Customer Cooperation. Customer understands that this is a self-service Service offering. However, if Customer seeks technical support related to the Service from Dell, then Customer will cooperate with and follow the instructions given by any Dell remote support service, phone analyst, or technicians. Experience shows that most problems and errors can be corrected remotely by closely following the remote diagnosis instructions or through close cooperation between the user and the analyst or technician.

Maintain Software and Serviced Releases. Customer will maintain software and Supported Products at Dell- specified minimum release levels or configurations as specified on www.dell.com/support. Data Backup; Removing Confidential Data. Customer will complete a backup of all existing data, software and programs on all affected systems prior to and during use of this Service. Customer should make regular backup copies of the data stored on all affected systems as a precaution against possible failures, alterations, or loss of data. In addition, Customer is responsible for removing any confidential, proprietary, or personal information and any removable media such as SIM cards, CDs, or PC Cards regardless of whether a technician is also providing assistance.

INFORMATION; **LOST OR CORRUPTED DATA, PROGRAMS OR SOFTWARE;**

Third Party Warranties. These Services may require Dell to access hardware or software that is not manufactured by Dell. Some manufacturers' warranties may become void if Dell or anyone else other than the manufacturer works on the hardware or software. Customer will ensure that Dell's performance of Services will not affect such warranties or, if it does, that the effect will be acceptable to Customer. Dell does not take responsibility for third party warranties or for any effect that the Services may have on those warranties.

Cancellation. If you purchased this service from a seller other than Dell, please see your sales receipt or other sales documentation for return policy, and please visit your original place of purchase for returns, cancellations, or refunds. FOR CUSTOMERS WHO PURCHASED FROM DELL, YOU MAY CANCEL THIS AGREEMENT BY PROVIDING TO DELL AT LEAST THIRTY (30) DAYS WRITTEN NOTICE OF THE DECISION TO CANCEL. IF YOU HAVE NOT USED THE SERVICE, THEN DELL WILL ISSUE A REFUND TO YOU FOR ANY UNUSED PORTION OF THE SERVICE TERM FOR WHICH YOU HAVE PAID. IF MORE THAN THIRTY (30) DAYS HAVE TRANSPIRED FOR THE CURRENT CONTRACT YEAR OR THE SHORTER CONTRACT PERIOD SPECIFIED ON YOUR ORDER DOCUMENTATION, THEN A REFUND WILL NOT BE PAID FOR THAT CURRENT CONTRACT YEAR OR PERIOD. THE BASE LIMITED HARDWARE WARRANTY OR BASIC HARDWARE SERVICES AGREEMENT, AS APPLICABLE, MAY NOT BE CANCELLED. If Dell cancels this Service for any of the above reasons, Dell will send Customer written notice of cancellation at the address indicated on Customer's invoice. The notice will include the reason for cancellation and the effective date of

cancellation, which will be not less than ten (10) days from the date Dell sends notice of cancellation to Customer, unless local law requires other cancellation provisions that may not be varied by agreement. If Dell cancels this Service for any of the above reasons, Customer shall not be entitled to any refund of fees paid or due to Dell. Additionally, Dell may, at its discretion, terminate the Services on thirty (30) days' notice to Customer, in which case Customer will be entitled to a pro-rated refund of any unearned fees for Services that Customer paid.

Geographic Limitations & Relocation. This Service will be delivered to the site(s) indicated on the Customer's invoice. This Service is not available in all areas. In situations when relocation occurs to a target country where the Service is already available, Dell will use commercially reasonable efforts to honor the Service obligation, per the terms of Service in the target country. Service options, including service levels and technical support hours will vary by geography and certain options may not be available for purchase in Customer's location. Dell's obligation to supply the Services to relocated Supported Dell Products is subject to local service availability and may be subject to additional fees.

Transfer of service. Subject to the limitations set forth in this Service Description, Customer may transfer this Service to a third party who purchases Customer's entire Supported Dell Product before the expiration of the then-current service term, provided Customer is the original purchaser of the Supported Dell Product and this Service, or Customer purchased the Supported Dell Product and this Service from its original owner (or a previous transferee) and complied with all the transfer procedures available at www.dell.com/support (for the US and Canada) and www.dell.com/support/global (for all other countries). A transfer fee may apply. Please note that if Customer or Customer's transferee moves the Supported Dell Product to a geographic location in which this Service is not available (or is not available at the same price) as Customer paid for this Service, Customer may not have coverage or may incur an additional charge to maintain the same categories of support coverage at the new location. If Customer chooses not to pay such additional charges, Customer's Service may be automatically changed to categories of support which are available at such price or a lesser price in such new location with no refund available.

