:**
For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Graphite packing kit on a inner liner, a special tool for proper installation of Graphite packing, and hardware.
For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Graphite packing kit on a inner liner, a special tool for proper installation of Graphite packing, two half casing, and hardware.
For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Graphite packing kit on an inner liner, a special tool for proper installation of Graphite packing, two half casing, insulation pad, and hardware.
For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Graphite packing kit on a inner liner, a special tool for proper installation of Graphite packing, two half casing, insulation pad and hardware.

Ø (in.)	Effective Length (in.)	Product Code					
		DCL (Single Wall)	DAS1 (1" air)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)	DIS3Z (3" Insulated)
5 to 36	7 1/4 to 28 3/8	DCLØLA	DAS1-ØLA	DIS1-ØLA	DIS2-ØLA	DIS4-ØLA	DIS3Z-ØLA

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

- Ø5" to Ø16": K = 0.4 (eff. length [ft] / Ø [in])
Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])
For Engine and Turbine Exhausts: K = 0.25 (eff. length [ft] / Ø [in])

Variable Lengths (LV)

Used to adjust to fit odd dimensions. Not used for thermal expansion. Can be used in positive pressure applications.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), one (1) collar kit on the inner liner with a special locking band (BS), and hardware.

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) collar kit on the inner liner with a special locking band (BS), two half casing, and hardware.

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) collar kit on the inner liner with a special locking band (BS), two half casing, insulation pad, and hardware.

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) collar kit on the inner liner, two half casing, insulation pad and hardware.

Ø (in.)	Effective Length (in.)	Product Code					
		DCL (Single Wall)	DAS1 (1" air)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)	DIS3Z (3" Insulated)
5 to 36	7 to 28 1/2	DCLØLV	DAS1-ØLV	DIS1-ØLV	DIS2-ØLV	DIS4-ØLV	DIS3Z-ØLV

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

Ø5" to Ø16": $K = 0.4$ (eff. length [ft] / Ø [in])

Ø18" to Ø36": $K = 0.3$ (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts: $K = 0.25$ (eff. length [ft] / Ø [in])

Bellow Lengths (LB)

Recommended for Diesel Engines / Turbine Exhausts. May be used in place of the Adjustable Lengths (LA) as an expansion joint to compensate for linear thermal expansion in chimney systems. Maximum compressive travel is 3".

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, one (1) Outer Band (BSE), a special tool for proper installation of Graphite packing, two half casing, insulation pad, and hardware.

Ø (in.)	Effective Length (in.)	Product Code

5 to 36	17 9/16	DCLØLB	DAS1-ØLB	DIS1-ØLB	DIS2-ØLB	DIS4-ØLB

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

Ø5" to Ø16": $K = 0.4$ (eff. length [ft] / Ø [in])

Ø18" to Ø36": $K = 0.3$ (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts: $K = 0.25$ (eff. length [ft] / Ø [in])

Drain Lengths (DL)

Used to drain condensation from inner wall on vertical runs. 1" NPT nipple.

- Included:**
For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).
For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).
For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).
For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

Ø5" to Ø16": K = 0.4 (eff. length [ft] / Ø [in])

Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts: K = 0.25 (eff. length [ft] / Ø [in])

Horizontal Drain Lengths (HDL)

Used as a horizontal drain section on horizontal runs. 1" NPT nipple.

- Included:**
For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).
For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).
For DIS1, DIS2 and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).
For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

Ø5" to Ø16": K = 0.4 (eff. length [ft] / Ø [in])

Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts: K = 0.25 (eff. length [ft] / Ø [in])

3° Elbows (E3)

Used to change direction of the duct or to provide offset. 3° Elbows provide also a slope for horizontal run. Comes alone (E3) or in pairs as a kit (EK3). The Elbow Kit (two elbows) can establish many different degrees combined with other elbows. The kit may also establish many different offset when combined with standard different lengths.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One Locking "V" Band (BSI), one Centering Flue Extension (PR-C0794) and one Locking Outer Band (BSE) included.

Flow resistance: K = 0.03

15° Elbows (E15)

Used to change direction of the duct or to provide offset. Two elbows can establish many different degrees combined with other elbows and may also establish many different offset when combined with standard different lengths.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2 and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = 0.06

15° Elbows (E15) continued

Used to change direction of the duct or to provide offset. Two elbows can establish many different degrees combined with other elbows and may also establish many different offset when combined with standard different lengths.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2 and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

36	10 3/16	5 1/8	19	10 1/4	DIS4-36E30

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = 0.12

30° Elbows (E30) continued

Used to change direction of the duct or to provide offset. Two elbows can establish many different degrees combined with other elbows and may also establish many different offset when combined with standard different lengths.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = 0.30

90° Elbows (E90) continued

Used to change direction of the duct or to provide offset. Two elbows can establish many different degrees combined with other elbows and may also establish many different offset when combined with standard different lengths.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Flow resistance: K = 0.30

90° Tees (T90)

Used to change direction at 90° breeching. Can be used as an inspection access in horizontal or vertical runs as well as drain.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316- 304

Flow resistance: K = 1.25"

Also available with Smaller TAP diameter (Øtap).

Code for Smaller Tap: DCLØT90B(Øtap), DAS1-T90B(Øtap), DIS1-ØT90B(Øtap), DIS2-ØT90B(Øtap), DIS4-ØT90B(Øtap).

Code example for Smaller Tap: a DIS1 90 degrees Tee of Ø12" with a tap of Ø10" = DIS1-12T90B10.

Also available with Smaller TAP (ØTAP) and Smaller Height.

Code for Smaller TAP & Smaller Height: DCLØT90B(Øtap)H(Øtap), DAS1-T90B(Øtap)H(Øtap), DIS1-ØT90B(Øtap)H(Øtap), DIS2-ØT90B(Øtap)H(Øtap), DIS4-ØT90B(Øtap)H(Øtap).

