Part No. 2006585010 Printed in China Edition 1 September 2018

### **Product Warranty (2 years)**

Advantech warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by Advantech, or which have been subject to misuse, abuse, accident or improper installation. Advantech assumes no liability under the terms of this warranty as a consequence of such events.

Because of Advantech's high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If an Advantech product is defective, it will be repaired or replaced at no charge during the warranty period. For outof-warranty repairs, you will be billed according to the cost of replacement materials, service time and freight. Please consult your dealer for more details.

If you think you have a defective product, follow these steps:

- 1. Collect all the information about the problem encountered. (For example, CPU speed, Advantech products used, other hardware and software used, etc.) Note anything abnormal and list any onscreen messages you get when the problem occurs.
- 2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information readily available.
- 3. If your product is diagnosed as defective, obtain an RMA (return merchandize authorization) number from your dealer. This allows us to process your return more quickly.
- 4. Carefully pack the defective product, a fully-completed Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
- 5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

### **Declaration of Conformity**

#### CE

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

#### FCC Class A

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Opera- thin of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**Caution!** There is a danger of a new battery exploding if it is incorrectly installed. Do not attempt to recharge, force open, or heat the battery. Replace the battery only with the same or equivalent type recommended by the manflatterer. Discard used batteries according to the manufacturer's instructions.

### **Technical Support and Assistance**

- 1. Visit the Advantech website at http://support.advantech.com where you can find the latest information about the product.
- 2. Contact your distributor, sales representative, or Advantech's customer service center for technical support if you need additional assistance. Please have the following information ready before you call:
  - Product name and serial number
  - Description of your peripheral attachments
  - Description of your software (operating system, version, application software, etc.)
  - A complete description of the problem
  - The exact wording of any error messages

## **Packing List**

Before you begin installing your card, please make sure that the following materials have been shipped:

	1 x MIO-5850 SBC	
	1 x SATA Cable 30cm	(p/n: 1700006291)
	1 x SATA Power Cable 35cm	(p/n: 1700018785)
	1 x Audio Cable 20cm	(p/n: 1700019584)
	2 x COM Cable 22cm	(p/n: 1701200220)
	A cable D-SUB 9P/1*3p-1.25+G-TEM 30cm	(p/n: 1700021705-01)
	1 x Heatsink (19mm)	(p/n: 1960087101T001)
	1 x Startup manual	(p/n: 2006585000)
	1 x Mini Jumper(10pcs package)	(p/n: 9689000002)
lf an	y of these items are missing or damaged, contact y	our distributor or sales

If any of these items are missing or damaged, contact your distributor or sales representative immediately.

### **Optional Accessories**

MIO-5850 User Manual

### **General Information**

This chapter gives background information on the MIO-5850.

- Sections include:
- Introduction
- Specifications
- Block diagram
- Board layout and dimensions

### 1.1 Introduction

MIO-5850 is first the 3.5" SBC with a CPU bottom side up design, powered by an Intel Celeron J1900, and Atom E3845/E3825. MIO-5850 is a specific design for domain focused applications in the Robotic/CNC industry. It has 3 LAN ports, CAN bus interface (2.5K ESD protection), 2GB/4GB memory on-board,16GB/32GB/64GB eMMC on-board (optional), power input, 16-bit GPIO, M.2 key E /mini PCIe. MIO-5850 supports various display interface including VGA, HDMI and LVDS and rich I/O: SATA, mSATA, 4 x Serial Ports, 1 x USB 3.0, 5 x USB 2.0.

