## HOW TO REMOVE AND INSTALL THE REFRIGERATOR DOORS

For moving the refrigerator through a house door, it might be necessary to remove refrigerator and freezer door handles.

**NOTE:** Removing the doors is always recommended when it is necessary to move the refrigerator through a narrow opening. If it is necessary to remove the handles, follow the directions below.

### TOOLS YOU MIGHT NEED OR USE

### HOW TO REMOVE REFRIGERATOR DOOR HANDLE

**NOTE:** Handle appearance may vary from illustrations on this page.

Loosen the set screws with a 3/32 in (2,5 mm). Allen wrench and remove the handle.

**NOTE:** If the handle mounting fasteners need to be tightened or removed, use a 1/4 in (6 mm). Allen wrench.

### HOW TO REPLACE REFRIGERATOR DOOR HANDLE

**NOTE:** Handle appearance may vary from illustrations on this page.

Place the handle on the door by fitting the handle footprints over the mounting fasteners and tightening the set screws with a 3/32 in (2,5 mm) Allen wrench.

**NOTE:** If the handle mounting fasteners need to be tightened or removed, use a 1/4 in (6 mm) Allen wrench.

## REFRIGERATOR INSTALLATION

**NOTE:** Removing the doors is always recommended when it is necessary to move the refrigerator through a narrow opening. If it is necessary to remove the handles, follow the directions below.

### HOW TO REMOVE FREEZER DOOR HANDLE

**NOTE:** Handle appearance may vary from illustrations on this page.

Loosen the set screws located on the lower side of the handle with a 3/32 in (2,5 mm). Allen wrench and remove the handle.

**NOTE:** If the handle mounting fasteners need to be tightened or removed, use a 1/4 in (6 mm). Allen wrench.

### HOW TO REPLACE FREEZER DOOR HANDLE

**NOTE:** Handle appearance may vary from illustrations on this page.

Place the handle on the door by fitting the handle footprints over the mounting fasteners and tightening the set screws with a 3/32 in (2,5 mm). Allen wrench.

**NOTE:** If the handle mounting fasteners need to be tightened or removed, use a 1/4 in (6 mm). Allen wrench

## REMOVING AND REPLACING REFRIGERATOR DOORS

### ⚠ WARNING

#### Excessive Weight Hazard:

Use two or more people to remove and install the refrigerator doors. Failure to do so can result in back or other injury.

### ⚠ WARNING

#### Electrical Shock Hazard

- Disconnect the electrical supply to the refrigerator before installing. Failure to do so could result in serious injury or death.
- Do not put hands, feet or other objects into the air vents or bottom of the refrigerator. You may be injured or receive an electrical shock.

⚠ CAUTION: Before you begin, remove food and bins from the doors.

1. Open the door. Remove the top hinge cover screw (1). Lift up the cover (2).
2. Remove the cover.
3. Pull out the tube (3).
4. Disconnect all wire harnesses (4).
5. Remove the grounding screw (5).
6. Remove the three bolts (6) using a 10mm socket wrench. Lift off the top hinge (7).

⚠ CAUTION: When lifting the hinge, be careful that the door does not fall forward.

7. Lift the door from the middle hinge pin and remove the door.
8. Place the door, inside facing up, on a non-scratching surface.

#### To remove the left refrigerator door:

On the back of the refrigerator, pull the water tube out of the collet fitting on the connector by pressing the fitting release ring (see picture below).

1. Open the door. Remove the top hinge cover screw (1). Lift up the cover (2).
2. Remove the cover.
3. Remove the three bolts (3) using a 10mm socket wrench. Lift off the top hinge (4).

⚠ CAUTION: When lifting the hinge, be careful that the door does not fall forward.

4. Lift the door from the middle hinge pin and remove the door.
5. Place the door, inside facing up, on a non-scratching surface.