Code example for smaller Tap and smaller Height: a DIS1 90 degrees Tee of Ø12" with a tap of Ø10" and the Height of a regular T90 of Ø10 = DIS1-12T90B10H10.

45° Tees (T45)

Used to change direction at 45° breaching a low resistance flow.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS 1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = 0.40

Also available with Smaller TAP diameter (Øtap).

Code for Smaller Tap: DCLØT45B(Øtap), DAS1-T45B(Øtap), DIS1-ØT45B(Øtap), DIS2-ØT45B(Øtap), DIS4-ØT45B(Øtap).

Code example for Smaller Tap: a DIS1 45-degrees Tee of Ø12" with a tap of Ø10" = DIS1-12T45B10

Also available with Smaller TAP (ØTAP) and Smaller Height.

Code for Smaller TAP & Smaller Height: DCLØT45B(Øtap)H(Øtap), DAS1-T45B(Øtap)H(Øtap), DIS1-ØT45B(Øtap)H(Øtap), DIS2-ØT45B(Øtap)H(Øtap), DIS4-ØT45B(Øtap)H(Øtap).

Code example for smaller Tap and smaller Height: a DIS1 45-degrees Tee of Ø12" with a tap of Ø10" and the Height of a regular T45 of Ø10 = DIS1-12T45B10H10

Double 45° Tees (TD45)

Used to centrally connect to appliance manifolds to a common chimney. The diameter of the taps (ØTAPS) must be smaller than the diameter of the body (ØBODY).

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Double 45° Tees (TD45) continued

Used to centrally connect to appliance manifolds to a common chimney. The diameter of the taps ($\emptyset$ TAPS) must be smaller than the diameter of the body ($\emptyset$ BODY).

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Also available with Smaller TAPS ($\emptyset$ TAPS) and Smaller Height.

Code for Smaller TAPS & Smaller Height: DCLØTD45B($\emptyset$ tap)H($\emptyset$ tap), DAS1-TD45B($\emptyset$ tap)H($\emptyset$ tap), DIS1-ØTD45B($\emptyset$ tap)H($\emptyset$ tap), DIS2-ØTD45B($\emptyset$ tap)H($\emptyset$ tap), DIS4-ØTD45B($\emptyset$ tap)H($\emptyset$ tap).

Code example for smaller Taps and smaller Height: a DIS1 double 45-degrees Tee of Ø12" with both taps of Ø10" and the Height of a regular TD45 of Ø10 = DIS1-12TD45B10H10.

Y-Tees (TY)

Used to provide low-pressure drop for joining two appliances. Can be used as a single clean out toward each 90° direction change. Offers same diameter on all branches, but available with smaller snout.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = 0.60

Also available with Smaller TAP diameter (Øtap).

Code for Smaller Tap : DCLØTYB(Øtap), DAS1-TYB(Øtap), DIS1-ØTYB(Øtap), DIS2-ØTYB(Øtap), DIS4-ØTYB(Øtap)

Code example for Smaller Tap: a DIS1 90 degrees Tee of Ø12" with a tap of Ø10" = DAS1-12T90B10

Lateral Tees (BT)

Used to change direction at 90° at lower resistance flow.

NOTE: LATERAL TEE (BT) ONLY AVAILABLE UP TO 24".

FOR SIZES 26"-36", USE A COMBINATION OF 450 TEE (T45) AND 450 ELBOW (E45).

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS32: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Code example for Smaller Tap: a DIS1 Lateral Tee of Ø12" with a tap of Ø10" = DAS1-12BTB10.

Also available with Smaller TAPS (ØTAPS) and Smaller Height.

Code for Smaller TAPS & Smaller Height: DCLØBTB(Øtap)H(Øtap), DAS1-BTB(Øtap)H(Øtap), DIS1-ØBTB(Øtap)H(Øtap), DIS2-ØBTB(Øtap)H(Øtap), DIS4-ØBTB(Øtap)H(Øtap).

Code example for smaller Taps and smaller Height: a DIS1 Lateral Tee of Ø12" with a tap of Ø10" and the Height of a regular BT of Ø10 = DAS1-12BTB10H10.

Tee Cap (TC)

Used to close, seal or provide access for cleanout unused tee ports.

Included:

For DCL: One (1) disc with handle, and one (1) SMALL Locking Inner "V" Band (BSI).

For DAS1: One (1) disc with handle, one (1) SMALLER Locking Inner "V" Band (BSI), one (1) LARGER Locking Inner "V" Band, and one (1) outer bucket-casing with handles.

For DIS1, DIS2, and DIS4: One (1) disc with handle, one (1) SMALLER Locking Inner "V" Band (BSI), one (1) LARGER Locking Inner "V" Band, one (1) outer bucket-casing with handles, one (1) (DIS1, DIS2) or two (2) (DIS4) round Insulated pad, and one (1) insulation wrap.

For DIS3Z: One (1) disc, one (1) SMALL Locking Inner "V" Band (BSI), one (1) LARGE Locking Inner "V" Band, one (1) outer casing, one (1) insulation wrap, three (3) insulation disc.

Drain Tee Cap (DTC)

Used to close and seal unused tee ports and to provide drain point for condensation at the base of a vertical duct run. 1" NPT nipple.

Included:

For DCL: One (1) disc with a 1" NPT nipple and one (1) SMALL Locking Inner "V" Band (BSI).

For DAS1: One (1) disc with a 1" NPT, one (1) SMALLER Locking Inner "V" Band (BSI), one (1) LARGER Locking Inner "V" Band, and one (1) outer bucket-casing with handles.

For DIS1, DIS2, and DIS4: One (1) disc with a 1" NPT, one (1) SMALLER Locking Inner "V" Band (BSI), one (1) LARGER Locking Inner "V" Band, one (1) outer bucket-casing with Handles, one (1) (DIS1 and DIS2) or two (2) (DIS4 only) round Insulated pad, and one (1) insulation wrap.

