Welcome to PBE

Principle Business Enterprises, (PBE) is a woman-owned, family enterprise celebrating over 55 years of service to the healthcare field and over 30 years as a pioneer in the development of incontinence and moisture management solutions. Founded by Lee and Jim Mitchell in 1961, the company's name and corporate charter clearly speak to its ethical foundation and purpose:

“to operate its business affairs in such a manner as will accord with that fixed principle which will destine it to do nothing but that which is honorable and will promote a high standard of business ethics in its own affairs and may tend to raise and leaven the standard of business ethics of the community.”

Principle Business is the acknowledged innovative leader in high performance niche products especially in the area of incontinence care, wound care and fall prevention. Its products have been designed to address risk factors and care protocols that can materially affect the quality of life for individuals in hospitals, nursing homes, clinics and homecare settings while providing exceptional customer service.

Our Mission

“To be an example of the right idea of business that operates and prospers from a principled base and tends towards **uplifting, enlightening** and **enriching** the lives of those it serves; that they might have life and that they might have it more abundantly.”

Premium Absorbency
Leakage Protection
Odor Control
Bacterial Inhibition

Providing Premium
Protection to the
following segments:
SNF, CCRC, Memory
Care, AL, Rehab,
HomeCare

Improved Clinical Outcomes & Bottom Line Savings

Clinical Benefits

- Longer wearing products allow for extended periods of uninterrupted sleep and the potential to improve cognition, reduce agitation and the need for sedation.
- Fewer changes allow staff to provide a more person-centered care approach to their residents: more time for therapy and meaningful family and staff interactions. Also, fewer changes allow staff to be more focused on safety and safety rounds.
- Premium protection keeps skin dry and in most cases reduces the incidence of Incontinence Associated Dermatitis (IAD).

Financial Benefits

- Utilization Reduction- Up to 50% reduction in product usage.
- Increased Productivity- Fewer changes reduce staff work load.
- Laundry Reduction- Higher absorbency and better leakage control.
- Reduction in Supplies- Fewer gloves, barrier creams, underpads, etc.
- Increased Reimbursement Rates- Better survey results and CMS/QI/QM ratings.

We Speak Your Language

Tranquility products and the PBE team deliver value from a thorough understanding of the issues facing today's healthcare providers. Helping our clients create and document improved quality outcomes is central to our mission. We understand how Quality Measures affect your bottom line and how Value Based Purchasing (VBP) can maximize your reimbursement rates. Ask our team how we are working to document the benefit of increased sleep utilizing Tranquility products and their effect on re-hospitalization rates.

Understanding Absorbency

Capacity claims can be confusing. Some brands show “drops of fluid” or use terms, such as; “super,” “extra,” or “supreme” to indicate product capacity. Two measurable indicators are C.U.P. and ISO. The Tranquility Product Family uses C.U.P. and displays actual product fluid capacity in standard 8 ounce measuring cups.

ISO (International Standards Organization) is a test method that measures capacity that only records the amount of fluid a product can absorb without any pressure applied (free-swell). The product is placed into saline solution for 30 minutes. After removal from the saline, it is allowed to drip for 5 minutes. The level of fluid that is retained is the ISO capacity.

C.U.P. (Capacity Under Pressure) is the recommended way PBE tests because it gives a more “real world” indication of what the product will hold in actual use.

PBE tests all absorbent products using the ISO method and also tests using the C.U.P. which takes it a step further. After the product has been soaked in synthetic urine, pressure is applied to simulate the kind of pressure a wearer would exert on the saturated product. The amount of fluid remaining after pressure has been applied is defined as the C.U.P. capacity.

The reality is that residents who are incontinent are sitting, standing, walking, or lying down – all of which exerts pressure on the product. Experienced caregivers are acutely aware that a product’s RETENTION is the key factor in incontinence management.

Easy to understand graphics on packaging help in selecting the right product and capacity to meet the challenge.

Experienced caregivers are acutely aware that a product’s **RETENTION** is the key factor in incontinence management.

Absorbent capacity indicator as shown on packaging.