### **1.2 Specifications**

#### **1.2.1 Functional Specifications**

#### Processor:

- Celeron<sup>®</sup> J1900 2.0GHz (burst frequency 2.42GHz), quad cores, four threads
- Atom<sup>™</sup> E3845 1.91GHz, quad cores
- Atom<sup>™</sup> E3825 1.33GHz, dual cores, two threads
- Cache Hierarchy
  - \* 32 KB 8-way L1 instruction cache and 24 KB 6-way L1 data cache per core
  - \* 1 MB, 16-way L2 cache, shared per two cores
- Supported C-states: C0, C1, C6, C7
- Advanced Technologies
  - \* Intel<sup>®</sup> Virtualization Technology (VT-x)
  - \* Intel<sup>®</sup> 64-bit architecture
  - \* Enhanced Intel SpeedStep technology
  - \* Intel<sup>®</sup> Trusted Execution Engine (TXE)
- Power Management
  - \* ACPI 5.0
  - \* System sleep states: S0, S3, S4, S5

#### System Memory Support

- Non-ECC
- 64-bit data bus
- x8 and x16 DDR3L SDRAM device data widths
- DDR3L with 1066 MT/s data rates for E3825, total memory bandwidth 8.5GB/s
- DDR3L with 1333 MT/s data rates for J1900/E3845, total memory bandwidth can be scalable to 21.3GB/s
- Aggressive power management to reduce power consumption

#### Graphic and Media Engine

- Intel<sup>®</sup> 7th generation (Gen 7) graphics and media encode/decode engine
- GFX: Normal 688 MHz / Burst 854 MHz for J1900/E3845, normal 533 MHz for E3825
- Graphic Features:
  - \* 3D HW acceleration: DirectX11, OpenGL3.2, OpenCL1.2
  - \* HW video decode: H.264, MPEG2, MVC, VC-1, WMV9, MJPEG and VP8
  - \* HW video encode: H.264, (MPEG2 and MVC only for J1900)
- Multi-display interfaces: VGA, HDMI, 48-bit LVDS.
  - \* Supports extend/ clone mode with multi-display device
  - \* Dual display: any two combination between VGA, HDMI/DisplayPort/MIOe, DisplayPort, LVDS/eDP
- Specification and Resolution
  - \* VGA: 2560 x 1600 at 60Hz

- \* HDMI/DisplayPort: HDMI 1.4a with audio, up to 1080P at 60Hz.
- \* LVDS: 48-bit dual channel LVDS up to WUXGA 1920x1200 at 60Hz via CH7511.
- \* Inverter power: 1A @ 5V/12V
- 3D HW acceleration: OGL4.0, DirectX 11.1
- HW video decode: H.264, MPEG2, VC-1, VP8
- HW video encode: H.264, MPEG2 (max at 1080p)

#### Gigabit Ethernet

- Controller: Intel<sup>®</sup> i210
  - \* 10/100/1000 BASE-T
  - \* IEEE 802.3az Energy Efficient Ethernet (EEE), which defines Low Power Idle (LPI) state
  - \* IEEE 1588/802.1AS precision time synchronization
  - \* 9.5 KB jumbo frames supported (full-duplex)
  - \* Flow control supported
  - \* Magic packet wake-up enable with unique MAC address

#### Peripheral interface

- 1 Serial-ATA port, up to 3.0Gb/s transfer rate (300 MB/s), supports independent DMA operation
  - \* SATA power: 5V / 12V
- 1 x USB 3.0 & 5 x USB2.0
  - \* One USB 3.0 and 1 USB 2.0 on rear I/O, 4 x internal USB2.0
  - \* USB 3.0 SuperSpeed (SS), implements xHCI software host controller interface
  - \* Multiplexed with EHCI controller that are High-Speed/Full-Speed (HS/FS)
  - \* USB source: USB 3.0 and USB 2.0's dual port on rear I/O's USB signal directly from CPU, 4 x USB 2.0 from USB hub.
  - \* Supports wake-up from sleeping state S3
  - \* Power supply: 0.5A @ 5V for USB2.0, 1A @ 5V for USB3.0
- 2 RS232/422/485 for COM1/2, 2 RS232 for COM3/4 (ESD protection: air gap ±15kV, contact ±8kV
- 8-bit programmable general purpose input/ output from iManager (5V tolerance)
- 1 SMBus / I<sup>2</sup>C channel from iManager
- Watchdog timer: Output system reset, programmable counter from 1 ~ 255 minutes/ seconds
- Mini PCle / mSATA
  - \* 1 Full-size Mini PCIe with SIM holder (with PCIe and USB interface)
  - \* 1 Half size mSATA (with SATA and USB interface)
  - \* Power supply: 1.1 A @ 3.3 V, 0.375 A @ 1.5 V
- M.2 E Key