For DIS3Z: One (1) disc with a 1 NPT, one (1) SMALL Locking Inner "V" Band (BSI), one (1) LARGE Locking Inner "V" Band, one (1) outer casing, one (1) insulation wrap, three (3) insulation disc.

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Tapered Increaser Adaptors (TINØ)

Used when a pipe diameter change (increasing) is required. Tapered increasers are preferred over Step Increasers when space permits.

Included:

For DCL: All items for the LARGER diameter: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: All items for the LARGER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: All items for the LARGER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Step Increaser Adaptors (INØ)

Used when a pipe diameter change (increasing) is required in a small space.

NOTE: Tapered Increasers are preferred over Step Increasers when space permits. NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: All items for the LARGER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).

For DAS1: All items for the LARGER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: All items for the LARGER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: $K = [1 - (\Ø/(\Ø+B))^2]^2$

Tapered Reducer Adaptors (TRDØ)

Used when a pipe diameter change (reducing) is required.

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: All items for the SMALLER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).

For DAS1: All items for the SMALLER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: All items for the SMALLER diameter: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Flow resistance: $K = 0.63 [1 - (\Ø/(\Ø+B))^2]^2 / (\Ø/(\Ø+B))^4$

ANSI Flange Adaptors (TRDØ)

Used to attach flue components to a class 125 lb or 150 lb ANSI. Dimensions are per ANSI 125 lb. Nut, Bolts and gasket kit for the ANSI flange are not included.

NOTE: For DAS1, DIS1, DIS2, and DIS4, the Outer Band (BSE) works as the outer wall of the adaptor. NOT AVAILABLE FOR MODEL DIS3Z

- Included:**
For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).
For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).
For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Ø (in.)	Effective Length (in)	Product Code				
		DCL (Single Wall)	DAS1 (1" Air Insulated)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)
5" to 36"	3"	DCLØFA	DAS1-ØFA	DIS1-ØFA	DIS2-ØFA	DIS4-ØFA

Material options (Inner): 304, 316
Flow resistance:
Ø5" to Ø16": K = 0.4 (eff. length [ft] / Ø [in])
Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])
For Engine and Turbine Exhausts,: K = 0.25 (eff. length [ft] / Ø [in])

Single Wall Adaptor (SWA)

Used to attache pipe straight shank outlets.

NOTE: For DIS1, DIS2, DIS4, and DAS1, the outerband (BSE) can be used as the outer wall of the adaptor. NOT AVAILABLE FOR MODEL DIS3Z

- Included:**
For DCL : One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) Locking Band (BS) and a Retaining Band.
For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) Locking Band (BS), one (1) Reataining Band, and one (1) Outer Band (BSE).
For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) Locking Band (BS), one (1) Retaining Band, one (1) 6" insulation band, and one (1) Outer Band (BSE) .

Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])
For Engine and Turbine Exhausts,: K = 0.25 (eff. length [ft] / Ø [in])

Single Wall Adaptor with Test port (SWAN)

Used to attach pipe straight shank outlets and has a $\varnothing 1/2"$ x 3" NPT test port with a cap.

NOTE: The Outer Band (BSE) can be used as the outer wall of the adaptor. If the BSE is used, it must be field cut to let the nozzle pass through. NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) Locking Band (BS) and a Retaining Band.

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) Locking Band (BS), one (1) Retaining Band, and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) Locking Band (BS), one (1) Retaining Band, one (1) 6" insulation band, and one (1) Outer Band (BSE).

Material options (Inner): 304, 316

Flow resistance:

Ø5" to Ø16": $K = 0.4$ (eff. length [ft] / Ø [in])

Ø18" to Ø36": $K = 0.3$ (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts,: $K = 0.25$ (eff. length [ft] / Ø [in])

Half Universal Flange (HUF)

Used to connect a pipe to a boiler or other appliance having a flange outlet with 4, 6, 8, 12, 16, 24, or no bolt pattern.

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: Four (4) Half Clamp Plates of 1/8" thickness.

For s: 1 Four (4) Half Clamp Plates, and two (2) Half Outer Band (DBSE).

For DIS1, DIS2 and DIS4: Four (4) Half Clamp Plates, two (2) Half Outer Band (DBSE), and two (2) 3" insulation band.

Material options (Inner): SS 439 .125"

Square to Round (STRAB) or Round to Square (RTSAB), where "A" & "B" are the square dimensions

Used to connect a round chimney to a square/rectangular connection and vice versa. The square dimension is designed to be connected by means of lap of weld on the field. These parts are always considered custom parts.

NOTE: ALL DIMENSIONS DATA MUST BE ANALYSED AND APPROVED BY DURAVENT TECHNICAL SUPPORT BEFORE ORDERING. NOT AVAILABLE FOR MODEL DIS3Z

Dimensional data to specify :

- the exact size of the outer dimensions of the square or rectangular (A" x B") ;
- the diameter of the round end (i.e. the DCL, DAS1, DIS1, DIS2, and DIS4 flue dimension);
- the effective height;
- the flange dimension on the square or rectangular end if not 1 1/2";
- the option of the square flange:
 - Option #1 = a 1" Flue extension on the square/rectangle side,
 - Option #2 = No flue Extension on the square/rectangular side.

NOTE: Standard dimensions will be as follow:

- Option #1
- Effective length = 20"
- 1 1/2" wide flange on the square/rectangular.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2 and DIS4: One(1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Ø (in.)	Effective Length (in)	Square Dimensions		Option	Product Code				
		A (in)	B (in)		DCL (Single Wall)	DAS1 (1" Air Insulated)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)
5" to 36"	20" or Custom	Custom	Custom	#1 or #2	DCLØSTRAB	DAS1-ØSTRAB	DIS1-ØSTRAB	DIS2-ØSTRAB	DIS4-ØSTRAB
					DCLØRTSAB	DAS1-ØRTSAB	DIS1-ØRTSAB	DIS2-ØRTSAB	DIS4-ØRTSAB

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = unknown (custom)

Eccentric Square to Round (CUSTOM) or Eccentric Round to Square (CUSTOM), where "A" & "B" are the square dimensions and the "C" and "D" is the offset of the round part.