# REFRIGERATOR INSTALLATION

## Reinstalling the Refrigerator Door

### ► Left Door

1. Lower the door onto middle hinge pin (10).
2. Line up the holes in the top hinge with the holes in the top of the refrigerator. Insert and tighten the three Bolts (6) in the hinge.
3. Install the grounding screw (5) and connect the two wire harnesses (4).
4. Push the water tube (3) located at the top of the left door into the hole beside the left hinge on the top of the cabinet until it exits through the back.
5. Insert the water supply tube (3) into the connector until you see only one scale mark. Fully insert the tube over 5/8 in. (15 mm).
6. Hook tabs on left side of hinge cover (1) under the edge of the top hinge (7) and position the cover in place. Insert and tighten the cover screw (1).

### ► Right Door

1. Lower the door onto middle hinge pin (9).
2. Line up the holes in the top hinge with the holes in the top of the refrigerator. Insert and tighten the three Bolts (6) in the hinge.
3. Hook the tabs on right side of hinge cover (2) under the edge of the top hinge (4) and position the cover in place. Insert and tighten the cover screw (1).

## ⚠ CAUTION

After inserting, pull the tube to make sure that it is secure and reinsert the clip.

## HOW TO REMOVE THE FREEZER DRAWER

**⚠ WARNING:** Use two or more people to remove and install the freezer drawer. Failure to do so can result in back or other injury.

**⚠ CAUTION:** Do not hold the handle when removing or replacing the drawer. The handle may come off, causing personal injury.

To remove, pull the drawer out to full extension. Lift the drawer up and out, making sure to clear the rail system.

Pull the drawer open to full extension. Remove the lower basket **①** by lifting the basket from the rail system.

Remove the screws (2) of the rail on both sides.

Grasp the drawer on each side and pull it up to separate it from the rails.

With both hands, hold the center bar and push it in to allow both rails to slide in simultaneously.

# REFRIGERATOR INSTALLATION

## HOW TO REPLACE THE FREEZER DRAWER

Pull out each rail to full extension.

With the drawer pulled out to full extension, insert the lower basket **④** in the rail assembly.

Grasp the drawer on each side and hook door supports **①** into the rail tabs **②** located on both sides.

To replace, with the drawer pulled out to full extension, insert the drawer in the rail assembly.

Lower the door into its final position and tighten the screws **③** located on both sides.

# REFRIGERATOR INSTALLATION

## LEVELING AND DOOR ALIGNMENT

### Leveling

After installing, plug the refrigerator's power cord into a 3-prong grounded outlet and push the refrigerator into the final position.

Your refrigerator has two front leveling legs—one on the right and one on the left. Adjust the legs to alter the tilt from front-to-back or side-to-side. If your refrigerator seems unsteady, or you want the doors to close more easily, adjust the refrigerator's tilt using the instructions below:

**NOTE:** Tools Required: 11/16 in (18 mm) wrench or flat blade screwdriver.

1. Turn the leveling leg to the left to raise that side of the refrigerator or to the right to lower it. It may take several turns of the leveling leg to adjust the tilt of the refrigerator.

**NOTE:** Having someone push backward against the top of the refrigerator takes some weight off of the leveling legs. This makes it easier to adjust the legs.

2. Open both doors again and check to make sure that they close easily. If the doors do not close easily, tilt the refrigerator slightly more to the rear by turning both leveling legs to the left. It may take several more turns, and you should turn both leveling legs the same amount.

**NOTE:** Your refrigerator is uniquely designed with two fresh food doors. Either door can be opened or closed independently of the other. You may have to exert slight pressure on the doors to get them to close completely.

### Door Alignment

If the space between your doors is uneven, follow the instructions below to align the doors:

1. With one hand, lift up the door that you would like to raise at the middle hinge.
2. With your other hand, use pliers to insert snap ring as shown.
3. Insert additional snap rings until the doors are aligned. (Three snap rings are provided with the refrigerator in the Use & Care Guide packet.)
