

Frontier 3-Point Mounted Snowblowers

SB11 • SB12 • SB13 Series

When winter arrives, will you be ready?

Introducing the Frontier 3-Point Snowblowers – powerful, dependable, and built to tackle the toughest winter conditions. With three affordable series to choose from, these rear-mounted Snowblowers offer an effective solution to meet the demands of your job, and your budget.

There's the **economical SB11 Series Snowblowers**. They feature a 48 to 94 inch working width, and are ideal for farmstead and large-property owners. Match one up with your compact or small utility tractor up to 90 PTO horsepower, and you've got one commanding, yet cost-effective winter cleanup package.

Commercial property and municipalities? We've got that covered too! Try the **commercial-grade SB12 Series Snowblowers**. This is the tool designed to handle the rugged demands of contractors. Available in a 74- and 80-inch working width, the SB12 Series has all the muscle to move heavy, wet snow from multiple locations.

For larger snow removal chores, check out the **heavy-duty SB13 Series Snowblowers**. Big snow banks are no match for the wide 88- to 104-inch working width. They're perfect for rural customers who need to clear long driveways and large areas. Hook up one of these winter warriors to your utility or row-crop tractor up to 150 PTO horsepower for fast, efficient snow removal.

The Frontier Snowblowers are sold and supported by John Deere, the most trusted name in farm, ranch and lawn equipment. To help you choose the right Frontier Snowblower, talk to your local John Deere dealer, your exclusive source of Frontier Equipment.

Skid Shoes

Frontier 3-Point Snowblowers are equipped with adjustable skid shoes prevent gouging on uneven surfaces. Also, the skid shoes allow you to better manage your operation with more control of the cutting edge height on your snowblower, increasing the overall performance. And best of all, these sturdy steel skid shoes provide added durability for long-lasting service.

Chute Rotation

The SB11 Series Snowblowers come standard with the manual chute rotation (above). Position the chute from the comfort of your tractor using the convenient adjustment lever. (Hydraulic chute rotation is optional.)

The SB12 and SB13 Series Snowblowers are equipped with a standard hydraulic chute rotation (optional on SB11, see left). Easy to use, the hydraulic chute rotation allows you to make effortless changes to chute rotation from the seat of your tractor.

Powerful, rugged Frontier 3-Point Snowblowers

Removal

Chute Deflector

Manual chute deflector is standard on all Frontier 3-Point Snowblowers. You can make simple adjustments to the chute deflector on the go to improve discharge accuracy. Or move up to an electric chute deflector as a dealer-installed option to pair with your cab tractors. *(Not available on the SB12 Series.)*

Upgrade to a hydraulic chute deflector for quicker and easier control, plus better accuracy. It's a great feature for tougher jobs, such as snow-packed city streets. Or when working around buildings or other confined areas.

Drum Rotation

Hydraulic drum rotation is an option on select SB13 Series Snowblowers. This convenient feature allows you to discharge snow – from the comfort and safety of your tractor seat – at a greater distance using lower horsepower. That's less wear and tear on both tractor and snowblower.

Dual Augers

Optional dual augers are available on certain Frontier 3-Point Snowblower models. The dual auger provides capacity to move larger volumes of snow. Dual augers are most productive in heavy drift conditions.

Tough winter chores call for high-performance Snowblowers

iMatch™ and Quick-Coupler Hitch System

Frontier 3-Point Snowblowers are compatible with the iMatch™ and Quick-Coupler ASABE Category 1, 2, and 3 quick-attach hitch systems. This innovative and affordable device converts the 3-point hitch to fixed hooks and attaching points, which allows for an easy connection.

The iMatch™ and Quick-Coupler systems are a welcome alternative to the sometimes challenging and awkward task of lining up 3-point hitch implements.

iMatch™

Frontier is proud to present our line of 3-Point Snowblowers. Sold and supported by John Deere dealers, our rugged and reliable lineup of SB11, SB12, and SB13 Series Snowblowers offer fast, efficient snow removal. Moving snow from your landscape is less demanding and much more manageable with these cost-efficient snow attachments. Parking lots, yards, driveways, roadways, or sidewalks – a Frontier Snowblower can handle the job.
