Complete™ Blood Pressure Monitor and EKG Device (BP7900)

Complete from OMRON is the **first blood pressure monitor with EKG capability in a single device for home use in the U.S**, providing a more complete heart health picture.

- Complete, which received clearance by the FDA and launched in the U.S. in 2019, represents groundbreaking innovation for millions with AFib or a family history of irregular heartbeat

- Up to six million Americans have atrial fibrillation (AFib) – their stroke risk is five times higher. Complete has the unprecedented ability to **monitor two critical risk factors for stroke – AFib and high blood pressure – together at home with a single device**

- Intuitive and user-friendly, Complete **syncs with the OMRON Connect mobile app**. Blood pressure and EKG readings can be stored, tracked and shared with your doctor to gain more insights and improve treatment over time

- Complete features **touchpad electrodes** located on the top face and both sides of the monitor for easy access to measure EKG. **Users can store up to 90 readings on the monitor** and can transfer readings to the OMRON Connect app for unlimited storage in our secure, HIPAA-compliant cloud

- EKG is an essential heart health measurement. Complete uses an advanced algorithm designed by AliveCor to improve **detection of the possibility of AFib, bradycardia, tachycardia and sinus rhythm** along **with trusted medical-grade blood pressure measurement** from OMRON

- An at-home EKG and blood pressure monitoring device from the #1 doctor and pharmacist recommended blood pressure monitor brand