It is similar to a STR except the round collar is offset from center of the square collar. Same used as the STR, but can have a flat bottom on horizontal runs or provide an offset (C X D). The square dimension is designed to be connected by means of lap of weld on the field.

NOTE: ALL DIMENSIONS DATA MUST BE ANALYSED AND APPROVED BY DURAVENT TECHNICAL SUPPORTS BEFORE ORDERING. NOT AVAILABLE FOR MODEL DIS3Z

Dimensional data to specify :

- the exact size of the outer dimensions of the square or rectangular (A" x B");
- Specify the offset dimensions C" x D" referred to one outer side of the square and the center of the round end;
- the diameter of the round end (i.e. the DCL, DAS PRO or DIS PRO flue dimension);
- the effective height;
- the flange dimension on the square or rectangular end if not 1 1/2";
- the option of the square flange:
 - Option #1 = a 1" Flue extension on the square/rectangle side,
 - Option #2 = No flue Extension on the square/rectangular side.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2 and DIS4: One(1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Ø (in.)	Effective Length (in)	Square Dimensions		Offset Dimensions (from the center)		Option	Product Code

							Custom	Custom	Custom	Custom	Custom

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance: K = unknown (custom)

Fan Adaptor (FAN)

Used to connect to a fan or any kind of device that requires a square plate adaptor. Standard square plate size.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2 and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794).

Ø (in.)	Effective Length (in)	A (in)	B (in)	Product Code					
				DCL (Single Wall)	DAS1 (1" Air Insulated)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)	DIS3Z (3" Insulated)
5 to 36	5	Ø + 12	Ø + 12	DCLØFAN	DAS1-ØFAN	DIS1-ØFAN	DIS2-ØFAN	DIS4-ØFAN	DIS3Z-ØFAN

Also available custom plate size as custom part. Dimension A and B must be specified.

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

Ø6" to Ø16": $K = 0.4$ (eff. length [ft] / Ø [in])

Ø18" to Ø36": $K = 0.3$ (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts,: $K = 0.25$ (eff. length [ft] / Ø [in])

Accessories

Relief Valve (RV)

For use on all engine exhaust applications. It helps to control the venting pressure when a backfire occurs. Consists of a spring loaded disk valve mounted on an ANSI Flange.

Must be used in conjunction with a ANSI Flange adaptor (FA) and a 45° Tee (T45). The nuts, bolts and gasket kit for ANSI are not included (by others).

NOTE: NOT AVAILABLE FOR MODEL DIS3Z.

Included:

For DCL, DAS1, DIS1, DIS2 and DIS4: One (1) Relief Valve (RV) only.

Ø (in.)	Effective Length (in)	Product Code				
		DCL (Single Wall)	DAS1 (1" Air Insulated)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)
5" to 36"	11 1/2"	DCLØRV	DAS1-ØRV	DIS1-ØRV	DIS2-ØRV	DIS4-ØRV

Damper Length (LxxDAMP)

Used to ensure optimum pressures through an appliance. It will aid in the proper operation and efficiency of the appliance by preventing higher than desired draft readings. It has a disc inside the flue. This disc can be controled and rotated from 0° to 90° manually from the outside of the part by the mean of a rod and braket.

NOTE: NOT AVAILABLE FOR MODEL DIS3Z.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Flow resistance: Ø5" to Ø24": 0 to 9999

Half Angle Ring (HAR)

Used for supporting and guiding the chimney on horizontal runs. See installation instructions for spacing. Effective Length = 0"

Included:

For DCL, DAS1, DIS1, DIS2, DIS4, and DIS3Z: One (1) Half Angle Ring (HAR) only.

Hardware for connection to structure is not included (by others).

Material options (angle): - Ø5 to Ø10 = 304, Ø11 to Ø44 = 439

Full Angle Ring (FAR)

Used for support on horizontal runs or for guiding on vertical runs. See installation instructions for spacing. Effective Length = 0". Same dimensions as the Half Angle Ring (HAR).

Included:

For DCL, DAS1, DIS1, DIS2, DIS4, and DIS3Z: Two (2) Half Angle Ring (HAR), and hardware to join both Half Angle Rings. Hardware for connection to structure is not included (by others).

ØA (I.D.) (in)	ØB (B.C.) (in)	C (Total Length) (in)	D (in)	E°	F°	G (#holes per half)	Product Code					
							DCL (Single Wall)	DAS1 (1" Air Insulated)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)	DIS3Z (3" Insulated)
See HAR							DCLØFAR	DAS1-ØFAR	DIS1-ØFAR	DIS2-ØFAR	DIS4-ØFAR	DIS3Z-ØFAR

Material options (angle): - Ø5 to Ø10 = 304, Ø11 to Ø44 = 439

Anchor Plate (AP)

Used for supporting the Chimney in vertical or horizontal runs and to provide a fixed point for thermal expansion consideration. The square opening of the frame must be a minimum of O.D. + 3/4" or a maximum of O.D. + 3 1/4". Effective Length = 0"

Must not be in contact with combustible materials.

Included:

For DCL: Four (4) Split Square plates, four (4) clamps ring, and hardware included.

For DAS1: Four (4) Split Square plates, four (4) clamps ring, two (2) half outer band (DBSE), and hardware included.

For DIS1, DIS2, and DIS4: Four (4) Split Square plates, four (4) clamps ring, two (2) Half Outer Band (DBSE) with two (2) 3" insulation bands, and hardware included.

