**DISC****ROUND WITH / WITHOUT HOLE**

1. Measure diameter of disc.
2. If a hole is present:
 - A. Measure across the opening of the hole to determine the diameter.
 - B. Measure all sides to the outside of the hole to determine the position.

**SHEETS****SINGLE THICKNESS**

1. Measure width and length.
2. If a hole is present:
 - A. Measure across the opening of the hole to determine the diameter.
 - B. Measure all sides to the outside of the hole to determine the position.

ENVELOPE

DOUBLE THICKNESS with stitching on 2 or 3 sides. These filters will come with or without holes. If a hole is present, it will either be through 1 sheet or go directly through the filter.

1. Measure width and length.
2. If a hole is present:
 - A. Measure across the opening of the hole to determine the diameter.
 - B. Make a note if the hole is through 1 side of the filter or passes straight through both sides of the filter.
 - C. Measure from the closed or stitched points of the filter to the edge of the hole. You should have 3 measurements for the hole position when you've finished.

Tough, Long-Lasting Floor Maintenance Pads

ACS / Scrubbe® Products manufactures a complete line of Floor Maintenance Pads for stripping, buffing, cleaning, polishing and high-speed burnishing. Our floor pads are formulated with the proper amount of non-woven Polyester, Nylon fibers and abrasive grains to achieve maximum product performance. The bonding process of these fibers blended together with our special resins and adhesives make these floor pads tough, durable and consistent.

All conventional and UHS pads are 1" nominal thickness. Our Stripping pads are 3/4" thick and our Emerald Hy-Pro is 1/2". Floor pads are available in 1" diameter increments from 10" to 32". We also offer the special size pads under 10" including 6-1/2", 7-3/4", 9" and 9-1/2". Center holes are 3-1/4" nominal.

Least
Aggressive

TYPE 31 • *Aqua Burnishing*

A UHS Pad that lightly polishes softer floor finishes. This pad is thick and soft. Ideal for top dressing to a reflective gloss. Use with machines up to 3000 RPM.

NEW

TYPE 52 • *Blue Velvet*

Removes black marks without removing the finish. Achieves a higher gloss level in heavy traffic areas. The UHS Pad will yield more time between recoatings. Use with machines up to 3000 RPM.

TYPE 36 • *Pink Burnishing*

This UHS Pad is designed to restore finish and improve gloss on harder floor surfaces. Removes marks and scuffs quickly. Excellent durability and minimal finish removal. Use with machines up to 3000 RPM.

TYPE 42 • *Beige Poly Thermal*

Designed to stand up to the high heat and strength required with Propane burnishing. This pad produces a very high gloss finish. Performs well on soft to medium surfaces. Use with machines up to 3000 RPM.

TYPE 33 • *Hair Blend Light*

A controlled blend of Polyester and natural hair fibers makes this a versatile UHS Pad. The lubricating effect of natural hair produces the wet look finish while providing strength and durability. Use with machines up to 3000 RPM.

TYPE 35 • *Hair Blend Heavy*

This is an aggressive burnishing pad that combines a heavy blend of natural hair with the proper amount of synthetic fiber. Best suited for medium to hard finishes with speeds of 1500 to 3000 RPM.

TYPE 37 • *Hair Blend Xtra-Heavy*

This is the most aggressive burnishing pad available. The ideal combination of natural hair and synthetic fiber to provide a "wet-look" shine. Best suited for hard finishes with speeds up to 3000 RPM.

Most
Aggressive

Utility Cleaning Pads & Holder For use in corners & hard to reach areas • See Pg. 9 for Ordering Information.

TYPE 34 • *Tan Buffer*

The perfect pad for light cleaning and dry buffing. Removes scuffs and black heel marks while producing a high gloss shine. Use with 350 – 800 RPM machines.

TYPE 41 • *White Polishing*

This popular extra fine pad is formulated for polishing clean, dry floors. A fine water mist is used to produce a high gloss wet look. This thick pad is ideal for polishing soft waves on wood floors. Use with 350 – 800 RPM machines.

TYPE 51 • *Red Buffing*

Restores gloss while removing scuff marks and dirt on medium traffic areas. Can be used dry or spray buffing to produce a sparkling shine. Ideal for automatic scrubbing. Use with 350 – 800 RPM machines.

TYPE 53 • *Blue Cleaner*

This pad is designed for wet scrubbing or medium-duty spray cleaning. Removes heavy dirt and scuff marks on most floor surfaces. This pad will remove the top layer of floor finish. Use with 175 – 350 RPM machines.

TYPE 55 • *Green Scrubber*

Our toughest duty, most aggressive scrubbing pad for heavily soiled areas. Best when used for wet scrubbing or light stripping. Very durable and long lasting. Use with 175 – 300 RPM machines.

TYPE 71 • *Brown Strip*

A very strong pad for wet or dry stripping applications. Quickly removes wax, dirt and old finish leaving surface ready for immediate recoating. Use with 175 – 300 RPM machines.

TYPE 72 • *Black Strip*

Our most popular stripping pad designed for heavy-duty wet stripping. Very aggressive texture to remove wax, dirt and any finish. Tough, durable and built to perform. Use with 175 – 300 RPM machines.

TYPE 73 • *Emerald Hy-Pro*

Maximum abrasive content, tear resistant and long wearing. Wide open mesh construction allows solutions to flow through without loading and build up. Highly aggressive, 5/8" thick is the toughest of them all. Use with 175 – 300 RPM machines.

TYPE 47 • *Maroon Thin Line*

This general purpose conditioning pad is designed for smoothing, cleaning and general surface conditioning. Best suited for between coats finishing of wood floor surfaces. Thin Line Pads are 3/8" thick and are packed 10 per case. Use with 175-300 RPM machines.

MOP BASICS — Scrubbe® Products offers a wide variety of yarns to help you achieve your specific mopping needs more efficiently. The following information should assist you in selecting which mops are right for you.

YARN

The variety of mops is large because certain yarns are designed for a specific task. It's important to understand that selecting the proper yarn will enable you to achieve maximum efficiency.

CUT-END

These mops are more economical at purchase; however, cut-ends tend to fray, lint and unravel with steady use. This condition will lead to increased mop replacement. (Non-launderable)

LOOP-END

The loop-end mop performs more efficiently by resisting tangles without linting and fraying. These mops stand up to heavy use. Sewn-in tailband provides wide surface coverage without gaps. Some Loop-Mops may be laundered with care,

5" wide or 1-1/4" narrow vinyl coated mesh headband is more durable

A variety of quality yarns allow you to choose the right mop for the right job

Multi-Sewn, color-coded tailband provides wide surface coverage without gaps

Loop-Ends keep yarn from tangling, fraying and linting

YARN	ADVANTAGES	DISADVANTAGES	APPLICATIONS
COTTON	Good absorption and retention. Low initial cost.	Needs to be broken in. Lints and is slow drying.	General Use
BLENDS	Ideal choice for performance, durability and price. Synthetic fibers add color.	May shrink over time.	Professionals who require a better, more durable mop.
SYNTHETIC	Synthetic yarn fights bacteria, mold and mildew while providing superior strength.	Higher cost. Not as absorbent.	Clean rooms & rough surfaces.
RAYON	Quick absorption & release. Dries fast, is mildew resistant and lints less.	Less liquid retention.	Applying liquids for finishes and disinfectants.

Tech Tip: 100% Natural Cotton Mops should be broken in or *primed* by rinsing in clean water 2X's and hung to dry. This process removes natural fiber & yarn oils.