“In the 3 months prior, we had 8 falls (residents attempting self-toileting). In the 3 months after starting the [Tranquility] SmartCore Program, we have had 0 falls. We are very impressed...and have no intention of changing.”

– S.N., Owner/Administrator, Osgood, IN

Moisture Management Standards

Effective products dealing with moisture need to meet exacting performance criteria. The objectives are always to maintain or restore the ideal “micro-climate” for skin, the safety and quality of life for the individuals and caregivers involved.

The following are fundamental principles and criteria that need to be considered when selecting absorbent products:

1. Sufficient absorbent capacity to provide 6-8 hours of protection to allow uninterrupted activity (such as sleep, working, shopping, etc.)
2. Protection from risks to the skin caused by sheer, friction, heat, wetness and unbalanced pH
3. Protection from the risk of falls associated with incontinence and/or wound exudate that leaves the feeling of wetness/cold from the absorbent products
4. Design and absorbent capacity that eliminates the waste and costs incurred arising from product leakage and the resulting excessive cost and labor demands resulting from wet bedding and/or wet clothing
5. Ease of use and effectiveness that minimizes the burden and frustration for caregivers or professional staff that leads to “burnout”
6. The high performance that allows care-providers to focus on individual-centered therapies and life-enhancement strategies for care recipients

Peach Mat Guarantee®

Exclusive to Tranquility Premium Protection Products

Tranquility products are carefully engineered to provide premium protection. The Peach Mat construction uses a proprietary composite structure of tissues, superabsorbent polymers, cellulose and liquid dispersing materials. The peach-colored core assures the product is the Tranquility brand. The clinically proven design guarantees four key factors:

- Unsurpassed capacity: protects against leakage and skin irritation
- Odor reduction: due to polymer selection and product construction odor is reduced
- Urine pH neutralization: protects delicate skin from the caustic effect of urine
- Inhibition of bacterial growth: deprives bacteria of a place or conditions to thrive

You can rely on Tranquility's promise of unsurpassed overall performance in the areas of...

- skin dryness
- odor reduction
- urine neutralization
- inhibition of bacterial growth.

In fact, we guarantee it!

Peach Mat Guarantee®

RESIDENTS

Uninterrupted sleep & reduced health risks for wounds and falls

CAREGIVERS

Improved morale & productivity

FACILITIES

Reduced product usage, laundry & odors

WHEN PERFORMANCE MATTERS MOST.

Nursing staff has a peace of mind that their residents are getting the best care and wasted efforts are avoided.

Tranquility products guarantee unsurpassed, overall performance in the areas of skin dryness, odor reduction, urine neutralization and inhibition of bacterial growth.

TRANQUILITY
INCONTINENCE CARE

Look for these high performance features in Tranquility products:

- PMG Peach Mat Guarantee®**
The promise of unsurpassed overall performance in the areas of skin dryness, odor reduction, urine pH neutralization and inhibition of bacterial growth.
- WI Wetness Indicator**
Yellow indicator lines turn to blue when moisture is present eliminating unnecessary changes.
- BR Breathable**
Allows air to circulate around the body, promoting skin integrity.
- RT Refastenable Tapes**
Advanced tape system allows multiple openings of the briefs.
- KG Kufguards®**
Inner leg cuffs channel fluids into the core, helping to contain high volume episodes.
- AS Adhesive Strip**
Secures product in place.
- CL Cloth-Like Backsheet**
Product outer layer is soft and rustle free.
- LF Latex-Free**
- MH Micro-Hook Closure Tabs**
Refastenable tabs grip the soft, cloth-like outer layer to securely fasten the brief.
- Absorbency**
Product fluid capacity represented by standard 8-ounce measuring cup.

Breathable
Sides

Absorbency: 34 oz/1005 mL, size Large

SmartCore® Briefs

Breathable sides help eliminate heat and moisture, providing an ideal micro-climate for skin integrity. Color coded by size.

Absorbency: 13.6 oz/403 mL, size Contour

What is a booster pad?