Hardware for connection to structure is not included (by others).

For DIS3Z: Four (4) Split Square plates, four (4) clamps ring and hardware included.

Hardware for connection to structure is not included (by others).

Material options (plates): 439, Galvanized

Length Anchor Plate (APL)

Used for supporting the duct on vertical or horizontal runs. Cannot be used as fixed supports because the anchor plates are free to move on the longitudinal axis of the length. For thermal expansion consideration and fixed support, use an Anchor Plate (AP). It is a single wall part, but for the DuraStack Pro Series, use the Outer Band (BSE) as the outer wall. The square opening of the frame must be a minimum of O.D. + 1/2" or a maximum of O.D. + 2 1/4".

Must not be in contact with combustible materials.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

For DIS3Z: One Locking Inner "V" Band (BSI) and one Centering Flue Extension (PR-C0794) and one Locking Outer Band (BSE)

Material options (inner): 304, 316

Flow resistance:

Ø5" to Ø16": $K = 0.4$ (eff. length [ft] / Ø [in])

Ø18" to Ø36": $K = 0.3$ (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts.: $K = 0.25$ (eff. length [ft] / Ø [in])

Heavy Duty Wall Support (WSHD)

Used for supporting the vent in vertical runs and to provide a fixed point for thermal expansion consideration. It can maintain a clearance to the wall from 1 1/2" to 10" by adjusting the extendable braces. See instruction manual for required specifications. Effective Length = 0".

Included:

For DCL: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, and hardware included. Hardware for connection to structure are not included (by others).

For DAS1: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, two (2) Half Outer Band (DBSE), and hardware included. Hardware for connection to structure are not included (by others).

For DIS1, DIS2, and DIS4: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, two (2) Half Outer Band (DBSE) with two (2) 3" insulation band, and hardware included. Hardware for connection to structure is not included (by others).

For DIS3Z: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, and hardware included. Hardware for connection to structure are not included (by others).

Material options (plates): 439, Galvanized

Heavy Duty Wall Support (WSHD) continued

Used for supporting the vent in vertical runs and to provide a fixed point for thermal expansion consideration. It can maintain a clearance to the wall from 1 1/2" to 10" by adjusting the extendable braces. See instruction manual for required specifications.
Effective Length = 0".

Included:

For DCL: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, and hardware included. Hardware for connection to structure are not included (by others).

For DAS1: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, two (2) Half Outer Band (DBSE), and hardware included. Hardware for connection to structure are not included (by others).

For DIS1, DIS2, and DIS4: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, two (2) Half Outer Band (DBSE) with two (2) 3" insulation band, and hardware included. Hardware for connection to structure is not included (by others).

For DIS3Z: Four (4) clamps ring, two (2) struts, two (2) adjustable struts, two (2) small wall brackets, two (2) brackets, and hardware included. Hardware for connection to structure are not included (by others).

Heavy Duty Wall Guide (WGHD)

Used for guiding in vertical installation attached to the wall. It can maintain a clearance to the outer wall from 2 1/2" to 10" by adjusting the braces. See instruction manual for required specifications.
Effective Length = 0".

Included:

For DCL, DAS1, DIS1, DIS2, and DIS4: One (1) Full Angle Ring (FAR), four (4) struts, four (4) wall brackets, and hardware included.

For DIS3Z: One (1) FAR, four (4) struts, two (2) small wall brackets, two (2) big wall brackets, two (2) brackets and hardware included.

Hardware for connection to structure is not included (by others).

Heavy Duty Floor Guide

Used for guiding in vertical installation when passing through a floor or roof. Maximum square opening dimensions is duct I.D. + 4". Must not be in contact with combustible. Effective Length = 0".

Included:

For DCL, DAS1, DIS1, DIS2, DIS4, and DIS3Z: One (1) Full Angle Ring (FAR), two (2) struts, two (2) straps, and hardware included.

Hardware for connection to structure is not included (by others).

Material options (Struts): Galvanized

Guy Ring (GR)

Used for attaching guys to the chimney stack. The Clamp rings have holes at 30° apart (12 holes). It is installed at the flange to flange joint of two sections of pipe. See installation instructions for correct location. Tensioners or anchors not included (by others). Effective Length = 0".

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: Four (4) half Clamp Ring, one (1) Storm Collar (SC), and hardware included.

For DAS1: Four (4) half Clamp Ring, one (1) Storm Collar (SC), two (2) half outer band (DBSE), and hardware included.

For DIS1, DIS2 and DIS4: Four (4) half Clamp Ring, one (1) Storm Collar (SC), two (2) half outer band (DBSE) with two (2) 3" insulation band, and hardware included.

Tensioners, anchors and hardware for connection to structure are not included (by others).

For DIS1, DIS2 and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) collar kit on the inner liner with a special locking band (BS), two half casing, insulation pad, and hardware.

Thimbles

Roof/Floor Thimble (RT)

Used when pipe passes through a combustible roof / floor structure to reduce clearances to combustibles. The RT allows for pipe expansion and contraction the roof. See installation instructions for hole opening for the right clearance of each diameter and other specifications. Effective Length = 0".

NOTE: NOT AVAILABLE FOR MODEL DCL AND DIS3Z

Included:

For DAS1, DIS1, DIS2, and DIS4: One (1) Roof / Floor Thimble only

Wall Thimble (WT)

Used when pipe passes through a combustible wall structure to reduce clearances to combustibles. The WT allows for pipe expansion and contraction of the roof. The part consists of a wall thimble female half and a male wall thimble half that slide in each other to adjust wall thickness from 8" to 12". See installation instructions for hole opening for the right clearance for each models and other specifications. Effective Length = 0".

NOTE: NOT AVAILABLE FOR MODEL DCL AND DIS3Z

Included:

For DAS1, DIS1, DIS2, and DIS4: One (1) wall thimble female half, and one (1) wall thimble male half.