#### High Definition Audio:

- Intel<sup>®</sup> High Definition Audio Interface
- High definition audio codec with Realtek proprietary loss-less content protection technology
- Supports 1 Line-input, 1 Line output, 1 Mic-input

#### BIOS

- AMI UEFI 64 Mbit, BIOS for 64 or 32-bit is different, default version is for 6-bit
- Default setting is legacy boot, that can be manually changed to UEFI boot. If default setting to UEFI is needed, that can be done by T-P/N

#### 1.2.2 OS Support

MIO-5850 supports Win8, Win7, WES8, WES7, WEC7. For further information about OS support of MIO-5850, please Advantech website: http://support.advantech.com.tw/ or contact the technical support center.

#### **1.2.3 Mechanical Specifications**

- Dimensions: 146 x 102 mm (5.7 x 4 inches)
- **Height:** Top side 19mm, PCB 1.6mm, bottom side 6.8mm, total 27.4mm
- Weight: 0.5 kg (reference weight of total package)

#### **1.2.4 Electrical Specifications**

**Power Requirement:** Single +12V DC ± 10% power input

#### Power Consumption:

- Max load
   MIO-5850J-U0A1E: 1.74A @12V (20.88W)
   MIO-5850J-U0A1E: 3.57A @24V (85.68W)
- Idle mode
   MIO-5850J-U0A1E: 0.63A @12V (7.56W)
   MIO-5850J-U0A1E: 0.60@24V (14.4W)

#### Power Consumption Conditions:

- Test software: 3DMark 2006
- Max. load: Measure the maximum current value which system under maximum load (CPU: top speed, RAM & graphic: full loading)
- Idle mode: Measure the current value when system in windows mode and without running any program

#### RTC Battery:

- Typical Voltage: 3.0 V
- Normal discharge capacity: 210 mAh

#### **1.2.5 Environmental**

- Operating Temperature: 0 ~ 60°C (32 ~ 140°F), extended: -40 ~ 85° C (-40 ~ 185° F)
- Operating Humidity: 40°C @ 85% RH Non-condensing
- **Storage Temperature:** Storage temperature: -40~85°C
- Storage Humidity: Relative humidity: 95% @ 60°C

## 1.3 Block Diagram

### **1.4 Board Layout: Dimensions**

Figure 1.1 MIO-5850 Mechanical Drawing (Top Side)

Figure 1.2 MIO-5850 Mechanical Drawing (Bottom Side)

Figure 1.3 MIO-5850 Mechanical Drawing (Coastline)

### Installation

This chapter explains the setup procedures of the MIO-5850 hardware, including instructions on setting jumpers and connecting peripherals, switches and indicators. Be sure to read all safety precautions before you begin the installation procedure.

### 2.1 Jumpers & Switches

The MIO-5850 has a number of jumpers that allow you to configure your system to suit your application. The table below lists the functions of the various jumpers.

Table 2.1: Jumpers	& Switches
J1	Clear CMOS
J2	Auto Power on Setting
J4	LCD power
J5	LVDS VCON Setting

### 2.2 Connectors

Onboard connectors link the MIO-5850 to external devices such as hard disk drives, a keyboard, or floppy drives. The table below lists the function of each of the connectors.

Table 2.2: Connectors				
Label	Function			
CN1	M.2 E-key			
CN2	RTC Battery			
CN3	CAN Bus			
CN4	SATA Power			
CN6	Front Panel			
CN7	SATA			
CN8	Internal USB			
CN9	Internal USB			
CN10	COM1/COM2/RS232/RS422/RS485			
CN11	COM3/COM4/RS232			
CN12	12C			
CN13	SM Bus			
CN14	FAN			
CN16	Audio			
CN17	GPIO_P0			
CN18	GPIO_P1			
CN19	mSATA			
CN20	MINIPCI Express			
CN22	Inverter Power output			
CN23	RJ45			
CN24	RJ45			
CN25	48-bit LVDS			
CN26	USB2.0+3.0			
CN28	HDMI			
CN29	Power Input

