User Guide.

1. Introduction.

About Hyundai Auto Link.

Hyundai Auto Link analyses your driving behaviour and monitors your vehicle for any fault codes. If any problems are detected with the vehicle, it automatically sends diagnostic data to the Hyundai Auto Link application (while the application is running). It also provides a convenient way to book your vehicle service with your Hyundai dealer.

Compatibility.

Only available on iOS and Android smart phones which support Bluetooth®4.0. The DIAGNOSIS MODULE is designed to communicate with user's smart phone through BLE (Bluetooth Low Energy).

Downloading the Application.

Connect to the App Store or Google Play Store to download the Hyundai Auto Link application. Components (already installed in your vehicle)

Diagnosis Module

OBD Adapter

Diagnosis Module.

The DIAGNOSIS MODULE is inserted into the vehicle OBD port with the OBD ADAPTER, and stores the driving history of the vehicle and transfers recorded data to your smart phone such as mileage, vehicle status and fault codes.

OBD Adapter.

The OBD ADAPTER is provided in order to fit the DIAGNOSIS MODULE into the fuse box.

User Guide.

Information Capture.

Hyundai Auto Link may collect the following information :

Vehicle information:

Vehicle Identification Number (VIN), License Plate Number, Odometer (ODO), Date of Purchase.

Smart phone information:

Number, WIFI Mac, Model, OS version, UUID, GPS (Personal Location Data if you have activated location services on your smart phone).

DIAGNOSIS MODULE information:

Bluetooth Mac, Serial number.

Favorite Hyundai dealer and service centre

Driving information:

Distance, Travel time, Average fuel efficiency rating, Fuel consumption.

Driving history:

Distance, Travel time, Average fuel efficiency rating, Fuel consumption.

Statistics (ECO driving):

Fuel efficiency rating, Fuel Consumption, Hard Braking, Rapid Acceleration.

Statistics (Speed):

Less than 40 km/h, ~80 km/h, ~120 km/h, ~160 km/h, over 160 km/h, Maximum RPM, Average RPM.

Minimum Smartphone Requirement

Below is the minimum requirement to run the Hyundai Auto Link application for compatible devices,

- 1. Android OS 4.3 version (After Galaxy S3 Model)
- 2. iPhone iOS 8.1

Application Setup

Search for "Hyundai Auto Link" in the App Store or Google Play Store and install.

User Guide.

Note:

- Airplane mode must be turned off.
- Bluetooth and Location services must be turned on.

[iOS Settings]

[Android Settings]

User Guide.

Terms and conditions

To use Hyundai Auto Link you must accept the terms and conditions and have read and understood Hyundai's Privacy Policy by pressing the "*I accept*" button.

Diagnosis Module - Connect (Step 1)

Press the "Start" button on the application to search for the diagnosis module in your vehicle.

User Guide.

DIAGNOSIS MODULE - Searching (Step 2)

Once the diagnosis module is detected and displayed, select it and press the 'Next' button.

The vehicle's identification number (VIN) is automatically detected by the DIAGNOSIS MODULE and captured. If the DIAGNOSIS MODULE is not able to obtain the VIN from the vehicle, retry the setup process.

DIAGNOSIS MODULE Settings - Login (Step 3)

Link Hyundai Auto Link to your myHyundai account.

1. To link to your myHyundai account, check the box and press the "Next" button.

If you are the vehicle owner and would like to become a myHyundai owner, press the "Register" button and follow the instructions.

2. If you don't want to link to myHyundai, leave the box unchecked and press the "*Next*" button. You will be prompted to enter your details.

User Guide.

If you would like to become a myHyundai member, press the "*Register*" button and follow the instructions. It is important you are the vehicle owner. After registering you must login to myHyundai to complete the setup process as per step '1.' shown above.

If you agree to link your myHyundai account, login using your myHyundai account details to use the Hyundai Auto Link application.

- Insert your ID/Username and Password to Login to myHyundai.
- Press 'Forgotten your password?' to retrieve your myHyundai password
- Press "Register" button if you need to register onto myHyundai.