Flashing (F)

Used in conjunction with Storm Collar (SC), included, for weatherization at the roof. There are 1" spacers on the top of the flashing to make sure there is an air gap between the Flashing and the outer wall of a section.

Included:

For DCL, DAS1, DIS1, DIS2, DIS4, and DIS3Z: One (1) Storm Collar (SC), and hardware included.

Material options (collar): 304, Galvalume

Storm Collar (SC)

Used above the Flashing or the Adjustable Flashing for complete weatherization above the roof. To be sealed with outer joint sealant (S-375) (not included).

Included:

For DCL, DAS1, DIS1, DIS2, DIS4, and DIS3Z: Hardware for the collar.

Material options (all): 304, Galvalume

Finishing Cone (FC)

Used at the top of the chimney and protects the chimney against water infiltration in the insulation between the inner and outer wall of the chimney. The inner flue is straight all the way. A Drain Tee Cap (DTC) at the base of the chimney or a Drain Length (DL) in the vertical run is required for use of a Finishing Cone (FC).

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), and one (1) Centering Flue Extension (PR-C0794).

For DAS1: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), and one (1) Outer Band (BSE).

For DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) 6" insulation band, and one (1) Outer Band (BSE).

Ø36	32 1/2					

Material options (Inner-Outer): 304-Galvalume, 304-304, 316-Galvalume, 316-304

Flow resistance:

Ø5" to Ø16": K = 0.4 (eff. length [ft] / Ø [in])

Ø18" to Ø36": K = 0.3 (eff. length [ft] / Ø [in])

For Engine and Turbine Exhausts: K = 0.25 (eff. length [ft] / Ø [in])

Conic Rain Cap (CRC)

Used to provide the greatest degree of rain protection and it is a single wall part. For dable wall, a Closure Ring (CR) is provided to protects the insulated space between standard pipe inner and outer. Also available with bird screen (DCLCRCB).

Included:

For DCL: One (1) Conic Rain Cap (CRC) only.

For DAS1, DIS1, DIS2 and DIS4: One Closure Ring (CR).

For DIS3Z: One Closure Ring (CR).

Material options (Inner): 304, 316

Flow resistance: K = 0.5

Material options (Inner): 304, 316

Flow resistance: K = 0.5

No Loss Cap (CNL)

Used to provide a “low-loss” termination on vertical run when the chimney is installed at a location subject to high wind condition and need protecting to the equipment from the rain. It allows your equipment to operate as efficiently as possible and the exhaust to blast unhindered straight up with full velocity. As per the ACGIH: Industrial Ventilation Manual, 23rd edition (1998), the outer wall must have a diameter of $\varnothing\text{flue} + 2$, overlap the inner wall by 6", be separated from the inner wall with 1" spacers, and have a height of four (4) times the $\varnothing\text{flue}$.

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Two different designs for the CRC:

Ø5" to Ø13": An inner flue with an outer wall connected on it.

Ø14" to Ø36": An inner flue with 1" spacers connected on it, different number of DCL sections of $\varnothing + 2$, working as outer wall, making a total height of 4 times the flue $\varnothing$, whose are mounted on an Anchor Plate (AP) when it has 6" overlap, placed.

See Installation Instructions for more information.

Included for Ø5 to Ø13:

For DCL: One (1) No Loss Cap (CNL) only.

For DAS1, DIS1, DIS2, and DIS4: One (1) Closure Ring (CR).

Included for Ø14 to Ø36:

For DCL: One (1) inner wall with brackets on it, one (1) locking inner V-Band, one (1) Anchor Plate (AP), different numbers and lengths of DCL section of $\varnothing + 2$ with their inner V-Band (BSI of $\varnothing + 2$), and one (1) Closure Ring (CR).

For DAS1, DIS1, DIS2 and DIS4: One (1) inner wall with brackets on it, one (1) locking inner V-Band (BSI), one (1) Anchor Plate (AP), different numbers and lengths of DCL section of $\varnothing + 2$ with their inner V-Band (BSI of $\varnothing + 2$), and one (1) Closure Ring (CR).

Material options (Inner-Outer): 304-316

Flip Top (FT)

Used mostly in vertical diesel or turbine exhaust, it prevents moisture and debris from entering the system. It can also be used on horizontal run when properly installed. It opens with internal pressure and closes when no pressure. It is a single wall part (for all Models DCL, DAS1, DIS1, DIS2, and DIS4). For DAS1, DIS1, DIS2, and DIS4, a Closure Ring (CR) is provided to protect the insulated space between standard pipe inner and outer.

NOTE: NOT AVAILABLE FOR MODEL DIS3Z

Included: One (1) Flip Top (FT) only.

For DCL: Nothing else.

For DAS1, DIS1, DIS2, and DIS4: One (1) Closure Ring (CR).

Ø16 to Ø18		9 1/8					
Ø20 to Ø22		10 1/8					
Ø24		11 1/8					

Material options (Inner-Outer): 304-316

Miter Cut (MC)

Used in horizontal diesel or turbine exhaust to minimize the entry of rainwater in the system when installed in the proper orientation.

Included:

For DCL, OAX1, DIS1, DIS2, DIS4, and DIS3Z: One (1) Miter Cut (MC) only, One (1) birdscreen at the end.

Flow resistance: K = 1.25

Locking Inner "V" Band (BSI)

Used to clamp and seal parts together. To be sealed with joint sealant (not included).

- Included:
For DCL, DIS1, DIS2, and DIS4: Two (2) half band, and hardware.
For DIS3Z: Two (2) half band, and hardware.

Ø (in.)	Total Length (in)	Effective Length (in)	Product Code

Materials available: 441.

Outer Band (BSE)

Used to seal outer casing at each joint. When then (BSE) is exposed to weather, sealant S-375 (by others) must be used to seal every joint.

