myTurf® Pro

ASSET MANAGEMENT FOR TURF PROFESSIONALS

Connect. Manage. Maintain. Simplify.

Toro's myTurf® Pro is a **powerful, easy-to-use software application**

that helps you effectively monitor and manage your equipment, systems, and staff. By collecting valuable data and providing detailed records, myTurf Pro's integrated technology will help you extend the life of your assets, reduce overall maintenance costs for your operation, and maximize the productivity of your staff.

POWERFUL

From “at a glance” overviews to deep dives into equipment maintenance history, parts inventory, service manual updates and more, myTurf Pro puts the information you need at your fingertips.

EASY

Despite its rich feature set, myTurf Pro's web-based interface is intuitive and easy to learn and use. And because it automates many routine, time-consuming tasks, it eliminates much of the detailed data entry required for sound management and accurate reporting.

FLEXIBLE

myTurf Pro is expertly configured to your operation, your needs and your preferences. So you can tap into its capabilities in exactly the way that works best for your turf management program.

ESSENTIAL

By helping you keep your equipment and staff running like a well-oiled machine, myTurf Pro lets you focus on the big picture: the health of your turf and the success of your operation.

FOR SUPERINTENDENTS

In this industry, every hour that your equipment or irrigation system is not operating at its best costs you money, threatens turf health, and potentially harms your reputation.

myTurf® Pro is a powerful and easy-to-use application that seamlessly connects and manages your assets, and streamlines your maintenance program, regardless of brand.

"At a glance" overviews keep you informed of equipment and irrigation maintenance requirements and operational status.

Detailed historical maintenance records provide valuable information on total cost of ownership and asset performance, while demonstrating operational excellence.

