

Splittable Flying Splice Tape 8387

Product Data Sheet

June 2015
Supersedes: NEW

Product Description

A splittable tape construction designed for straight line flying splices, furnished with aggressive adhesives on both sides for good adhesion to film substrates, and a coated paper liner with liner score for easy manual application.

Key Features

- designed for film substrates
- designed for straight line flying splices for a wide variety of film substrates, such as Polyethylene, BOPP, polyester, cast polypropylene, aluminium foil and paper.
- designed so that no fibers are present after splitting, thereby preventing contamination of the central impression drum, and removing the need for costly cleaning to remove fiber residues after splicing.

Physical Properties

Adhesive Type Splicing side	Rubber adhesive	
Adhesive Type Reel side	Acrylic adhesive	
Tape Colour	Pink (splicing side) Black (reel side)	
Carrier	Splicing side: Polyester Reel side: LDPE	
Thickness (ASTM D-3652) Tape Liner Total	Before splitting 0.183 mm 0.077 mm 0.260 mm	After splitting Splice side 0.104 mm Reel side 0.076 mm
Splittable Layer	Fiber-free cleavable layer	
Release Liner	Coated easy-release paper	

Physical Properties

Repulpability	Construction is not repulpable
Bonding Strength	Designed for high affinity to film substrates

Storage	3M™ Splittable Flying Splice Tape 8387 should be stored in the original carton at 16°C – 27°C and 40 – 60% Relative Humidity. It is recommended that the protective liner be removed just prior to splicing, rather than leaving film rolls with prepared splice patterns in storage without the protective liner.
Shelf Life	12 months from date of manufacture by 3M when stored in the original carton at the conditions specified in “Storage.”

Important Notice	All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M’s control can affect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user’s knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user’s method or application. All questions of liability relating to this product are governed by the terms of the sale subject, where applicable, to the prevailing law.

Values presented have been determined by standard test methods and are average values not to be used for specification purposes. Our recommendations on the use of our products are based on tests believed to be reliable but we would ask that you conduct your own tests to determine their suitability for your applications.
This is because 3M cannot accept any responsibility or liability direct or consequential for loss or damage caused as a result of our recommendations.
