

Axcient x360Sync Sync With Confidence.

Axcient

Maximize employee productivity and mobility with x360Sync

We live in a fast-paced, mobile world. How are your employees accessing and sharing files on the go?

File sync technology has made it possible for employees to access and share files from virtually anywhere. Unfortunately, the use of consumer-grade file sync services, such as Dropbox, Microsoft OneDrive, and Google Drive, jeopardizes corporate data. The cost to organizations that mishandle data varies depending on the industry – but in all cases it is significant.

The benefits of file sync technology are great, but consumer-grade file sync services are not appropriate for the workplace. Therefore, it is imperative that organizations adopt a enterprise-grade file sync solution that is both easy to use and secure.

x360Sync syncs corporate data, allowing users to access and share critical files and folders from their computers and mobile devices. With x360Sync, users are able to work from virtually anywhere.

Your cloud data matters. Choose a company that will value your cloud data as much as you do.

x360Sync is full of features that make it easy for users to securely share and work with others. Users have various options for sharing with internal and external parties, can control the files and folders that they have shared, and set policies for the ways in which they are accessed. Users can also collaborate via the web on documents, spreadsheets, and presentations all in real time. All of this combines to form an intuitive and seamless user experience.

Additionally, x360Sync allows you to map a folder structure on a file server to a Team Share or a user account in the cloud. In addition to local paths, you can specify a network share, a UNC path, or a NAS device, as a source for File Server Enablement. This feature replaces the need for mapped drives (network drives), so that end users no longer need to be on-site or require the use of a VPN connection to access files and folders.

Finally, x360Sync gives administrators total control over their corporate data. A comprehensive dashboard, rich reporting, and granular controls makes it easy to manage an entire instance of x360Sync. Coupled with military-grade encryption, custom or unlimited retention, remote wipes, continuous backups, and rapid restores, x360Sync sets the standard for enterprise-grade file sync.

KEY FEATURES:

Enterprise-grade file sync, enabling secure file access from any device

Secure and easy sharing, empowering user collaboration

Backup and restore features, preventing data loss

Administrative features and integrations, delivering security and control

Compliant data centers and military-grade security, exceeding industry standards

File Server Enablement
Map a folder structure on a file server to the cloud

Features:

ENTERPRISE-GRADE FILE SYNC

- Secure file access from anywhere, across multiple devices
- Cloud-enable existing file servers (File Server Enablement)
- Support for Windows, OS X, iOS, Android, and Windows Phone
- Customizable branding for agent, web, and mobile applications

SECURE AND EASY SHARING

- Public share links for sharing of large files
- Team share folders for internal collaboration
- Secure share links with granular permissions and enforced credentials for secure, external collaboration
- Real-time collaboration on documents, spreadsheets, and presentations (Collaborative Web Editing)
- Instantly preview files before downloading them with Web Preview
- Lock files from editing
- Outlook plug-in for file sharing within Outlook
- Password enforcement on shares
- Expiration date policies
- Download limit policies
- Notifications on downloads
- Personalized messages when sharing

BACKUP AND RESTORE FEATURES

- Continuous, real-time backup of files and folders
- Local directory backup (Documents, Desktop, Pictures, etc.)
- Custom or unlimited retention periods for deleted files and file revisions
- Bulk, point-in-time restores

ADMINISTRATIVE FEATURES AND INTEGRATIONS

- Comprehensive usage reports and activity logs
- File type exclusion
- Customizable email templates for onboarding
- Agent and organizational bandwidth throttling
- LAN Sync
- Remote wipes of desktops and devices
- Granular user access and security controls
- Active Directory (AD) integration
- Two-factor authentication

SECURE ALWAYS-ON NETWORK

- SSAE 16 Type II or SOC Certified
- Axcient 100% uptime cloud service-level agreement (SLA)
- 99.999% reliability, translating to less than 5 minutes average downtime per year
- Silent Data Corruption Protection, end-to-end checksums to “tag” data with strongly verifiable identifiers
- HTTPS stand-alone processes running behind a firewall
- Persistent and transient encryption key
- Organizational privacy mode
- Data transferred over Secure Sockets Layer (SSL) encrypted connections
- Server Side Encryption (SSE), using 256-bit Advanced Encryption Standard (256-bit AES) in transit and at rest

FILE SERVER ENABLEMENT

- Users can access, read, and update content through the web or through their preferred device.
- Configure File Server enablement as file-level backup, hybrid approach, or full migration to the cloud

ABOUT AXCIENT:

Axcient x360 is the proven business continuity and cloud migration solution for Managed Service Providers (MSPs). The Axcient x360 platform includes Replibit, BRC, CloudFinder, Anchor, Fusion, and the Axcient Cloud. MSPs and their clients depend on us to protect their data and ensure business continuity in the event of security breaches, human error, and natural disasters. Our focus on partner experience has resulted in more than 3,000 MSP customers throughout the world.