CN32	NAMO SIM			

### 2.3 Locating Connectors

Figure 2.1 MIO-5850 Connector Locations (Top Side)

Figure 2.2 MIO-5850 Connector Locations (Bottom Side)

### 2.4 Setting Jumpers

You may configure your card to match the needs of your application by setting jumpers. A jumper is a metal bridge used to close an electric circuit. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To "close" a jumper, you connect the pins with the clip. To "open" a jumper, you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2 and 3. In this case you would connect either pins 1 and 2, or 2 and 3.

The jumper settings are schematically depicted in this manual as follows:

A pair of needle-nose pliers may be helpful when working with jumpers. If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any changes. Generally, you simply need a standard cable to make most connections.

Table 2.3: Clear CMOS (J1)				
Setting	Function			
(1-2)*	Normal			
(2-3)	Clear COMS			

### 2.4.1 Auto Power On Setting (J2)

Table 2.4: Auto Power On Setting (J2)			
Setting	Function

Setting	Function		
(1-2)*	3.3V High for VCON on LVDS		
(1-3)	Low for VCON on LVDS		

AMI BIOS Setup

With the AMIBIOS Setup program, you can modify BIOS settings and control the various system features. This chapter describes the basic navigation of the MIO-5850 BIOS setup screens.

AMI BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This information is stored in battery-backed CMOS so it retains the Setup information when the power is turned off.

### 3.1 Entering Setup

Turn on the computer and check for the patch code. If there is a number assigned to the patch code, it means that the BIOS supports your CPU. If there is no number assigned to the patch code, please contact an Advantech application engineer to obtain an up-to-date patch code file. This will ensure that your CPU's system status is valid. After ensuring that you have a number assigned to the patch code, press <DEL> and you will immediately be allowed to enter Setup.

#### 3.1.1 Main Setup

When you first enter the BIOS Setup Utility, you will encounter the Main setup screen. You can always return to the Main setup screen by selecting the Main tab. There are two Main Setup options. They are described in this section. The Main BIOS Setup screen is shown below.

Aptio Setup Main Advanced Chipset	U <mark>tility – Copyright (C) 2018 American</mark> Security Boot Save & Exit	Megatrends, Inc.
BIOS Information BIOS Vendor Core Version Compliancy Project Version Build Date and Time	American Megatrends 5.0.1.0 0.32 x64 UEFI 2.4; PI 1.3 MIO 5850000DF60X010 05/16/2018 15:15:20	Set the Date. Use Tab to switch between Date elements.

The Main BIOS setup screen has two main frames. The left frame displays all the options that can be configured. Grayed-out options cannot be configured; options in blue can. The right frame displays the key legend.

Above the key legend is an area reserved for a text message. When an option is selected in the left frame, it is highlighted in white. Often a text message will accompany it.

#### System time / System date

Use this option to change the system time and date. Highlight System Time or System Date using the <Arrow> keys. Enter new values through the keyboard.

Press the <Tab> key or the <Arrow> keys to move between fields. The date must be entered in MM/DD/YY format. The time must be entered in HH:MM:SS format.

#### 3.1.2 Advanced BIOS Features Setup

Select the Advanced tab from the MIO-5251 setup screen to enter the Advanced BIOS Setup screen. You can select any of the items in the left frame of the screen, such as CPU Configuration, to go to the sub menu for that item. You can display an Advanced BIOS Setup option by highlighting it using the <Arrow> keys. All Advanced BIOS Setup options are described in this section. The Advanced BIOS Setup screens is shown below. The sub menus are described on the following pages.

#### Network Stack

Enable or disable UEFI Network Stack.

