### Sizing Guide

**How to Determine What Size Rubber Insulating Glove to Order:**

Wrap a tape measure around your dominant hand just below the knuckles, not including the thumb. The measurement in inches is your numerical glove size (round up to the nearest half inch)

i.e. A measurement of 8.25" would be a size 8½.

Leather protectors are sized similarly to rubber insulating gloves. Leather protectors are dual sized to fit properly over half sizes.

i.e. If you are a size 8½ in rubber insulating gloves, you would be an 8 in leather protector gloves, as a size 8 leather protector fits over a size 8 and a size 8½ rubber insulating gloves.

**How to Determine What Size Jacket, Lab Coat and Pants to Order:**

Please refer to the sizing chart to the left to determine the coverall size you will need. All garments are unisex.