Fair Use Policy. The use of these Services is subject to Dell's fair use policy. Dell's fair use policy provides that if at any time a user is found to be abusing the Services by exceeding the level of reasonably expected use, then Dell reserves the right to suspend or cancel these Services. In addition, to the extent allowed by local law, Dell reserves the right to suspend or cancel any Services that Dell, in its sole discretion, determines are being used (a) fraudulently, (b) by any person other than the eligible customer or his or her permitted transferee hereunder, or (c) for any computer system other than a Supported Dell Product.

Recording Calls. In carrying out its obligations and to the extent allowed by local law, Dell, or its third party sub-contractors, may at its discretion and solely for the purposes of monitoring the quality of Dell's response, record part or all of the calls between you and Dell. **By utilizing these Services, you consent to have your calls with Dell or its third-party subcontractors monitored or recorded.**

Attachment A

Migrate

Dell Migrate allows you to copy data, personal settings, records and files from one PC (the old PC) to your latest Dell PC (the new PC). Migrate will discover your files and settings and provide you with the choice of allowing Migrate to either 'Move everything for me' or to personally select what gets migrated with 'Let me choose'. You will also have the option to erase your personal data from your old PC and restore the operating system. Otherwise, data, settings, records, and files on your old PC will remain intact.

Before getting started with Migrate (both PCs)

Customer agrees to the following customer-specific responsibilities:

- We recommend that you perform a backup of data for both the old and new PCs as detailed in the "Data Backup" section of General Customer Responsibilities in this Service Description.
- Ensure Migrate has been purchased and is available on the new Dell PC.
 - See 'Finding Migrate' below if you are unsure how to ensure Migrate is available on your PC
- Ensure the new Dell PC to which you would like to copy data is operable and running Windows 10 or newer
- Ensure Dell SupportAssist is installed on the new Dell PC and updated to the latest version
 - Most Dell PCs already have SupportAssist installed. If not already installed, then please see SupportAssist installation details in the Finding Migrate section below.
- Ensure the old PC from which you would like to copy data is operable and running Windows 8.1 or newer
- Ensure the Dell Data Assistant executable is downloaded and available on the old PC. You can find instructions on where to find and how to download the Dell Data Assistant executable within the 'We're looking for your old PC' section of Migrate on your new PC.
- Ensure both the old and the new PCs are connected to a power source and connected to the same network
 - **For greater security, we highly recommend that you use a private, trusted network.**
- Ensure you are logged in as an administrator on both PCs
- Ensure any active antivirus permissions are set to allow Migrate to connect your PCs. A firewall or router must be configured properly to allow Migrate to connect over the necessary ports
- Ensure sufficient space is available on the new PC
- Ensure no applications are running on either PC
- We recommend that you run antivirus software on your old PC prior to initiating Migrate.

Finding Migrate

- For your convenience, Migrate can be accessed via SupportAssist on your new Dell PC. Open SupportAssist and run Migrate from the Home page at any time during your Migrate entitlement.
- Most Dell PCs already have SupportAssist installed. If needed, download and install SupportAssist from Dell.com; Dell SupportAssist for PCs. Once installed, run Dell Migrate from the SupportAssist Home page at any time during your Migrate entitlement.

Getting Started

- If you purchased Dell Migrate at the same time you purchased a new Dell PC, then Migrate should auto-present soon after you have completed the Microsoft out-of-box and My Dell experiences. If you purchased Migrate separately from a new Dell PC purchase, you will need to open SupportAssist and run Migrate from the SupportAssist Home page.
- At any time during your Service term, you can open SupportAssist and run Migrate from the SupportAssist Home page.
- Many of the common file types can be migrated including Documents, Photos, Videos, Music and more.
- Types of settings that can be migrated include:
 - Date and Time settings such as: Additional calendars, Additional clocks, User locale
 - Appearance and Display settings such as: Wallpaper, Folder options, Taskbar settings, Colors

- Hardware settings such as: Phone and modem, Fax options
- Browser bookmarks such as: Internet Explorer favorites, Google Chrome bookmarks, Mozilla Firefox bookmarks
- Game settings
- User Control settings such as: Mouse, Keyboard, Sound
- Accessibility settings such as: High contrast, Toggle keys, Sticky keys, Filter keys, Color filters, and Magnifier.
- Types of data and settings that will not be migrated include:
 - Program applications
 - Program files
 - System files such as cached files and temp files
- Product configuration specifications, and covered data and settings may change from time-to-time. You may access a current list of specifications and the data and settings that can be migrated in the Dell Migrate section of the SupportAssist user guide on your Dell Supported Product.