#### 3.1.2.10 CSM Configuration

Aptio Setup Utility – Copyright (C) 2018 American Megatrends, Inc. Advanced				
Compatibility Support Module Configuration		Enable/Disable CSM Support.		
CSM Support	[Enabled]			
CSM16 Module Version	07.76			
GateA20 Active Option ROM Messages	[Upon Request] [Force BIOS]			
Boot option filter	[Legacy only]			
Option ROM execution				
Network Storage Video Other PCI devices	[Legacy] [Legacy] [Legacy] [Legacy]	<pre>++: Select Screen 14: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save &amp; Exit ESC: Exit</pre>		
Version 2.18.1263. Copyright (C) 2018 American Megatrends, Inc.				

CSM Support

Enable or disable CSM Support.

GateA20 Active

UPON REQUEST - GA20 can be disabled using BIOS services. Do not allow disabling of GA20; this option is useful when any RT code is executed above 1MB.

Option ROM Messages

Set display mode for Option ROM.

Boot option filter

This option controls Legacy/UEFI ROM priority.

Network

Controls the execution of UEFI and Legacy PXE OpROM.

Storage

Controls the execution of UEFI and Legacy Storage OpROM.

Video

Controls the execution of UEFI and Legacy Video OpROM.

#### Other PCI devices

Determines OpROM execution policy for devices other than Network, Storage, or Video.

#### 3.1.2.11 SDIO Configuration

Aptio Set Advanced	tup Utility – Copyright (C) :	2018 American Megatrends, Inc.		
SDIO Configuration		Auto Option: Access SD device		
SDIO Access Mode		in DMA mode if controller supports it,otherwise in PIO mode.DMA Option: Access SD device in DMA mode.PIO Option: Access SD device in PIO mode. ++: Select Screen 14: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save & Exit ESC: Exit		
Version 2.18.1263. Copyright (C) 2018 American Megatrends, Inc.				

#### SDIO Access Mode

Auto Option: Access SD device in DMA mode if controller supports it, otherwise in PIO mode.

#### 3.1.2.12 USB Configuration

Aptio Setup Utility - Advanced	Copyright (C) 2018 American	Megatrends, Inc.
USB Configuration		Enables Legacy USB support.
USB Module Version	17	support if no USB devices are
USB Controllers:		keep USB devices available
USB Devices:		Unity for Eri applicacions.
i unive, i keypoard, 3 Hubs		
Legacy USB Support XHCI Hand–off	[Enabled] [Enabled]	
EHCI Hand-off USB Mass Storage Driver Support	[Disabled] [Enabled]	
USB hardware delays and time-outs:		≁: Select Screen ↑↓: Select Item
USB transfer time-out	[20 sec]	Enter: Select
Device power-up delay	[Auto]	F1: General Help
Mass Storage Devices:		F3: Optimized Defaults
ADATA USB Flash Drive 1100	[Auto]	F4: Save & Exit ESC: Exit
Version 2.18.1263. Cc	pyright (C) 2018 American M	egatrends, Inc.

#### Legacy USB Support

Enables Legacy USB Support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.

#### XHCI Hand-off

This is a workaround for OS without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

#### EHCI Hand-off

This is a workaround for OS without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

#### USB Mass Storage Driver Support

Enable or disable USB Mass Storage Driver Support.

USB transfer time-out

Time-out value for control, bulk, and interrupt transfers.

#### Device reset time-out

USB mass storage device start unit command time-out.

#### Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100 ms, for a Hub port the delay is taken from Hub descriptor.

#### 3.1.2.13 Security Configuration

- TXE HMRFPO Disable
- TXE Firmware Update
- TXE EOP Message Send EOP Message before entering the OS
- TXE Unconfiguration Perform Revert TXE setting to factory defaults.

Select Security Setup from the MIO-5850 Setup main BIOS setup menu. All Security Setup options, such as password protection and virus protection are described in this section. To access the sub menu for the following items, select the item and press <Enter>:

### Change Administrator / User Password

Select this option and press <ENTER> to access the sub menu, and then type in the password.

## 3.1.5 **Boot**

### Setup Prompt Timeout

Number of seconds that the firmware will wait before initiating the original default boot selection. A value of 0 indicates that the default boot selection is to be initiated immediately on boot. A value of 65535(0xFFFF) indicates that firmware will wait for user input before booting. This means the default boot selection is not automatically started by the firmware.