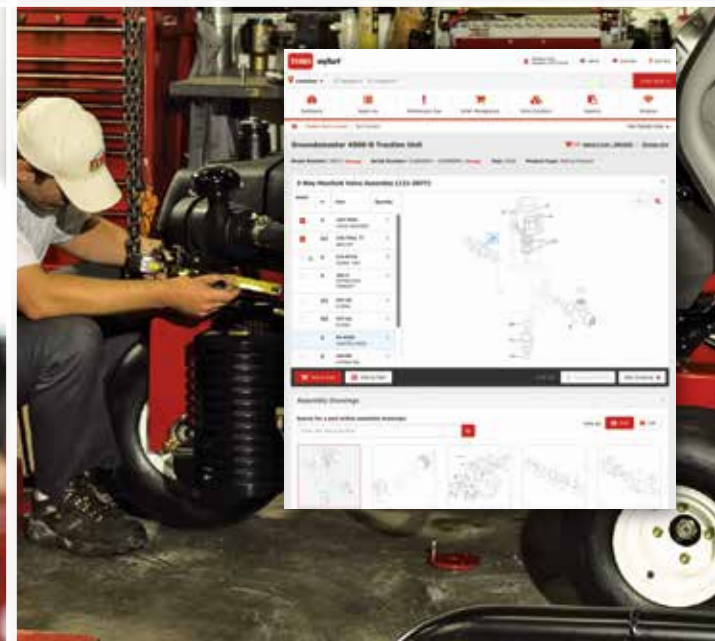

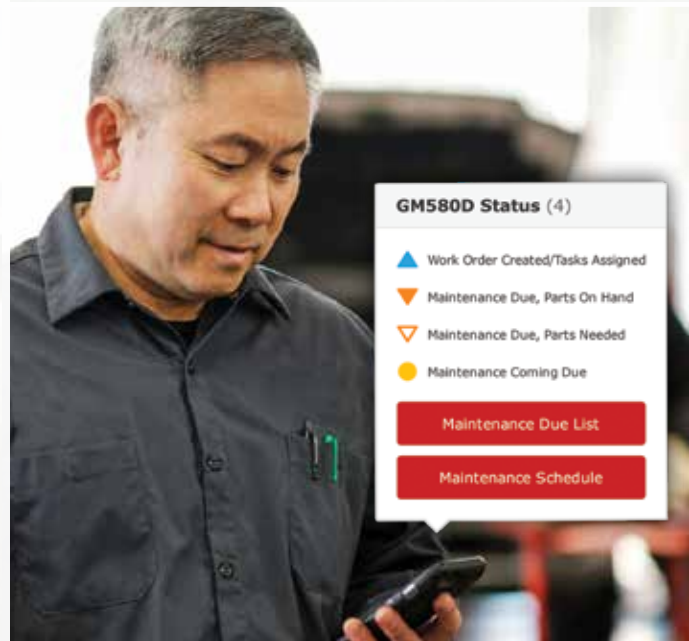

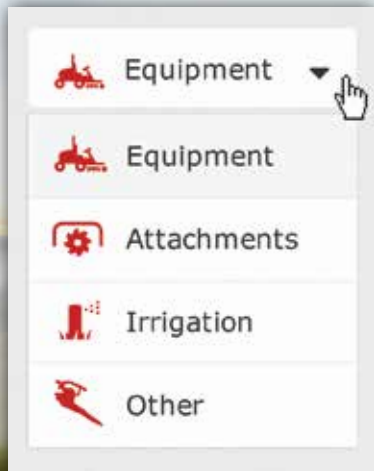

FOR ASSET MANAGERS

myTurf Pro helps you manage the many day-to-day complexities of your job.

Automate your processes with equipment connectivity and proactive maintenance notifications. Provides your team with the tools to be more efficient by rapidly accessing service documentation, manage maintenance assignments and track task completion. Quickly determine parts requirements and easily place an order with the click of a button.

myTurf Pro empowers you to work smarter and more efficiently, extending the life of your assets and reducing overall maintenance expense.

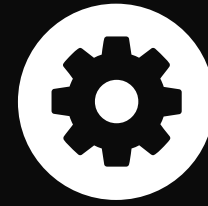

CONNECT

Capture, combine and access equipment and irrigation information on a mobile-enabled, real-time, web-based platform. Track utilization data through internet-connectivity, regardless of brand.

MANAGE

Customizable tools deliver interactive alerts, automated/proactive notifications, labor management and expense tracking, and instant access to mission critical service documentation and operational reports.

MAINTAIN

Order parts, schedule service activities and routine maintenance tasks, track inventory, monitor fleet health and labor expenses or generate reports that demonstrate operational excellence, 24/7.

SIMPLIFY

There's no other tool like it for turf professionals! myTurf® Pro is designed to make your difficult job easier. It puts the optimization, efficiency and effectiveness of your operation at your fingertips.