During Migrate

- Once Migrate has successfully identified data to be migrated to your new PC, you will have the opportunity to choose either 'Move everything for me' or 'Let me choose what to move'. With 'Move everything for me' Migrate will transfer the data as identified. With 'Let me choose what to move' Migrate will provide the ability to choose specific data and drive mapping attributes.
- Length of Time: The file transfer time will vary depending on several factors, primarily the quantity of data transferred and the type of network utilized. Dell recommends using the 5GHz band of your wireless router or a wired network to help reduce transfer time.
- Please stay near both computers so that you can act on any prompts from the Service.
- Migrate will automatically open local network firewall ports to facilitate the transfer. Once Migrate is complete, it will close those ports. In certain circumstances where you have manually configured firewall rules, you may need to allow certain ports for the migration to complete.
- You can continue to use your new PC while the transfer is taking place. During the transfer, you will notice settings and files starting to move over.

After Migrate

After migration is done, your migrated files are typically available in the same locations as they were on your old PC. For instance, files in the Documents folder on your old PC are in the Documents folder on your new PC. Your settings are migrated transparently within Windows.

Erasing and Resetting your old PC

Once you've successfully migrated your data you'll be presented with an option to erase and reset your old PC. This is an especially important step if, for example, you want to erase data before selling, gifting or trading in your old PC.

- If your old PC is a Dell with the latest version of SupportAssist OS Recovery your personal data will be removed using Dell Reset and your PC will be restored to the out-of-box experience with Dell software preinstalled and ready to go.
- If your old PC does not meet these requirements, you will be guided through Windows Reset to remove your personal files and reset the operating system.

Important Note About Data Erasure

No data removal process leaves a hard drive or computer as free from residual data as a new product. Dell makes no recommendations regarding the customer's security needs or representations regarding the effectiveness of one method of data removal over another.

To learn more about the level of data erasure offered as part of the Service (Level 2) and other levels of erasure, please read the [Levels of erase](#) document (Dell.com/levelsoferase)

Dell Data Assistant is designed to strike a balance between utility, ease-of-use, and effectiveness. It does so by:

- Being a simple-to-use solution, erasing data and automatically restoring the system to the first-boot experience.
- Erasing personal data to a Level 2 standard which overwrites the part of the disk where a file previously existed, as further described below and in the [Levels of erase](#) document (Dell.com/levelsoferase)
- Retaining the PC's usefulness by leaving the operating system (Windows), reset capability, and drivers intact.
- Running as a standalone software solution that does not require additional hardware or tools.

By contrast, higher-level erase solutions may:

- Require additional hardware.
- Delete all operating system and recovery partitions, leaving a blank hard drive without an operating system.
- Meet certain erasure standards.
- Require manual steps and extra media to restore the PC's original functionality

If your old PC is a Dell with the latest version of SupportAssist OS Recovery, Dell Data Assistant works by leveraging special recovery software built into modern Dell Windows PCs that includes both the ability to overwrite (erase) user-addressable portions of the hard drive while also being able to reset the computer to a fresh operating state. It performs the following steps:

1. Determines sectors of the hard drive that contain Dell OS Recovery tools.
2. Overwrites all other sectors of the hard drive. These sectors are considered "user addressable" and are where personal data and the operating system is stored. Please note: since this is more thorough than a Level 1 erasure, this process may take several hours to complete.
3. Verifies all sectors have been successfully overwritten.
4. Initiates Dell OS Recovery, which begins rebuilding the operating system and Dell tools, restoring the system to a first-boot experience.

Exclusions

- Company-administered PCs
- Corporate networks
- Migration of files and settings which directly interfere with Windows operating system (OS) operations
- Migration of applications and programs
- Any activities other than those specifically set forth in this Service Attachment A
- Third-party applications
- Data removal or erasure in accordance with any standards other than those set forth in this Service Description