User Guide.

DIAGNOSIS MODULE Settings - User information (Step 4)

1. Link to myHyundai – Your user information will be automatically retrieved from your myHyundai account. You will need to complete the last few fields and press 'Next' to continue.

User Guide.

4. Main Function i. Vehicle management

Shows Driving information, Tyre pressure, Driving history, Vehicle health check and Parking management screens

• Swipe the screen left or right to switch screens.

Driving Information (default screen)

- 1. Current
 - Distance: The distance travelled for your current driving trip.
 - Travel time: The time elapsed for your current driving trip.
- 2. Today
 - Distance: The total distance travelled for the day's driving trips.
 - Travel time: The total time elapsed for the day's driving trips.
- 3. Fuel
 - Efficiency rating: measured from engine start to engine off
 - Consumption: measured from engine start to engine off
- 4. ECO
 - Hard braking: The number of times hard braking occurred during current driving trip
 - Rapid acceleration: The number of times rapid acceleration occurred during current driving trip

User Guide.

Tyre pressure

Shows the pressure for each of the vehicle tyres. If the tyre pressure is below the standard pressure then the tyre pressure will be displayed as Low in red.

User Guide.

Driving history

The driving history is sorted by date. Each item consists of:

- Departure
- Arrival
- Maximum speed
- Average speed
- Average fuel efficiency rating
- Fuel consumption
- Rapid acceleration
- Hard braking
- Distance and travel time

User Guide.

Check driving history

Shows driving history in the latest date order.

- 1. Select the item for more information.
- 2. For detail information, press the 'i' button at the bottom.

Delete driving history

- 1. Press \checkmark button on the upper left corner to activate the check box.
- 2. Select the box next to the item you want to delete.
- 3. Press the "Delete" button on the upper right corner to delete.

User Guide.

Vehicle health check

Diagnose the health of your vehicle. If a fault code is detected, it is captured automatically for diagnosis by Hyundai.

- 1. Initiating system inspection
 - Place the gear lever to "P" range position
 - Turn the Ignition to ON position
 - When you are ready, press "Start" button.

Notes regarding compliance

The Module complies with part 15 of the FCC Rules, US. Operation is subject to the following two conditions: (1) The Module may not cause harmful interference, and (2) the Module must accept any interference received, including interference that may cause undesired operation.

This product is CE marked according to the provision of the R&TTE Directive (99/5/EC). G.I.T., Co., Ltd., (as manufacturer of the Module) declares that this product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC

User Guide.

7. Trouble shooting

The DIAGNOSIS MODULE is not detected

The main cause of this problem is that either the DIAGNOSIS MODULE is not connected to the OBD port or Bluetooth is turned OFF. Please check your module in accordance to the following instructions

- 1. Smart phone settings.
 - Make sure Airplane Mode is turned OFF.
 - Make sure Bluetooth is turned ON.
- 2. Check connection between the DIAGNOSIS MODULE and the OBD port. Also, check if the ignition is on and the engine is running.
 - Open the fuse box and check the LED status of the DIAGNOSIS MODULE.
 - Try reconnecting the DIAGNOSIS MODULE to the OBD port.
- 3. If the problem cannot be resolved by the above methods, please contact your Hyundai dealer or the Customer Care Centre for more information.

Hyundai Auto Link application is not running

The problem may occur due to application crash or malfunction of the smart phone's operating system. Please check your application in accordance to the following instructions.

- 1. Restart your smart phone and try again.
- 2. Uninstall the Hyundai Auto Link application from your smart phone and reinstall it through the App Store or Google Play Store.
- 3. If the problem cannot be resolved by the above methods, please contact your Hyundai dealer or the Customer Care centre for more information.

Driving Information is not updated

The problem may be caused by the Bluetooth connection and/or program version. Please check your application in accordance to the following instructions.

- 1. Check the Bluetooth connection between the DIAGNOSIS MODULE and the Hyundai Auto Link application.
- 2. Make sure your Hyundai Auto Link application is the latest update. You can check the current version on program version of configuration.