TRACK AND MONITOR USAGE WITH WIRELESS HOUR METERS

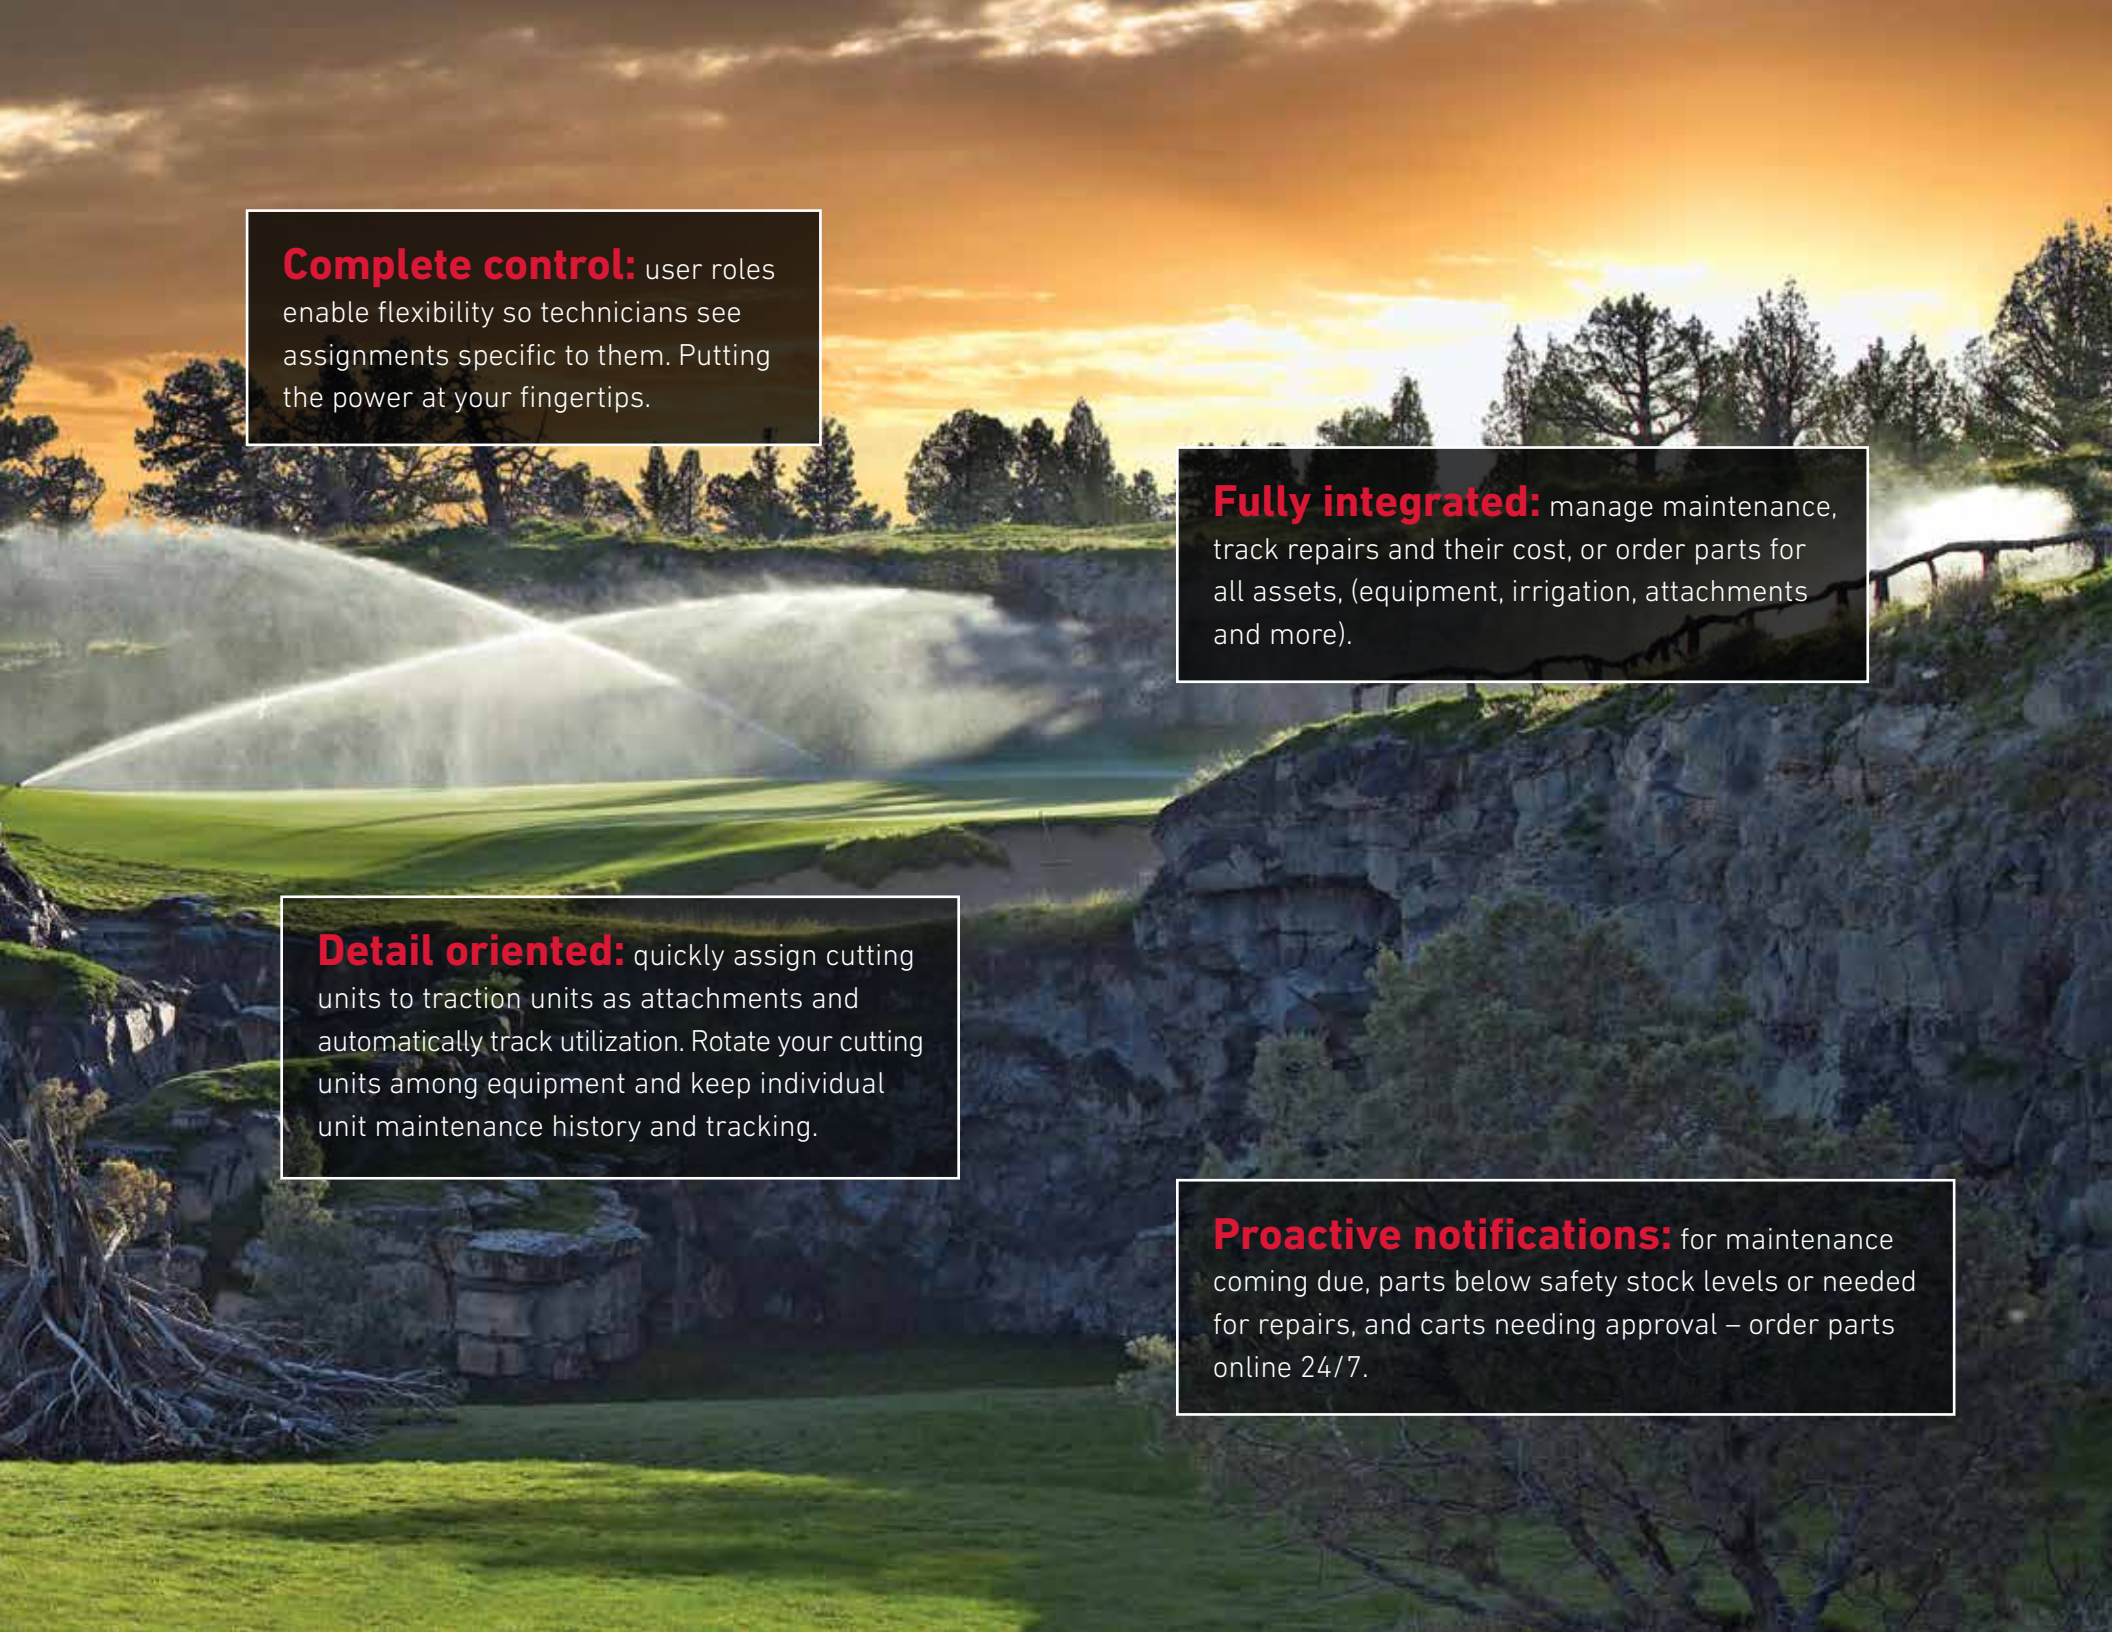

- Toro's myTurf® Pro integrates with its myTurf Wireless System, allowing your equipment to report hours in use automatically.
- The myTurf BaseStation is installed in your shop and receives signals when a wireless hour meter is within 250 feet (76 meters).
- Wireless hour meters are easy to install and can be retrofitted onto almost any piece of equipment that has its own battery power, Toro and non-Toro.
- Technology works with your myTurf Pro system to automatically update equipment hours and trigger maintenance alerts.

A Toro riding mower operator, wearing a red shirt and a red hard hat, is driving a red Toro riding mower on a green golf course. In the background, there is a large, dark, rocky cliff face. Several trees are visible on top of the cliff and on the grassy slopes. The sky is filled with dramatic, orange-hued clouds, suggesting a sunset or sunrise. The overall scene is a professional landscape maintenance setting.