Booster pads have a flow-through design that allows the pad to fill to capacity first and then pass additional fluid to the host (primary) garment. Booster pads are placed inside briefs or disposable underwear, boosting absorbency to extend wear-time, reduce changes and help contain bowel incontinence. Strategically placed over the hip helps prevent leaking for side sleepers.

TM

ThinLiner Moisture Management[®] Sheets

100% breathable, soft cloth-like sheets reduce skin-on-skin friction. Collects, absorbs and retains moisture.

Product Features:

ITEM #	LENGTH/WIDTH	CAPACITY	PACKAGING	HCPC
3090	6" x 10"	5 oz/150 mL*	8 bags of 25 (200)	T4535
3091	6" x 14"	7.7 oz/228 mL*	4 bags of 25 (100)	T4535
3092	20" x 22"	15 oz/450 mL*	4 bags of 25 (100)	T4535

* Moisture capacity (not C.U.P.)

ThinLiner Moisture Management Absorbent Sheets wick moisture away from the skin providing an ideal micro-climate:

- Collection and retention of moisture/exudate
- Inhibition of bacterial growth and odor neutralization
- Soft, comfortable sheets contain trace amounts of Aloe Vera
- Absorbs equally from both sides
- Change as needed (PRN)

Note:
NEVER CUT, only fold,
ThinLiner Sheets to
accommodate various
sizes and applications.

Clinicians have shared the following applications:

- Tuck into irritation and infection prone skin folds, under axilla, breasts, pannus, groin or anywhere moisture is a problem.
- Wrap between fingers and toes (for contractures of the digits). Fold the 6" x 10" ThinLiner lengthwise into 4 equal parts and weave between digits.
- Place in the palm of a contracted hand. Cover a rolled up washcloth with the 6" x 10" ThinLiner.
- Place in gluteal folds (fold the 6" x 10" size in half long way and place in the fold to absorb liquid stool and keep surrounding skin dry).
- Place over dressings for extra absorption (Lymphedema, lining over splints).
- Use anywhere there is a moisture problem or areas prone to moisture related infections.

Sleep & Incontinence

Challenges involving the issue of sleep in the LTC setting include:

- Protocols that prescribe check and change every 2 hours interrupt sleep patterns.
 - Frequent sleep interruptions result in poor sleep efficiency.
 - Normal nighttime staff routines (medication regimens, stocking, etc.) add to disruptions of quality sleep.

Improved sleep leads to better clinical and quality of life outcomes:

- **Improved Cognition:** Tranquility superabsorbent products allow for longer periods of uninterrupted sleep, and the potential to improve cognition, reduce agitation and the need for sedation, especially in residents with dementia.
- **Less Wandering/Aggression:** Residents with dementia may experience fewer episodes of wandering and decreased resident aggression.
- **Reduced Anti-Psychotic Medications:** Decreasing the need for sedation can decrease the need for off label anti-psychotic medications.
- **Increased Participation:** More alert residents can better participate in meaningful interactions, therapy, and self-care.
- **Higher Satisfaction:** Long term care residents who sleep longer experience enriched quality of life and perceive the overall care of the facility as more satisfactory.

“I can say without a doubt that even though the initial cost seemed higher, we are now using LESS product due to the great effect these Tranquility products have, our skin problems because of wetness are 0%, satisfaction of staff and residents and their families (always MOST important) has never been higher and the residents are sleeping through the night which of course has resulted in a higher level of wellness, less stress on the resident, fewer mind and physical complaints, and a much lower transfer rate to outside treatment facilities for care. We can now focus on resident care and their needs as this problem is solved!”

– J.P., RN Staff Development/Infection Prevention

EXCELLENT CAPACITY, OUTSTANDING VALUE.

Heavy Protection, Excellent Value.
High quality products with proven performance.

Look for these high performance features in Select products:

- BR Breathable**
Allows air to circulate around the body, promoting skin integrity.
- WI Wetness Indicator**
Yellow indicator lines turn to blue when moisture is present eliminating unnecessary changes.
- KG Kufguards®**
Inner leg cuffs channel fluids into the core, helping to contain high volume episodes.