- Bootup NumLock State
   Select the keyboard NumLock state.
- Quiet Boot

Enables or disables Quiet Boot option.

## Boot Option #1

Sets the system boot order.

Fast Boot

Enables or disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

## New Boot Option Policy

Controls the placement of newly detected UEFI boot options.

## 3.1.6 Save & Exit

Aptio Setup Utility – Copyright (C) 2016 American Main Advanced Chipset Security Boot Save & Exit	Megatrends, Inc.
Save Changes and Exit Discard Changes and Exit Save Changes and Reset Discard Changes and Reset	Exit system setup after saving the changes.

## Save Changes and Exit

This item allows you to exit system setup after saving the changes.

# Discard Changes and Exit This item allows you to exit system setup without saving any changes.

#### Save Changes and Reset

This item allows you to reset the system after saving the changes.

#### Discard Changes and Reset

This item allows you to rest system setup without saving any changes.

## Save Changes

This item allows you to save changes done so far to any of the options.

## Discard Changes

This item allows you to discard changes done so far to any of the options.

#### Restore Defaults

This item allows you to restore/load default values for all the options.

#### Save as User Defaults

This item allows you to save the changes done so far as user defaults.

#### Restore User Defaults

This item allows you to restore the user defaults to all the options.

#### Boot Override

Boot device select can override your boot priority.

Installation

The MI/O compact form factor SBC is a new-generation SBC design with a variety of mechanical improvements. Here is the quick installation guide for our thermal design and MIOe module installation.

# 4.1 Quick Installation Guide:

1. There is a Heatsink / Cooler in the white box inside the package. Carefully remove the release paper from the thermal pad before installation.

2. There are six screws and six studs inside the white box, please install the heatsink into place as per illustration below:

How to install Win7 64bit

## **B.1** Purpose

Instructions for Win7 64bit installation on MIO-5850 eMMC.

## **B.2 Requirement:**

Intel eMMC/SD card driver(iaiosd folder) Win7 64bit SP1 installation disc. Storport.sys file

# **B.3** Instruction

Inject storport.sys into Windows & 64 bit SP1 installer.

- 1. In C drive, make a folder "image" and go into "image" folder make another folder name "mount".
- 2. Open Windows 7 64bit SP1 ISO file, extract files: boot.wim & install.wim to directory: C:\image.
- 3. Launched Command Prompt with administrator privileges.
- Mount boot.wim 1 image with write permissions.
   C:\windows\system32>dism /mount-Wim /WimFile:C:\image\boot.wim /Index:1 / MountDir:C:\image\mount
- 5. Open a Windows Explorer window and navigate to C:\image\mount\Windows\System32\drivers.
- 6. Locate and replace the existing storport.sys file
- Unmount and commit the boot.wim 1 image. C:\windows\system32>dism /Unmount-Wim /MountDir:C:\image\mount /Commit
- Again, Mount boot.wim 2 image with write permissions.
   C:\windows\system32>dism /mount-Wim /WimFile:C:\image\boot.wim /Index:2 / MountDir:C:\image\mount
- 9. Open a Windows Explorer window and navigate to C:\image\mount\Windows\System32\drivers.
- 10. Locate and replace the existing storport.sys file
- Unmount and commit the boot.wim 2 image.
   C:\windows\system32>dism /Unmount-Wim /MountDir:C:\image\mount /Commit
- 12. For install.wim, mount the WIM image with write permissions: C:\windows\system32>dism /mount-Wim /WimFile:C:\image\install.wim /Index:4 /MountDir:c:\image\mount Index 4, is in the case for Windows 7 Ultimate Edition 64-Bit. In case you need other editions of Windows 7, run following command: C:\Windows\System32>dism /Get-WimInfo /WimFile:E:\wim\install.wim And select correspondent index number.
- 13. Open a Windows Explorer window and navigate to C:\image\mount\Windows\System32\drivers. Locate and replace the existing storport.sys file. If you cannot replace the storport.sys file due to access permission, please follow instructions to change access permission for a file.

14. Locate the "storport.sys" file and click the file, right click, propertities.