Total visibility: total cost of ownership goes beyond depreciation, parts and labor. myTurf® Pro allows you to easily track and estimate fuel usage and operating labor costs.

Save time: uploads and updates via excel allow you to quickly load new assets and parts inventory; even update fuel usage and utilization across multiple assets simultaneously.

Tailored to your needs: Toro saves you time by loading the default preventative maintenance schedules that are fully customizable to your operations.

The background image is a composite of two scenes. The upper portion shows a golf course with several large, powerful water cannons spraying arcs of water onto the green grass. The sky is a vibrant orange and yellow from the setting or rising sun, with some clouds. The lower portion of the image shows a rugged, rocky quarry or cliff face. The lighting is dramatic, with long shadows and highlights from the low sun.

Complete control: user roles enable flexibility so technicians see assignments specific to them. Putting the power at your fingertips.

Fully integrated: manage maintenance, track repairs and their cost, or order parts for all assets, (equipment, irrigation, attachments and more).

Detail oriented: quickly assign cutting units to traction units as attachments and automatically track utilization. Rotate your cutting units among equipment and keep individual unit maintenance history and tracking.

Proactive notifications: for maintenance coming due, parts below safety stock levels or needed for repairs, and carts needing approval – order parts online 24/7.

SUPPORTED BY TORO® NSN®

Toro NSN is dedicated to serving their customers, and they know myTurf® inside and out. Toro's National Support Network provides you with the hardware, software, telephone or remote help you need to keep your systems and equipment running smoothly. With over 4,800 customers globally, Toro NSN provides you with dedicated technical support by online chat, email and phone.

- **Dedicated myTurf technicians**
