### Siemens' gas turbine generator packages to power Eni Mexico Area 1 FPSO of MODEC

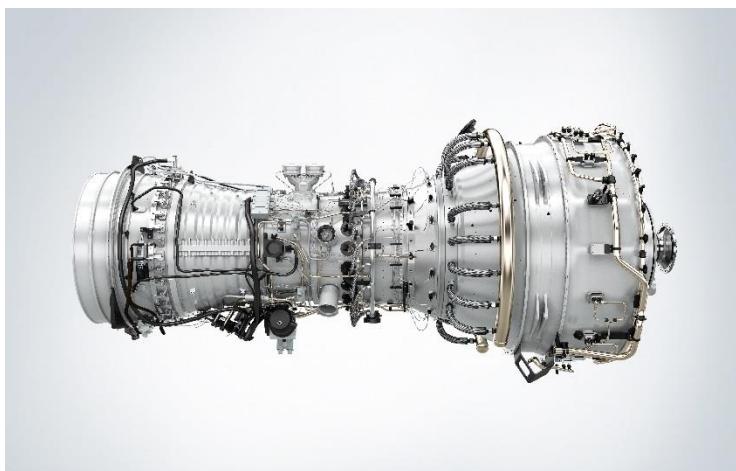

Siemens will provide MODEC with three 34-megawatt (MW) SGT-A35 gas turbine power generation packages that will power MODEC's floating production, storage, and offloading (FPSO) vessel. The vessel, referred to as the "Eni Mexico Area 1 FPSO," will be deployed in the Offshore Area 1 approximately 6 miles (10 kilometers) off the coast of Mexico at a water depth of approximately 105 feet (32 meters). The field is owned by a consortium of two companies including Eni Mexico S. de R.L. de C.V. ("Eni Mexico") as operator and Qatar Petroleum.

MODEC is responsible for the engineering, procurement, construction, mobilization, installation, and operation of the FPSO. Once operating in 2021, the FPSO is expected to process 90,000 barrels per day (bpd) of crude oil and have a storage capacity of 900,000 barrels of crude oil.

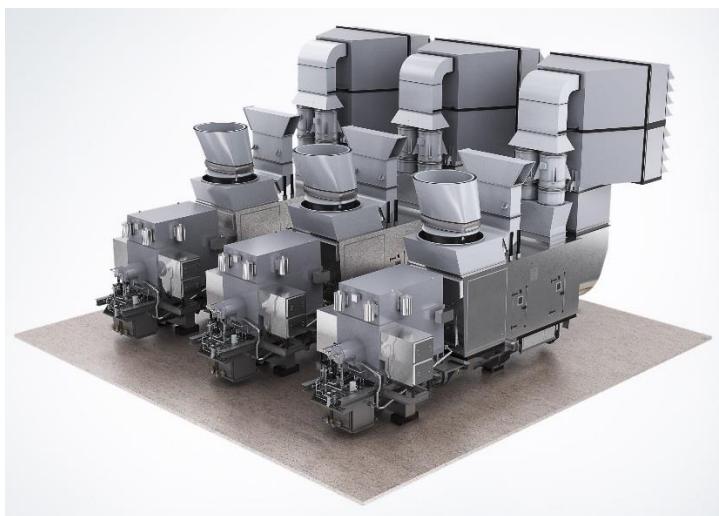

The SGT-A35 aeroderivative gas turbine (formerly the Industrial RB211), with a 3,600 rpm power turbine from the Rolls Royce marine MT30 gas turbine and directly coupled to a synchronous 2-pole generator, offers leading-class reliability and availability that is critical to this type of remote installation. The gas turbine packages feature lightweight, torque-tube-style baseplates, and modularized design with easy maintainability. Furthermore, the SGT-A35 gas turbine generation packages are dry low emissions (DLE)-ready, allowing for conversion to DLE-type engines if required for future upgrades. SIL 3 compliance was incorporated into the package design, as requested by MODEC for this specific project.

Last year, MODEC purchased four SGT-A35 gas turbine power generation packages for its FPSO Carioca MV30 for the Sépia field operated by Petrobras, located in the giant "pre-salt" region of the Santos Basin.

"MODEC selecting us again for such a large-scale project confirms our strong position in the power generation business," said Patrice Laporte, Vice President of Oil and Gas for Siemens America. "Due to the fast-paced delivery schedule of the overall FPSO, we will supply the gas turbine generation packages within a very short lead time."

**Siemens Gas and Power (GP)** is a global pacesetter in energy, helping customers to meet the evolving demands of today's industries and societies. GP comprises broad competencies across the entire energy value chain and offers a uniquely comprehensive portfolio for utilities, independent power producers, transmission system operators and the oil and gas industry. Products, solutions and services address the extraction, processing and the transport of oil and gas as well as power generation in central and distributed thermal power plants and power transmission in grids. With global headquarters in Houston in the U.S. and more than 64,000 employees in over 80 countries, Siemens Gas and Power has a presence across the globe and is a leading innovator for the energy systems of today and tomorrow, as it has been for more than 150 years.

**Siemens AG** (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. The company is active around the globe, focusing on the areas of power generation and distribution, intelligent infrastructure for buildings and distributed energy systems, and automation and digitalization in the process and manufacturing industries. Through the separately managed company Siemens Mobility, a leading supplier of smart mobility solutions for rail and road transport, Siemens is shaping the world market for passenger and freight services. Due to its majority stakes in the publicly listed companies Siemens Healthineers AG and Siemens Gamesa Renewable Energy, Siemens is also a world-leading supplier of medical technology and digital healthcare services as well as environmentally friendly solutions for onshore and offshore wind power generation. In fiscal 2018, which ended on September 30, 2018, Siemens generated revenue of €83.0 billion and net income of €6.1 billion. At the end of September 2018, the company had around 379,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