NOTE: NOT AVAILABLE FOR MODEL DCL

- Included:
For DAS1 and DIS1, DIS2, and DIS4: Two (2) half band (small diameter) or one (1) band (for large diameter).
For DIS1, DIS2, and DIS4 only: Two (2) half band (small diameter) or (1) band (larger diameter), and one (1) 6" wide insulation strip, and hardware.
For DIS3Z: Two (2) half band (small diameter) or one (1) band (for large diameter).

Centering Flue Extension (PR-C0794)

Unattached sleeve used for centering parts together while assembling.

NOTE: NOT AVAILABLE FOR MODEL DCL

- Included:
For DAS1 and DIS1, DIS2, DIS4, and DIS3Z: One (1) Sleeve.

Ø (in.)	Ø of sleeve (in.)	Total Length (in)	Effective Length (in)	Product Code
				DAS1 (1" air), DIS1 (1" Insulated), DIS2 (2" Insulated), DIS4 (4" Insulated), DIS3Z (3" Insulated)
5 to 36	Ø - 1/8	Ø - 1/8	0	PR-C0794-Ø

Materials available: 441.

Half Outer Band (DBSE)

Used to seal outer casing when using Anchor Plate (AP), an Heavy Duty Wall Support (WSHD), Half Universal Flange Adaptors (HUF). Half height of the BSE. Need one (1) band on each side of the plates.

NOTE: NOT AVAILABLE FOR MODEL DCL

- Included:
For DAS1 and DIS1, DIS2, and DIS4: Two (2) half band (small diameter) or one (1) band (for large diameter), and hardware.
For DIS1, DIS2, and DIS4 only: Two (2) half band (small diameter) or (1) band (larger diameter), and one (1) 3" wide insulation strip.
For DIS3Z: Two half bands (small diameter) or one band (for large diameter), One 3" wide insulation strip and hardware.

Ø (in.)	Ø of band (in)	Total Length (in)	Effective Length (in)	Product Code				
				DAS1 (1" air)	DIS1 (1" Insulated)	DIS2 (2" Insulated)	DIS4 (4" Insulated)	DIS3Z (3" Insulated)
5 to 36	Ø O.D. + 3/4	2 11/16	0	DAS1-ØDBSE	DIS1-ØDBSE	DIS2-ØDBSE	DIS4-ØDBSE	DIS3Z-ØDBSE

Materials available: 441.

Duct Closure Band (CR)

Use to shield insulation from weather for some Single Wall Termination (Conic Rain Cap, No loss Cap, Flip Top) or when transition from DAS1, DIS1, DIS2, DIS4 to DCL on vertical run. Hardware provided.

Included:

For DAS1, DIS1, DIS2, and DIS4: One (1) collar and hardware.

For DIS3Z: One (1) half band and hardware.

Ø (in.)	ØA (in)	ØB (in)	Total Length (in)	Effective Length (in)	Product Code				
					DAS1 (1" air)	DIS1 (1" insulated)	DIS2 (2" insulated)	DIS4 (4" insulated)	DIS3Z (3" Insulated)
5 to 36	Ø + 1/16	ØO.D. + 4	7	0	DAS1-ØCR	DIS1-ØCR	DIS2-ØCR	DIS4-ØCR	DIS3Z-ØCR

Materials available: Galvalume, 304

Transition Outer Band (O.D. from one lineup to another)

Used to shield insulation on vertical or horizontal run when there is a transition from any product lineup to another one. Each product can be used on both ways: to convert up to a larger outer wall, or to convert up to a smaller outer wall.

Included:

For DCL, DAS1, DIS1, DIS2, and DIS4: Two (2) half bands with half disc, and hardware.

Ø (in.)	Ø of band (in)	Total Length (in)	Effective Length (in)	Product Code			
				One (1) lineup gap (O.D. + 2 or O.D. - 2)	Two (2) lineup gap (O.D. + 4 or O.D. - 4)	Three (3) lineup gap (O.D. + 6 or O.D. - 6)	Four (4) lineup gap (O.D. + 8 or O.D. - 8)
5 to 36	ØO.D. + 3/4	5 3/8	0	DCLØDAS1 DAS1-ØDIS2 DIS1-ØDIS2	DCLØDIS2 DIS2-ØDIS4	DAS1-ØDIS4 DIS1-ØDIS4	DCLØDIS4

Materials available: 441

Sealant

The **S-375** grey sealant is used if any joints of any bands are exposed to weather, or on other parts that are external the structure and need to be sealed.

The **S-650** red sealant is used for Flange to Flange Joint Assembly for a maximum continuous flue temperature of 650°F.

The **S-2000** white sealant is used for Flange to Flange Joint Assembly for a maximum continuous flue temperature of 2000°F.

Flue Diameter Ø	Expected number of tubes per joint/hole for each sealant

No Tool Inline Access Door

Used for inspection and cleaning. Greaseproof and fire-tight seal.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) fiber high temperature gasket, one (1) silicone gasket, one (1) inner door, and hardware (wing screws) for the access door. Replacement gaskets available

For DAS1, DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) locking outer band (BSE), one (1) fiber high temperature gasket, one (1) silicone gasket, one (1) inner door, one (1) outer door and hardware (wing screws) for both access doors.

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794), one (1) locking outer band (BSE), one (1) fiber high temperature gasket, one (1) silicone gasket, one (1) inner door, one (1) outer door and hardware (wing screws) for both access doors.

Materials available: 304, 316.

Flow resistance: $K = .30 \text{ (eff.length [ft] / } \text{Ø [in])}$.

Through Penetration Firestop Kit

Used to maintain fire resistance rating of a floor or a wall when the grease duct DIS3Z is penetrating a 2-hour fire-rated floor or wall (UL System No. C-AJ-7160). One kit required for a floor penetration and two kits required for wall penetrations. Diameter of penetration is outer casing + 2" (Ø I.D. + 8"). Must use the firestop caulking. Reference installation instructions.

