

Your access to premier, fully integrated infrastructure services.

AECOM project teams fuse top technical expertise around the world with deep local experience, to design and deliver infrastructure, utilities and facilities that meet the needs of our clients and the communities.

Across all components of the in-project cycle — design, build, finance and operate — AECOM is uniquely positioned to deliver a differentiated service, working globally and delivering locally. Our engineers, planners, architects, landscape architects, environmental specialists, economists, scientists, consultants and construction specialists as well as cost, construction, project and program managers are all dedicated to finding the most innovative and appropriate solutions, and to achieve the most successful outcome for our clients.

New Clark City
Master planning services for first Smart Megacity in the Philippines.
Expected population will exceed 1 million - including new government administrative, sports and technology centres, multimodal transport and next-generation connectivity

About AECOM

AECOM is built to deliver a better world. We design, build, finance and operate critical infrastructure assets for governments, businesses and organizations. As a fully integrated firm, we connect knowledge and experience across our global network of experts to help clients solve their most complex challenges. From high-performance buildings and infrastructure, to resilient communities and environments, to stable and secure nations, our work is transformative, differentiated and vital. A *Fortune 500* firm, AECOM had revenue of approximately \$20.2 billion during fiscal year 2018. See how we deliver what others can only imagine at aeom.com and [@AECOM](https://www.instagram.com/AECOM).

Philippines

AECOM in the Philippines

As one of the fastest growing economies in the world, the Philippines place great importance on high-impact sustainable infrastructure development. AECOM's work runs across various sectors and industries in the country that support this growth.

Since 1982, we have been channeling our diverse spectrum of capabilities, spanning environmental, transportation, construction, energy and water, to serve the Philippines’ infrastructure development.

Our services support our clients’ projects through the entire asset lifecycle from early feasibility studies, briefing, design, project management and construction, maintenance and operations and where economically justifiable, financing. Some clients choose to appoint us for a specialist single service expertise; others recognise the value we bring to their projects through our full service offering that we provide through a fully integrated single business approach. It’s your choice which of our services you wish to procure for your project. What is important is that you have options with AECOM. You can be assured that at all times our work is characterised by a focus on reducing risk, improving value and assuring outcomes.