Included:

For DIS3Z: Two (2) split closure band, two (2) split cover plate, one (1) 12" wide insulation strip, one (1) 3" wide insulation strip and Hardware included except the connection to the wall/floor (by others).

Materials available: Galvalume.

90° Tees and 90° Tees with a Dam

Used to change direction at 90° breeching. Can be used as an inspection access in horizontal runs. An optional Dam can be ordered in position #1 or #2 for protection against fluids running out while cleaning.

Included:

For DCL: One (1) Locking Inner "V" Band (BSI) and one (1) Centering Flue Extension (PR-C0794).

For DAS1, DIS1, DIS2, and DIS4: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

For DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Centering Flue Extension (PR-C0794) and one (1) Locking Outer Band (BSE).

Also available with smaller snout ØB. Code: DCLØT90BØ or DAS1-ØT90ØB, DIS1-ØT90ØB, DIS2-ØT90ØB, DIS4-ØT90ØB
Two different position option of a Dam inside the flue is available. Code for position 1 or 2: DCLØT90D(1or 2) or DAS1-ØT90D, DIS1-ØT90D, DIS2-ØT90D, DIS4-ØT90D (1 or 2).
Materials available: 304, 316.
Flow resistance: K = 1.25

90° Tees with Nozzle

Used to change direction at 90° breeching, and provides access for installation or inspection of sprinkler head. 1" NPT nipple.

Included:

For DCL, DAS1, DIS1, DIS2, and DIS4: One Locking V-Band (BSI), one Centering Flue Extension (PR-C0794) and one Locking Outer Band (BSE).

For DIS3Z: One Locking V-Band (BSI), one Centering Flue Extension (PR-C0794) and one Locking Outer Band (BSE).

Materials available: 304, 316.

Also available with smaller snout ØB. Code: DCLØT90NØB or DAS1-ØT90NØB, DIS1-ØT90NØB, DIS2-ØT90NØB, DIS4-ØT90NØB

Flow resistance: K = 1.25 + an unknown value for the sprinkler head. Contact sprinkler head manufacturer

No Tool Access Tee Cap

Used to close and seal unused tee ports. Provides easy and toolless access for inspection.

Included:

For DCL: One (1) disc, one (1) annular disc with rivnuts, one (1) SMALL Locking Inner "V" Band (BSI), wing screws and hardware.

For DAS1, DIS1, DIS2, and DIS4: One (1) disc, one (1) annular disc with rivnuts, one (1) SMALL Locking Inner "V" Band (BSI), one (1) outer casing with latches, one (1) insulation wrap, three (3) insulation disc, wing screws and hardware.

For DIS3Z: One (1) disc, one (1) annular disc with rivnuts, one (1) SMALL Locking Inner "V" Band (BSI), one (1) outer casing with latches, one (1) insulation wrap, three (3) insulation disc, wing screws and hardware.

Materials available: 304, 316.

Drain Bucket

Used at the base of a vertical riser as a drain reservoir and to provide cleanout access. Made of a short Length with a drain tee cap. 1" NPT nipple.

Included:

For DCL: One (1) small length plus one (1) drain Tee Cap (DTC).

For DAS1, DIS1, DIS2, and DIS4: One (1) small length plus one (1) drain Tee Cap (DTC).

For DIS3Z: One (1) small length plus one (1) drain Tee Cap (DTC).

Materials available: 304, 316.

Round Flanged Hood Adaptor

Used to connect the first duct section to hood. Can be field welded or supplied to Hood manufacturer for installation (by others).

Included:

For DCL: One (1) Locking Inner "V" Band (BSI).

For DAS1, DIS1, DIS2, DIS4, and DIS3Z: One (1) Locking Inner "V" Band (BSI), one (1) Locking Outer Band (BSE).

5 to 36	2 3/4	DCLØRFHA	DAS1-ØRFHA	DIS1-ØRFHA	DIS2-ØRFHA	DIS4-ØRFHA	DIS3Z-ØRFHA

Materials available: 304, 316.

Flow resistance: K = 0.825/Ø

Square to Round Adaptor

Used to connect a round duct to a hood equipped with a square/rectangular collar or to connect to a square duct.

STR's are a custom part and all requests need to go through the design group at layouts@duravent.com.

Custom parts are non-returnable and may require extra production time.

Grease Duct Roof / Floor Thimble

Used when pipe passes through a combustible roof / floor structure to reduce clearances to combustibles. The RT allows for pipe expansion and contraction the roof. See installation instructions for hole opening for the right clearance of each diameter and other specifications. Effective Length = 0".

NOTE: NOT AVAILABLE FOR MODEL DCL

Included:

For DAS1, DIS1, DIS2, and DIS4: One (1) Roof / Floor Thimble only

Grease Duct Wall Thimble

Used when pipe passes through a combustible wall structure to reduce clearances to combustibles. The WT allows for pipe expansion and contraction of the roof. The part consists of a wall thimble female half and a male wall thimble half that slide in each other to adjust wall thickness from 8" to 12". See installation instructions for hole opening for the right clearance for each models and other specifications. Effective Length = 0".

NOTE: NOT AVAILABLE FOR MODEL DCL

Included:

For DAS1, DIS1, DIS2, and DIS4: One (1) wall thimble female half, and one (1) wall thimble male half.

Grease Duct Wall Thimble

Used when pipe passes through a combustible wall structure to reduce clearances to combustibles. The WT allows for pipe expansion and contraction of the roof. The part consists of a wall thimble female half and a male wall thimble half that slide in each other to adjust wall thickness from 8" to 12". See installation instructions for hole opening for the right clearance for each models and other specifications. Effective Length = 0".

NOTE: NOT AVAILABLE FOR MODEL DCL

Included:

For DAS1, DIS1, DIS2, and DIS4: One (1) wall thimble female half, and one (1) wall thimble male half.
